Object	positive annum planning (July 20 ten year delivere totalled Whilst totalled wh	considered that the windfall allowance idently prepared or justified. Table 3 expects 225 (excluding the initial 3 years to avoid double g permissions). However, the Council's publing explores historic windfall completions. For standard windfall sites of less than 10 units had. Windfall completions of 10 or more units 1,749 in the last ten years. The Council takes the pragmatic decision to explore evelopments of 10 or more units from history, it is considered that too much reliance is performing windfall schemes of less than 10 units are a number of minor allocations of less than 40 and a poly. It is evident that the emerging Local Plates a number of minor allocations of less than 40 and 40 an	units per counting shed SHLAA for the last lave been have exclude fic windfall laced on laced on laced on laced on laced on laced (less than laced (less than laced on l	Table 3 should be updated to reduce the extent of windfall allowance to 200 per annum. This is considered a modest reduction but a fairer reflection of the circumstances relating to windfall for he District in the last 10 years. The resulting 250 reduction in the windfall allowance should then be reallocated to new allocations o secure certainty and confidence in deliverability. It is suggested that a selection of small-medium allocations would best address this need, facilitating prompt delivery that can help immediately address housing need and so provide a suitable balance between the large strategic sites and smaller modest schemes. St John's College own a number of additional smaller scale sites that are suitable, available and deliverable to address this need. These vary in capacity from providing 4 up to 120 homes. These sites have been submitted to Thanet District Council at various stages of the Local Plan production but summary principles are set out below. Maior Sites (Capacity for 10 or more Dwellings) Land east of Willetts Hill Monkton The site totals approximately 2.3 hectares and is considered to be suitable for up 50 dwellings. The Site is not subject to any landscape or heritage designations and it is considered that high quality development will enhance the existing site and its setting.	936	061 Mills Claire Savills Table 3.pdf (1.5 MB)	Email

The fact that the emerging Local Plan opts to allocate spec ific minor sites indicates their expectation to progress through an allocation as opposed to counting towards windfall. The fundamental issue with reliance on a significant windfall derives from the five year housing land supply position. Thanet District Council has been subject to an out of date Local Plan, failing to have reviewed the currently adopted Plan from 2006. Furthermore, and exacerbated by this out of date plan, Thanet District has not been able to demonstrate a five year housing land supply. In such circumstances where the presumption in favour is often triggered, a Council will tend to rely far more heavily on windfall sites of all sizes. It is inevitable that where insufficient allocated sites exist, windfall sites will dominate supply. Whilst this may appear to indicate that a District has historically benefited from significant windfall, it is contested that this should be given such weight hen calculating housing need and the assumptions that windfall will contribute to supply. The statistics are clearly flawed. In a scenario where a Local Plan is being prepared and adopted, the case is made that housing supply should plan for the scenario where a five year supply of deliverable sites can and will remain effective. In such circumstances, the presumption in favour would not be triggered and the proportion of windfall sites would inevitably reduce.

It is appreciated that the Council has deducted major sites of 10 or more from the windfall allowance. However, the Council has made no acknowledgement of the fact that they do nevertheless allocate sites of less than 10 dwellings. One must consequently consider this and the fact that windfall sites are not necessarily a never-ending source, particularly if the Council assumes the majority to relate to brownfield land as claimed. It is not argued that a drastic reduction in windfall allowance is required. Instead, it is considered that the calculation of windfall is flawed. Whilst it is agreed as appropriate for the Council to not take into account the 3 most recent years of windfall in the supply totals to avoid double counting with planning permissions, the same should not apply when simply calculating the windfall average itself. It one uses the mean average for windfall completions from 2008/09 up to the latest evidence, which is 2017/18, it is clear that the evidence indicates an average of 214 windfall units per annum for schemes of 10 or less. The table is summarised below:

Year Windfall Sites <10

cemetery) is located circa 210m to the north east, the site is considered sufficiently distinct and separate from this designated asset. Furthermore archaeological investigations as part of any future planning application can ensure any potential artefacts within the site are adequately assessed and recorded .

An overhead line crosses the site but this need not affect the layout of the scheme. It is anticipated that the line would be undergrounded as part of any future development.

Monkton benefits from a primary school, public house and bus stops connecting to Minster to the east, which benefits from substantially more services including a railway station. As noted at paragraph 55 of the 2012 NPPF and paragraph 78 of the 2018 NPPF (which iteration applies will be influenced by when the LPA submit the Local Plan for Examination), the interrelationship between settlements should be acknowledged and the opportunity for development in one village to help support services in a village nearby.

Land to the South of Monkton Street, Monkton Development of the land to the south of Monkton Street provides the opportunity for a high quality residential development on a small, well contained land parcel providing a natural extension to the settlement. The site totals circa. 1.2ha and is considered suitable to accommodate up to 20 dwellings. This is slightly less than typically expected for a 1.2ha site due to allowance made for the site shape. For instance, it is envisaged that dwellings would only be located on one side of the access road connecting onto Monkton Street until the site widens to the south. The site capacity also makes allowance for the retention of the copse to the south eastern corner of the site where pond (believed seasonal) is also located. Despite the proximity of field drains, it is reiterated that the site falls within flood zone 1, the zone 1, the zone to which development should be directed.

The site is within the sole ownership of our client and is considered suitable, available and deliverable within the next 1-5 years. Furthermore, if one excludes the south eastern copse from the site area, it is evident that the site would be no more than 1ha. In the scenario where the submission timings of the emerging Local Plan mean that the 2018 NPPF applies, this site could consequently readily address the need for 10% of the housing requirement to be met through sites of 1ha or less.

2008-09 367	The site is well contained by its surrounding built and

Average 214		
Total (per		
annum)		
In light of this and the fact that on the adention of a Local Plan		
In light of this and the fact that on the adoption of a Local Plan the extent of windfall schemes will likely reduce dramatically, it		
is considered more proportionate for the housing land supply in		
Table3 to assume 200 windfall dwellings per annum.		
It is also reiterated that year 2010-11 significantly affects the		
mean average with a total of 496 windfall units on schemes of		
less than 10 being a clear anomaly. If one excludes that year (as		
the highest quantum), as well as excluding the lowest figure (76		
completions for 2012-13) for the sake		
of balance, this would reduce the average annual completion		
rate to 196 dwellings per annum. This further indicates the		
soundness of a modest reduction in the windfall assumption		
from 225 to ensure confidence in delivery.		
As noted at paragraph 48 of the 2012 NPPF and paragraph 70 o		
the 2018 NPPF, where allowance is made for windfall sites as		
part of anticipated supply, there should be 'compelling evidence' that they have been consistently available and will		
provide a reliable source of supply. Whilst the phrasing		
between these two iterations of the NPPF differ very slightly,		
the premise remains comparable. Which applies will ultimately		
and premise remains comparable, while applies will altimately

Stores Ltd		Buxton -		Plan, we broadly welcomed the increase to 17,140 additional	Supply, as 225 units per annum sustained over a 10 year		
		RPS		dwellings over the plan period. On behalf of our client, we	period is considered unrealistic and unsustainable;		
				consider that this represents a more accurate reflection of the	additional housing sites (such as land north of Millennium		
				total number of additional dwellings required across Thanet	Way) should be allocated instead in accordance with a		
				than the 12,000 additional homes previously identified in the	plan-led system.		
				2015 consultation. This does though comprise a 43% increase in			
				the level of need in the plan period, thereby necessitating a			
				more flexible and proactive approach towards identifying			
				suitable housing sites.			
				In this context, we consider that Table 3 – Total Housing Supply,			
				is over reliant on Windfall Sites which are proposed to deliver			
				225 units per year across the plan period (2011-2031). The			
				Council should be aware of additional sites which are suitable			
				to be allocated within the emerging Local Plan to avoid such a			
				heavy reliance on windfall.			
				We consider it would be more appropriate, under a plan-led			
				system (as advocated by the NPPF), for the Council to identify			
				and allocate sites now rather than relying on windfalls. Since			
				windfall can include any sites not specifically identified in the			
				local plan, it is inevitable that the level of windfall will increase			
				where a local plan is out of date or unable to demonstrate a 5			
				Year Housing Land Supply. As the local plan progresses, and			
				providing the Council is able to demonstrate and sustain a 5			
				Year Housing Land Supply, the level of windfalls should diminish			
				over time.			
				We therefore question whether it is realistic for this level of			
				windfalls to be delivered year on year across the Plan period.			
				Consequently, evidence of previous levels of windfall should			
				not automatically be deemed "compelling evidence" (as			
				required in paragraph 48 of the NPPF) or a reliable indicator			
				of future trends.			
				We note that based on the current total housing provision,			
				approximately 26% of the total 857 dwellings required each			
				year would be provided by windfall sites. We consider this			
				represents an over- dependence on windfall sites being brought			
				forward for development and the Council should instead be			
				allocating additional sites. If this level of windfall allowance is to			
				be carried forward in the Local Plan, we request that further			
				evidence is provided to demonstrate that the allowance is			
				realistic with regard to the housing evidence base (notably the			
				Strategic Housing Land Availability Assessment), historic			
				windfall delivery rates and expected future trends as required			

				by the NPPF. We have previously identified that land north and south of Millennium Way would be suitable for a housing allocation and such an allocation would help with the housing supply and enable the Council to reduce its dependence on Windfall sites within the Local Plan.			
The Mockett Trust Ltd	433	Mike Goddard - Goddard Planning Ltd	Observatio n	Introduction This statement accompanies our representations to seek the reallocation of this former gasholder site as a housing allocation in the Local Plan. We explain the important history of the site as an allocation in both the adopted Local Plan and in the previous 2015 draft replacement for that Local Plan. We attach a plan identifying in red the land for which we seek this allocation (the area in blue is other land owned by the	1265	Appendices.pdf (1.1 MB)	Email
				Mockett Trust Ltd). The Plan Pedigree - 2006 The site has an important "plan pedigree", with allocations in the current adopted Local Plan and in the previous 2015 draft local plan. Adopted Local Plan 2006			
				The site is identified in the current 2006 adopted local plan as land to be retained for employment uses (appendix 1). It is part of a wider area on either side of the railway line known as Dane Valley Industrial Estate. The relevant policy EC12 requires land to be retained for employment uses falling within use class B1 and B8 in locations close to residential areas, with additional B2 use away from residential areas. In our view under this policy there might be a restricted use for B1 close to the existing residential areas but the majority of the site could be available for B1 or B2. That local plan is now under review but it is still the development plan and decisions should be in accordance with the development plan unless material considerations			
				indicate otherwise. Draft Local Plan – Preferred Options Consultations – January 2015 The site was allocated in this document as a housing site (SS37) for a notional development of 60 dwellings (see appendix 2). Following that we submitted a planning application for the site and adjacent land. During its consideration an appropriate density of 12 units per acre was agreed with the council for our application. And subsequently the 2018 NPPF at paragraph 123 seeks a significant uplift in the average density of residential development in locations such as this. The site is approximately			

5.8 acres and therefore capable of accommodating 70 or more The draft Local Plan August 2018 The former gas holder station site is within the urban boundary and therefore subject to draft policy SP21. This policy relates to development in the countryside and resists development outside of the urban and village confines. The site is located within the urban confines on the policies map of the draft Local Plan. We consider that development within the urban confines is acceptable in principle, but obviously subject to control over its content, use, detail and impact. However, in the current draft local plan, now under review, the site is no longer a housing allocation. It was removed by the council as it considered that its development for housing was 'unsustainable' due to the high cost of remediation. We now have revised figures for remediation which demonstrate that it is viable and deliverable. We deal with that in the next section. Is The Site Viable? We understand that the council chose to delete the site as a housing allocation from the 2018 draft Local Plan in view of information which it had received during the course of a planning application and subsequent appeal. This scheme was development on the former gasholder station site and on additional agricultural land within the green wedge. At that time, the anticipated cost of remediation was substantial and well beyond any capital receipts which could have been achieved by the development of the former gasholder station Consequently, enabling development beyond the area of the former gas holder station site was needed to finance the necessary remediation of the former gas holder land. The council considered that the former gas holder site on its own was therefore not deliverable. However, the owners of the land have now obtained information which was previously confidential and at the time of the application and appeal exclusively available to the former owners of the gas holder station and not the applicants/appellants. That information now demonstrates that the cost of remediation can be significantly less. This subsequent report was undertaken by the original owners' consultants who had previously implemented an initial minimum requirement remediation on behalf of the National Grid in order to be able to sell the site for open storage use only. The more recent work has been undertaken by Advision (part of Worley Parsons Group who undertook the original remediation of the site) and involves reviewing existing information relevant to land contamination, risk and liability on the former gas works gas storage site. The assessment (see appendix 3) has reviewed documentation and comes up with a

remediation strategy and an overall reduced cost when compared to that originally advised by separate consultants who had undertaken a desk top exercise only (so the contingency cost was greater). This figure is considered in a viability assessment and covering letter provided by viability specialists Strutt and Parker (appendix 4). This development appraisal concludes that a scheme of 70 dwellings (12 units per acre as per the previous application) is a viable proposition, delivering an appropriate return to the land owner and an acceptable margin to a developer. Such a development could also provide 23% affordable housing, a proportion previously considered acceptable by the council when dealing with the planning application and appeal on the larger site. The proposal would also deliver a package of Section 106 infrastructure contributions. The additional work in relation to the cost of contamination and the viability assessment by Strutt and Parker demonstrate that this site can deliver a viable development of housing. **Brownfield First** The site for which we seek an allocation is a former gas holder station. The site is hard surfaced and there are remnants of previous buildings. It is not part of countryside and is located within the identified built confines of the urban area. Government policy in the 2018 National Planning Policy Framework aims to make effective use of land (chapter 11). Paragraph 117 states that planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses whilst safe-guarding and improving the environment and ensuring safe and healthy living conditions. It requires strategic policies to set out a clear strategy for accommodating objectively assessed needs in a way that makes as much use as possible of previously - developed or brownfield land. Paragraph 118c) gives substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs and it goes on to say that it supports appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land. Paragraph 118d) promotes and supports the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained and available sites could be used more effectively. Paragraph 119 encourages local planning authorities to take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs, including suitable sites on brownfield registers. Paragraph 123 requires plans to contain policies to optimise the use of land and meet as much of the identified needs for housing as possible. The NPPF refers to the need to seek a significant uplift in the average density of residential

development.
The recently published NPPF places even more importance
upon the need to make effective use of brownfield land. The
development of the former gasholder station site would
achieve this objective.
Policy SP11 and Housing Delivery
The council has identified provision for a total of 17,140
additional homes up to the period of 2031. However, this
aspiration in our view is unlikely to be achieved based upon
past performance and the quantity and quality of sites which
are proposed to be allocated. Over the last 5 years, the council
has delivered little more than 300 dwellings per annum. It is
very likely that delivery will fall well below 95% of the local
planning authority's housing requirement, bringing with it the
need to prepare an action plan to assess the causes of under
delivery and identify actions to increase delivery in future
years. In our view, this may involve relaxing controls in certain
areas to ensure adequate delivery (paragraph 75 of the
NPPF). If it is to achieve more than 1,000 each year, more than
trebling its current rate of delivery, it will need to take a more
positive approach to development and not only grant
permission but also make additional allocations on sites which
are likely to be developed.
Our assessment now demonstrates that the site can be
remediated if it were to be released for housing development.
There would be sufficient capital receipts to fund the cost of
remediation. The site therefore has important historic local
plan policy credentials, including the current adopted plan
allocation for employment uses, a previous draft allocation for
residential development and a location within the urban
confines. The site is also a brownfield site and does not lie
within the identified green wedge.
Consequently, we ask the council to reconsider its decision to
de-allocate the site and reinstate that allocation for housing.
The site can be delivered and will contribute towards housing
delivery in this sustainable location.
Conclusions
Our representations have explained the important
development credentials of this site, its brownfield
characteristics and its viability as a potential housing site.
The council has previously considered this site acceptable for
housing development. But it is deleted in the current draft
solely on the basis that the council considered that the
development of this site alone would not be economically
viable. That concern and reservation have now been dealt with
and resolved by the further work undertaken and by Strutt and
Parker's demonstration that the site is viable.
The site was previously a draft allocation at a time when the full
extent of the council's housing need was substantially less than
now. Furthermore, the recently published NPPF places even

	1	1	T							1
						greater emphasis upon the need to develop brownfield land				
						first, increase delivery and raise densities.				
						The site is currently a retained employment site within the				
						adopted Local Plan and we simply request the council to				
						replace that allocation with a housing allocation.				
		St Johns	311	Mark	Support	We support this policy on overall housing numbers to be		1297		Email
		College		Hodgson -		delivered over the plan period. We consider the notional				
				Savills		delivery periods to be achievable over these				
						timescales. However, we have some concerns over the number				
						of dwellings to be delivered through windfall as set out in Table				
						3 of the Plan.				<u> </u>
Agnew	Richard	Gladman	516		Object	Policy SP11-Housing Provision		1538		Email
						As already set out above Gladman do not consider the housing				
						provision of the Local Plan to be sound. We consider it will be				
						necessary for the figure to be increased to take more account				
						of the worsening market				
						Further, we are concerned that currently this figure is				
						expressed as a total as opposed to a The use of the term total				
						would suggest that this is a ceiling or maximum figure. It is well				
						established in Local Plans throughout the Country that housing				
						requirements should be expressed as a minimum to ensure the				
						Local Plan has sufficient flexibility to adapt to rapid change.				
						Seeking to set a total figure could restrict otherwise sustainable				
						development coming forwards, conflicting with the objectives				
						of the Framework to significantly boost the supply of housing.				
						We also have concerns regarding the approach the Council is				
						taking in setting the plan peri At present the plan period runs				
						from 2011 to 2031 which will mean that on adoption this plan wold have less than 12 years left. Such a short time period is				
						contrary to the 15-year time frame for plans recommended in				
						paragraph 157 of the NPPF.				
						The proposed trajectory is not sound in seeking to delay the				
						timeframe upon which the current backlog since the start of				
						the plan period is addressed and is contrary to the approach				
						established in PPG that backlog should be addressed within the				
						first five years of the plan. We recognise that the Council would				
						struggle to address a backlog in excess of 4,000 homes within				
						five years however as a minimum the Council should be				
						annualising its housing requirement to ensure this backlog is				
						made up as soon as possible.

vacancies and second homes, increased migration from London and in response to market signals. Whilst the overall approach is in line with the methodology suggested in Planning Practice Guidance (PPG) we do not consider the Council to have taken sufficient account of market signals. Our assessment of the approach taken in the SHMA is set out below. Demographic starting point The Council is using the 2014 based sub national population projections as the starting point for assessing housing needs. These have been rebased to allow for consideration over the 2011 to 2031 plan period and results in per annum household growth rate of 773. At the time of the study these were the most up to date figures. However, as required by PPG, it will be necessary to consider the latest projections on household growth which were published on the 20th of September 2018. These show that over the next ten years that average household growth as being 764. Given the similarity in these growth rates we would consider the Council's suggested starting point to be a sound basis for assessing housing needs. London migration adjustment We welcome the inclusion of an adjustment to take account of the likely impact of higher migration from London. The poor delivery in the capital and poor affordability will inevitably lead to increased migration in future that will not necessarily be captured by past trends. Market signals The Council have increased its OAN by 19 dpa over the plan period in response to market signals. This represents a 2.3% increase, a level we would consider to be wholly inappropriate given the evidence presented by the Council in relation to the affordability of housing in Thanet. Since the publication of the PPG, the approach taken to market signals and the degree to which Councils have responded to these signals has varied considerably. The PPG provides no detail as to the how much of an uplift is necessary in relation to the market signals in an area. The only statement made in PPG at paragraph 2a-020 is that any increase in planned supply should be: "... by an amount that on reasonable assumptions and consistent with the principles of sustainable development, could be expected to improve affordability." However, this lack of clarity on market signals will be addressed with the introduction of the standard methodology as set out in the draft NPPF and PPG published earlier this year. Whilst this consultation and the methodology cannot be given any weight it does signal that the Government do not consider the current approach being taken by many local authorities to have been sufficient. If it had, then this change in approach would not have been necessary. Whilst the methodology will not be used to assess this plan it is helpful to understand the changes being made and why.

The standard methodology requires uplift to be applied where
affordability ratios show house prices to be more than four
times local salaries then an uplift should be applied. The
Government clearly considers that where house prices are
more than four times salary then this is when house prices start
to become unaffordable. The standard methodology proposes a
formula that requires an uplift of 2.5% above the
demographic base for every 1 point above the baseline
affordability ratio. The baseline ratio was set at 4 and would
mean that, for example, an area where the median workplace
to house price affordability ratio was 8 would be required to
provide an uplift of 25% on its base demographic projections.
However, the formula has been capped so that those
areas with the worst affordability would not be required to
provide more than a 40% uplift over demographic projections
of household growth.
However, as stated above, we cannot consider the standard
methodology when examining plans submitted up to 6 months
after the publication of the draft NPPF. But it is important to
consider the expectations of Government in relation to the
quantum of housing its wants to see delivered each year in
future. In his 2017 Autumn Budget Statement the Chancellor
announced the Government's target for house building across
the country stating:
"I'm clear that we need to get to 300, 000 units a year if we are
going to start to tackle the affordability problem, with the
additions coming in areas of high demand."
As we have outlined earlier in our representation the
Government's commitment to this figure as being key to
addressing affordability has also been reiterated in its
response document to the revised NPPF
(https://www.gov.uk/government/consultations/draft-revised-
national-planning-policy-framework). The Government have
stated that where population projections show a reduced rate
of increase in the latest household projections they will revise
the standard methodology accordingly in order to ensure the
starting point in the plan making process is:
" consistent with ensuring 300,000 homes are built by the
mid-2020s"
It will therefore be important that any plan that seeks to use
the latest projections, even when submitted prior to January
2019, will need to take account of the Government's stated
national target for housing delivery. If the Government are to
achieve its aims of delivering this level of housing by the mid
20's, which it considers will improve affordability, it is clear
that market signals uplifts need to be much higher than have
so far been applied across the Country. In particular those areas
with the worst affordability will need to see much higher uplifts
if increased delivery is to be expected to improve affordability.
In establishing what level of uplift is required to improve
affordability the PPG has set out a range of indicators to be

examined and states in paragraph 2a-020 that: "A worsening trend in any of these indicators will require upward adjustment to planned housing numbers ... " The market signals for Thanet shows that there is a worsening trend in a number of indicators. For example, the work place based lower quartile house price to lower quartile income ratio (LQ ratio) has increased from 4.80 in 2001 to 10.01 in 2017. House prices have also seen significant increases. Lower quartile house prices have increased from £56,000 in 2001 to £160,000 since 2017. What is also apparent within these trends is that whilst there has been a period of relative stability between 2009 and 2013, where house prices rose by just £3,000 these have increased sharply since 2013. During the last 4 years lower quartile house prices have increased from £120,000 to £160,000. This suggests that the Housing Market Area within which Thanet is located has not been providing sufficient homes to meet needs. Therefore, whilst we recognise that Thanet may be relatively more affordable than other areas in the HMA it is still under pressure and will require an appropriate uplift to address these concerns. Therefore, whilst the context of its position relative to its neighbours must be considered it is equally important to recognise the pressures on housing in Thanet and ensure an appropriate response is made. Paragraph 2a-020 of PPG makes it clear that Council's do not need to consider the precise impacts of any uplift but that it should be reasonable and expected to have an impact. An uplift of 19 homes each year is unlikely to have any discernible impact. The most often cited example has been the Eastleigh Local Plan where an uplift of 10% for market signals was considered appropriate by the Inspector. Eastleigh had similar LQ ratios to Thanet being just under 10 at the time the plan was examined. In other areas with affordability concerns the uplift for market signals have been higher where there have been similar affordability ratios. For example, at Braintree, where affordability ratios were similar to those in Thanet, a 15% uplift for market signals was considered sufficient to have a reasonable prospect of improving affordability. Recommendation Given, the poor affordability in Thanet and the recent rapid increase in lower quartile house prices would suggest the need for a substantial market signals adjustment of at least 15%. **Housing Trajectory** The Council are proposing to use a stepped trajectory which will see the Council deliver 4,500 homes between 2016 and 2021, followed by 5,500 between 2021 and 2026 and 5,585 in the remaining five years of the plan. This trajectory seemingly limits the Council's delivery for the first 5 years of the plan period (2011-2016) to what was delivered. This will in effect remove any backlog from the Council's consideration of its 5year land supply. The Government have established in PPG that

1				backlog should be addressed within the first five years of the		
				plan. If the housing requirement is annualised across the plan		
				period, this would leave an expected backlog on for 2018/19 of		
				over 4,000 homes. This is significant and shows the level of		
				under supply in Thanet in recent years and is		
				the reason why the Government has been advocating the need		
				for speedy plan preparation. In delaying the preparation of this		
				plan the Council have failed to address the growing backlog of		
				housing needs within the Borough that will inevitable be		
				delivered much later than they were needed.		
				We recognise that the Council would struggle to address this		
				scale of backlog within five years. However, we would suggest		
				that the Council as a minimum seeks to plan for a housing		
				trajectory that meets remaining needs for the 2016 to 2031		
				period on an annualised basis and does not use the proposed		
				stepped trajectory. Using the Council's assessment of housing		
				needs this will require the Council to deliver an average of		
				1,039 homes each year for this period. Based on the Council's		
				evidence this would deliver a 5.09-year housing land supply on		
				adoption using the 'Sedgefield' approach to backlog and		
				applying a 20% buffer to take account poor delivery in the past,		
				as required by paragraph 47 of the NPPF.		
				This approach would require the allocation of further small		
				sites earlier in the plan period but would represent a more		
				proactive, but reasonable, response to the scale of the backlog		
i				that is currently present in Thanet and one that is more		
i				consistent with national policy. Should a higher OAN be		
İ				consistent with national policy. Should a nigher OAN be considered appropriate then further consideration will need to		
I				be given to the housing trajectory and 5-year housing land		
ı						
ı				supply. Recommendation		
i				In order to make the plan sound the Council should, as a		
İ				minimum, plan for an annualised housing trajectory to meet its

				proposed 2, 500 houses-to be built in Westgate on Sea		r	
		21,000 houses across Thanet in total					
				The reasons being:			
				Lack of suitable infrastructure:			
				1 Access - Only suitable roads for access are Minster Road and			
				Victoria Avenue, both of which are purely residential, and are			
				already gridlocked in the mornings and evenings. I experience			
				this every day in journeys by car on this road; as it is I consider			
				this to be one of the most dangerous roads to drive along in			
				Thanet.			
				2 Employment - There are no jobs, factories or large shops in			
				Westgate & Garilnge. Thanet is an area of high employment			
		there is no industry. I am not convinced by projections of new jobs being brought to the area and can only see short					
				term employment brought in the construction industry. Long			
				term these proposals will lead to higher unemployment in the			
				area.			
				3 Margate hospital - The hospital is struggling to cope wtth			
				Thanet's current population level and there are already long			
				waiting lists; I have several severe			
				health conditions including a heart problem which means I have			
				plenty of experiences myself and of observing the queues of			
				the people waiting to be seen at			
				Queen Elizabeth Queen Mother hospital. The staff do an			
				admirable job trying to manage this at the present time. The			
				situation would greatly worsen if more houses are built in			
				Westgate and Garlinge and I worry from a personal level how			
				this would impact on me. The condition I suffer from Atrial			
				Fibrillation puts me at a higher risk of suffering a stroke if the			
				stroke units at Margate and Canterbury are closed down and I			
				had to travel to William Harvey hospital in Ashford I believe this			
				would put me in greater danger as all advice with strokes is to			
				be treated as soon as possible time is of the essence in			
				achieving a good outcome so another huge worry I have is			
				that the stoke unit at my nearest hospital will be closed down.			
				4 - Local GPs Surgery- The surgery in Westgate Bay Avenue Is			
				already over subscribed. Currently it has registered over the			
				10,000 patients it was built to serve and has been extended to			
				it's full capacity . Westgate is not a suitable area to take such a			
				huge expansion in population .			
				5 Dental Surgery - There is only one private dental practice in			
				Westgate so would be unable to support such a rise in			
				population.			
				6 Traffic Congestion across Thanet - Whereever you go in			
				Thanet you get caught in traffic jams which causes stress and			

frustration to road users. You need to allow at least an extra half hour for any appointments to ensure being there on time. I am also concerned about the pollution all these stationery vehicles are producing. 7 Water and Sewage - There is already inadequate water on the island, which often leads to water restrictions during in summer, and the sewage plant at Broadstairs has in the past had overspills into the local bays which is not good for tourism. Margate is just building this up with the Turner and Dreamland effect these proposals threaten to undo all the good work that has gone into regenerating Margate so far. The treatment plant is working at it's full capacity and would not cope with the proposed level of new housing across Thanet. 7 Westgate has already more than reached it's population capacity. Thanet has already taken more than it's fair share of development and already has 3 times over the average for Kent 439. The Thanet average is 1368 which goes a long way to explaining the problems already covered in earlier points the traffic chaos, huge strain on the local health service providers at the hospital and in the local practices across Thanet. High levels of unemployment. There are around 2000 empty properties across Thanet which should be utilised to provide for local housing needs. Loss of valuable agricultral land and habitat for wildlife 1 The fields at risk of being built on are prime agricultural land which serves a far more valuable purpose in it's currrent use to grow food. This scheme blatantly contradicts the government's plan for agricultural self suffiency post Brexit. If we can't grow our own food in this country we are going to have rely on costly food imports. Kent is the garden of England we should preserve our fields which are iconic parts of our landscape, it is a huge part of Kent's identity. Once we have lost this land we cannot get it back. 2 The fields provide a habitltat for animals and insects. Birds use them to hunt or collect seeds and plants for food and small birds nest in the hedgerow. Every day I walk with my dog along the verges to the fields I see birds hovering above the fields they will lose this crucial hunting area if this plan is approved. Our green spaces are precious to our native species. One of the many birds that make their home in the fields on Minster Road are Skylarks which are protected and under threat. The hedgerow running beside the fields provides pollen and nectar for bees and butterflies as we all know they are under threat from loss of habitat as well as pesticides. 3 The fields and open space enrich our lives and are good for our well being. I can't imagine not being able to walk by them with my dog. My wife and I treasure being able to pause on our walks and listen to the bees buzzing and the birds singing. They provide precious moments of calm and peace in an increasingly hectic and noisy world. With my health problems they offer a place of tranquility and beauty which is vital to me

					and I'm sure many other local people. Increased Risk of Flooding The fields help to soak up water from heavy rain without them the area could be at higher risk of flooding. I sincerely hope you will take the issues and points I have made in this letter into consideration when making your decision and will decide to reject this proposal. I also think there should be a government enquiry into this as once the land is gone as I have already said but can't stress this enough the decision cannot be reversed and we will have lost it forever. The Campaign for the Protection of Rural England rightly is opposed to the development of agricultural land. Please also consider this in your decision making.				
Brown	Doug		Doug	n	I am making a representation on behalf of Mr Evans, Mr Walker and Mr Mcintyre. All three are registered on your consultation system. They do not object to the plan per se, however they have concerns that housing policy SP11 leaves Thanet largely reliant upon strategic sites for housing provision. The complex nature of these sites and the requirement for them to provide significant infrastructure, including a new inner ring road means that it is likely that much of the strategic housing provision will be toward the end of the plan period. The previous search for sites has resulted in some areas of the district being identified as suitable for non strategic allocations. One such village is St Nicholas at Wade. All three representatives jointly own a site to the west of Down Barton Road and have asked me, on their behalf to submit the land in their ownership as a site that can be developed immediately to meet the requirement for 4,500 houses by 2021. This land is adjacent to land that has recently received planning permission and is a sustainable site. It is requested that consideration is given to amending the plan to include this site which is capable of providing approximately 20 houses.	meet immediate demand. This cannot be achieved through the strategic sites which will take some time to come onstream. additional sites should be provided within the areas already identified as suitable for non-strategic development. One such site is located at the west end of Down Barton Road, St Nicholas and I would like this site included as a non-strategic site for delivery before 2021 in the Local Plan. The site is identified on the attached plan.	245	Location Plan of proposed residential site St Nicholas at Wade.pdf (283 KB)	Web
Brown	Doug		Doug Brown	Observatio n	I have been asked by Mr and Mrs Paul, who also own land at Down Barton Road St Nicholas to make a representation on their behalf on the basis that there is a need to provide housing as soon as possible to meet immediate demand. This cannot be achieved through the strategic sites which will take some time to come onstream. Additional sites should be provided within the areas already identified as suitable for non strategic development. Mr and Mrs Paul own land adjacent to that identified in my representation on behalf of Messrs Evans, Walker and Mcintyre and would like their land added to the potential site in St Nicholas to help meet this shortfall in 5 year supply. The amended site plan showing the ownerships of the various areas is attached.	•	504	Location Plan of proposed residential site St Nicholas at Wade.pdf (295 KB)	Web
Chapman	Brian	317			The Local Plan as now proposed requires the release of excessive areas of open Green Field land, and by the continued desire to see aviation uses return to the currently redundant airfield at Manston, a desire that effectively supports proposals made by RiverOak Strategic Partners', pays little or no attention		969		Email

					to the living conditions and residential amenities of residents of			
					Ramsgate or to continued or new investment within the town.			
					In addition the Councils proposals will have an adverse impact			
					outside of the Local Plan area by placing increasing heavy goods			
					traffic onto the South East road network.			
					First I must lodge a fundamental objection to the amount of			
					Green Field land that the Council is proposing to release for			
					development, and to the location of these sites. The proposals			
					appear to represent a piecemeal approach adding areas to the			
					existing urban fringes in a somewhat ad hoc way which results			
					in a number of smaller parcels of land being developed with			
					less chance of providing sufficient infrastructure, in particular			
					shops, health provision, schools etc. the release of one			
					significant area for development allowing a purpose designed			
					settlement would counter these failings.			
					This add hoc approach of many smaller sites also leads to the			
					loss of, in total, a significant area of agricultural land. This does			
					not represent sustainable development.			
					The Local Plan should support and give precedence to policies			
					requiring the development of Brown Field sites, the protection			
					of open countryside and agricultural land, and sustainability			
					and should not be approved in its present form.			
China	China	503	Abraham	Object	China Gateway International Limited, welcomes the increase to	1416	Laker China	Email

Internationa	Internation				Gateway International Limited considers that this represents a		KB)	
I Ltd.	al Ltd.				more accurate reflection of the total number of additional		,	
					dwellings required across Thanet, than the 12,000 additional			
					homes previously identified in the 2015 consultation. This			
					comprises a 43% increase in the level of need in the plan			
					period, thereby requiring a greater need to advocate a flexible			
					and proactive approach towards identifying suitable housing			
					sites.			
					It is our view that Table 3 – Total Housing Supply, is over reliant			
					on Windfall Sites which are proposed to deliver 225 units per			
					year across the plan period (2011-2031). The Council should be			
					aware of additional sites which are suitable to be allocated			
					within the emerging Local Plan and avoid such a heavy reliance			
					on windfall.			
					We also question whether it is realistic for this level of windfall			
					to be delivered year on year across the Plan period. By their			
					very nature, windfalls are sites which are not allocated in the			
					Local Plan. As the Plan progresses and providing the Council can			
					demonstrate and sustain a 5 Year Housing Land Supply (5YHLS)			
					the level of windfall should diminish over time.			
					We consider it would be more appropriate, under a plan-led			
					system (as advocated in paragraph 15 of the NPPF), for the			
					Council to identify and allocate sites now rather than relying on			
					windfalls. Since windfall can include any sites not specifically			
					identified in the development plan, it is inevitable that the level			
					of windfall will increase where a 5YHLS cannot be			
					demonstrated. It is important to recognise that in these

S526 Land at Manston Man Not in or adjoining built	
Business Park ston confines. Submission	
(east of existing not seeking residential	
BP) allocation	
diocation	
Figure 1: Extract from SHLAA 2018 Update	
It is our view that Thanet District Council failed to understand	
that Phase 3 (Residential development) was linked to two other	
phases for development which sought to encompass a mix of	
various uses from employment, mixed use and residential. With	
the other phases taken into consideration, the justification	
within the SHLAA 2018 for the site to be allocated on the	
reserve list is viewed as unjustified, as Phase 3 will be within	
the built confines once the other phases are brought forward	
for development.	
If a future planning application submission is sought, it will be	
the intention of China Gateway International Limited to submit	
a comprehensive masterplan proposal which promotes a	
mixed- use site that can deliver significant benefits to Thanet.	
Further detail is identified below of the proposed three phases	
and how they tie into contributing to employment and	
residential land in the Manston area as well as the wider	
Thanet district.	
Phase 1 – Employment Uses	
Given the existing employment designation of the majority of	
the land forming Phase 1, and the previous grant of planning	
permission (ref: F/TH/08/0400) for commercial development,	
which was not implemented, it is considered that an	
employment use is the best use of land. It is not China Gateway	
International Limited's intention to lose employment floorspace	
within the Land Allocation for Economic Developments (EC1),	
but instead enhance any future proposed employment	
development. This approach is in line with Policy SP04 of the	
draft Local Plan.	
Phase 2 – Mixed Use (Other Employment Generating Uses)	
Phase 2 is an area which is open, not currently developed and	
falls outside the employment designation. the view is taken	
that this open land provides a good opportunity to	
accommodate a mixed used development. The mixed uses	
proposed comprise A1/A2 and potentially C1 uses. This	
approach will provide a positive transition from employment	
use (Phase 1) to a mixed-use development (Phase 2). These	
uses will provide employment generating uses, which maintains	
the employment allocation of these areas as well as providing	
the opportunity for the introduction of other services that can	
support the Manston Business Park, potential future use and	
development of Manston Airport and the wider area of Thanet.	
	1
It is acknowledged that the recommended uses will generate an

						met within the area, taking into account of the substantial			
						environmental and infrastructure constraints. In particular,			
						CPRE Kent considers there is no reason why the loss of best and			
						most versatile agricultural land should be accelerated to			
						increase housebuilding. Part of the Local Plan preparation			
						process is to consider whether it is necessary to moderate the			
						OAN (the starting point) to take account of constraints; and			
						, , , ,			
						Swale Borough Council prepared a study titled 'value of best			
						and most versatile agricultural land in Swale' and a similar piece			
						of work would be helpful for Thanet.			
						CPRE Kent is concerned at the level of housing proposed and			
						considers that there are mitigating reasons why the objectively			
						assessed housing need should not be provided for in full. The			
						recent ONS population projections & estimates suggest a lower			
						population than that used by the Council and the recent ONS			
						household projection shows a reduced household need. The			
						construction industry has not delivered this scale of			
						development. A very high proportion of land in the District is in			
						Grades 1 and 2 agricultural land value which in our view should			
						be safeguarded from development. Kent is 'severely water			
						stressed' and the District has high levels in Kent of Mortality			
						attributable to PM<75 (3.01). These concerns are expanded			
						upon below.			
						Population and Housing			
						The 2012 NPPF requires the local planning authority to use			
						their evidence base to ensure that their Local Plan meet the			
						full, objectively assessed needs for market and affordable			
						housing as far is consistent with the policies set out in the			
						Framework [1]. The Local Plan's objectively assessed housing			
						need, based on the 2014- based population projections is given			
						as 17,140 for the period 2011-2031. This reflects the			
						consultants forecasts which are "based on an updated			
						assessment of migration trend based population projections			
						(2014) and the labour requirements supporting the Council's			
						aspirations for economic and employment growth."			

The components of population change for Thanet District
indicate that annual change has been declining since
2014. Natural change remains negative, net internal migration
and net international migration have been on the decline since
2013. This is reflected in the 2016-based ONS Sub National
Population Projections which forecast that population growth
2011-2031 will be less that that forecast in the 2014-based
projections. The ONS 2016-based household projection for the
2011-2031 period, based on the 2016-based population
projection, at +14,811 is 6% lower than the 2014-based
projection, indicating that the OAN of 17,140 is greater than
required.
Housing completions
The plans identified housing need of 17,140. Policy SP11
Housing Provision sets out the following notional delivery:
Period Number Annual average
2011-16 1555 311
2016-21 4500 900
2021-26 5500 1100
2026-31 5585 1117
Kent County Council net dwelling completions data [2] indicates
that the annual average for the five year period to 2016/17 was
325 down on the 10 year average 469. Both are well below the
notional annual average for the post 2016 periods. The highest
annual completions were 889 achieved in 2010/11.
The County Council's Housing Information Audit suggests that
the low completion rates are not due to lack of
permissions. Information on dwellings not started, dwellings
under construction and net dwelling completions for the past
ten and five years indicates that around a third of permissions
were under construction or completed. This suggests that
there is insufficient demand for the scale of housing proposed.
Period Dwellings not started Dwellings under
construction Dwelling completions (net)
2008- 17 65.5% 23.0%
11.5%
2013- 17 66.3% 24.4%
9.3% The Pt Han Sir Oliver Letwin MD identifies the fundamental
The Rt Hon Sir Oliver Letwin MP identifies the fundamental
driver of build out rates once detailed planning permission is
granted for large sites appears to be the absorption rate – the
rate at which newly constructed homes can be sold into the
local market without materially disturbing the market price
[3]. This suggests that increasing housing numbers to reduce
house price is unlikely to be effective.
Vacant dwelling stock
It is noted that Table 3 Total Housing Supply refers to 173
empty homes brought back into use and the desire to bring a
further 357 back into use. KCC Housing Stock 2017 document

indicates that at 2017 there were 2,341 vacant homes in the District of which 771 were long term vacant. Greater effort should be made to bring as many vacant homes back into use as this will reduce the need to identify land, and in particular greenfield land, for development. Best and Most Versatile Agricultural Land The Agricultural Land Classification system classifies land into five grades, with Grade 3 subdivided into Subgrades 3a and 3b. The best and most versatile land is defined as Grades 1, 2 and 3a by policy guidance (see Annex 2 of NPPF). This is the land which is most flexible, productive and efficient in response to inputs and which can best deliver future crops for food and non food uses such as biomass, fibres and pharmaceuticals. Current estimates are that Grades 1 and 2 together form about 21% of all farmland in England; Subgrade 3a also covers about 21% [4]. Indicating that the remaining 58% of all farmland is in Grades 3b, 4 and 5. Best and most versatile land is a limited resource that will be required for generations to come to help feed the Country. Continuing security of food supply will be an important issue for future generations supporting health and social well-being. The 2012 NPPF at paragraph 112 requires local planning authorities to take into account the economic and other benefits of the best and most versatile agricultural land. The paragraph continues that where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality. This approach is taken forward in the updated NPPF at paragraph 170 b) and footnote 53. This approach is reasonable for districts which have a mix of land in all Grades. Thanet, however, does not follow the national picture. Natural England data shows the following position: Grade 1 44.2% Grade 2 17.3% Grade 3 4.5% Grade 4 0.0% Grade 5 1.2% This shows that 61.5% is classified as Grades 1 and 2 compared to 16.9% for England. Grade 3a is not identified and thus amount of best and most versatile agricultural land could be higher at 61.5%. There is limited land in Grades 3, 4 and 5. The Grade 3 agricultural land tends to lie in the River Stour Valley or on the north west shoreline where it is shown on the proposals map as being in Flood Zone 3 and Marshes landscape Character Type where draft local plan policies CC01 and SP23 are applicable. The Grade 5 agricultural land is at Cliff End where it is shown to be NNR, SAC, in Flood Zone 3 and Marshes landscape Character Type where draft local plan policies G101,

SP25, SP23 and CCo1 are applicable.
The objectives of Local Plan Strategic Priority 1 include
supporting a sustainable rural economy, recognising the
importance of best and most versatile agricultural land.
The revised NPPF 2018 paragraph 118 requires planning
policies to recognise that underdeveloped land can perform
many functions, such as for food production.
In our view the very high proportion of agricultural land
designated as best and most versatile agricultural land (BMV)
suggests that Thanet should be treated as an exception and
that BMV should as an urgency be safeguarded from any form
of development.
Water Supply
The Environment Agency has recognised that Kent is 'severely
water stressed'. The scale of development should take into
consideration the effect of new housing and employment on
water supply, including that required by agriculture.
Air Quality The Control of the state of the
The Council recognises that air quality is an important factor in
overall health. The development strategy should not worsen air
quality, be that in the existing AQMAs or elsewhere in the
borough, but should improve matters. Where levels are
exceeded plans need to be put in place to enable compliance at
the soonest possible date (Client Earth (No. 2) judgement
(02/11/2016). It should not rely on the hope that future
technologies, such as electric vehicles, will reduce air quality to
a level that complies with Article 23. The Kent Public Health
Observatory Air Quality Report April 2018 for Kent Districts sets
out that the 'Mortality attributable to PM<75 (3.01))' is 20.1 per
100,000 population. This is the highest in Kent.
It will be important for the plan to assess all potential allocation
sites to ensure that development of sites both individually and
collectively will not worsen matters. Consideration should be
given to the impact of known and emerging development
beyond the borough boundary that will result in additional
traffic on the borough's roads.
Housing capacity
The SHLAA Review July 2018 sets out that the total number of
dwellings for a site were based on a broad requirement of 35
dwellings per hectare. This is low density suburban. A letter
from the Rt Hon Sajid Javid MP to Crispin Blunt MP in April 2018
set out that where there is a shortage of land for meeting
housing needs, local planning authorities will be expected to
use minimum density standards to make the most of the land
available, and to make full use of under-utilised sites that could
provide homes, and using airspace above existing properties to
build upwards [5]. This approach has been taken forward in the
updated NPPF. It would be helpful for the plan to include a
policy encouraging higher density where appropriate to reduce
the need for loss of best and most versatile agricultural land.

Dawson	Emma		320		Object	Building on A1 Agricultural land, What considered argument	975	Email
						could be put to be beneficial to Thanet residents. Taking away		
						rich soil, currently being farmed when our need for farming will		
						be even greater after the outcomes of our countries exit from		
						the European Union. There are plenty of other Brown field sites		
						which would equally serve the need for some of the house		
						shortages in Thanet. We do not need 17140 houses, because		
						inward migration has slowed and will do even further after		
						Brexit. The real need we have in Thanet is for social housing		
						with social rents, council housing for people that already		
						currently live in Thanet waiting on the housing lists for better		
						accommodation or those that are sofa surfing in Thanet. The		
						waiting lists for council housing is approx 2,000 add the sofa		
						surfing residents to this figure, which likely to be unknown. We		
						have areas that have very poor housing stock in the private		
						rental sector, in parts of Thanet we have high levels of		
						deprivation and we have a large waiting list of families waiting		
						to be housed in housing that meets a living standards.		
						We will also need starter homes for young people attempting		
						to climb the housing ladder but in reality those young people		
						require jobs. Thanet currently has very high unemployment,		
						some of the local jobs are topped up with working tax credit		
						because of low wages and rents still require being topped up		
						because rents are too high. This adds to the reason behind		
						building further homes for social rents, because people still		
						cannot afford the rents even if they are working full time. We		
						do not need an excess of 4 and 5 bedroom houses as these will		
						attract out of area buyers and this is where our infrastructure		
						and water supply and school placements and need for dentists		
						and doctors and appointments at hospital, will begin to		
						implode.		
						The local plan was rushed to enable it to be ready in time, in my		
						view, with the difficulty the plan has in that it has become		
						divisive over the Airport DCO and the additional housing		
						planned on the Manston site. The written plan in my view has		
						had to be pieced together but it doesn't fit well. The two		
						transport plans which are trying to fit either outcome the		
						Airport or the Housing and business development. The plan in		
1						my view is attempting to piecemeal these two contradicting		
1						outcomes and which makes the plan unsound.

		St.Peter's				Housing densities are still too high, on added sites. Town			
		Town				Council recommendation is for 25 per hectare.			
		Council							
Everest	Penny		179	C	Observatio	Thanet has beautiful sandy Blue Flag beaches with distinctive	510		Pape
				n	1	and individual towns for tourism (one of its main sources of			r
						employment). Margate, Broadstairs, Ramsgate, Westgate-on-			
						Sea and Birchington need to keep their individuality to continue			
						to attract tourists. However, the proposed increase in housing			
						will not allowag for them to keep their individuality. Thanet will			
						become one urban ugly sprawl. Not attractive to tourists. The			
						green wedges between the towns will disappear. It is important			
						to have green open spaces for health and well being and			
						planting trees will help reduce pollution.			
						The existing roads will become congested and create more			
						pollution as more cars will be using them. Birchington Square			
						and the St Lawrence Roundabout in Ramsgate are already			
						known 'black spots'. Yes, a new road has been planned			
						(Transport Plan) to take some of the congestion from the A28			
						across to Westwood Cross but there is no guarantee that the			
						funding will be forthcoming from KCC and developers to build			
						this road and it all takes time. I can foresee that the houses will			
						be built first and the proposed road not being ready.			
Everest	Michael		210	C	Object	The total number of proposed new houses of 17,140 is based	638		Pape
					-	on unsound figures. The birthrate is falling in Thanet. The Office			r
						for National Statistics (ONS) figures for 2017 show a decrease			
						on the projected figures for 2016.			
						The average density of population in Thanet is 1,368 compared			
						with Dover at 368 and Canterbury at .531 and the population in			
						Westgate-on-Sea right now is 2,800!!! higher than the rest of			
						Kent and if these houses were to be built this would double the			
						density. If these houses are required by Government then I feel			
						they should be distributed evenly throughout Kent not forced			
						upon Thanet. Yes local houses for local people not for the over-			
						spill from London.			
						These houses are to be built on prime farming Green Belt Land			
						at a time when it is most likely the UK will need this land to			
						produce more crops due to post-Brexit. This Green Belt			
						Land should be secured for farming only.			
						Based on this number of houses the following would be			
						affected and reach an unsustainable standard:			
						Roads - would be overcrowded and congested. Present roads in			
						towns could not be widened. The proposed new road			
						mentioned in the Transport Plan has no guaranteed funding			
						from KCC and developers. Would it ever be built? Congested			
						roads would create pollution and cause delays to important			
						emergency services.			
						Schools - Two primary schools in Westgate (St Crispins and			
						Chartfield) are already oversubscribed and underfunded.			
						Health Services - Hospitals, Ambulance Service, Doctors,			
						Dentists			
		1	_1			Deficion			

						, , , , , , , , , , , , , , , , , , ,
				Water Supplies - Southern Water have imposed hosepipe bans		
				in recent years.		
				Sewerage and Drainage- Southern Water have frequently		
				discharged sewage into the sea!!		
				Totally unacceptable.		
				Policing - More pressure on the Police Service which is barely		
				coping at present.		
				Fire Service would be further stretched.		
				The proposed increase in housing would jeopardise most of		
				Thanet's coastline which is designated as a Site of Special		
				Scientific Interest (SSSI), a Special Area of Conservation		
				or Special Protection Area. by the risk of run-off and drainage		
				water/sewage being discharged into the sea by Southern Water		
				when it is stormy. They are unable to cope at such times		
				with the present housing levels.		
				Settlements - Birchington, Westgate, Margate, Broadstairs and		
				Ramsgate have limited sections of green belt between these		
				villages and need to keep their individuality and characters to		
				continue to attract tourists, tourism being one of the main area		
				of employment. Thanet proudly have six wonderful sandy Blue		
				Flag beaches.		
				I feel strongly that if this number of houses is forced upon		
				Thanet, it would spoil the area and		
				create the many problems I have mentioned.		
Favell	Dorothy	490	Object	Many of the local Councillors from the top down have stated	1363	Email
raveii	Dorothy	490	Object	that 17200 homes are being imposed on Thanet. I believe this is	1303	Elliali
				false. The NPPF places "The emphasis upon local authorities to		
				produce a local plan that objectively identifies and then meets		
				the housing, business and other development needs of an		
				area". It is my understanding that this allows local authorities to		
				determine their own needs so the argument used by several		
				· · · · · · · · · · · · · · · · · · ·		
				councillors, including the leader, that "the government sets the		
				target" rings untrue and is an attempt to "pass the buck". A		
				letter from The Rt. Hon. Eric Pickles supports this. This letter		
				says that the new homes bonus also applies to long-term empty		
				homes brought back into use. When questioned at the		
				Birchington Parish Council consultation about the 4,000+ empty		
				properties in Thanet we were categorically told that the		
				government excluded them and only new builds were an		
				accepted part of the housing allocation. So, yet more untruths		
				from TDC? Or do they really think we aren't going to find these		
				things out? I take great issue in the way Thanet District Council		
				have arrived at their assertions. I suspect it has a lot to do with		
				the amount of money they will be paid under the New Housing		
				Bonus payments from Government. I do not believe they have		
				fulfilled their duty to consult the public properly or taken notice		
				of residents' views. This is my personal view.		
				Next we come to the loss of Grade 1 prime agricultural		
1		1		farmland. Thanet has some of the best farmland in the UK. I	1	1
				refer you to the http link		

http://protectkent.org.uk/news/thanet-local-plan-consultation-
views-matter/ with the summary of CPRE Kent's position on the
Thanet local plan. Everything they say in the summary, in their
response to the local plan and their covering letter I agree with
and you must take into account as they represent my views.
Once it's gone, farmland can never be "re-made". It doesn't
form anywhere else (other than by knocking down
developments). An extract from NPPF -
How can planning take account of the quality of agricultural
land? The National Planning Policy Framework expects local
planning authorities to take into account the economic and
other benefits of the best and most versatile agricultural land.
This is particularly important in plan making when decisions are
made on which land should be allocated for development.
Where significant development of agricultural land is
demonstrated to be necessary, local planning authorities
should seek to use areas of poorer quality land in preference to
that of a higher quality. The Agricultural Land Classification
provides a method for assessing the quality of farmland to
enable informed choices to be made about its future use within
the planning system. Natural England provides further
information on Agricultural Land Classification. The Agricultural
Land Classification system classifies land into five grades, with
Grade 3 subdivided into Sub-grades 3a and 3b. The best and
most versatile land is defined as Grades 1, 2 and 3a and is the
land which is most flexible, productive and efficient in response
to inputs and which can best deliver food and non-food crops
for future generations. Natural England has a statutory role in
advising local planning authorities about land quality issues.
in TDC's local plan 1998 they said this " OBJECTIVES (1) TO
PROTECT THE BEST AND MOST VERSATILE AGRICULTURAL LAND
FROM IRREVERSIBLE DEVELOPMENT, IN THE INTERESTS OF
LONG TERM CONTINUED AGRICULTURAL PRODUCTION; (2) TO
SUPPORT APPROPRIATE FARM DIVERSIFICATION MEASURES TO
BROADEN FARM INCOME, AND ENABLE FARMING OPERATIONS
TO BE CONTINUED; AND (3) TO ENSURE THAT FARM-RELATED
DEVELOPMENTS DO NOT PREJUDICE THE LANDSCAPE AND
OTHER OBJECTIVES OF THIS PLAN. " and this " 11.11
Agricultural land concerns have been dominant in determining
planning policies and decisions in Thanet for many years.
Thanet's farmland ranks as some of the best and most versatile
productive land in Kent and in the South East, by virtue of both
the high soil quality, and the extensive and continuous nature
of the land in production. As a national food resource in the
terms of PPG7, it therefore merits long term protection from
irreversible development. " page139

blw4HYBA&usg=AFQjCNFuBjzblqfz8SvbtUrozHOpIDuEA&sig2=4aPjB-JkByV mnbE2CfUgw&cad=rjt There is a world food shortage. How can TDC allow the building on prime Grade 1 agricultural land when people need to be fed? The farms surrounding Birchington are regularly cropped – at the moment they contain winter wheat and rape. Two crops a year are often sown, wheat, broccoli, cauliflowers, rape, sunflowers and potatoes being the usual crops. This is from http://planningguidance.planningportal.gov.uk/blog/guidance/ natural-environment/brownfield-land-soils-and-agriculturalland/#paragraph 026 Guidance **Natural Environment** Brownfield land, soils and agricultural land Paragraph: 024 Reference ID: 8-024-20140306 Can brownfield land have a high ecological value? It can do. A core principle in the National Planning Policy Framework is to encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value. This means that planning needs to take account of issues such as the biodiversity value which may be present on a brownfield site before decisions are taken. Defra has published information on Open Mosaic Habitats, a specific type of habitat that is of high ecological value and which occurs on brownfield land. Where insufficient information is available, survey work may be appropriate to assess ecological value before decisions on development are In addition, planning may need to take account of contamination Revision date: 06 03 2014 Related policy **National Planning Policy Framework** Paragraph 111 Paragraph 120 Paragraph: 025 Reference ID: 8-025-20140306 Should planning take account of soil? The National Planning Policy Framework states that the planning system should protect and enhance valued soils and prevent the adverse effects of unacceptable levels of pollution. This is because soil is an essential finite resource that provides important 'ecosystem services', for example as a growing medium for food, timber and other crops, as a store for carbon and water, as a reservoir of biodiversity and as a buffer against pollution. As part of the Government's 'Safeguarding our Soils' strategy, Defra has published a code of practice on the sustainable use of soils on construction sites, which may be helpful in development design and setting planning conditions. Revision date: 06 03 2014 Paragraph: 026 Reference ID: 8-026-20140306 How can planning take account of the quality of agricultural The National Planning Policy Framework expects local planning authorities to take into account the economic and other benefits of the best and most versatile agricultural land. This is particularly important in plan making when decisions are made on which land should be allocated for development. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality. The Agricultural Land Classification provides a method for assessing the quality of farmland to enable informed choices to be made about its future use within the planning system. Natural England provides further information on Agricultural Land Classification. The Agricultural Land Classification system classifies land into five grades, with Grade 3 subdivided into Sub-grades 3a and 3b. The best and most versatile land is defined as Grades 1, 2 and 3a and is the land which is most flexible, productive and efficient in response to inputs and which can best deliver food and non-food crops for future generations. Natural England has a statutory role in advising local planning authorities about land quality issues. Thanet District Council must do more to identify and utilise existing brownfield, poorer quality land, surplus land and, if necessary, to force landowners whose land/property has remained unused/derelict for several years to either build or To conclude, I have left out many of the points raised in the local plan, not because I agree with them, but because my main personal concerns are that the proposed use of agricultural land in Birchington should be taken out of the plan, I am questioning the need for 17,200 houses overall, I am disputing the number of jobs forecast, and I advocate Manston Airport remaining as a functioning airport with only aviation related activities. Other documents used in the writing of my objections: https://www.gov.uk/government/policies/giving-communitiesmore-power-in-planning-local-development/supportingpages/local-plans http://www.publications.parliament.uk/pa/cm201415/cmselec t/cmcomloc/190/190.pdf http://www.guildford.gov.uk/media/15420/Local-Plan-Issuesand-Optionsdocument/pdf/Guildford_borough_Local_Plan_Strategy_and_Si tes Issues and Options.pdf (what a shame TDC did not

					+to+2012.xlsx This document shows how immigration is affecting the population of the UK – in Thanet we have had an upsurge of immigration in recent years. This is affecting the availability of jobs, and the availability of housing. It is my contention that immigration, which was unfettered during the last Labour		
					administration, and which the coalition government have done little to contain, is having a direct impact on Thanet and the drafting of this local plan. Why should the settled local population have to put up with the consequences of failed government policies? If this link does not open see attached document. http://webarchive.nationalarchives.gov.uk/20100528142817/h

	Valley Woods	170			reduction of open spaces and farmland and further environmental pressures on an already overdeveloped and urbanised landscape is not something to be blindly supported, especially if migration-based population trends alter?		 VVCD
Francis Vincent		448	Ob	Object	I writing to object to the proposals as set out in Thanet's Local Plan I am struggling to understand the amount of housing planned for us in Thanet, every document I have seen does not support this amount of housing. Even in TDC's plan you have stated that a number of jobs will be created, which is clearly not enough for the amount of housing you want built. Thanet's unemployment as is well documented is some of the highest, in Kent, the highest. If you build all these extra housing without adequate jobs, the area is likely to become a huge unemployment area. Thanet's population is actually decreasing, the only reason why the figures are increasing are due to people moving into the area. I am at odds to understand why our Local Plan is taking this into account.	1278	Email
					As for Birchington, the increase in housing is far above the recommended amount of housing for a village, this will turn Birchington into a town. We also do not have adequate		

	infrastructure in place to handle 1000 new houses, which	
	would be build on Grade 1 agricultural land, which in itself is	
	madness. The local Doctor's can not cope as it is, so how will	
	you allocate all these extra people? The air quality in	
	Birchington will also become an issue, the Square is a main link	
	and is clogged at times & getting worse. Station Road is clogged	
	and getting worse, do you actually think about people having to	
	live in this area at all?	
	Thenet is an area that is considered a notential drought area	
	Thanet is an area that is considered a potential drought area,	
	you will be making this worse, can our water & drainage cope	
	with these houses? I would like to see proof that Thanet will	
	not be blighted with this increase in housing & that TDC are not	
	gambling with our quality of life.	
	I list below some of the main concerns in bullet point form:-	
	This below some of the main concerns in ballet point form.	
	1) Housing increases are not fully evidence based. Being told	
	"the Government says so" does not reflect the actual local	
	population growth figures.	
	2) The existing and planned infrastructure is woefully	
	inadequate to cater for such a large increase in population on a	
	relatively small coastal peninsular.	
	relatively sitiali coastal perillisular.	
	3) in regard to point 2 my concerns are that there is	
	insignificant funding available to pay for it all.	
	4) Scant regard to local concerns that have been ongoing since	
	the last draft plan went out to consultation especially in regard	
	to the loss of Grade A farmland.	
	to the loss of Grade A farmand.	
	5) A complete disregard of your own policy documents namely	
	Policy CC2 relates to landscape character areas and the Central	
	Chalk Plateau. At the rate you seem to want to build on Thanet	
	there will be little or no "Character areas" left.	
	6) Manston Airport - somewhat out of your hands now with the	
	DCO in progress but kicking the can down the road for the last 4	
	years and not actually robustly supporting the important asset	
	and a "unique selling point" for Thanet, Kent AND the South	
	East raises concerns that plans for the site that do not involve	
	aviation have been pre-determined. This leads many including	
	myself to question just how much of this plan, now out for	
	"consultation" has also been pre-determined and therefore	
	whatever the residents say will be ignored and carried out	
	anyway?	
	It boils down to a simple matter of trust. Is this a local plan for	
	local people? Or a hastily cobbled together plan that ticks	
	boxes?	
1 1		

		1	Γ	T T		<u> </u>	
					It should be commented that the process has not included people or considered them, it was commented that the engagement with the public should be improved from the feedback in the 2015 consultation, now we are now at the publication stage, no improvement has been made!		
Gale	Roger	Parliament of the United Kingdom	149	Object	This observation is made in the light of representations received as the Member of Parliament for North Thanet and of local knowledge. I suggest a reappraisal of the number of houses planned in the light of likely realisation of the build-out and, particularly, local rather than out of area need between now and for the duration of the plan.		Web
Georgiou	Nicholas		42	Object	Huge over-development of housing that would detrimentally effect the area; it's Character, massive increase in traffic, How many 'brown sites' have been identified? I wish to register my strong objection to the proposed housing development at Westgate and other arears of Thanet. This "Local Plan" has everything to do with meeting a National Strategy for house building, rather than meeting local needs, which are quite modest. The proposed new house builds are of such a high figure as to alter the character of the area. I believe that the area cannot support these proposals and would make the following points: The loss of grade 1 and 2 agricultural land There is certainly not the "local demand" for these house numbers Both Water supply and waste disposal for this increase is not realistic School places do not exist to take the increase in demand Doctors and Dentists cannot meet the increased demand The huge increase in traffic would be detrimental to the environment and health An "aspirational" number of new jobs is not evidence Thanet already has a very high level of built up area compared to other areas The Government should be encouraging the use brown sites and the refurbishment of existing poor housing stock to help meet demand Proposed developments do nothing to enhance the rural economy and is against TDC policy to protect the character, quality and our natural environments	93	Pape
Giddins	Rod		62	Object	The draft Local Plan proposes an additional 17,140 dwellings, including 1,600 for the village of Birchington. The evidence for this is drawn largely from a report by G L Hearn in January 2017 (the Updated Assessment of Objectively Assessed Housing Need). This uses the Office of National Statistics (ONS) subnational population projections which indicate an increase of Thanet's population of 20% over the plan period to 2031, including a higher net out-migration from London than originally envisaged. My view is that the basis for the number of houses required is fundamentally flawed:	161	Email

The methodology does not take into account the fact that Thanet is bounded on the north and east by sea and that any development outside existing urban settlements has to be inland to the west and south, contained within the local authority's boundari Thanet is a small local authority area covering just 39 square miles with an existing population density of 3543 people per square mile. This compares with the neighbouring authorities of Dover with a population density of 950 per square mile and Canterbury with 1250 per square mil In their Local Plans both authorities are proposing to build fewer houses than is now proposed for Thanet. House prices in Thanet remain below the average for the South East and the national average but, in terms of affordability, house price to income ratio at 37 is higher than others due to the lower wage economy in Thanet. This would appear to underpin the need for greater impetus to be given to economic regeneration. However, in the report by G L Hearn they state that, inter alia, "there is no need to increase housing provision...to support the economy" (see paragraph 2.7 and Table 14). They go on to state that their housing needs assessment "is not a housing target and does not take account of land supply, development and environmental constraints or infrastructure". (see paragraph 2.17). The Housing Strategy emphasises the importance of providing quality housing and this is welcomed as some recent developments (e.g. at Westwood) have produced monotonous, bland terraced housing which does nothing to enhance the street scene or local environment. The Plan has identified 540 empty properties in the district but the local authority is slow to act in bringing these back into beneficial housing use for local people. The Plan should give greater emphasis to this issue and include more robust policies to prevent properties being vacant for more than a reasonable period (e.g. 1 year). It is clear from the Plan that the housing demand in Thanet is largely driven by out-migration from London. Houses in Thanet are much more affordable for people living and working in London and there are two statements in the Local Plan which support my view. Firstly, under the Job Growth Strategy (see paragraph 1.18) it states that inter alia "Improved rail links could expand commuting out of the district". Secondly, Policy SP45 concerning the proposed new parkway railway station at Cliffsend, is supported by the statement "Thanet has the potential to become a more attractive location for people employed in London seeking to live in a more pleasant environment" (see paragraph 6.17). To summarise, the housing policies in the Local Plan do not take into account the special circumstances of Thanet as a densely populated coastal area and therefore the housing target methodology is flawed

				,	_	 _	
					will do little to increase the number of affordable homes for		
					local people		
					will encourage more out-migration from London and		
					commuting back into the capital, pushing up house prices		
					whilst having a detrimental effect on existing local public		
					services		
					will enable development of very important agricultural land for		
					housing (see below)		
Gimes	Alan	Alan Gimes	374	Observatio	This letter and its contents are intended to be submitted to the	1075	Pape
				n	relevant Planning Inspector who will be responsible for the		r
					examination of the recently published Local Plan.		
					Would you be kind enough to acknowledge receipt of this letter		
					and of its transmission to the Planning Inspectorate in due		
					course?		
					I am requesting this action because of the increasing reluctance		
					of the Council Officers to engage with its residents on		
					contentious matters, its inability to consider the views of		
					residents and its dilatory approach to matters of accountability		
					and transparency.		
					Outlined below are my considered observations and responses		
					to aspects of the local Plan. Soundness.		
					I believe that the plan is unsound because it has not been		
					prepared in a positive manner.		
					Quote from policy SP11 "Housing provision is made for 17,140		
					additional homes over the 20- year period to 2031. This reflects		
					forecasts based on an updated assessment of migration trend-		
					based population projections (2014) and the labour		
					requirements supporting the Council's aspirations for economic		
					and employment growth."		
					In relation to employment prospects, it has relied solely on an		
					over optimistic report dated 2012 (Experian) to project an		
					employment gain of 5000 jobs and thence 17000 plus housing		
					requirement.		
					The report itself states this is very optimistic and suggests a		
					more considered figure of 3100. Great reliance on a fully		
					functioning Airport and seaport form the basis of these figures.		
					There is huge doubt on the viability of both these sites to		
					produce this level of employment.		
					There has been no evidence of any alternatives being put to the		
					public for consideration, I consider this a fundamental fault in		
					the preparation of the plan.		
					The infrastructure requirements.		
					It is the stated intention of this Local Plan that infrastructure		
					improvements be made by the developers in terms of 5.106		
					agreements and possibly the use of the Community		
					Infrastructure Levy. The road infrastructure requires		
					considerable improvements to support such a significant		
					increase in housing.		
					This approach is fundamentally flawed as it relies upon		
					developer's willingness to provide the required infrastructure		

and could therefore adversely affect the viability of each proposed site.' Developers have particular skills in avoiding provision of 'off site' infrastructure. This is particularly relevant to the proposed "inner ring road" where many Individual developers are involved; Thanet District Council has limited influence on bringing the infrastructure requirements together in a timely or effective manner. This will result in a piecemeal approach to the delivery of a sustainable infrastructure for the proposed level of housing. Given this level of reliance upon developer contribution Ifirmly believe that this is not a sustainable strategy and again the council has not explored alternatives. It therefore fails on the economic test of sustainability. In such a compressed land area, the proposal of 17000 additional houses within Thanet does not represent sustainability for the future. Thanet is the second most densely populated part of Kent and about 90% of the proposed housing is on Grade 1prime agricultural land. The over reliance on optimistic aspirations without reference to updated population figures provided by the ONS will inevitably have a negative effect on the overall sustainability of the plan and its delivery. There appears a reluctance on the part of the council to seek other ways promoting future sustainability and this approach means that the plan is unjustifiable in its current I believe also that the environmental impacts of this approach will be detrimental to Thanet. Take for example the Landscape Assessment, within it pages, insistence on protecting the northern slopes of the Wantsum Channel are made. Much is made of the need to preserve the natural beauty and uniqueness of them, yet the strategic sites 5512/436 are located on this area with no indication of mitigation, screening or design concepts to be followed. These sites show the contradictions within the plan not only in relation to the landscape Assessments but with the stated provision of rural housing in Minster. The proposed housing numbers for Minster are way above historical development and are destined to become bolt on dormitory estates built for market speculation rather that an evidenced need for rural housing. It therefore fails on the social and environmental tests of sustainability. Given my remarks about infrastructure delivery Icannot see that the council can claim this plan is effective or deliverable within the time frame. General observations. As an overall observation the plan presents as repetitive, contradictory and far more optimistic than reality demands. If Thanet District Council had been more pragmatic in their use

				T	<u> </u>	T	
				of figures the number of houses needed would be more			
				realistic and possibly more deliverable.			
				At this time local councils do not build houses and this vast			
				number can only be delivered by developers who will demand			
				the most advantageous benefits and the least contribution to			
				that infrastructure. That could well result in a much lower			
				delivery of affordable houses in an area that needs them.			
				Thanet is not a high value area and all the current social			
				indicators show a minor growth in employment, minor increase			
				in population and increase in benefit claimants together with			
				an increasingly gridlocked road network.			
				Many parts of it are sensible and self-evident, but many are			
				well beyond the ability of the council to deliver.			
				I have taken part in the previous consultations and public			
				presentations and have been left with the enduring impression			
				that the only representations the council have taken notice of			
				are developers and landowners. This plan relies heavily on out			
				of date data for its conclusions and as such does not have the			
				support of the residents.			
				They have never sought to present other pragmatic alternatives			
				or engage in meaningful consultations.			
				I am far from alone in holding this view of Thanet District			
				Council.			
				On this plain evidence the projected housing numbers are			
				fanciful, unsustainable and will not be delivered. The Plan is not			
				sound in its current form

Grantham	Michael	& Son Concrete Solutions	504	Object	The Previous version of the local plan suggested a provision of 12000 houses. This has risen to 17,140. Studying the historic rise in population in can be seen that in 2011 a sudden rise occurred - I suspect due to migrants from Europe, which is unlikely to be repeated given the forthcoming BREXIT. See graphs attached at the end of this submission. Both graphs suggest a 2031 population for Thanet of around 150,000 - a rise of some 25000 from 2011. At a national average occupancy rate of 2.3 per household that suggests a need for perhaps 11,000 more houses and not the suggested 17140. I would challenge the evidence base for the higher number? The fact is that Thanet is already much more densely populated than the surrounding areas with some 27% of the land area developed, compared to dramatically lower numbers for the surrounding areas (closer to 9%). Thanet does not have the infrastructure to deal with another 40,000 people and their cars. Westwood is already gridlocked at peak times. QEQM cannot cope properly already with A&E and would be simply swamped with such a massive increase. Similary Doctors, Dentists etc are already struggling to cope. The sewerage system won't cope, there is unlikely to be sufficient water available to provide for such numbers the list goes on. Thanet should ONLY be building enough houses to cope with its own population rise. And it most certainly shouldn't be building on Grade 1 Agricultural land as is currently proposed. [See attachment for population graphs]	A plan allowing for housing numbers much closer to the originally proposed 12,000 houses would be much more reasonable. And detailed consideration for avoiding building on Agricultural land where at all possible. A detailed consideration is also required as to how infrastructure will cope with an increased population and their cars and how sufficient provision will be made for hospitals, doctors, dentists etc.	1414	#228 Grantham M Extract.JPG (34 KB)	Email
Green	David	Mr	470	Object	My main concern is in regard to the unrealistic and environmentally damaging high target for land allocated for new housing set at 17,140. This has risen from 12,500, which was the calculation 4 years ago purely because of changes to the way Government has decreed these things should be calculated. We do not wish to challenge the way these formula have been applied, but would suggest that there are unique aspects of Thanet that the Council should have taken into account. A one size fits all formula might be ok for middle England, but should not be applied uncritically in relatively remote coastal areas such as Thanet without detailed consideration. Thanet's geography, as a remote peninsular, with just effectively two roads on and off "the island", places large constraints upon the area's ability to generate employment. The logistics mean that employers can usually find more advantageous locations nearer to the M25. Despite promises, KCC and Government have failed to address this constraint.		1336		Web

Even commuting to find work is constrained to travelling to Dover, Canterbury or Ashford areas or to brave the escalating costs and hassle of rail to London. For these reasons we believe that the plan's target of 5,000 new jobs is wholly unrealistic. Thanet has no large scale employers, and even some of its lesser ones such as local government, retail, hospital, the port and airport are closing or retracting. We see nothing in the plan that convinces us that the Council plans will address this. Our one bright spot, tourism, is notoriously fickle and uncertain. We would advocate no more than 3000 jobs being a realistic expectation which would mean that the housing target should be reduced. We do not think the area will attract large numbers of people relocating here to work. The housing target also seems to fail to take into account the large increases in housing planed for our neighbouring districts, Dover, Canterbury and Ashford. Because of better employment opportunities, we believe that these will inevitably meet some of Thanet's housing need. It is entirely unacceptable that against council officer's advice, the local plan fails to address the future of the derelict airport site at Manston. The unviability of this site as an airport is dealt with elsewhere; however the current owners have submitted plans to the council that would provide the area with real opportunities to develop a sustainable development with employment, recreation and housing on brown field land. We believe it is wrong to identify so many green field sites in the plan which comprises grade 1 agricultural land (up to 15,000 homes proposed on such green field farmland or 80% of the total). Such land is a vital asset to the people of Thanet. Government policy is to maximise use of brown field sites. This plan does not do so. We do not believe that house builders will actually be able to build the target amount of new housing in Thanet – Our previous delivery of housing falls short of this with target averaging 678 units a year 2006-11 and from 2011 to 2016 311 per year. There are currently sites with planning consent for over 2,000 homes which have yet to commence development. There are also 2,488 empty and second homes within Thanet Inevitably, in this situation, quality will suffer. The danger, in allocating so much land for housing development, is that development will be very piecemeal. Numerous small developments will occur, contributing little to the much needed infrastructure that makes for sustainable communities. Furthermore, the plan concedes that Thanet faces serious water supply and water quality issues, likely to increase in the future. Southern Water in their document "Water futures in the South East" say "River flows could fall 35% as population & climate changes bite, Extreme droughts could be over 50% worse than current systems may be resilient to. On their latest figures Thanet is currently reliant on 2.7 MI/d transfer of water

					from other regions, expected to rise to 17.6 MI/d by 2050, a			
	'		1	1	rise of 600%. Meeting this threat will incur costs that will be a		I	
	'		1	1	constraint to further development. In fact it is obvious that the		I	
	'	'	1	1	political decision to re-allocate sites for 3700 houses, at the last		ı

	'		1	1	to the Planning Inspector. Once again, little time has been			
	'		1	1	allowed for the proper consideration of the numerous matters			
	'		1	1	worthy of discussion, and so I will comment on only a few of			
	'		1	1	them.			
	'		1	1	My submission (copy enclosed for ease of reference) on the			
	'		1	1	earlier 2015 Draft covered various subjects, but I do not detect			
	'		1	1	that the revisions made in the updated Draft have answered all			
	'		1	1	of the problems to any extent. One ray of hope is that the			
	'		1	1	Transport Strategy has now finally been issued. However, it			
	'		1	1	remains to be seen whether the required new roads would			
I	'		1	1	indeed appear before the provision of any substantial numbers			
	'		1	1	of new houses.			
1	'		1	1	Central Government Policies			
1	'		1	1	I realise that Thanet DC has to follow the edicts of Central			
I	'		1	1	Government in many of these matters, notably in the			
	'		1	1	apparently arbitrary allocations of numbers of new houses in			
	'		1	1	each local authority area, but the consequent increase from			
	'		1	1	1000 to 1600 new houses for Birchington could only exacerbate			
	'		1	1	the likely problems in our area.			
	'		1	1	Use of Agricultural Land			
	'		1	1	My enclosed comments included reference to the inexplicable			
	'		1	1	decision of Central Government not to protect Grade One			
	'		1	1	Agricultural Land from development, a provision which still			
	'		1	1	beggars belief. The inability of the UK to feed itself has not			
	'		1	1	reduced in the last three years, and now we face the prospect			
	'		1	1	of Brexit, which surely could only increase the problem.			
	'		1	1	I can only hope that the Inspector, when he/she considers			
			1	1	these proposals in the light, inter alia, of the requirement for			

on the rationality (or rather the lack of it) of that particular policy. Other important Matters inly previous submission was not able to cover several other sugmission are used to plade severes. On this notation, twould like to apacity, the particular area of the program of		_	_					
policy. Other important Matters, My previous submission was not able to cover several other significant areas of public services. On the occasion, i would like be decided to the provision of t						"Consistency with National Policy", would make some comment		
Cither important Matters My previous submission was not able to cover several other significant areas of public services. On this occasion, I would like to outline a few of them. Toucation: The local Primary and Secondary schools are both up the country of the local Primary and Secondary schools are both up the country of the local Primary and Secondary schools are both up the local BODM Asoptal in Thanec cannot cope with present numbers, and finds it every difficult to recruit staff. The Birchington Medical Centre also suffers from the same two problems. Social Services: Central Government requirements for reduced expendit un a renecessificating withoriawais of provision by Kent CC at a thread the company of the control of the CC at a thread the company of the control of the CC at a thread the company of the control of the CC at a thread the company of the control of the CC at a thread threa						on the rationality (or rather the lack of it) of that particular		
My previous submission was not able to cover several other significant ures of public services on this occasion, I would like to outline a few of them. Education: The local Prinary and Secondary schools are both up to capacity. Health: The local GEGM Hospital in Thanet cannot cope with present numbers, and finels it very difficult to recruit staff. The librichington Medical Canter also suffers from the same two problems. Social Service: Social Service: One over members of the delety are increasing. Water Fast Kent has experienced the lowest rainfull in the UK, and as far as I am awave, current discussions with the local water Company have not yet left to any specific proposib. Hartley Tricia Ramsgate Town Team Town Team Town Team Town Team A so far as I am awave, current discussions with the local water Company have not yet left to any specific proposib. Housing: We would like to see the Plan focus on the potential to use mail infill sites in various parts of Ramsgate to provide much-needed low-cost housing, and to tity up some unloved corners with sympathesistically and appropriately designed new buildings. We recognise that such sites may not be attractive to developers, particularly if they subtim conversation areas, so conjunting above that the local water control of a storey building. We strongly suggest that the Plan about on the potential to louding. We strongly suggest that fire Plan about on the potential possible of the considered on the potential possible of the considered on the potential possible of the considered on the potential possible of the considered on the potential possible much-needed low-cost housing, water that because the considered on the potential possible much-needed low-cost housing, water than the proposed business may propriate the control of the potential possible extended to include such parts the proposed business of the proposed business of the proposed business of the proposed business of the proposed business the major possible of the proposed busine						policy.

					suggested on the farmland in Westgate.				r
					The farmland is even more important to the local community			ı	
					more than ever before due to Brexit. We need to get back to a			ı	
					more sustainable way of life.			i	
					I am also against the amount of houses suggested as we cannot			ı	
					cope as it is at doctors surgeries. So much so, you can only			ı	
					complain or speak to a doctor concerning one issue or problem.			ı	
					The length of waiting for an appointment is ridiculous as it the			i	
					wait already on an already over stretched QEQM.			ı	
					This is just the tip of the iceberg - we do not have the facilities -			i	
					water waste to cope as it is. We have no jobs for the existing			ı	
					people of Thanet.			ı	
					Pollution will increase! I moved here for health! Our beaches			ı	
					will become even more at risk of pollution.			ı	
					Thanet is not big enough not broad enough for this ridiculous	,		ı	
					increase. So I totally oppose the entire local plan. I feel you			ı	
					think small term + of your pockets rather than long with the isle				
					in mind.				
Holden	Michael		49	Object	I am so incensed at any proposal to built more houses in		116		Pape
					Thanet, especially having seen the figures used to justify the				r
					proposals, as those figures and forecasts are either fictitious or				
					hypothetical (and way overestimated).			ı	
					My reasons for my strong opposition are as follows:			ı	
					1 No Thanet residents will benefit from them (born and bred	,		ı	
					residents that is), and my family will still not be allowed access	,			
					to the Housing list. It is social housing for Thanet residents that	,		ı	
					is needed, but only when the last reason on my list is satisfied.				
					2 The proposal is to build, concrete, and tarmac over prime				
					farmland, the like of which is not found in many parts of the				
					country. This land is capable of sustaining 3 or 4 crops per year,				
					if sensibly rotated, and in the not too distant future will be				
					essential for Britain.				
					3 As the Government figures (declared) show, Thanet is already				
					more densely populated than any other borough in Kent, other				
					than those on the M25 and within it. To allow an influx of more				
					people (I am of the opinion that the London boroughs are very				
					aware of this, if not funding it), would be totally			I	
					irresponsible. Tell the London people to build on Hyde Park, it			ı	
					is not as precious as prime farmland, and that farmland is just				
					precious to us as Hyde Park is to them.				
Hume	Alister	Hume	341	Object	Following the removal of Policy SP05, the "top-up" sites which		1024		Email
		Planning			have been hurriedly compiled by the LPA as replacement /				
		Consultanc			alternative housing allocations to the earlier proposed				
		y Limited			allocation at the former Manston Airport site largely represent				
		'			extensions to existing draft allocations, as reflected in the				
					revised 'Table 2'. The most recent Call-forSites exercise				
					undertaken by the LPA in February 2018, as well as those				
					undertaken previously, have identified opportunities for				
					reasonable alternative development options to accommodate				
					the redistribution of this housing provision to support Thanet's				
					future growth. It is however submitted by HPC that the Local				

					Plan in its current fform has ffallen short off sufficiently		
					scrutinising these other development options, and considers		
					that more sustainable urban-extensions such as those put		
					forward on Land to the South and West of Chilton School,		
					Cliffsend (SHLAA 372 and SHLAA 373), and on Land Adjoining		
					QEQM in Margate, have not been properly assessed or tested.		
					For these reasons, it is asserted that the Local Plan is unsound.

Lamb	Kyla	Minster	373	Object	Overall Future Sustainability: Minster Parish Council does not	1074	Pape
	,	Parish			believe that the provision of		r
		Council			17,000 houses is sustainable for this district. We have		
		Council			attempted to outline the issues of		
					economic prospects and transport infrastructure above and it is		
					our considered view that the reliance on questionable		
					outcomes and aspirations will have a negative effect on the		
					overall		
					sustainability of this plan.		
					Equally, the delivery over the time period of this plan		
					represents 2.5 to 3 times the historical		
					house building figures for the district. It would have been far		
					more beneficial for the district to have adopted a more realistic		
					approach to economic drivers and the provision of		
					transport infrastructure to produce a deliverable level of		
					housing development. Such an approach is supported by more		
					recent ONS population predictions and up to date social		
					research.		
					The Experian report which Thanet District Council uses in		,
					preparing this plan encourages investment in tourism and		
					agriculture.		
					The Local Plan itself speaks of protecting character, quality and		
					function of Thanet's rural settlements.		
					Yet recent financial decisions by Thanet District Council		
					mitigate against tourism and 91% of the proposed		
					developments in this plan are on Grade 1 or 2 very productive		
					agricultural land.		,
					Thanet is recognised to be a water stressed area, both in terms		
					of sustainable water supply and the difficulties with waste		
					• • •		
					disposal.		
					It is already the second most densely populated in area in Kent,		,
					yet with less investment and employment opportunities. The proposed level of housing would therefore be used by		
					The proposed level of flousing would therefore be used by		

					significant numbers of people migrating into the area. The lack of employment means that either these additional houses will have a dormitory function where most of the occupants will be travelling out of the area to work, or we have large numbers of people, often elderly, displaced from London Boroughs, hugely increasing the demand on social care and medical facilities. The NPPF states that the planning system should contribute to and enhance the natural and local environment by protecting and enhancing valued landscapes. More specifically to our parish, the Landscape Character assessment speaks of the Wantsum North Slopes (Ref.B1.) and the views across the former channel-side villages as being a unique setting. Yet the land identified for development in Minster in the Local Plan forms part of these slopes and directly overlooks this 'unique' setting. The planned development would destroy these views and appears to be contrary to Thanet's own policy.		
Latchford	Barry		45	Observatio n	You have already undermined your proposals by eradicating the mixed development proposals for Manston which is a brownfield site and would offer 4,000 homes with supportive infrastructure. Instead you have proposed moving the building of houses without supporting infrastructure around villages which include greenfield sites. A disastrous and unnecessary move. Acknowledge that the proposals for Manston are logical and practical and avoids the building of houses with no supportive infrastructure around villages and greenfield sites which would also be an additional load on existing community support.	107	Web
Lee	A		133	Object	The population/housing in the area is not being met by the community facilities in place and are buckling. Thanet is an island, we welcome day trippers and visitors but cannot expand the population by people relocating into the area.	324	Web
Lorenzo	Peter	The Broadstair s Society	37	Observatio n	One hopes that now that ONS has taken over the production of projections they, too, will be adhered to as, according to their figures, the number of households in England is projected to increase by 4.0 million (17%) over the next 25 years from 22.9 million in 2016 to 26.9 million in 2041 which equates to 159,000 additional households each year compared to the 210,000 previously projected. As time goes on the the number of houses needed in THanet should decrease rather than increase	288	Web
Mairs	David	Mr	455	Object	I welcome the opportunity to engage with and contribute to development of the Thanet Local Plan. I consider the draft Local Plan to be unsound as there is insufficient emphasis on the creation of employment to sustain the population growth envisaged. The saga of the Manston airport site and the political game-playing that has regrettably accompanied it have clouded many of the issues pertinent to Thanet, one of the most deprived areas in the country. My greatest concern is the potential housing target to be imposed on the district. This has risen remorselessly in recent years from 7,000 to an eye-wateringly high (if only rumoured) 17,000. I am aware housing targets have been contested across the UK, but it is difficult to stress how damaging such a potentially high figure would prove to Thanet	1302	Web

	10,000 would be appropriate. It is pertinent to note that Thanet District Council has historically adopted higher housing targets than deemed necessary by central government. Whatever the reasons behind this, such an approach has drastically failed the		
	to do with housing an incoming population, largely, I presume, from the capital. Again, what would those people do for work? I accept a need for new housing in Thanet but at a reasonable, sensible and proportionate level; a figure between 7,000 and		
	able to cope with it. A figure of 17,000 new homes – or indeed anything close to that – would have nothing to do with local need and everything		
	be in line for a disproportionately high figure, a situation exacerbated by the fact that it is just about the district least		
	the unsustainability of a vast growth in housing is apparent. The issue of Objectively Assessed Need has been well aired, but a quick scan of housing targets nationwide shows Thanet could		
	according to a study by the BBC and University of Sheffield. Then consider that Thanet, like much of Kent, is subject to some of the highest levels of water stress in the country and		
	Further, the open space that such farmland provides is critical to the amenity and well-being of those who live in Thanet – at 27 per cent, the second most urbanised district in the county,		
	food need but it provides one of the few consistent sources of local employment.		
	In addition to this, the district has one of the highest concentrations of Grade 1 agricultural land in the region. Not only is this likely to be of increasing importance to the country's		
	greatly improved career opportunities – an aim the local authority, of whichever political hue, has never come close to achieving.		
	living here – how could it expect to meet such a vast new demand for employment? Rather than tens of thousands of new homes, the district needs		
	support such a staggering increase in households, if the 17,000 figure were to be adopted. To put it another way, Thanet, with its low-skilled, low-paid economy, cannot provide enough work for the people already		
	The district has suffered for decades some of the highest levels of unemployment in the country and it is difficult, if not impossible, to see how gainful employment could be found to		

Margate Estates Matthews Sylvia and Philip	Margate Estates	365	Zena Foale- Banks - Nexus Planning	Object	left and run down why not rejuvenate these for our young people to purchase and realistic prices or realistic rents not letting some people getting rich at the expense of others which always seems the case. Our village has a small doctors which just about can see it's residence/dentist the same schools so on and so on let alone roads having to have to put up with more traffic - we don't want a by pass either this is the garden of Eden so they say - let's keep it that way. Policy SP11 identifies the amount of additional housing that Thanet is expected to cater for during the Plan period up until 2031, and it is clear that there may some challenge in delivering that housing. Paragraph 3.12 establishes that there is limited land within the District remaining for new housing provision. Furthermore, the NPPF identifies that 'Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land'. We therefore consider that additional text should be included in the supporting text that endorses the optimal development of brownfield sites across the district, where appropriate, for residential development. For example, the supporting text at 3.13 could be updated in bold as follows: Optimise use of capacity from brownfield sites in the built up areas of the coastal towns The Area Specific Housing Objectives for Cliftonville West and Margate, as included within Table 4 of Policy SP11, identify that there is a desire to create a mixed use, inclusive and settled community through improvements to the quality and configuration of residential accommodation. The table further identifies a second objective to apply public sector intervention to pump prime private sector investment. We consider that in addition, an objective should be included to increase the overall amount of housing stock within Margate, particularly on brownfield and opportunity sites. We write to object in the strongest possible terms to	1319		Pape
					poverty is becoming endemic. The infrastructure at present is			
McCulloch Andrew		44		Support	The Plan states that the area will need 17,140 new houses before 2031. No-where does it adequately explain the methodology behind this estimate. I doubt whether 17,140 new	98	WRSE Water graph.jpg (64 KB) AMcC letter to	Web

families have moved into the area in the past 15 years and I	Sajid Javid January
must therefore question the planners' calculations.	2018 RD.pdf (465
In the Council's own words, "Thanet's business parks have	KB)
taken time to develop, and there remains a significant amount	
of undeveloped employment land." This implies that businesses	
have been unwilling to set up here which begs the question	
why this was not pointed out to the DHCLG when they imposed	
their arbitrary housing figures.	
17,140 three-person families will require 14,300 tonnes of extra	
water PER DAY, and that is before pipeline wastage. Putting this	
into perspective it is a volume equivalent to a standard sized	
football pitch flooded to a depth of 6½ feet. Not only does it	
have to be supplied, it has to be removed; something at which	
Southern Water have proved themselves to be particularly	
inept.	
We have enough trouble with water supply at the moment and	
the February 2013 Phase 2B report by WSRE stated that "All	
areas supplied by the six water companies have been formally	
designated as areas of serious water stress. In parts of the	
South East of England the limited water availability, combined	
with density of population and growing demand for water	
places stress on the environment." As can be seen from the	
graph below, the south east of England is already in deficit with	
water supply, our only hope at the moment being that Normal	
Year Annual Average (NYAA) conditions exist every year. Even	
then, the projections are that even that hope will fade by 2037.	
The other curves on the graph are:	
The other curves on the graph are.	
Dry year annual average (DYAA),	
Dry year critical period (DYCP), and	
Minimum deployable output (MDO)	
The full report is available on

nal_report_24Apr2013.pdf	
Although I am sure that planners are already aware of it.	
Southern Water report an average personal water consumption	
of 266 litres per person per day, a figure that is slightly lower	
than that recorded in our house. Assuming that each of the	
17,140 new houses consists of three people, this means that	
Southern Water will have to find an additional 13,677,720 litres	
of water PER DAY by 2031. That is before we allow for wastage.	
That is nearly fourteen thousand tonnes of EXTRA water per	
day just for Thanet; a volume equivalent to a space 137 metres	
long by 10 metres high by 10 metres wide, or a standard	
football pitch flooded to a depth of 6½ feet. Every day!	
By TDC's own admission, groundwater from the chalk rock	
beneath Thanet is used to supply water for drinking water,	
agriculture, horticulture and industry. It also feeds the springs	
, , , , , , , , , , , , , , , , , , , ,	1 1

						that emerge along the coast and near the marshes. Thanet's			T	
				! 		groundwater is extremely vulnerable to contamination as	'		1	
	'			 		substances (natural substances and man-made chemicals) are				
	'			 		able to pass rapidly through the thin soils and the natural

				-				
				An additional 500 dwellings at Westwood, as an extension of			MB)	
				the previous draft allocation at				
				Manston Court Road/Haine Road;				
				An additional 550 dwellings at a new strategic site north and				
				south of Shottendane Road.				
				The allocation of these sites for housing would (if developed)				
				result in the loss of greenfield, agricultural				
				land predominantly classified as 'Excellent' in the Agricultural				
				Land Classification. As these sites would				
				involve a more 'piecemeal' approach to housing delivery, it is				
				also unlikely they would be able to create				
				sufficient critical mass to deliver the infrastructure necessary to				
				mitigate their own impact and are				
				therefore likely to place additional pressure on existing local				
				facilities and services.				
				We also question whether these sites are capable of delivering				
				the quantum of homes proposed over				
				the plan period. We summarise our client's representation on				
				each proposed strategic allocation below.				
Miss P A		395	Observatio	I find it difficult to separate the issue re number of houses into	I am unable to suggest alternative wording as it covers too	1272		Pape
Smith			n	different points of key concern are the proposed number	many sections, both housing and infrastructure.			r
				allocated along the Manston\Haine,Westwood area. The				
				number has increased as the Manston quota has been				
				reallocated. However it does not resolve the considerable				
				problem that in a few square miles 4000 houses are proposed				
				which will all feed on to the same roads which are already grid-				
				locked, no requirement of developers to provide arterial roads				
				and solve the problem. There needs to be another major access				
				north of the area to alleviate Margate/Broadstairs traffic.				
Mulley	Sylvia	102	Object	Please accept this letter as a strong objection to the proposed		225		Pape
				at S 1 - S2 houses to be built at Westgate, Garlinge and other				r
				agriculture areas of Thanet for the following reasons:-				
				Thanet is a small area and cannot sustain such a high				
				proportion of housing and the high proportion of traffic that				
				would ensue.				
				With proposed housing also to be increased at Westwood				
				Cross, the exit roads out of Thanet, which are already				
				gridlocked at peak times, would become impassable. This				
				would make it very difficult for people living in St Peters and				
				Broadstairs to exit the island.				
				With the proposed closure of the Stroke Unit at the QEQM it				
				would make the journey to Ashford from these areas				
				impossibly lengthened, putting lives at risk. We are at peak				
				capacity with regards to schools, hospitals, doctors surgeries				
				and dentists.				
				To build enough schools etc to encompass the increase in				
				population because of the proposed building of 17,000 houses				
				(say 2 adults and 2 children to each home) would equal a				
				(say 2 addits and 2 children to each nome) would equal a				
				further 34,000 adults and 34,000 children on the island. How				

				it is difficult at the present population numbers to keep our		
				schools, hospital, dentists and doctor' surgeries fully staffed.		
				These proposals will permanently damage the basic character		
				of Westgate and Garlinge and the rest of Thanet to such an		
				extent that they will not be recognisable as small towns and		
				villages, but one large built up area.		
				The building of houses proposed on Minster Road, both sides,		
				on beautiful arable farm land should never be allowed. We will		
				need our prime agricultural land, of which some of the best in		
				UK is to be found in Thanet, to grow more crops for home		
				consumption. With the forthcoming Brexit inevitable, we will		
				need to be able to produce more crops to save on proposed		
				tariffs which could be imposed by Brussels.		
				Water, and the disposal of waste would be a monumental task		
				for the proposed addition of 68,000 children and adults. And		
				when these 34,000 children grow up, where will they live, and		
				work.		
				There is a shortage of jobs in Thanet. Does that mean that the		
				34,000 extra adults will all be living on the state?		
				On these ground I again state I object most strongly to the		
				proposed building of 17,000 houses in Thanet. It is obvious that		
				we will have to build for future generations, but certainly not at		
				this high level.		
Newing	April Dover	322	Observatio		978	Email
	District		n	In its response dated 20 March 2017, DDC detailed its position		
	Counci			in relation to the findings of TDC's Strategic Housing Market		
				Assessment (2016), specifically the disagreement regarding the		
				identified Housing Market Area (HMA) of Thanet, Canterbury		
				and Dover. This differs to DOC's SHMA (2017) that identifies a		
				HMA of Dover and Shepway as most appropriate for the Dover		
				District.		
				With regard to paragraph 9.7 of the Duty to Co-operate		
				Statement (2018) and paragraph 3.4 of the draft Local Plan to		
				2031, the District Council confirms that a meeting was		
				held between TDC, DDC and GL Hearn to discuss the above		
				matter. However, to date, no final agreement has been reached on the extent of the HMA boundaries and therefore the		
				District Council's position on this still stands.		
				·		
				Whilst the matter regarding the HMAs is still outstanding, DDC supports TDC's approach to meet its own housing requirement		
				as outlined in paragraph 9.9 in the Duty to Co-		
				operate Statement (July 2018).

realities – most obviously the refusal to accept that no coherent Plan is possible until the question of Manston Airport is resolved one way or the other. The previous administration thought that 12,000 houses with an Airport was unrealistic – an increase to 17,000 puts Thanet at 50% above an average allocation (circa 365 districts into 4 million houses) but of course the Chief Planner's methodology has been revealed by the ONS as flawed and is overstating the overall household formation rates by at least a third. The ETHPOP population projection of c 5% increase in Thanet may very well prove 'ambitious' if 'other things are equal'. Thanet's own population is flatlining – presumably a reflection on the lack of jobs (which explains the highest rates for empty properties south of the Wash). The Institute for Economic Affairs ascribed low investment to low wages and low skills. The Select Committee on Housing last November (Helen Hayes MP RTPI) put it to the then Minister that 'economy comes first'. He agreed. It is not clear where Marsham Street sees the jobs coming from: the Centre for Cities has recently forecast 30% job losses in 'left behind' districts (and the Bank reckons more like 50% 'technological redundancy is in prospect.) Thanet would need something like 15,000 jobs to stand still. 17,000 houses implies 40 to 50,000 extra population presumably needing at least another 15,000 jobs. Even with the Airport Thanet is in trouble jobwise. In order to attract investment Thanet needs a vigorous upskilling and reskilling programme – the loss of the Broadstairs Campus and downsizing at the local FE College indicate that this not going to happen – so no great investment may be expected. Our schools are struggling and aslready occupy too many low positions in the national league tables. The Resolution Foundation identified the three most vulnerable sectors in the 'Fourth Industrial Revolution as Care, Retail and Public Sector. The earlier draft LP talked of a 'robust public sector' which rather undermined its credibility (do 'they' not read the papers ?) and the present offering seems to think that Thanet needs more 'shelf space' and ignores the online revolution (certainly 'they' do not read the papers.) Apart from the presently (long) empty retail properties Westwood Cross itself will need radical rethinking as a 'brownfield-in-waiting.' The LP hasn't quite grasped the importance of 'heritage' to the local economy – despite the recent public announcement of the Dreamland 'Sea View Hotel' Group of their wish for more attractions to reinforce all-year-round business. TDC has resolutely refused to engage on Local Listing, refused to publish the Living Spaces Workshops Report from 2016, refused to join progressive districts like Sevenoaks in implementing the Community Infrastructure Levy, refused to set up a Heritage Working Party following those workshops last year – this does not augur well for any meaningful consultation. Our 'cultural offer' is our great strength.

г г	, , , , , , , , , , , , , , , , , , ,	Т	T		1	T	
				So, economically unsustainable – socially unsustainable			
				(Marsham Street have clearly not seemingly taken much heed			
				of Thanet's position in Deprivation and Social Justice Indices)			
				and I daresay physically unsustainable (others will no doubt			
				dilate on the transportation problem let alone water and			
				sewage.)			
				Despite well-meaning aspirations from Ministers in the past			
				about 'Beautiful In My Back Yard' and 'anti-bolt-on estates'			
				expressions such noble ideals have not filtered through to the			
				backwoods : witness the Salmestone development nodded			
				threough and early back-tracking on viability at Briary Close.			
				We are not going to get the 'affordable to rent' that is actually			
				required for local needs – we may very well get a lot of			
				bankrupt developers and even more despoiled prime			
				agricultural land			
				However, perhaps some are waking up: the County Council			
				Network has recently tumbled to the need for 'infrastructure'			
				before housing and that should include skills = employment =			
				housing demand. Which is no more than what Big Ears			
				observed to Noddy all those years ago when the latter wanted			
				to put the roof up first 'in case it rains'. That lesson seems to			
				have been forgotten. Unless of course the 'imports' to fill the			
				housing are not jobseeking? But that may not do much for			
				social balance ?			
				Powerhouse Thanet to rival the Oxon/Cantab Arc ? East Kent			
				Engine to balance the Midlands ? It seems an unlikely Vision			
				from Central Planning but they declined the and the community			
				would have liked a constructive dialogue with Marsham			
				Street but the suggestion was declined – indicating a lack of			
				much faith in their own algorithms perhaps (justifiably so			
				according to the ONS.) 'Right Homes in Right Places' doesn't			
				ring true in struggling Thanet.			
				Thank you for your attention. A proper Local Plan can be			
				devised once the Airport (including Parkway) and even Port			
				Ramsgate issues are 'solidified' : Bob Bayford's present			
				predicament is understood.			
Pannell janet	498		Object	What I do want to say is that I am concerned about the plan to	1393		Pape
Janet	438		Object	build at least 17,000 new homes in an area which already has	1333		rape
				the 2nd highest density in Kent Dartford being the highest with			'
				14.8 people per hectare) with approx 13.7 people per hectare.			
				Ashford, on the other hand has approx 2.2 people per hectare.			
				(Taken from KCC Business Intelligence Statistical Bulletin 2017			
				(census based), as published by ONS on 28/6/18 called '2017			
				Midyear Population Estimate of Total Population of Kent			
				Authorities'. The Thanet average no of people per km2 is 1368,			
				whereas the Kent average is 439. Apparently Westgate, where			
				We			
				live has over 2,800 people per km2 (so the proposed allocation			
				of 2,000 new homes there will increase the density even more			
				and almost double the population there). Overcrowding leads			
				to violence/criminality, which we have enough of in Thanet,			

	т						T	т
	1	1	1	1	particularly Ramsgate/Margate.		1	
	1	1	1	1	Also we can't see that Thanet needs 17,000 new homes. A lot of	J	1	
	1	1	1		people appear to travel out of Thanet to work. I understand the	J	1	
	1	1	1		Plan hopes to see a total of 5,000 new jobs in the district by	J	1	
	1	1	1		2031 but the figure planned seems way too high, especially as	J	1	
	1	1	1		population numbers in the future are based on the Hearn	J	1	
	1	1	1		Report, which does not appear to be a true representation of	J	1	
	1	1	1		the current population as it estimates an annual increase of	J	1	
	1	1	1		1365 rather than the ONS 16/17 figure of 533. There is a feeling	J	1	
	1	1	1		these numbers have been 'bumped' up to legitimise migration	J	1	
	1	1	1		from London to Thanet. We understand that a lot of homes at	J	1	
	1	1	1		Westwood were built, particularly for London Councils to move	J	1	
	1	1	1		residents to, so getting them off their waiting lists. This all puts	1	1	
	1	1	1		extra pressure on local schools and health services, in	J	1	
	1	1	1		particular.	J	1	
	1	1	1		Post Brexit, I think we should be looking at even more self-	J	1	
	1	1	1		sufficiency in England not losing prime agricultural land to	J	1	
	1	1	1		, , ,	J	1	
	1	1	1		housing. The Food of Agriculture Organisation of United	J	1	
	1	1	1		Nations estimates the minimum land required to feed a person	J	1	
	1	1	1	1	is 0.5 of a hectare; in Kent only Ashford has a population	J	1	
	1	1	1		density that meets that requirement. The land mass of Thanet	J	1	
	1	1	1		is only 10,334 hectares, whereas Ashford has 58,062 hectares.	J	1	
	1	1	1		Ashford has roughly 118,000 people as opposed to roughly	J	1	
	1	1	1		134,000 here in Thanet. Thanet already has to buy in food from	J	1	
	1	1	1	1	outside the area, which increases the price. (Based on date	J	1	
	1	1	1	1	2011 census/ONS) and the carbon footprint.	J	1	
	1	1	1		It seems to me that there are many existing unused/run-down	ļ	1	
	1	1	1		properties in the area of Thanet that could be refurbished to	J	1	
	1	1	1	1	create new homes for people, should they be needed -	J	1	
	1	1	1	1	especially for those on lower incomes - who would find the	J	1	
	1	1	1		cost of a new house on a development too expensive and the	J	1	
	1	1	1	1	level of Council Tax, in particular, an extra burden each month	J	1	
	1	1	1	1	as they are usually at Band C at least. Use Brown Field Sites,	J	1	
	ļl		 '	1	where available, of course.	<u> </u>	1	
Proctor C	1	491	1	Object	The Local Housing plan will not work and will be detrimental in	1365	1	Pape
	1	1	1		so many ways. The Government requires councils to increase	J	1	r
	1	1	1	1	the number of houses in relation	J	1	
	1	1	1	1	to the needs of LOCAL people. According to the statistics in the	J	1	
	1	1	1		Local Plan, 1555 homes have already been built. The uptake of	J	1	
	1	1	1		new houses at Westwood Cross	J	1	
	1	1	1		was slow and obviously was not required by local people	J	1	
	1	1	1		because families from a London borough have already moved	1	1	'
	1	1	1		into them. Is that in keeping with the	J	1	
	1	1	1		Government directive? It follows, that if we are building for	J	1	'
	1	1	1		local needs up until 2031, the figure of 17140 homes required,	J	1	
	1	1	1		is grossly over- estimated.	J	1	
	1	1	1		I understand that our council is under great pressure to keep	J	1	
	1	1	1		services running with little resources, but the housing figure is	J	1	
	1	1	1		far too high. The temptation to	J	1	
	1	1	1		increase housing to accommodate the London overspill may be	J	1	
	1	1	1		O.K. for London but the result will be devastating for the Isle of	J	1

Homes	Homes		LLP				
					3.2 The draft Local Plan confirms the Thanet Strategic Housing		
					Market Assessment (SHMA, January 2016) and Updated		
					Assessment of Objectively Assessed Housing Need (mistakenly		
					identified as 'September 2016' in draft Local Plan, but actually		
					January 2017) establishes the Council's housing requirement.		
					, ,		
					3.3 The January 2017 SHMA update identifies a full Objectively		
					Assessed Need (OAN) for 17,140 dwellings over the plan-period		
					(2011 – 31), equating to 857 dwellings per annum. The full OAN		
					includes uplifts to the demographic need starting point to		
					address inwards migration from London and affordability.		
					dudices inwards migration from Editaon and anordability.		
					3.4 We support the Council's identification of its full OAN		
					including relevant uplifts in line with the requirements of the		
					NPPF.		
					TWIT.		
					3.5 Whilst the Local Plan is to be assessed against the criteria		
					contained in the NPPF 2012 and therefore will avoid the		
					requirement to adopt the Government's Standard Method we		
					are mindful of the requirement of para 33 of the NPPF 2018		
					which notes:		
					willeli flotes.		
					Policies in local plans should be reviewed to assess whether		
					they need updating at least once		
					every five years, and should then be updated as necessary		
					Relevant strategic policies will need updating at least once every five years if their applicable local		
					, , , , , , , , , , , , , , , , , , , ,		
					housing needs figure has changed		
					significantly; and they are likely to require earlier review if local		
					housing need is expected to change significantly in the near		
					future.		
					[emphasis added]		
					2 C. The assument Standard Mathe of Secretariation has at		
					3.6 The current Standard Method for calculating housing needs		
					results in a higher OAN for the District of 1,070 dwellings per		
					annum (on basis of 2016-based household projections). In light		
				1	of this, there may be a need for an early review of the Local		

	Plan to address increased housing needs.
	3.7 The Council identifies it is seeking to meet its full OAN,
	recognising the following housingsupply:
	• Completions (April 2011 – March 2018) – 2,182
	dwellings;
	• Empty homes brought back into use 2016/17 – 89
	dwellings;
	• Empty homes brought back into use 2017/18 – 84
	dwellings;
	Planning permissions – 4,294 dwellings;
	Proposed Local Plan allocations – 8,939 dwellings; Proposed Local Plan allocations – 8,939 dwellings;
	Windfall allowance – 2,250 dwellings; and
	Empty homes allowance – 357 dwellings.
	3.8 The above sources of delivery result in an over-provision of
	1,195 dwellings against the OAN requirement of 17,140
	dwellings, resulting in a total supply of 18,335 dwellings. Whilst
	no detail is provided within the draft Local Plan as to why the
	Council is seeking to over-provide, this approach is nevertheless
	supported and provides an effective and flexible strategy for
	development which will help achieve the Council's growth
	aspirations and reduce the risks of
	under-delivery.
	3.9 To meet its growth requirements, the draft Local Plan
	provides a positive plan-led approach, with allocations
	delivering the majority of future supply. This approach is
	supported and consistent with national policy.
	3.10 The Council acknowledges there are a number of
	constraints to growth across the District which limit where
	development can be located, including the District being
	surrounded by coastland, the location of internationally and
	nationally important nature conservation designations and
	areas at risk of flooding.
	3.11 Whilst the Council's strategy seeks to first optimise use
	of sites in the existing built up area(i.e. brownfield sites), there
	is insufficient brownfield land available to meet the housing
	requirement. The Council's Brownfield Register identifies land
	available for circa. 1,700 dwellings on brownfield sites
	(excluding the former Manston Airport site, as discussed
	below), of which circa. 620 dwellings already have permission
	and the remaining are proposed Local
	Plan allocations.
	3.12 As detailed in para 3.13 of the draft Local Plan, the
	residual level of housing growth, not being met by brownfield
	land, will mainly be delivered by suitable and available housing
	land on sites abutting the built-up area. This approach is
	supported and is consistent with the sustainable
	supported and is consistent with the sustainable

				development principles of the draft Local Plan and national		
				policy.		
				3.13 The draft Local Plan identifies 5no. 'strategic sites' (those		
				in excess of 500 dwellings) to deliver 6,800 dwellings across the		
				plan-period, on sites adjoining the built-up area boundary.		
				prant period, en area aujenning the same ap area seaman,		
				3.14 Whilst this will require a significant level of greenfield land		
				to meet the housing target, as acknowledged in para 3.17 of		
				the draft Local Plan, the allocation of strategic sites provides		
				the opportunity to "deliver development at a scale that will		
				serve both to facilitate a step change in delivering the type of		
				homes required to meet need and secure the infrastructure		
				required to support them". This includes the delivery of the		
				Inner Circuit link road, a key element of the proposed Local Plan		
				strategy.		
				3.15 We support the Council's acknowledgement, at para 3.24,		
				that Birchington is a "sustainable location for new		
				development, with good access to local services, including local		
				schools and other community facilities, as well as convenient		
				transport options to the rest of Thanet and locations outside of		
				the district" and the subsequent allocation of a Strategic Site		
				•		
				for housing delivery and to assist in the delivery of the Inner		
			_	Circuit link road.

Estates	Est	states		U	n	following previous submissions in relation to the Local Plan. In		Estates.pdf (2.1	
			Ev	Evans LLP	1	those submissions our client advocated the allocation of land		MB)	
				I	1	adjacent to Yoakley House in Margate for specialist older			
				I	1	people's accommodation and residential development. We			
				1	1	note that in the Regulation 19 version local plan the site is not			
				1	1	proposed to be allocated, however.			
				1	1	We enclose the previous submissions which describe in detail			
				I	1	the benefits of the proposal which include the delivery of high-			
				1	1	quality purpose-built older peoples' accommodation and a			
				1	1	contribution to meeting the need for homes in the local area.			
				I	1	We note that in the Regulation 19 draft and in respect of			
				1	1	housing delivery, the Council is relying on a lower 'need' than			
				1	1	that which would result from a calculation using the			
				1	1	Government's standard methodology. Thus the real 'need' is			
				1	1	greater than that which is being planned for.			
				I	1	Furthermore, the Council is relying on a significant number of			
				1	1				
İ				I	1	historic planning permissions to meet the need, yet there is no			
ı				J	1	real analysis of whether or not these are 'deliverable'.			
ı				I	1	On that basis we once again request that the Council gives			
İ				I	1	consideration to including land adjacent to Yoakley House in			
İ				1	1	the new Local Plan.			
i				1	1	We would be grateful if our client could appear at the			
			-		+'	forthcoming examination in public.	1222		
Read			344	I	Object	South Thanet Labour's main concern is in regard to the	1033		Web
İ		hanet		I	1	unrealistic and environmentally damaging high target for land			
i		onstituen		I	1	allocated for new housing set at 17,140. This has risen from			
ı		y Labour		1	1	12,500, which was the calculation 4 years ago purely because of			
1	Par	arty		1	1	changes to the way Government has decreed these things			
1				1	1	should be calculated. We do not wish to challenge the way			
1				1	1	these formula have been applied, but would suggest that there			
I				I	1	are unique aspects of Thanet that the Council should have			
i				I	1	taken into account. A one size fits all formula might be ok for			
i				1	1	middle England, but should not be applied uncritically in			
İ				1	1	relatively remote coastal areas such as Thanet without detailed			
İ				1	1	consideration.			
İ				1	1	Thanet's geography, as a remote peninsular, with just			
i				1	1	effectively two roads on and off "the island", places large			
i				I	1	constraints upon the area's ability to generate employment.			
1				1	1	The logistics mean that employers can usually find more			
1				1	1	advantageous locations nearer to the M25. Despite promises,			
1				1	1	KCC and Government have failed to address this constraint.			
1				1	1	Even commuting to find work is constrained to travelling to			
1				1	1				
1		İ	Ì	1	1 ,	Dover, Canterbury or Ashford areas or to brave the escalating			ĺ

costs and hassle of rail to London. For these reasons we believe that the plan's target of 5,000 new jobs is wholly unrealistic. Thanet has no large scale employers, and even some of its lesser ones such as local government, retail, hospital, the port and airport are closing or retracting. We see nothing in the plan that convinces us that the Council plans will address this. Our one bright spot, tourism, is notoriously fickle and uncertain. We would advocate no more than 3000 jobs being a realistic expectation which would mean that the housing target should be reduced. We do not think the area will attract large numbers of people relocating here to work. The housing target also seems to fail to take into account the large increases in housing planed for our neighbouring districts, Dover, Canterbury and Ashford. Because of better employment opportunities, we believe that these will inevitably meet some of Thanet's housing need. It is entirely unacceptable that against council officer's advice, the local plan fails to address the future of the derelict airport site at Manston. The unviability of this site as an airport is dealt with elsewhere; however the current owners have submitted plans to the council that would provide the area with real opportunities to develop a sustainable development with employment, recreation and housing on brown field land. We believe it is wrong to identify so many green field sites in the plan which comprises grade 1 agricultural land (up to 15,000 homes proposed on such green field farmland or 80% of the total). Such land is a vital asset to the people of Thanet. Government policy is to maximise use of brown field sites. This plan does not do so. We do not believe that house builders will actually be able to build the target amount of new housing in Thanet – Our previous delivery of housing falls short of this with target averaging 678 units a year 2006-11 and from 2011 to 2016 311 per year. There are currently sites with planning consent for over 2,000 homes which have yet to commence development. There are also 2,488 empty and second homes within Thanet Inevitably, in this situation, quality will suffer. The danger, in allocating so much land for housing development, is that development will be very piecemeal. Numerous small developments will occur, contributing little to the much needed infrastructure that makes for sustainable communities. Furthermore, the plan concedes that Thanet faces serious water supply and water quality issues, likely to increase in the future. Southern Water in their document "Water futures in the South East" say "River flows could fall 35% as population & climate changes bite, Extreme droughts could be over 50% worse than current systems may be resilient to. On their latest figures Thanet is currently reliant on 2.7 MI/d transfer of water from other regions, expected to rise to 17.6 MI/d by 2050, a rise of 600%. Meeting this threat will incur costs that will be a

				1	
			constraint to further development. In fact it is obvious that the		
			political decision to re-allocate sites for 3700 houses, at the last		
			minute in the process of plan development, because of the		
			political failure to address the Manston issue, has impacts on		
			infrastructure, transport and social, including health and		
			education, which have not been properly assessed.		
			Thanet has a chronic need for social housing to rent by the		
			indigenous population. As at March 2018, there were 2447		
			households on the housing register, broken down as follows;		
			• 1203 households require one bed		
			• 594 households require two beds		
			• 458 households require three beds		
			• 157 households require four beds		
			• 35 households require five bedrooms or more		
			Plus a rise year on year of the numbers of rough sleepers.		
			This can only be provided by the council or providers		
			purchasing land, or more likely through section 106 agreements		
			with developers. We would like to see the needs of indigenous		
			residents better reflected in the plan.		
Repsch John	126	Object	3.1 "Expected population growth". If Britain comes out of the	407	Web
			EU, population growth will be a lot less than expected. Suitable		
			land cannot possibly include Grade 1 farmland. To use any of		
			this land for building on would be totally irresponsible. The grey		
			urban area around Thanet's coast is increasing its width at the		
			expense of the decreasing green at the centre. If we don't start		
			using foresight now we will have nothing but urban sprawl to		
			bequeath to future generations.		
			"Supporting the re-use of empty properties" Yes. We should		
			also:		
			1. Disallow properties to remain empty for more than 6		
			months.		
			2. Use brownfield sites.		
			3. Use financial incentives to encourage sole occupants of large		
			properties to down-size.		
			4. Encourage the conversion of empty rooms above shops into		
			flats.		
			5. Encourage the letting out of flats and bed-sitting rooms.		
			3.2 "in-migration (including from London)" Off-loading		
			hundreds or thousands of people from homeless waiting lists in		
			London boroughs could cause big difficulties:		
			1. Local people are already fearful that their own properties		
			will not be secure.		
			2. The people arriving may not like the new way of life in		
			Thanet, where the quiet of this area contrasts acutely with the		
			noise and frenzy they would be leaving behind. They would be		
			bringing with them completely different cultures and, in a worst		
			case scenario, could produce the kind of gang warfare which is		
			currently bringing violence and death to the streets of London.		
			3. Unemployment in Thanet is the highest in Kent. There are		
			not enough jobs available to cater for such a large influx,		
	1		especially outside the tourist season.		

	1		1	1			1	1	
					3.5 Space for housebuilding is finite. If we build over all our				
					fields, there will come a time when there is no space left. Then				
					the in-comers will simply go elsewhere. It's because building in				
	_			_	Thanet continues to go on, that in-comers continue to come in.				
Schembri	Angela	RPS	387	Object	RSP is wholly supportive of the Council's decision to no longer		1140	213 Schembri	Email
		Planning &			allocate the Manston Airport site for a new mixed-use			Angela RSP.pdf	
		Developm			settlement. For the reasons set out in RSP's representations			(2.7 MB)	
		ent Ltd			to the Proposed Revisions to the draft Thanet Local Plan				
		(Preferred Options) January 2017 (set out in our letter dated							
			17th March 2017), a new settlement on the airport site would						
					not be sustainable or deliverable.				
				RSP is aware of the hybrid planning applications by Stone Hill					
				Park Limited (the airport owners) for mixed-use, housing-led					
				redevelopment of the Manston Airport site (TDC application					
				references OL/TH/16/0550 and OL/TH/18/0660). At the time of					
				writing, both applications remain to be determined by TDC					
				albeit that the deadline for a decision on the 2016 application					
					expired on 20th October 2016 (nearly two years ago). The				
					Council does not want to prejudice the outcome of the				
					Manston Airport DCO application and has chosen not to				
					allocate the airport site for any specific purpose in the new				
		Local Plan. Bringing housing forward on the Manston Airport site is no longer part of TDC's housing policy. However, RSP are							
			mindful of the airport owner's redevelopment aspirations for their site and their position that TDC's housing evidence base and policy response are not robust particularly in respect to objectively assessed need (OAN) and land supply matters and						
					the role that the Manston Airport site can make in meeting				
					development and especially housing needs. To provide further				
					evidence in support of RSP's recommendation that there				
					should be a policy which safeguards Manston Airport for				
					aviation uses in the interests of proper planning in accordance				
					with NPPF advice, RSP have prepared a report which				
					assesses the Council's deliverable supply of housing land				
					against the housing targets necessary to meet the OAN for				
					housing. This RPS report entitled Thanet District Local Plan:				
					Updated Review of Housing Land Supply and Housing Need				
					(October 2018) is provided as Appendix 1. It concludes that				
					based on TDC's up-to-date evidence base, that there is				
					currently sufficient deliverable housing land capacity in Thanet				
					District plus sufficient flexibility				
					without the Manston Airport site, to deliver the Council's				
					housing need for the Plan period 2011-2031. Consequently, the				
					airport site is not required to deliver the Council's				
					housing strategy.				
					It is noted in the TDC Duty to Cooperate Statement (July 2018)				
					that both Dover District Council and Canterbury City Council				
					have raised concerns about the level of employment land				
I					surplus identified in the draft Thanet Local Plan (paragraph				
I					9.11). This is despite TDC removing some 30 hectares of older				
ı					employment land from the supply to provide new housing sites.				

	ľ	•	_	,			T	1	
						The TDC Employment Land Review (2010) is old and one could			
						argue that it should be updated to provide a current position on			
						the employment land supply in the District. However, and on			
						the assumption that Dover District and Canterbury City Council's			
						concerns are correct, it would suggest that TDC could remove			
						more employment land from the supply to provide more			
						housing sites, thereby demonstrating that there is absolutely			
						no need for the Manston Airport site for housing. This also			
						raises the question as to whether the Council's Housing and			
						Employment Strategies are aligned.			
Scott	Jane	Finn's	452	Obse	rvatio	Introduction	1299	109 Scott Jane Site	Email
				n		■ This representation is in response to the Thanet District Draft		Plan.pdf (339 KB)	
						Local Plan Reg 19 Consultation, October 2018. Please accept		, , ,	
						this as a response to Draft Policy SP11 and as a new site option,			
						part of a larger site previously submitted in this Local Plan			
						process.			
						■ This parcel of land forms part of site SHLAA Reference 356 and			
						comprises 11 acres (4.4 ha). The representation is made on the			
						joint instruction of the developer & landowner.			
						■ Following discussions with the landowner, the developer is			
						interested in building out this site and has a local Housing			
						Provider, with the funds to allocate, interested in providing the			
						affordable housing element of the scheme.			
						■ This parcel of land is now submitted as a separate site option			
						that we request is considered as a separate deliverable and			
						sustainable residential development which can be quickly built			
						out to help to address housing need.			
						Location			
						■ The site consists a contained parcel of land just outside			
						Birchington and connected to Birchington by road, bus, cycle			
						and pedestrian paths.			
						■ It adjoins existing residential development in Brooksend and			
						Thanet Earth, which has recently expanded.			
						Services			
						■ The main residential built confines of Birchington lie 600m in a			
						north easterly direction. Birchington is a well-established and			
						well serviced settlement with a good range of facilities			
						including shops, restaurants and services, as well as a library, a			
						primary school and just on its eastern side, a large secondary			
						school.			
						Brooksend has its own shop which is due to expand & include			
						an ATM Cash Machine.			
						The site benefits from good connectivity to community			

	amenities and public transport –
	o Mainline Rail Station, including HS1 serving London -
	accessible within 10 minutes by bicycle
	o Bus stops with services run at 15 minute intervals & serving 5
	routes – adjacent the site
	o Pedestrian & Cycle paths - adjacent the site
	■ Therefore, this location is considered to be sustainable, with
	good pedestrian and cycle access into Birchington centre and
	the local primary and secondary schools.
	Deliverability
	■ Following discussions with the landowner, a developer is
	interested in building out the site and has a local Housing
	Provider interested in providing the affordable housing element
	of the scheme. The land benefits from being within a single
	ownership.
	■ The National Planning Policy Framework July 2018 (the
	Framework) recognises the important contribution that small
	and medium sized sites can make to meeting the housing
	requirement within an area and that such sites are often built-
	out relatively quickly (paragraph 68).
	■ In Thanet's case, smaller housebuilders remain happy to build
	out sites of 100 houses or less and this is supported by the
	ongoing build out of several smaller sites across the Thanet
	District.
	District.
	■ In locational terms, the Thanet area is less attractive to the
	major housebuilders, at the present time. Several large sites of
	over 1,000 dwellings within Thanet are proposed to be
	allocated for residential development.
	■ Deliverability of sites is given high priority, with the
	Framework advocating local planning authorities 'make a
	realistic assessment of likely rates of delivery' when allocating
	large sites (Framework, paragraph 72(d)).
	Targe sites (Framework, paragraph / 2(a)).
	Utilities
	Mains water, gas, electric and foul drainage are adjacent in Mains water, gas, electric and foul drainage are adjacent in
	the Highway/the land ownership.
	Agricultural Land
	■ The Framework seeks to address the loss of 'best and most
	versatile' agricultural land. The land in question is of poor
	quality, with little top soil over the chalk, resulting in well below
	average crop yields and in some years crop failure.
	Highways & Pedestrian safety improvements
	■ There is a recognized issue with pedestrians using Seamark
	- There is a recognized issue with pedestrians using seaman

			Road, running to the south of the site, to walk to work at		
			Thanet Earth.		
			 Development of this site would enable highway 		
			improvements to Seamark Road and the provision of a		
			pedestrian and cycle path to improve pedestrian access to		
			Thanet Earth & the bus network.		
			Summary		
			With an interested developer and housing provider available,		
			this single ownership site is available and can be delivered		
			quickly within the first years of the Plan period to help bolster		
			housing provision within Thanet, in a location which has		
			excellent pedestrian and cycle links to local shops, schools and		
			services within Birchington.		
Scott	511	Object	1 Executive summary	1440	Email
Scott			The Draft Thanet Local Plan - 2031 - Pre-Submission Publication,		
			Regulation 19 is unsound for a number of reasons.		
			Firstly, the objectively assessed housing need (OAHN) has been		
			calculated including unusual peaks in internal migration and is		
			therefore inflated. The consultants GLH have also inflated it		
			further using questionable assumptions. The figures also do not		
			take into account the reduction of immigration from the EU		
			which will reduced the OAHN.		
			Using calculations based on ONS figures, the OAHN should be		
			reduced from 17.1 k to at least 13k because of the inaccuracies		
			with the population projection figures, and then should be		
			reduced further to 12.25k when taking Brexit into account		
			(cautious estimate) or to 10.8k (stronger effect of Brexit).		
			The OAHN should be recalculated using the most recent		
			population projection figures and by taking an average from a		
			larger range of years e.g. average of the population increase for		
			10 consecutive years rather than 5 consecutive years. It should		
			also take into account the predicted effect of Brexit on the		
			international migration to Thanet which mainly consists of EU		
			citizens.		
			Secondly, the vast majority of houses in the Local Plan are		
			allocated on grade 1 agricultural land, which is contrary other		
			Government policies regarding food security and soil health.		
			The OAHN should be reduced and therefore the area of		
			farmland that is allocated should then be reduced. The National		
			Planning Policy Framework states that the Best and Most		
			Versatile Land should be used as a last resort and therefore		
			reductions in the OAHN should be removed from this		
			agricultural land first.		
			The plan is not sound with regards to environmental		
			sustainability and the sustainability policies of NPPF due to the		
			massive areas of agricultural land that will be destroyed.		
			Thirdly, the process by which the allocations have been chosen		
			has been weighted by a need to use section 106 monies to pay		
			for a new road on the Isle of Thanet, as funding could not be		

accessed from elsewhere. The choice of the allocations in this way is very questionable. Also, as the majority of the s106 money will be use to fund a major infrastructure project, it will leave little for local community. TDC has stated that all monies will be used as s106 and not as a Community Infrastructure Levy (CIL). This is particularly unfair as a Neighbourhood Plan is being written in Westgate-on-Sea which can increase the CIL contributions. The plan should be rethought with regards to housing allocations being based on local need and sustainability, rather than based on the need to collect monies for the new road Fourthly, the whole process was not consulted on properly. The foundations of the local plan is based on the views of approximately a hundred people in 2013. They were consulted on the possibility of around 7,000 houses being built in Thanet. There should be a full new consultation as the answers people gave in the first consultation in 2013 are now not valid due to the massive increase in OAHN. Furthermore, the computer system was problematic over the last consultation period, leading to representations being lost. This included the representation sent to TDC by the Westgateon-Sea Town Council, who has a receipt that it was received. It became clear that TDC had not read it when the green spaces put forward by the Town Council were not added to the subsequent draft Local Plan. The TDC Planning Manager apologised that they had lost the representation. How many more had they lost? The Local Plan should be withdrawn, comprehensively reconsidered and redrafted to reflect the lost representations made and take on board the views of the community. Lastly, the whole process of TDC local planning has been top down, despite the Government promoting neighbourhood engagement in planning e.g. through a Neighbourhood Plan. This process did not have an inch of Localism in it and in my view, the Localism Act is dead. Furthermore, not only is the OAHN over inflated causing unnecessary damage to the local communities and environment, but the plan is undeliverable at present without a fully integrated infrastructure, transport plan and fully costed implementation programme. 1.1 The Objectively Assessed Housing Need The OAHN has been created from population projections based on population increases between the years 2009 - 2014. It was suggested by the 2014 based ONS figures that Thanet's population will increase by 1200 every year, however the population only increased by approximately 509 in 2016-2017 (Figure 1-1). The population projections are over-estimated due to the fact that the projections are made using just a 5 year span between 2014 – 2009 and one of these years (2013-2014) had an

unusually high increase (1734 people) in population compared to other years.

If the average population increase was taken over the whole of graph from 2001 - 2017 the figure would be 894 people each year, >300 less than the projections.

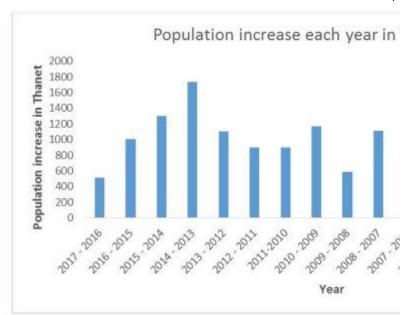

Figure 1-1 Population increase per year created from ONS figures UK mid year estimates

2017https://www.ons.gov.uk/peoplepopulationandcommunity /populationandmigration/populationestimates/datasets/popul ationestimatesforukenglandandwalesscotlandandnorthernirela nd. See table MYE 5 line 307.

Using 894 as the increase in population each year, this would give an increase in population of 17,880 over the 20 year period, instead of the 24,000 that the ONS projects. These figures have approximately 3,000 added to them due to the aging population giving the calculated approximate figure of 20,800 people over 20 years (17,880 + 3,000). If 2 people live in each house this would give an OAHN of 10,400. I know that TDC are adding on a couple of thousand houses as housing rate has been slowed in recent years so this would give us a final OAHN of 12,400. Even if 1.6 people live in each house this would only give an OAHN of 13k.

Interestingly this is similar to the number of houses that the Local Plan began with back in 2015. Because the figures used the ONS figure 2014 based, the population projections were skewed and Thanet has been allocated an overinflated and unfair number of houses.

As well as the inflated figures caused by this method, GLH consultants also added to the OAHN using questionable assumptions regarding extra movement from London. TDC was assured by London Boroughs that they would address their own OAHN and it is unfair that Thanet should have to increase the OAHN to cater for the lack of planning in London, forcing people to move out of the city. It is clear that people have

always migrated to Thanet, however these extra figures added	
to the OAHN by the consultants is an unsound way of	
calculating the OAHN.	
Over the period of 2002 – 2014 the average international	
migration each year was 300. In Thanet this international	
migration is mainly made up of European citizens. If Brexit was	
to reduce this number by just a third to 200 people each year	
this would mean that 1,200 less European Citizens will come to	
Thanet to 2031 (100 people x 12 years (2019 – 2031)). This is	
important as the OAHN could be reduced by 600 houses if 2	
people live in each house. If the ratio is 1.6, the OAHN would	
reduce by 759 houses.	
If Brexit was to reduce the figure even more, to just 100 people	
coming to Thanet every year, then 2,200 less people would be	
included in the population projections, which would be a	
decrease of 1392 houses from the OAHN.	
This is important because large areas of agricultural land will be	
destroyed in the Local plan and any reduction in the number of	
houses should be removed from the agricultural land first. The	
OAHN should be recalculated and the reduction in allocation	
should be taken from the agricultural land first.	
Using the calculated figures above, the OAHN should be	
reduced from 17.1 k to 13k because of the inaccuracies with	
the population projection figures and then should be reduced	
further to 12.25k when taking Brexit into account (cautious	
estimate) or to 10.8k (stronger effect of Brexit).	
The OAHN should be recalculated using the most recent	
population projection figures and by taking an average from a	
larger range of years e.g. average of the population increase for	
10 consecutive years rather than 5 consecutive years.	
It has been suggested by the Planning Manager that if housing	
numbers were reduced they would not be taken off of the	
"Strategic Housing sites" on the agricultural land. This would	
break the only legal protection for grade 1 agricultural land as	
stated in the NNPF. The housing on the agricultural land should	
be removed first and foremost as the NPPF states that the best	
and most versatile land should be only be used as a last resort.	
1.2 The loss of significant tracts of Grade 1 agricultural land	
In the Thanet Local Plan all of the strategic sites are allocated	
for agricultural land. Building on grade one and grade two	
agricultural land, or any agricultural land, is unacceptable. This	
is more so now than ever before. The Food and Agricultural	
Organisation for the United Nations (FAO) explains:	
"to provide for a (predicted worldwide) population of 9.7 billion	
in 2050, food production will need to increase from the current	
8.4 billion tonnes to almost 13.5 billion tonnes a year" (FAO,	
2017)	
We will need much more food in the future and therefore	
building on our top quality farmland is a very short sighted	
method of planning for housing.	
The FAO goes on to explain that:	

"Eighty percent of the additional (food) required to meet demand in 2050 will need to come from land already under cultivation." In other words, agricultural land will need to become even more productive than it already is. This shows how ludicrous it is to build on this land under cultivation in Thanet. Many residents of Thanet are against the building of houses on the agricultural. It needs to be valued and viewed as a precious commodity. As building on the soil will cause irreversible destruction of the farmland, when it is gone, it will be gone forever. Trevor Mansfield of the UK Soil Association has written: "We believe that high quality agricultural land should be preserved for growing and protected from development both now and in the future. Good quality agricultural land is invaluable - It is the fundamental resource on which human life depends and protecting and improving the health of our soil is more important today than it ever has been. In the UK it's estimated that we lose 2 million tonnes of soil a year through erosion (see Defra's 2009 Safeguarding Our Soils); yet it can take more than 500 years to generate an inch of soil. Soil stores 10 times more carbon than the forests. Climate change will bring even greater challenges in the future, with increased pressure due to waterlogging and drying, affecting the productive capacity of soils". He points out that soil is the resource on which life depends and so protecting it is vitally important. He goes on to explain that it can take almost half a century to produce an inch of soil. How sad it would be to see our soils destroyed as if they were Global Climate Change is a real issue caused by man-made increases of greenhouse gases such as carbon dioxide in our atmosphere, and this will affect everyone in the world. Soils store large amounts of carbon and help with balancing our carbon cycle. They also assist with flood mitigation preventing flooding (POSTnote 484 in POST, 2015). The Parliamentary Office of Science and Technology conducted research into the importance of soils in the UK and concluded: "Around 95% of food production relies on soil. The global nature of the food system makes soil health (or quality) an international concern. Soils filter and store water, support agriculture and other plant and animal communities, and harbour a quarter of the world's biodiversity". Soil quality is of international concern. Not only do soils have a multifunctional purpose, but they also harbour a quarter of the world's biodiversity. The land at ST1 and ST2 in Westgate-on-Sea is grade 1 agricultural land and has produced award winning crops (Figure 1-2). People might question the sanity of those who thought that

building on this land was a good idea whilst conducting the SHMA a few years ago, including Quex Estates themselves. The Linnington family has lovingly fertilized and nourished the soil. They have prevented the soil from eroding and decreasing in fertility, which has been the fate of many other soils across the world; over half the world's agricultural land is subject to soil erosion (POST, 2015). Destroying the soil now would undo all their hard work to sustain this precious resource.

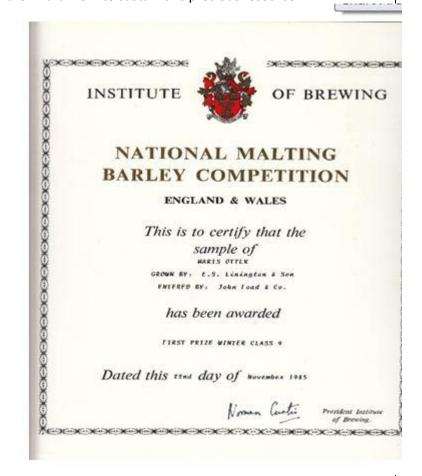

Figure 1-2 Certificate for Barley crops

The National Planning Policy Framework states that the best and most versatile land (Grade 1-3 soils) "is the land which is most flexible, productive and efficient in response to inputs and which can best deliver food and non-food crops for future generations".

Protecting soil presents an opportunity to address simultaneously several global challenges such as food security, climate change, water security, waste management and biodiversity loss (POST, 2015).

We must protect and value this finite resource and build only the very smallest number of houses on the agricultural land. We need it for growing food in a world of ever increasing population and demand on food supplies.

The in combination effect of such a large housing allocation in Thanet will impact the birds and wildlife of the area significantly.

	1					
				The loss of significant open spaces and associated birds and		
				wildlife in the local plan together with the loss of agricultural		
				land means that the plan is not sound with regards to the		
				sustainability section of the NPPF.		
				The Local Plan does not meet the criteria in the sustainability		
				section of the NPPF.		
				The OAHN should be recalculated and some of the housing		
				allocation should be taken off of the agricultural land.		
Scullion	Shelley	275	Object	I am against the local plan as I believe it is not fit for purpose.	817	Email
				the The amount of housing is excessive and to build on grade A		
				land shows very poor judgement. The town centers are full of		
				empty shop's and derelict buildings, surely they should be used		
				first.		
				Thanet has always had high unemployment and poor		
				infrastructure. I see in the local plan there are no firm		
				commitments to build better roads and bring jobs to the area.		
				Another concern is the lack of rainfall in the area. We have less		
				rainfall than Rome, even the water companies admit that they		
				will struggle to supply the area with clean water with the		
				amount of housing proposed. There have also been problems		
				coping with sewerage in the past during storms and raw		
				sewage has been discharged into the sea to prevent flooding,		
				ruining our beautiful beaches.		
				The grade A fertile land which can grow two crop's a year may		
				be needed in the future when we leave the EU. We may need		
				to be more self sufficient once we leave and if it is concreted		
				over it will be gone forever. I hope you will take time to		
				consider all the local people's arguments. I am a 61 year old		
				lady who has lived in the local area all my life and have seen		
				many changes over the years, not all for the better and feel this		
				local plan would be disastrous for the area.		
				Yes we need more houses but please please use the brownfield		
C III		245	01	sites first.	0.40	
Scullion	George	315	Observatio	I believe the local plan to be flawed.	949	Email
			n	Firstly the number of houses seem to be rather excessive.		
				Assuming the forecast is correct and we build 21000 new		
				houses and each has an average of three occupants, the		
				population of Thanet will increase by some 30 to 40%.		
				The demands that would be put on all services would be		
				tremendous. Schools, medical facilities, welfare budgets,		
				transport, water resources and infrastructure would all be put		
				under severe strain. There has been a lot of talk about tackling		
				these issues but nothing substantial has been put forward.		
				Nobody has said they would definitely fund any of the		
				aforementioned. I feel that development would take place and		
				we would be left to sort out any issues once those concerned		
				have made their profits.		
				We are all aware of the employment situation in the area so		
				where would the 5000 jobs being spoken about come from. It's		
				no use including construction jobs as they will not be there		
				once the contracts are completed.		
	•	•		· · · · · · · · · · · · · · · · · · ·		

	Т	T	T T	ı		T	T		1	
						To build on such high quality agricultural land would also be a				
						mistake. With the impending Brexit due to be completed next				
						year who can say what our future needs in being able to sustain				
						ourselves independent of outside influence. Surely it would be				
						best to err on the side of caution and retain valuable quality				
						farmland, after all there is more than enough brownfield sites				
						which could be put to good use within the local towns. I feel				
						that the costs of developing these are not in the interest of				
						profit seeking developers.				
Shonk	Trevor	Ramsgate	93		Observatio	(Statement of need,) needed houses, unaffordable (Doctors)		214	F	Pape

Stevens	David		175		Object	Policy SP11 – Housing Provision I am writing to object to the revised OAN figure of 17,140 for the period 2011 to 2031. In January 2016 GL Hearn produced the Strategic Housing Market Assessment for TDC. In this document GL Hearn based their calculations on the 2012-based sub national population projections data from ONS and DCLG. Using the data from 2031 of a projected population of 158,500, GL Hearn produced an OAN figure of 15,700. In September 2016 GL Hearn produced an update on their SHMA which was based on the 2014-based sub national population projections. GL Hearn stated that:	The whole housing allocation needs to be changed and must be done in consultation with neighboring authorities.	558	uknppaccuracyrep ort2015tcm774127 221.pdf (1014 KB) Figure 1_ Household estimates and household projections, England, 2001 to 2018.jpg (51 KB)	Web

"These projections show stronger growth than the previous 2012 projections ..." As a result the OAN figure was raised to 17,140, an increase of 1,440 which equates to a 9.1% increase. This is somewhat surprising as the 2014-based sub national population projections give a Thanet projected population in 2031 of 161,500, which is only a 1.9% increase. I would also question the original figure arrived at by GL Hearn (based on 2012 data) as it involves an uplift of 4% for migration when the evidence produced in Table 11 (page 49) does not support such an assertion. Indeed, the trend is for a decrease in migration rather than an increase. As GL Hearn state: "Expected levels of migration show relatively little change over time. When compared with the past trends, the migration figures look to be reasonable. For the whole of the projection period (2014-31) the average level of migration is expected to be around 1,116 people (net) per annum. This figure is similar to the level seen in past trends (1,074 per annum on average from 2001 to 2014 and 1,186 per annum for the past five years)." Since the ONS and DCLG (now MHCLG) projections have already taken migration trends into account the uplift is unnecessary and removing this would produce a lower more realistic OAN of 15,100 based on 2012 data. Using 2014 data should give an increase of 1.9% resulting in an OAN of 15,387. Population projection is not an exact science and is based primarily on past trends. This is illustrated in Figure 14 (page 41) where, depending on which 5 year period you choose, you can project a population in Thanet in 2031 anywhere between 152,000 and 159,000. The Office for National Statistics produced the "National Population Projections Accuracy Report, July 2015" (see attachments) and in it they state: "It is acknowledged that projections become increasingly uncertain the further they are carried forward and it is noted that long-term projections should be used with caution". To add more uncertainty to the mix, the 2016-based sub national population projections have just been released and these put the projected population for Thanet in 2031 as 159,800 which is 1,700 less than the 2014 figure. The ONS have also just released household estimates for the period 2001 to 2018 which show a much lower growth in house numbers than even the 2016 projections. (see figure 1 in attachments) To try and achieve a more robust projection I used the census data from ONS for the last 50 years to help identify the trend in Thanet population change. There have been peaks and troughs ranging from just over 1,000 increase in one ten year period to just over 11,000 in another 10 year period. However there has been an average increase of 12,200 people for each 20-year Using this information it would project a population for Thanet in 2031 of 146,386. Using the government figure of 2.09

<u> </u>	, , , , , , , , , , , , , , , , , , ,				,
			persons per dwelling this would reduce the OAN by about 6,000		
			dwellings.		
			What is clear to me is that the whole process of producing the		
			OAN for Thanet must be questioned.		
			Finally, I would question the whole validity of the revised		
			Thanet Local Plan on the grounds that TDC appear to have		
			failed in their legal Duty to Cooperate.		
			In January 2015, Thanet District Council (TDC) opened their		
			public consultation on the Thanet Local Plan Preferred Options.		
			Dover District Council, which is an adjoining authority, took the		
			opportunity to express their opinion on the plan.		
			It is very clear from the response by DDC that TDC did not carry		
			out its Duty to Cooperate:		
			"The duty to cooperate was created in the Localism Act 2011,		
			and amends the Planning and Compulsory Purchase Act 2004. It		
			places a legal duty on local planning authorities, county councils		
			in England and public bodies to engage constructively, actively		
			and on an ongoing basis to maximise the effectiveness of Local		
			and Marine Plan preparation in the context of strategic cross		
			boundary matters." DCLG Guidance March 2014		
			Appendix 1 of the 2015 report contains the following regarding		
			the failure to cooperate:		
			"For instance, the Council has not been involved in or consulted		
			on the evidence base that has formulated the proposed		
			housing figure (total 12,000, p. 53), the employment growth		
			and job predictions (a minimum of 5,000 additional jobs, p. 28)		
			or the proposed provision of retail floor-space (34,300 sq. m of		
			comparison goods and 3,941 sq m of convenience goods, p. 35).		
			Moreover, there has been no up-to-date evidence base		
			published with the Plan (such as a Sustainability Appraisal or		
			Habitat Regulations Assessment) which could have informed		
			our response."		
			It goes on to say:		
			"It is extremely disappointing that as a neighbouring Local		
			Planning Authority, Thanet District Council has not entered into		
			a constructive, active dialogue with officers from Dover District		
			Council prior to the publication of the Preferred Options Thanet		
			Local Plan. It will be essential that Thanet DC engages in a		
			constructive active and on-going dialogue with officers and		
			Members of Dover District Council from now on, especially on		
			cross- boundary issues and strategic matters."		
			Following the elections in May, the new UKIP run council		
			engaged G. L. Hearn to produce a "Thanet Strategic Housing		
			Market Assessment" which was published in January 2016. The		
			document makes a number of recommendations but two are		
			particularly relevant.		
			1) TDC should include DDC in their HMA:		
			For practical purposes in planning for housing provision, GL		
			Hearn would recommend use of a 'best fit' to local authority		
			boundaries to housing market areas. The 'best fit' HMA would		
			comprise the three authorities of Canterbury, Dover and		
		1	comprise the three dathornies of culticipally, bover and		

•	T			<u> </u>		
				Thanet.		
				2) TDC has a Duty to Cooperate:		
				In finalising the Local Plan for publication, Thanet District		
				Council should engage with the other Local Planning Authorities		
				(LPAs) to consider how housing need is being met across the		
				Housing Market Area. It would be advisable that a Background		
				Paper is prepared and agreed with the other LPAs to		
				demonstrate how housing need is being met across the HMA in		
				line with Paragraph 47 in the National Planning Policy		
				Framework.		
				Despite the legal Duty to Cooperate; the warning to TDC by		
				DDC in their 2015 response and the clear advice by G L Hearn to		
				Cooperate it seems that TDC appear to have once again failed		
				to carry out their Legal Duty to Cooperate with DDC.		
				TDC undertook a Consultation on their revised Local Plan which		
				ended on 17th March 2017. DDC has produced a report, which		
				was unanimously agreed by DDC Cabinet, and has been		
				submitted to TDC.		
				The report is very critical of the Thanet Local Plan on a number		
				of issues but fundamental to those is, yet again, the lack of		
				cooperation.		
				It is clear from reading the report that DDC feel that TDC have		
				not carried out their Legal Duty to cooperate:		
				"It is extremely disappointing that as a neighbouring Local		
				Planning Authority, Thanet District Council has not entered into		
				a constructive, active dialogue with DDC under the Duty to Co-		
				operate prior to the publication of the draft Local Plan in terms		
				of the future of Manston airport given that the future of the		
				airport is a strategic cross boundary issue." Page 527 of the		
				report.		
				This failure to carry out their Legal Duty must cast serious		
				doubt on the validity of the TDC revised Local Plan:		
				"The Local Plan examination will test whether a local planning		
				authority has complied with the duty to cooperate. The		
				Inspector will recommend that the Local Plan is not adopted if		
				the duty has not been complied with and the examination will		
				not proceed any further." DCLG Guidance March 2014.		
				It is not clear whether this situation has been resolved since		
				the new administration took over and it should be noted that		
				the present administration inherited much of this Local Plan		
				and have not had the time to correct the numerous		
				errors. However, I object to this aspect of the plan.		
				errors. However, robject to this aspect of the plan.		
Stevens	Angela	163	Object	The government algorithm for working out the number of The National Policy for Housing states that local	603	Web
	/		- ,	houses required does not fit all areas of the UK in the same authorities should state their own local needs. I don't		
				way. Thanet DC did not write to the MHCLG about Thanet's consider that TDC has done this. They have blindly		i i
				unique situation and the small Isle of Thanet certainly doesn't followed the government's algorithm without even		i i
				need 17,000 new homes built on it. As stated b6 TDC at the attempting to persuade the government to accept		
				beginning of this new Local Plan, Thanet consists of 3 main Thanet's actual housing needs!		
				coastal towns and attractive rural villages. It also has an airport		
l	•	•		Codstal towns alla attractive raini villagesi it also has all port	1	1

				10701		1 1	
				around 350 houses on average per annum over the past 10			
				years, so the numbers quoted for Thanet are ridiculous! There			
				are also numerous plannng projects and empty buildings			
				already earmarked for housing, so only around 9000 more			
				houses are needed. The 2,500 on the airport site were quoted			
				as being a "windfall" so are not needed. Nor should building on			
				prime grade 1 and grade 2 agricultural land be allowed either!			
Streatfield	IM	181	Observatio	Objection Ideas for the Local Plan		526	Pape
			n	Your list of objections are spot on and you have covered ALL			r
				major details. I fully agree with them, and the restoring of run			
				down properties seems to be an excellent alternative.			
				Whilst I do appreciate that housing is greatly required in			
				Thanet, there is not enough infrastructure and amenities to			
				warrant this. I also feel that			
				There will not be enough Surgeries, Doctors and Nursing staff,			
				also Dentists and Libraries to provide all the extra people who			
				will eventually live here. The QEQM hospital will surely not			
				have enough medical personnel, beds or rooms so will not be			
				able to supply treatment that is badly required. In my Surgery			
				alone, we have to wait up to 3 weeks before we get an			
				appointment to see a Doctor.			
				With the climate change we are experiencing over these past			
				years, especially this summer, we will not have enough water			
				for everyone.			
				Extra schools will be badly required, including teachers and			
				extra staff.			
				Losing more countryside to housing will be devastating for ALL			
				wildlife, hedgehogs, butterflies, bees to name a few, and all			
				different birds.			
Sutton	Stephanie	92	Object	It seems almost criminal to destroy prime agricultural land to		212	Pape
Jaccon	Stephanie		Cojecc	build houses on especially with global warming and "Brexit"			r
				looming. In small places like Garlinge, Westgate and			·
				Birchington it will increase the population tenfold and if past			
				building projects are anything to go by i.e. St Augustines and			
				Westwood Cross there will not be infrastructure put in place,			
				namely roads, drainage, DR's, schools, increased hospital staff			
				etc. There are many thousands of properties all over the country			
				· · · · · · · · · · · · · · · · · · ·			
				which should be used before new buildings are erected, but if you have to build why not find a large area of brownfield and			
				, ,			
				build a new town like Milton Keynes in Bucks, which is very			
				successful and will also provide employment of which there is			
				very little in Thanet.			
				The most important point is our agricultural land as we are			
				losing more and more farms to building, where food could soon			
				be our priority so please use your powers to pressurise			
				developers to build elsewhere. I am sure they could make more			
				money building a new town.

	City				for the objectively assessed housing needs in full within Thanet	'		
	Cour	ncil			District. Given the introduction of the	'		
					Government's standardised methodology for calculating	'		
					housing needs however, we understand that this will be likely	'		
					to necessitate an early review of the Local Plan to ensure that	'		
					housing needs continue to be met over the period to 2031.	'		
					We would also draw attention to the Canterbury District SHMA	'		
					(2018) https://drive.google.com/drive	'		
					/folders/15ZIK7vu068sr4h acc8cbNS4hCsUeJCp	'		
					which concludes that the Canterbury District Housing Market	'		
					Area (HMA) is distinct from the Thanet HMA. Although we	'		
					acknowledge that there may be some overlap at the edges of	'		
					each HMA, it is not considered that all of Thanet District is	'		
					within the Canterbury District HMA. We would welcome the	'		
					opportunity to agree this position within a Statement of	'		
					Common Ground.	'		
					A stepped approach to the housing trajectory, that would allow	'		
					for the delivery of the strategic sites, is supported; in particular	'		
					given the significant role that the proposed strategic sites	'		
					will play in meeting housing needs. Very large development	'		
					sites, with significant infrastructure requirements, are likely to	'		
					incur longer lead-in times than small and medium	'		
					sized developments and therefore a stepped approach is	'		
					necessary to ensure that housing supply can be maintained in	'		
					the early years of the Local Plan.	'		
Trotter	AR & PJ	2	388	Object	HOUSING PROVISION	 	1143	Pape
Housi	AIVOLI		36	Object	The Local Plan calls for 17140 houses to be built in Thanet by	'	1143	r
	1				2031. The Governments formula for calculating this figure does	'		'
	1				not take into account the" remote" location of Thanet and it's	'		
	1				sub standard transport links with the rest of Kent. The 2011	'		
	1				Census stated that the population of Thanet was 138000. If the	1		
	1				· ·	1		
	1				new houses are built this will increase the population of Thanet	1		
					by at least 25% to approximately 175000. Although the plan	'		
					calls for 30% affordable housing there is no provision for the	'		
					building of social housing for people on the Council's waiting	'		
					list. The building of the houses seems to be dependent on	'		
					supply and demand and there is no guarantee that the	'		
					developers will build the houses. We have the scenario at the	'		
					moment that planning permission was granted 10 years ago to	'		
					build 1000 houses between Westwood Cross and Nash Road	'		
					Margate. At present the developer has only built about 80	'		
					houses under Phase 1. Thanet has become the dumping	'		
					ground for problem families from other areas. It is quite likely	'		
					that this will continue and new houses will not be purchased by	'		
					local families to reduce the Council's ever growing waiting list.		<u> </u>

Twyman	Paul	324		Object	In Chapter 3, para 3.13 should revert to the original version. Table 2 should return to the original or, better still, should be replaced with more robust and appropriate housing demand and supply statistics. Chapter 3, 3.17 and 3.19 should revert to the original The coverage of housing matters in the supporting documentation is of remarkably poor quality. The Strategic Housing Land Availability Assessment is naïve, it displays a misunderstanding of statistical techniques, and despite caveats adopts an underlying "set in concrete" approach to housing demand and supply. While one recognises that the authority has to follow national policies - not to say "diktats" - rather than respond to local circumstances, one is reminded of the late Professor Self, who commented on one complicated cost/benefit analysis that it was "nonsense on stilts". One particularly odd feature of the assessment is that, without explaining why, it restricts the detail to Thanet, Canterbury and Dover Districts - while for many other local government coordination purposes the East Kent region includes Ashford. This inevitably skews the results in what I would argue is a bias towards developer-led, excessive, housing provision.	In Chapter 3, para 3.13 should revert to the original version. Table 2 should return to the original or, better still, should be replaced with more robust and appropriate housing demand and supply statistics. 		_	<u> </u>				
					nature of these sites and the requirement for them to provide		
					significant infrastructure, including a new inner ring road for		
					Thanet, means that it is unlikely that much of the Strategic		
					housing provision will not be until the latter part of the		
					strategic plan period.		
					Mr Miles and Mr Friend jointly own a site of approximately 1.4		
					hectares that is capable of immediate development in a		
					comprehensive form. The site is considered to provide the		
					potential for a development of up to 14 large houses in		
					grounds, designed in a form that takes account of their rural		
					Conservation Area location, taking their cue from the character		
					of historic buildings and spaces in proximity of the site. This will		
					also help meet the need for larger units in the Local Plan, a		
					need that is less easily net on large strategic sites. The provision		
					of units at an early stage will help the District meet its 5 year		
					housing supply and to provide 4,500 units by 2021, a target of		
					Policy SP11.		
					The attached plan identifies the site in question, it would be the		
					subject of a Master Plan to ensure it fits into the character and		
	<u> </u>				form of its Conservation Area setting.		
Walker	John	The	231	Object	Comments on Chapter 3: Housing Strategy; SP11	705	Web
		Ramsgate			Housing Numbers		
		Society			3.1 The Draft Plan proposes that provision be made for 17,140		
					additional homes during the 20 year period from 2011 to 2031.		
					This represents an average new build figure of 857 per annum.		
					Is this level of new building needed, and is it a realistic target?		
					Questions can be raised about how the figure of 17,140 was		
					arrived at. The methodology used by central Government has changed in order to increase the numbers nationally, and how		
					they should be allocated between different areas of the		
					country. This change has increased Thanet's new housing		
					requirement by about 4500 for the 20 year time-line, or 225 per		
					annum on average. There is, however, little point in taking issue		
					with the figure produced by the updated methodology: it is		
					what it is, and given the Secretary of State's criticism of, and		
					action taken against, TDC for its late production of the Local		
					Plan, it is very unlikely that the figure could be changed.		
					3.2 Whatever the "true" figure should be, the evidence of the		
					last decade or so suggests that these planning targets are highly		
					unrealistic in terms of actual delivery: in the period immediately		
					before the current 20 year time-line (2006-2011), an average of		
					678 new units per year was achieved, nearly 200 per year less		
					than the Draft Plan's average annual target; in the period 2011-		
					2016 the figure fell sharply to an average of 311 per annum.		
					These figures, and the tables provided in the Draft Plan showing		
					· · · · · · · · · · · · · · · · · · ·		
					The second secon		
					· ·		
					•		
					, , , , , , , , , , , , , , , , , , , ,		
					the phasing of the allocations in five year tranches up to 2031, show that the annual new build for the remainder of the period (2016-2031) would need to be something between 1000 and 1100 units per year, far beyond anything which has been achieved for decades. 3.3 This does not therefore seem either credible or		

					environmentally sustainable, particularly if the large,				
					brownfield Manston site is not available for a concerted,				
		•			balanced house-building programme, and TDC has to rely on				
		·			allocating a multiplicity of smaller, mainly greenfield sites on				
		·			the periphery of existing towns and villages, where vigorous				
		·			objections to such plans are very likely. Indeed, the reallocation				
		·			of the houses originally allocated to the Manston site to other				
					places has already caused protests in Westgate and Garlinge			!	
		·			where their original allocation of 1000 new homes was				
					increased by another 1000.			!	
		·			3.4 The Draft Plan does acknowledge the problem: "The				
		·			existing built up areas of the district will continue to deliver				
					additional housing. However, a significant amount of greenfield			!	
		·			housing land is required to meet the target." The reality is that				
		·			about 15,000 homes are being proposed to be built on prime				
					agricultural land, to the detriment of the amenity and open			!	
		·			space which such areas represent and are enjoyed by the				
					people of Thanet as a whole. This is in clear contradiction to the			!	
		·			NPPF policy which has a statutory requirement to prioritise				
		·			brownfield sites for new development, which TDC has chosen				
		'			to ignore in favour of reopening of the airport.				
Wall	David	\top	451	Object	As a Birchington resident I strongly object to the proposed		1293		Email
		'			housing plan.				
		'			Firstly the plan falls way short of explaining where all the				
		·			funding for infrastructure is coming from or if it has been				
		'			secured.				
		·			Where are all the 5000 jobs coming from ? whilst there will be				
		·			some increase while the houses and roads get built, what then?				
		·			we are going to have close to that number of new people				
		·			moving here, even taking away those that will be allocated				
					social/affordable housing, there is still going to be nowhere			!	
		·			near enough jobs.				
		·			Traffic is going to become so congested that the whole of the				
					Thanet area will come to a standstill.			!	
					My main objection is that to take perfectly good open farm land			!	
		·			before looking to regenerate old and unused land property in				
ı		·			Thanet Particularly Margate and Ramsgate is quite frankly				
ı		·			unbelievable.				
			1	'	I strongly object				1

		association			In January 2016 GL Hearn produced the Strategic Housing			Figure 1_	
					Market Assessment for TDC. In this document GL Hearn based			Household	
					their calculations on the 2012-based sub national population			estimates and	
					projections data from ONS and DCLG. Using the data from 2031			household	
					of a projected population of 158,500, GL Hearn produced an			projections,	
					OAN figure of 15,700.			England, 2001 to	
					In September 2016 GL Hearn produced an update on their			2018.jpg (51 KB)	
					SHMA which was based on the 2014-based sub national				
					population projections. GL Hearn stated that:				
					"These projections show stronger growth than the previous				
					2012 projections"				
					As a result the OAN figure was raised to 17,140, an increase of				
					1,440 which equates to a 9.1% increase. This is somewhat				
					surprising as the 2014-based sub national population				
					projections give a Thanet projected population in 2031 of				
					161,500, which is only a 1.9% increase.				
					I would also question the original figure arrived at by GL Hearn				
					(based on 2012 data) as it involves an uplift of 4% for migration when the evidence produced in Table 11 (page 49) does not				
					support such an assertion. Indeed, the trend is for a decrease in				
					migration rather than an increase. As GL Hearn state:				
					"Expected levels of migration show relatively little change over				
					time. When compared with the past trends, the migration				
					figures look to be reasonable. For the whole of the projection				
					period (2014-31) the average level of migration is expected to				
					be around 1,116 people (net) per annum. This figure is similar				
					to the level seen in past trends (1,074 per annum on average				
					from 2001 to 2014 and 1,186 per annum for the past five				
					years)."				
					Since the ONS and DCLG projections have already taken				
					migration trends into account the uplift is unnecessary and				
					removing this would produce a lower more realistic OAN of				
					15,100 based on 2012 data. Using 2014 data should give an				
					increase of 1.9% resulting in an OAN of 15,387.				
					Population projection is not an exact science and is based				
					primarily on past trends. This is illustrated in Figure 14 (page				
					41) where, depending on which 5 year period you choose, you				
					can project a population in Thanet in 2031 anywhere between				
					152,000 and 159,000. The Office for National Statistics				
					produced the "National Population Projections Accuracy				
					Report, July 2015" (see attachment) and in it they state:				
					"It is acknowledged that projections become increasingly				
					uncertain the further they are carried forward and it is noted				

that long-term projections should be used with caution". To add more uncertainty to the mix, the 2016-based sub national population projections have just been released and these put the projected population for Thanet in 2031 as 159,800 which is 1,700 less than the 2014 figure. ONS have also just released household estimates for the period 2001 to 2018 and these show a much lower growth than even the 2016 projections. (see Figure 1 in attachments). To try and achieve a more robust projection I used the census data from ONS for the last 50 years to help identify the trend in Thanet population change. There have been peaks and troughs ranging from just over 1,000 increase in one ten year period to just over 11,000 in another 10 year period. However there has been an average increase of 12,200 people for each 20-year Using this information it would project a population for Thanet in 2031 of 146,386. Using the government figure of 2.09 persons per dwelling this would reduce the OAN by about 6,000 dwellings. What is clear to me is that the whole process of producing the OAN for Thanet must be guestioned. Finally, I would question the whole validity of the revised Thanet Local Plan on the grounds that TDC appear to have failed in their legal Duty to Cooperate. In January 2015, Thanet District Council (TDC) opened their public consultation on the Thanet Local Plan Preferred Options. Dover District Council, which is an adjoining authority, took the opportunity to express their opinion on the plan. It is very clear from the response by DDC that TDC did not carry out its Duty to Cooperate: "The duty to cooperate was created in the Localism Act 2011, and amends the Planning and Compulsory Purchase Act 2004. It places a legal duty on local planning authorities, county councils in England and public bodies to engage constructively, actively and on an ongoing basis to maximise the effectiveness of Local and Marine Plan preparation in the context of strategic cross boundary matters." DCLG Guidance March 2014 Appendix 1 of the 2015 report contains the following regarding the failure to cooperate: "For instance, the Council has not been involved in or consulted on the evidence base that has formulated the proposed housing figure (total 12,000, p. 53), the employment growth and job predictions (a minimum of 5,000 additional jobs, p. 28) or the proposed provision of retail floor-space (34,300 sq. m of comparison goods and 3,941 sq m of convenience goods, p. 35). Moreover, there has been no up-to-date evidence base published with the Plan (such as a Sustainability Appraisal or Habitat Regulations Assessment) which could have informed our response." It goes on to say: "It is extremely disappointing that as a neighbouring Local

	Beatrice					While we accept that a certain amount of houses need to be		1	
	'					built in Thanet, we strongly object to the total amount		1	
	'					proposed in the Local Plan, and our reasoning is as follows:		1	
	'					The Plan envisages 17140 houses.		1	
	'					If one multiplies the above figure with the average family unit		1	
	'					of 2.58 (as per ONS 2010 census), one arrives at an increase in		1	
	'					population of 44221.2, add this to the existing population of		1	
	'					141300 (in 2017) and one gets a population for the year 2031		1	
	'					of 185521.2.			
	'					Now the ONS projection for 2031 is 159792.5 which means that			
	'					there is an excess figure of 25.728,7 souls.		1	
	'					If we now divide this figure by the base family unit of 2.58 one			
	'					arrives at a figure of 9972.36 excess houses foisted on Thanet.			
	'					Take that last figure away from the 17140 proposed in the Plan,			
	'					based on ONS population projection, Thanet will only require		1	
	'					7168 new houses NOT 17140			
						7106 New Houses NOT 17140			

While the above is not the only objection to the Plan, it is the	
most telling that the projected figures are WRONG.	
Finally, having followed closely the progress of the Local plan	
for the past few years, we have grave concerns about	
employment and road infrastructure in the Isle, as KCC are	
incapable to provide adequate road at present. Section 106	
moneys should not exclusively be used for roads, it should	
benefit the wider population.	
We wish to submit these objections and are prepared answer	
any questions that the Inspector may have.

	St Johns College	311	Mark Hodgson - Savills	Object	This policy sets out a series of criteria which all allocated residential sites must comply with. A number of these are related to the provision of utilities such as providing a connection to the sewerage system and allowing future access to water supply infrastructure for maintenance and upsizing purposes. There are no equivalent references to other utilities such as gas or electricity. The water companies have statutory powers and obligations to provide their services and so these criteria serve no purpose in planning policy terms. Likewise the provision of digital infrastructure is not within the remit of developers and this can only be delivered by the communications providers. This policy also requires a mix of housing types to be provided including care and supported housing in accordance with Policy SP19. There is limited information available about the requirement for care and supported housing and so this would need to be dealt with at planning application stage provided it does not affect overall housing numbers. The policy also requires all sites to provide an assessment of a site's functionality in relation to the Thanet Coast and Sandwich Bay SPA. It is unclear why this is necessary if all sites have to contribute to the Strategic Access Management and Monitoring Plan in any event. It is unclear what is meant by providing a Statement of Social Impact when this could be addressed within a Planning Statement. Community facilities provision is set out in the strategic policies for the allocations and it is not considered necessary to provide a specific statement on these issues when they can be appropriately covered in any Planning Statement. There is also a requirement to provide community business space for which no justifying evidence is provided. The policy also states that: A Heritage Impact Assessment will be required at the masterplanning stage for the strategic sites to assess any cumulative impacts of the site allocations and highways infrastructure on heritage assets and archaeological	[See comment above - formatting unavailable here] Acting for a strategic site landowner we would welcome the opportunity to put our view in person to the Inspector.	1298		Emai

		Ī			I	1	1
				accompanied by a Heritage Impact Assessment. It is not clear			
				from the above why a Heritage Impact Assessment is specifically			
				required at the masterplanning stage which is presumably			
				meant to tie in with the development brief and masterplan.			
				Development briefs and masterplans are informed by various			
				assessments including heritage assessments and therefore it is			
				not considered necessary to			
				specifically highlight heritage as a particular assessment that is			
				required.			
				Policy SP12 - General Housing Policy			
				Proposals for residential development on sites allocated in this

		Federation			plan to ensure the provision of digital infrastructure and the			
					installation of Fibre to the Home. Government has made clear its			
					intentions in a number of documents such as set out in Fixing			
					the Foundations, the Housing Standards Review, planning			

					practice guidance and the Written Ministerial Statement of 2015 that they are looking to reduce red tape associated with planning. The Written Ministerial Statement is clear that local planning authorities should not set in their emerging Local plan any additional local technical standards or requirements relating the construction, internal layout or performance of new dwellings, as these issues will be dealt with more appropriately by Building Regulations. Part R of the Building Regulations clearly sets the appropriate standards for high speed electronic communication networks. It is not considered appropriate for Thanet to seek additional local technical standards over and above this requirement. The HBF generally consider that digital infrastructure is an important part of integrated development within an area. However, the inclusion of digital infrastructure such as highspeed broadband and fibre is not within the direct control of the development industry, and as such it is considered that this policy could create deliverability issues for development and developers. Service providers are the only ones who can confirm access to infrastructure. Whilst, paragraph 112 of the NPPF establishes that local planning authorities should see k support the expansion of electronic communications networks it does not seek to prevent development that does not have access to such networks. The house building industry is fully aware of the benefits of having their homes connected to super-fast broadband and what their customers will demand. The HBF consider that in seeking to provide broadband and fibre to homes the Council should work proactively with telecommunications providers to extend provision and not rely on the development industry to provide for such infrastructure. Recommendation		
Blackburn	Camilla	Kent Wildlife Trust	385	Object	The HBF recommend that the policy is deleted. Site allocations will need to show due regard has been given to: • Protection of section 41 habitats (no net loss) and s41 species • Due consideration has been given to opportunities for the creation of semi-natural habitat and restoring, enhancing, protecting and reconnecting ecological corridors (net gain) • Indirect impacts on protected sites/habitats and species, including recreational use, are managed and appropriately mitigated for Site allocations will need to show due regard has been given to: • Protection of section 41 habitats (no net loss) and s41 species • Due consideration has been given to opportunities for the creation of semi-natural habitat and restoring, enhancing, protecting and reconnecting ecological corridors (net gain) • Indirect impacts on protected sites/habitats and species, including recreational use, are managed and appropriately mitigated for	1134	Emai I

Davies	Julie	CPRE Kent	147	Observati on	Point (1) - provision for electric cars should be made more explicit to ensure that superfast charging points (of at least 50kW) be installed, rather than trickle chargers (which can take up to 12 hours to fully charge an electric vehicle).	Amend point 1 to refer to superfast charging points (of at least 50kW).	383	Web
Davies	Julie	CPRE Kent	147	Object	Comments on behalf of CPRE Kent Thanet District Committee. An additional policy is needed on housing density to ensure the effective use of brownfield and greenfield land (to reduce pressure for the release of green field land/and best and most versatile agricultural land. The SHLAA Review July 2018 sets out that the total number of dwellings for a site were based on a broad requirement of 35 dwellings per hectare. This is low density suburban. The revised NPPF 2018 states that where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies avoid homes built at low densities (paragraph 123). Given our concern on the loss of greenfield land, and in particular best and most versatile agricultural land, it would be helpful to include a policy that helps make effective use of land through encouraging higher housing densities. See also 2012 NPPF paragraph 47 which allows Councils to set their own approach to housing density to reflect local circumstances.		384	Web
Gale	Roger	Parliament of the United Kingdom	149	Object	This submission is made in the light of representations received as the Member of Parliament for North Thanet, local knowledge, discussions with Ministers and reality	While the Draft Local Plan has been overdue the current version has been prepared in haste and with insufficient reference to the need to, first, use all available and soon to become available brownfield sites before granting the use, for building, of high-quality agricultural land. Thanet has an over-provision of sites earmarked for industrial use and no account has been taken, in the agricultural hinterland of Birchington, Westgate and Garlinge, of the probable future availability of MoD sites that should be used to mitigate the use of farmland for housing. The original inclusion, by the previous administration, of Manston Airfield, now entirely properly the subject of an application for a Development Consent Order in the national interest as an airfield , in a Draft Plan has distracted attention from other suitable sites for housing. It is my considered view that this aspect of the work needs to be re-visited.	410	Web
Giddins	Rod		62	Observati on	Policy SP12 sets out some specific requirements and I suggest an additional one as follows: "Front gardens with off street parking should be constructed with permeable materials to reduce the		163	Emai I

					risk of flooding". There is much evidence to suggest that paving over front gardens has contributed to flooding in some areas and also significantly harmed local environments.			
Holton	Susan		139	Observati on	When will Manston Green houses be built? Planning permission has been granted but if the DCO goes through then surely this would fall within a potential Public Safety Zone for the airport. If they are not built then even more houses will need to be allocated somewhere else. Too many houses are going on greenfield land already. The same thing with the airport site, if it isn't used then other less suitable sites around Thanet will end up being used.		349	Web
Johnson	Elisabeth	Monkton Residents Association	51	Observati on	As previously noted the mix of dwellings, including care and supported housing and affordable housing does not seem to feature anywhere in any of the plans for the rural areas, even where these are for fairly large developments of many more houses than 10 as planned for in Minster and this policy should therefore be adhered to.		126	Web
Jones-Hall	Samara		295	Object	The draft Local Plan (endorsed by Thanet District Council but opposed by its officers) has pushed 2500+ houses to be built on Greenfield sites and in areas with little or no additional infrastructure.	The Local Plan must support the mixed-use development of the former Manston airport site and allocate a specific purpose for the Manston site with regards to housing requirements and mixed-use development. This is line with Objective 2 of the Department for Environment: Food and Rural Affairs single developmental plan updated 23 May 2018, the National Planning Policy Framework updated July 2018 and its Local Plan policies including but not limited to SP02, SP09, SP12, SP21, SP23, SP34, SP36, E10, E05 Commercial aviation is not viable at the Manston site. A 24/7/365 cargo hub will blight tourism, regeneration, economy, heritage, employment growth and health of Thanet residents. Further, the impact of and congestion on road vehicles and HGVs used to transport air-cargo, workers, passengers and fuel travelling to and from the proposed airport on Kent's road transport infrastructure and the associated carbon, nitrogen oxides and particulate matter emissions, noise and air pollution - on Thanet's and Kent's villages, towns and businesses is unacceptable nor has it been subject to a Health Impact Assessment; and - nor have travel times for all East Kent stroke victims to reach stroke unit in time as the nearest stroke unit is likely to be moved to William Harvey Hospital in Ashford been addressed. Latchford	Barry		45		Object	The amount of houses with no supporting infrastructure being build around the villages and greenfield sites is not necessary as 4,000 of them along with supportive infrastructure could be built together with other facilities supplying recreation and much needed employment at Manston, which is a brownfield site. Accept that the mixed development proposal for the brownfield site at Manston is the most sensible solution for 4,000 house with supportive infrastructure and reduce the number of houses with out supportive infrastructure around villages and greenfield sites accordingly.	108	Web
Margate Estates		Margate Estates	460	Zena Foale- Banks - Nexus Planning	Object	Policy SP12 provides guidance around housing development. The policy comprehensively addresses the requirements of larger scale residential development and residential development on allocated land. Upon review of the policy, we consider that the policy does not go far enough in promoting residential development on appropriate brownfield land and appropriate opportunity sites. It is considered that thesesites should be a preferential location over and above residential development on Green Belt sites.	1320	Web
Mayall	С	Southern Water	473		Observati	Southern Water is the statutory water and wastewater service provider throughout Thanet District. In line with paragraph 162 of the National Planning Policy Framework and the National Planning Practice Guidance, at various stages of the consultation process, Southern Water undertook assessments of the existing capacity of its infrastructure and its ability to meet the forecast demand for each of the residential development sites allocated in the Local Plan. Southern Water notes that points 3 and 4 of Policy SP12 incorporate policy criteria previously requested in relation to specific housing allocation sites, and it should be noted that these criteria will apply to some, but not all site allocations. In addition, the wording of criterion 3 requires updating to reflect recent changes to the way in which developers are charged for new water and wastewater connections (see https://www.southernwater.co.uk/infrastructure-charges for further information). Since OFWAT's new approach to water and wastewater connections charging was implemented from 1 April 2018, Southern Water has adjusted its requisite site specific policy wording for Local Plans, to align with the new charging	1338	Web

Designer Homes Limited	Millwood	Millwood	508	Anna Gillings -	flooding. We therefore set out our updated policy provisions in section 4 below, and in addition to this have added criterion 3 to the relevant site allocations within strategic policies SP15, SP16 and SP18, and policies HO2, HO6, HO12 and HO16 in order to identify those sites to which these requirements apply. Representations on these policies are included as part of Southern Water's response to this consultation. In order to ensure this policy is up to date with regard to new infrastructure connections charging implemented in April 2018, and to align with the relevant housing allocation policies in the Plan, Southern Water requests the following amendments to Policy SP12 (new text underlined): Proposals for residential development on sites allocated in this plan must: [] Provide a connection to the sewerage system at the nearest point of adequate capacity, Where required, phase occupation of development to align with the delivery of sewerage infrastructure in collaboration with the service provider 4. Allow future access to the any existing water supply and/or wastewater infrastructure for maintenance and upsizing purposes. [] Object Although the principle of this policy is supported, as drafted it is currently overly restrictive and does not allow for site specific	1430	Gillings	Web
	Homes	Homes		Gillings Planning	of requirement no.5 and no.6 which relate to the installation of digital infrastructure and Fibre to the Home. The policy should allow for local site matters to be taken into account, particularly where the provision is not in the control of a site promoter or developer. The policy should therefore allow for exception (reflecting the provision in subsection 2 relating to boundary conditions). Further, the policy is inaccurately drafted as it duplicates the provisions of other policies unnecessarily in respect of the requirement for 'complementary uses such as community business space'. The site specific policies allow for complementary uses, as appropriate to each site. There is no requirement for a general statement within this overarching where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Lorentz Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where possible 6.Provide for the installation of Fibre to the Home (FTTH), where poss			

proposed policies 6. 2 Policy SP12 (General Housing Policy) sets out a number of policy requirements for residential developments, to apply for all sites allocated for residential developments, to apply for all sites allocated for residential development allocated by the plan. Generally, the policy requirements are supported, and apply the policy requirements are supported, and the policy requirements are supported, and the policy requirements are supported. The policy requirement is necessary to support self-build, with no publicly available in diversionable whether as specific policy requirement is necessary to support self-build, with no publicly available information provided to demonstrate this need. The lack of this creates uncertainty regarding any self-build pilor requirements. The support self-build pilor requirements for such as its included within any of the strategic site allocations, the majority of which no by support send scale. Weetgate providing a district certeral and therefore are unlikely to support self-build policy is not considered to be justified and should be amended to ensure it is found "sound". The road infrastructure to support such a large number of houses a factory. The road infrastructure to support the expectation of the town of the policy is not considered to be justified and should be amended to ensure it is found "sound". 				Since 2011 there have been numerous instances of rainfall causing raw sewage to be released into the sea around Thanet		
				and ending up on beaches. 2. More housing and roads will mean more paved surfaces, which can increase risk of flooding.		
				which can increase risk of flooding. 3. 70% of Thanet's needs are met by underground aquifers,		
				according to the Environment Agency and CPRE.		
				4. Kent is one of the driest parts of England. High population is		
				increasing the pressure on water supply.		
Skerratt	Michael	254	Object	There are significant concerns around the high numbers of	773	Web
				additional housing allocated and the associated environmental		
				impact, including significant increase in pollution levels, poor air		
				quality impacting upon local health, and further loss of green		
				space in Thanet. Also the infrastructure plans are inadequate for		
				vehicular, pedestrian and alternative modes of transport such as		
				cycling. Westwood Cross is a prime example where road		
				improvements were seen as an after thought, but should have		
				been implemented before the development, and even now are		
				still not great. Agreed restrictions are not monitored or enforced by the council, for example deliveries to the Tesco store on		
				Canterbury Road, Margate near the Royal Sea Bathing Hospital		
				site. There have been a number of fatal and serious accidents		
				involving cars, motorcycles and cyclists, on the roads around		
				Thanet, which are very hazardous, and unlikely to improve with		
				potential significant residential development of the area. Many		
				of these routes around the Westgate, Birchington, Westwood		
				and Manston offer alternative routes for locals, either as short-		
				cuts or when the main roads are congested, but were not built		
				or intended for heavy traffic, and remain dangerous particularly		
				for pedestrians, cyclists, motorcyclists or when used by farm		
				vehicles (as intended) or lorries.		
Solly	С	419	Object	Point 1: Table 3 (Paragraph 3.15) appears to contain housing Westgate, Birchington, Westwood, and Minster should	1214	Emai

				calculations suggest 228 houses was built 2017/18. local plan, it is unsound and unpopular with the local		
				Point 2: The local plan is proposing that population will step up communities. The sites at Birchington and Westgate		
				because of the policy making in the local plan. This is not true should be considered if they are needed at all due to the		
				and not evidenced in the ONS projections; population in 2017 is slowdown of population growth, the stepped approach		
				also lower than the projection which shows a count of 900 less people in Thanet. With population not being realised this will Versatile Agricultural land (mainly of Grade 1). The		
				also alter the demand for housing and its timing/phasing. Strategy is flawed due to the decision making on issues		
				Point 3: The decision making in getting to the local plan has not surrounding deleted policy SP05.		
				been positive. In 2015 many questions and comments was raised		
				about allocating housing in Westgate and Birchington. Brexit will have an impact on the economy and housing		
				There were questions on viability mainly due to the issues of market, there is no mitigation for this scenario.		
				many infrastructure issues. Mainly the road network requires		
				funding levels which may not be attainable by development Issues with Policy SP11 should be considered as this has		
				alone. Development on Grade 1 agricultural land was a large an effect on this policy.		
				objection by the communities of Westgate, Garlinge		
				and Birchington. There is concern of the effectiveness of the Provision as stated for capital costs for Kent Police.		
				ICRIS (Inner Circuit Route Improvement Strategy) and if it will be		
				fully completed and funded for. Infrastructure is questioned on		

Policy SP01 which should be read together with comments in this policy. Point 4: It appears that the traditional Agricultural economy is not represented in this local plan and there is no mitigation on the loss of Farmland in Birchington, Westgate and Garlinge. The fields are producing a yield at least twice a year and offer the large open landscapes that North Thanet has. It is clear that the communities of Westgate and Birchington do not want to lose the Greenfield land to housing. The scaling of the allocation was not agreeable in 2015, and with the increase of the allocations this has strengthened opposition especially with local councillors and Member of Parliament. This objection has been the same in St Nicholas, Minster, Salmestone ward and Cliffsend. Point 5: The decision on the land at Manston airport was not positively prepared. Deleted Policy SP05 has had a negative impact on the progress of the local plan due to indecision. In 2015 a action plan was policy, in 2017 to develop housing and commercial mixed use and now in publication no policy at all. The council has gone through 2 CPO processes which were not progressed. So the matter now will be decided by the DCO process which is moving to the examination phase. The choice of adding more housing in Birchington, Westgate, Westwood and Minster was not popularly voted in July 2018 and was weighted on the likelihood of a successful DCO for which is not controlled by the local plan. This is still highly debatable especially coinciding of the publication of the plan with no further amendments possible. Point 6: Intervention in November 2017 by the Secretary of State has not allowed positive preparation of the plan due to the issues stated in point 5 above. A further decision is to be made by the secretary of state: In a letter dated 23rd March 2018 it states within the letter that: "We also made clear that decisions on intervention will be informed by the wider planning context in each area (specifically, the extent to which authorities are working cooperatively to put strategic plans in place, and the potential impact that not having a plan has on neighbourhood planning activity). I gave the District Council the opportunity to put forward any exceptional circumstances by 31 January 2018, which, in the Council's view, justifies the failure to produce a Local Plan under the Planning and Compulsory Purchase Act 2004 regime. I have considered carefully the Council's letter of 31 January 2018. In summary, in January 2018, the District Council resolved to reject the recommendation of officers to publish the draft Local Plan and is therefore failing to meet its deadline for publication of a Plan, in accordance with your published Local Development Scheme. The Council has failed to meet milestones in published Local Development Schemes at least five times since 2004. The District Council's argument to justify this failure sets out two inter-related circumstances – the

Twizell	Heather	Natural	512		Object	3 – Housing Strategy	1451		Emai
		England			,	Paragraph 3.9 – Natural England notes that the Local Plan makes			1
						housing provision for 17,140 additional homes over the 20 year			
						period to 2031.			
						Policy SP12 - General Housing Policy			
						We would query whether the reference to Policy SP26 in clause			
						7 of this policy only serves to confuse matters. ALL net increases			
						in residential development within Thanet District will be			
						required to contribute to the SAMM Plan whether they are sites			
						allocated in the Local Plan or windfalls. SP26 makes this clear but			
						we have some concerns that reading SP12 it might seem as			
						though this only applies to allocation sites.			
						The policy also contains a requirement for developments of 10			
						or more units to assess the development site's functionality as a			
						feeding or roosting resource for the interest features of the			
						Thanet Coast and Sandwich Bay SPA (which currently contains a			
						typo, being referred to as the Thanet Coast and Sandwich Bay			
						SPA Special Protection Area). We welcome this additional			
						protection but would like the opportunity to discuss with your			
						authority how it could be further refined to make it less onerous			
						for developers as many developments at the lower end of the			
						scale i.e. ~ 10 units (particularly if they are urban infill) are highly			
						unlikely to have any impact on land functionally linked to the			
						SPA. The main species of concern here is golden plover and			
						these birds have a preference for large, arable fields. It should			
						certainly be recognised, perhaps in the supporting text, that for			
						many developments such an assessment can be light touch and			
						will not necessary require bespoke survey work.			
						We are also slightly concerned by the reference to a 400m buffer			
						around development sites when assessing impacts on SPA			
						functional land. The evidence for this distance is not			
						immediately clear but from reading the HRA it appears it may			
						stem from the 400m buffer which was enshrined in various			
						levels of policy protection covering the Thames Basin Heaths SPA			
						in Surrey. If this is the case then much of the evidence			
						underpinning this distance is not applicable to use of			
						functionally- linked land by golden plover. For example it was			
						intended to reduce the risk of cat predation (not a significant			
						issue for overwintering adult waders as it is for the young of			
						ground-nesting heathland birds) and of new residents simply			
						walking to the SPA to recreate (much of the functionally-linked			
						land used by golden plover is arable land in private ownership			
						with any public access confined to rights of way). Therefore,			
						while we welcome the recognition that building on an area of functional land would not only result in direct loss but would be			
						likely to make some of the surrounding habitat less suitable as			
						well, we feel that requiring assessment of a 400m buffer around			

				all developments of 10 units or more is an over-precautionary approach.

Alan Byrne/Engli sh Heritage		Triume .	155		Object	Policy SP13 - Policy SP18 - Strategic Housing Sites - notwithstanding the mentioning of heritage assets within the individual site allocation policies and the requirement to have regard to them in preparing development proposals, we are concerned that insufficient prior assessment of potential impacts on those assets has been undertaken in advance of the site allocations. We are unable, therefore, to fully understand the likelihood or otherwise of impacts occurring that harm (or indeed preserve or enhance) the significance of the assets. For this reason, Historic England is unable to support these polices as they are currently drafted and suggest HIAs are carried out to inform the policies in advance of the EIP. The policies may have to be redrafted in light of the assessments if potential for harm is identified. (See also the not below on HIAs).		928		Email
Barnett	Adrian		77		Object	These comments are in reference to Manston Green which is mentioned in the Draft Thanet Local Plan under reference SP13 in Section 3 or should it be reference SS33 as stated in Appendix B. In Section 3 the plan states the site is part Draft Thanet Local Plan's strategic development. It is intended to have 785 houses and that planning permission has been granted though it is not stated where to find details of the plan on the Thanet planning database (R/TH/15/0250). Now it also states elsewhere in Section 3 and and also in Appendix B that the 785 houses do not count to total number of dwellings included in the Draft Thanet Local Plan. I was told over the phone by a member of staff working on the Plan it is because the plan should only count dwellings where planning permission has not yet been granted and this is not the case regarding the Manston Green development even though as far as I know no work has yet taken place. I would have thought it was more important to count the dwellings where planning permission had been granted rather than for something that is possibly ephemeral so it might never happen, but then I don't make the rules for the Draft Thanet Local Plan. There a contradiction between the way the Manston Green development has been treated in the Draft Thanet Local Plan and in in the way many smaller developments have been treated. One example is a 91 KIngsgate Avenue mentioned in Appendix B. Here there is development well under way, where planning permission was initially granted in 2015 and	been prepared in an inconsistent way. The change required in this particular instance would be to include the count of the number of dwellings in the overall count in the plan and adjust the plan accordingly.	193		Web

	•					_		
				T		finally updated in August 2017 (F/TH/17/0537). Unlike	\Box	
						Manson Green this development is included in the count of		
						the number of dwellings included in the draft plan. This is		
						not a unique example. I have checked some others 49-50		
						Hawley Square (F/TH/15/0097), 139-141 High Street,		
						Ramsgate (F/TH/15/0087) and 44 Canterbury Road, Margate		
						(F/TH/15/0278). I have no idea whether work has started		
						on these sites but the point is they all have been granted		
						planning permission, they are all mentioned in Appendix B		
						and all the dwellings they include are included in the overall		
						count of properties stated in the plan. There are many		
						other references to potential developments in Appendix B		
						with references to the Thanet planning database. From		
						what I have seen I must assume that they will all have been		
						granted planning permission too.		
						As housing must be one of the more important parts of the		
						Draft Thanet Local Plan it must be of concern to us all the		
						inconsistent way in which dwellings have been counted, If		
						the 785 houses from Manston Green were included in the		
						count of dwellings for the plan it is possible even likely that a		
						different number of houses would be shown for the other		
						strategic development sites. As such I do not believe Section		
						3 or Appendix B are fit for purpose,

Johnson	Elisabeth Monkton Residents Association	51		Observation	It is hoped that the minimisation of the impact on views will indeed happen and it is noted that an extended bus service is planned at a time when rural areas are threatened with loosing their bus services!	127		Web
May	Raymond	238		Object	This development, of 785 houses with a potential 2,500 residents, starts at around 500 metres from the end of the Manston runway and directly under the flight path. The Council supports future aviation use at Manston. The only economically viable plan would be for a 24/7 freight hub. Surely no-one in their right mind would consider such a proposition; putting those residents at serious risk from noise and air pollution, not to mention the affect on the proposed primary school and the value of homeowners' properties. National policy on housing does not promulgate building new housing estates adjacent to airfields whose local councillors want that airfield developed.	744		Web
moore	helen	36		Object	The proposal for such a large number of new houses does not take into consideration that all the local schools are full, there are not enough doctors to see patients within a reasonable time scale, social services are inadequate to cover such a large increase in population, the water aquefers are running dry and there aren't enough jobs for local people at the moment so there will be a lot of hostility to large numbers of new people coming in to an already underfunded area.	72		Web
Repsch	John	126		Object	SP13. 3.24 "Developers will need to work with relevant healthcare providers to ensure adequate provision is made" This is already inadequate in providing Thanet with sufficient schools, social services, surgeries, hospitals. smith	edward C		273 419		Support Object	property had 3 occupants and 64% if there were 4 per household which is far to much for the village. I would also like to know how water will be supplied to all the new homes and businesses in Thanet when water is already in short supply. I agree that homes need to be built and Birchington should share in its responsibility but the number of properties planned is far greater than should be reasonably be expected. I read that it is down to the developer to negotiate with Birchington Medical Centre to increase the property to meet increased medical needs but this is no good unless General Practitioners can be found to fill the vacancies. As GP practices are closing because doctors cannot be found and surgeries are in short supply in this area would it not be more prudent to employ first and not wait until to late. A two form entry primary school is to be built but where will the children go after as secondary education is at a premium in Thanet already and may mean children having to travel unacceptable distances. The traffic in birchington is already bad, you will only be adding to the congestion Planning permission has already been approved. It also appears that viability was not tested when this was approved as funding for the road in the application has not been met by the developer completely News story: https://theisleofthanetnews.com/2018/02/01/manstongreen-development-awarded-2-5million-governmentfunding/ Phasing for the first phase was given 2016-2021 and work has not started however, there are no phasing requirements in this publication even though the policy states this. Delivery of this site could be affected by the Manston Airport DCO, as the site is in close proximity to the airport site and landing strip.	Phasing of this development should be stated in appendix B, as this should be compared with other sites in the local plan.	814 1216		Web

					proximity to Manston Airport. Then, when the new and inexperienced UKIP council took over on the strength of reopening Manston Airport, this planning application was resubmitted, but was called East and West of Haine Road and was passed, much to the angst of many councillors when they realised what they'd passed! Now, suddenly, it is Manston Green again. I object most strongly to this project, especially as the airport is likely to reopen once the DCO has been granted. The road from Lord of the Manor to Westwood Cross is already at crawling pace daily. This project is dreadful and should not be allowed to progress! If officers lived locally they would agree!!!!	houses built by them. The whole ambiance of rural Thanet is going to end up as one big urban sprawl, satisfying London overspill. There is NO need for so many houses for local people!

		Tesco Stores Ltd	408	Mark Buxton - RPS	Object	We have concerns over the timescales and feasibility of the some of the sites currently being promoted in the Local Plan to meet the Council's OAN over the Plan period, and particularly the strategy to accommodate the 2,500 dwellings which need to be reallocated as a consequence of the deletion of a mixed use development at Manston Airport from the Proposed Revisions to the Local Plan. The contribution being sought from Strategic Housing Site SP14 Birchington has increased from 1,000 dwellings to 1,600 dwellings in the Pre-Submission Local Plan. We consider that there is little justification provided for the increase of 600 dwellings at this site. The first 50 units are expected to be delivered in 2019/20 but with no planning application submitted we consider this to be extremely optimistic, and indeed, unrealistic. There are a number of matters which need to be addressed before any planning permission is granted. This includes the provision of a new link road, a serviced school site, appropriate noise mitigation on development in the northern edge and integration with the open countryside. The NLP report 'From Start to Finish' (November 2016) establishes that it takes on average 3.9 years from the first identification of a site to the submission of the initial planning application. NLP's report further finds that on average its takes more than 4 years for an application for over 500 dwellings to progress from the validation to the decision date of the first applications which permits the development of dwellings on site whether it be a full, hybrid or reserved matters application. This does not include the discharging of any precommencement conditions if required. Following the planning application being approved it takes on average a further 6-12 months for schemes of 500 up to 1,500 units to start delivering units on site. Therefore from validation to the delivery of the first units on schemes of over 500 units it takes on average at least 5.3 years. We therefore consider that this site (SP14, Birchington	Provide a robust justification in the draft Local Plan for increasing the housing allocation at Birchington by 600 units or otherwise reduce the allocation to 1,000 units and allocate a wider range of additional housing sites to make up the shortfall. Apply a more realistic housing trajectory in Appendix B in recognition of the planning status of the site.	1187		Email

				adoption and there are serious doubts that it will deliver sufficient dwellings across the plan period to meet the Objectively Assessed Need. Therefore, the Council should consider allocating further sites for housing which can be delivered earlier in the plan period, including the land to the north (and south) of Millennium Way.			
Alan Byrne/E nglish Heritage		155	Object	Policy SP13 - Policy SP18 -Strategic Housing Sites - notwithstanding the mentioning of heritage assets within the individual site allocation policies and the requirement to have regard to them in preparing development proposals, we are concerned that insufficient prior assessment of potential impacts on those assets has been undertaken in advance of the site allocations. We are unable, therefore, to fully understand the likelihood or otherwise of impacts occurring that harm (or indeed preserve or enhance) the significance of the assets. For this reason, Historic England is unable to support these polices as they are currently drafted and suggest HIAs are carried out to inform the policies in advance of the EIP. The policies may have to be redrafted in light of the assessments if potential for harm is identified. (See also the not below on HIAs).		1001	Email
Alexand	Richard	189	Object	Birchington has neither the infrastructure nor the healthcare provision to cope with existing levels of population let alone an influx of 3,200 people (based on two people per household). Birchington Square is a bottle neck and suffers extremely poor air quality and the draft plan provides no clue as to what is to be created to address this (e.g. plans for a ring road?). The provision of a road between the A28 and Minnis Road will create a rat run for motorists going to Minnis Bay and the traffic lights at the Minnis Raod railway bridge will cause tail backs through the new housing development and back onto the A28. The existing medical practice does not seem to be able to retain GPs (there are only 2 full time principals) so increasing the size of the facilities will only exasperate patients further. Building on agricultural land will diminish the groundwater supply and could in certain places cause localised flooding.	Set out precise proposals for managing the inevitable increase in traffic, particularly relating to Birchington Square. Provide evidence that assurances are in place to safeguard QEQM hospital and, preferably, expand the provision of healthcare in Thanet.	650	Web
Alexand er	Christin a	219	Object	The traffic through Birchington at peak times is too heavy for Birchington square resulting in traffic build up and air pollution. Greater levels of activity will only make the matters worse, the plan does not address this crucial factor. The provision of link roads will not change the traffic problem but the planned link between the A28 and Minnis Road will result in a greater level of traffic using the traffic lights at the Minnis Road railway bridge, which will inevitably lead to traffic jams. The existing medical centre barely copes with its work load because it only has 2 full time GPs. This understaffing will be worse with extra patients, regardless of how large the building is.	The problem of coming into Thanet needs to be addressed before any development considerations take place.	670	Web
Allardyc e	D	338	Observ ation	We are surrounded by grade 1 agricultural land (soil quality amongst the top 5th in the country. This land is needed for food, and biodiversity. Extra housing would mean extra demands on QEQM hospital and local schools. Air pollution will increase due to higher levels of traffic on the roads. Building work would mean constant noise and dust. Local residents with health problems may be affected.		1020	Paper
Amer	Diane	404	Object	Location of housing Birchington has a unique village community which should, I believe, be afforded protection from the sheer number of proposed houses on our border. Whilst I understand the need for new housing stock the approach should be in proportion to the number of residents already living here and take into account the age range of people living in the village. Birchington has		1175	Web

historically been classed as a 'retirement village' and therefore a lot of the amenities are geared to this age group. A new development of retirement houses should be considered as well as starter homes for new families. However, priority should be given to existing Thanet residents in the first instance. Traffic The new houses will also impact on the already busy Birchington Square which has peak time traffic congestion and a high level of pollution. I note that the developer will need to build a primary school but I assume traffic will still need to use the existing route to King Ethelbert secondary school as there is no mention of a new secondary school. I am not certain therefore of the soundness of the Local Plan in relation to increased traffic through Birchington and that enough thought has been done with reference to relief roads around the village. In addition are the funds already in place for the roads identified as needing improvement? Should Manston development (Stone Hill Park) go ahead as a mixed use site then this will create even more of an issue as there will be additional traffic if residents want to shop at Birchington. Station Road in Birchington is at peak capacity for most of the day as it currently stands. Where will the additional parking be catered for as there is no additional land to be found near to the shops. Grade 1 agricultural land I am sure that there are brownfield sites, such as land adjoining Manston (not including the airport, which may reopen) which have not been examined properly and could be better utilised for housing as the road infrastructure is largely already in place. In addition should Manston reopen as an airport these houses would be strategically placed to enable the workforce to get to the airport easily. With all the unknowns of Brexit looming we should retain as much Grade 1 land as possible to ensure that we are as self sufficient as we can be in our food production. Once this valuable resource has been built on it will be gone forever. Kent is known as the "Garden of England' so Grade! agricultural land should be protected at all costs. Water resource Thanet does not get much rainfall and according to climate change statistics our summers are due to get drier and hotter. With this in mind are there plans in place to supply water to all of these homes in times of drought? The existing residents of Birchington (and Thanet) will be the ones that have to live with the consequences of this for the future. I attend the Local Plan meetings and we have had no concrete answers from Southern Water as to how the situation will be managed. **Doctors and Hospitals** In Birchington we have to wait sometimes 3 weeks for a routine appointment. The QEQM hospital has one of the worst A & E waiting times in the country. With such an influx of new residents this will only get worse. The Thanet area is classed as one of high deprivation which, statistically shows that people that live in these areas have poorer health. With this in mind a new Hospital should be built before completion of all the new houses I worry that this will not be the case and again it is people that already live here that will suffer. The number of houses should be looked at again to see if the infrastructure and natural resources can support this both now and in the future as what we

			do will have an effect on everyone.

			(23/08/18) has as well.			
			However, while none of us, honestly wish for further development of our			
			village on the scale quoted in the original 'Local Plan' to go ahead, there is a			
			dire need for affordable housing to accommodate the next generation of			
			Birchington residents. Likewise, a great many of us, wish for the tranquillity			
			and natural scenery in and around our village, to be protected as far as			
			possible. Therefore, whilst we have to accept that a measured and hopefully, well			
			thought out housing expansion will happen in the next few years around			
			Birchington, the green field and countryside surrounding our village, needs			
			equally, to be reciprocally subject to a measured retention also as 'Green			
			Corridors / Wildlife Corridors'. For the avoidance of doubt, the term 'Green			
			Corridors / Wildlife Corridors' in this representation, are one and the same as			
			they are separate titles			
			for natural land serving a duel purpose.			
			The quintessential character of our village must be retained and these natural			
			areas should be enjoyed by all village residents, whether as an open space for			
			informal recreation, or as a green view. Therefore 'softening the edges' of			
			proposed housing developments (new next to the old) with footpaths, cycle			
			paths, areas convivial to indigenous wildlife and countryside views, will			
			become managed areas of Birchington that will preserve a tranquil quality to our village. There is a varied mix of agricultural land and open spaces			
			currently.			

Object	the projected housing numbers planned on strategic sites, however to offset this shortfall, I would like Thanet District Council and/or the relevant Planning Authorities, to consider alternative nearby sites, where land is identified and is currently being used, as anything other than 'grade 1' agricultural land, for housing development. For example, several areas adjoining the Manston Airport site could be considered. The proposal for the retention of Manston Airport as a freight/passenger terminus is a sound one and will contribute positively towards the local economy and job market. Such alternative housing development areas would ideally require a sustainable and existing conurbation infrastructure - Manston already has that. In the interests of expediency at this time, I suggest sustainability tests be conducted accordingly. In conclusion with SP14 in mind, such a compromise measure, would allow the projected housing target numbers to still remain achievable, ethical and urbanisation pressure along the boundaries of strategic sites would be alleviated and an ergonomic housing expansion would still be possible with the retention of Birchington's character and natural heritage in green corridors / wildlife corridors in a more convivial, Local Plan proposal. The publication of the 'Draft Thanet Local Plan – 2018 – Pre-Submission Publication, Regulation 19 contains several pointers towards the proposed housing development of Birchington and calls into play, the 'soundness' of this local plan to which I wish to make the following representations. Further in this document, I have explained how any shortfall in strategic housing land to develop, can be recouped by the developers to still achieve their 1,600 houses target for Birchington. All my following representations are in green font for the avoidance of doubt. See attached file for complete submission Strategic Site Policies 3.23 states "Birchington is a large village with an existing population of approximately 10,100. 				The village has a train station with routes to Margate, and the rest of Thanet as		attachme	.iit.p

population. This plan only represents the needs of other areas who have failed over the years to make adequate provision for their growing housing problems. I have lived in Thanet all of my life and moved back to Westgate-on-Sea from Margate six years ago, back to the home I was brought up in. Over the years my family and I have witnessed the tragic loss of several delightful, architecturally stunning buildings to the greed of various developers in our lovely little town by the sea. Local bodies were not quick enough to award these historic buildings with listed status and now they are gone forever. The proposal to build thousands of houses on Grade 1 agricultural land adjacent to these three communities is in my view barbaric. Our local farming community is precious and should be awarded protection not only for the preservation of local jobs, wildlife and for our future but once that Grade 1 agricultural land is built on there will be no turning back. In the words of Franklin D. Roosevelt 'A nation that destroys its soils destroys itself'. Southern Water has already stated that water supplies "half of demand" by 2030 and will be looking to encourage customers to use less even though here in Kent we the customers are among the most water efficient in the UK. Southern Water on the other hand is the worst water company for complaints as broadcast recently on local radio from official statistics. It has been stated by Southern Water that Westgate does not have the capacity to either supply water or dispose of waste water for the number of housing proposed in the earlier Local Plan, even greater numbers of houses on the new Local Plan can only exacerbate this problem. If the Government dictates to local Councils, these houses should be built then the infrastructure should be put in place first and funding supplied by the Central Government. Road building should be completed before house building starts. Thanet's roads are greatly congested and many in desperate need of repair. When repairs are made or when one main road is closed for repair, installations or accidents there is mayhem on all other roads with traffic at almost standstill. The strain on the local Doctors (oversubscribed by 200 patients already), Dentists, Hospital, Mental Health Unit and Police would be unbearable. The A & E Department at QEQM. is already overstretched and now we have looming over us the loss of the stroke emergency care to Ashford a good hours drive away if the traffic allows. Our local primary schools cannot accommodate the number of applicants each year as the population stands at present and the promise of another infant school for Westgate guite honestly does not guell my fear for the future educational needs of this area. In the new local plan the projected new jobs in Thanet is 5,000 and the planned additional housing is 17,500 meaning probably a 35,000 addition to the population. These projections only spell one thing; many thousands of people either unemployed or having to commute out of area. If Westgate-on-Sea has the additional 2,000 houses as in the new local plan that equates to 4,000 people trying to exit Westgate to get to their place of work because it will not be in Thanet. Westgate-on-Sea has a small Railway station with no parking facility so good commuters with your walk to the station and back after your long day at the office.

				Finally, Should any of the proposed housing go ahead the very least that should be demanded is a park. There is not one park in either, Westgate, Garlinge or Birchington. There are two or three recreation grounds (NOT Parks) and in consideration to the fact that you will be removing the local open space which is a requirement to maintain the quality of life, it is vital that part of the plan for Westgate, Garlinge and Birchington incorporates at least one decent sized park. Not much to ask when you consider that Margate has the luxury of three parks. Please rethink your plan. If more housing is absolutely needed, which I doubt, especially the numbers, they should be placed in an area that has easier access to out of the area i.e. The Thanet Way.		
Belt	M	483	Object	The whole idea of all these houses on agricultural land is ridiculous, we need this precious land for food and we are certain that our services could not cope, things are bad enough already. There are also many empty properties & brownfield sites around Thanet already which could be made into affordable homes. This should be a priority before any valuable agricultural land is ruined. We have already lost land with the building of Thanet Earth. Our roads are already very busy and would struggle to cope with the large extra volume of traffic. As long term residents of Birchington we feel that this short sighted proposal would impact negatively on the people of Birchington for generations to come. These houses would not even be far local people – our own young people would not be able to afford to buy them.	1349	Paper
Blight	Ken	427	Object	There are far too many houses in the local plan for Birchington and they should not be built on prime agricultural land. There are few young local people that need houses or can afford them. There is no work in the area, the schools are full and the GP surgery is struggling. This is a very ill conceived plan and is not at all suitable for this area.	1219	Email
Bottali	Denise	1962 325	Object	I would like to register my objection to the Local Plan, with regards to housing being built on grade 1 agricultural land at Garlinge, Westgate and Birchington on the grounds that no such development should be given permission on land that is used to grow our food, especially with the uncertainty of Brexit looming. You should be using all brown field sites (apart from Manston) and compulsary purchasing empty and derelict homes across the Isle and renovating these for local people awaiting housing instead of lining the pockets of developers and playing into the hands of London's social cleansing, of which the Isle of Thanet cannot sustain such an increase in it's population.	998	Email
Bradley	Alan	488	Object	the proposed land is Grade A agricultural land. Use of brownfield sites would be more appropriate. Many areas throughout Thanet, especially Ramsgate & Margate, shops boarded up, the old police station and Gasboard opposite Aldi's in Ramsgate, left for years and total eyesore, surely accommodation could replace just these 2 areas alone. It is a great place to love but please don't make it a concrete jungle.	1354	Paper
Bransfiel d	Sheila	456	Observ ation	POLICY SP14 –STRATEGIC HOUSING SITE – BIRCHINGTON When considering the impact of the proposed Birchington site upon the junction of Manston Road/Park Lane and Acol Hill, the priority should be altered. In a 2006 study, CPRE suggested that Park Lane and Manston Road should be a continuous carriageway. They suggested chicanes at the top of Acol Hill to deter through traffic. Kent Highways agreed in principle, but had	1306	Email

Endangered species would be at greater risk. China Gateway International Limited has concerns over the timescales and feasibility of some of the sites currently being promoted in the Local Plan to meet the Council's OAN over the Plan period and compensating for the 2,500-dwelling allocation being removed from the Proposed Revisions to the Local Plan. China Gateway International Limited has concerns over Strategic Housing Site Policies SP14 Birchington, SP15 Westgate-on-Sea, SP18 Land at Manston Court Road/Haine and Housing Allocation HO2 Land north and south of Shottendane Road. The reasons for these concerns are set out below; The contribution being sought from Strategic Housing Site SP14 Birchington has increased from 1,000 dwellings to 1,600 dwellings in the Pre-Submission Local Plan. We consider that there is little justification given for the increase of 600 dwellings. The first 50 units are expected to be delivered in 2019/20 but with no planning application submitted we consider this to be extremely optimistic and unrealistic. There are several matters which need to be addressed before any planning permission is granted. This includes the provision of a new link road, a serviced school site, appropriate noise mitigation on development in the northern edge and integration with the open countryside. In conclusion we consider that the Pre-submission Local Plan is currently unsound as there are concerns still to be addressed over the delivery timescales of several of the Strategic Housing Sites and housing allocations. We consider these issues mean it is unlikely that the Council will be able to ensure the delivery of sufficient housing during the initial years of the new development plan to meet its increased Objectively Assessed Need. Development of the three sites (Phases 1,	1311	Email
Claris		459		Observ ation	the open view from the back of our house - Grade 1 Agricultural land stretching across almost as far as minnis bay. We've watched the farm machinery and workforce work year after year; potatoes, caulifowers, sweetcorn etc, our own home grown crops - not something flown in from the other side of the world! Only 60% of the food consumed in the uk is home grown, we need to grow more not less. Taking this valuable farmland and filling it with properties will cut our growing capacity and make us less independent. Do we want this after Brexit? Birchingtons population is 10,000 and our schools and Doctors are struggling to cope (you're lucky to get to see a Doctor these days!) The hospitals are mush the same, they can't cope, patients are sent to other hospitals outside	1311	Paper

				the local area for minor operations! How on earth are they going to take on more patients when they are not coping now with what they've got? We have a struggle here in the summer with water shortages, more houses will add to this problem. Also the roads get choked up with traffic especially in the summer, this corner of England is not going to benefit with so much property The Local Plan to Build at least 12,000 new homes in Thanet, with Birchington and Westgate being expected to give up Greenbelt land for this purpose - grade 1 farmland - it's a SIN. If this goes ahead our village and community will be changed forever. SAD!			
Clement	Richard	259	Object	The local infrastructure is not capable of supporting this amount of development because: Already Southern Water are talking about a shortage of water. In addition to the shortage of water is the problem of waste water and sewage ending up on our beaches when flash floods have occurred. This has a devastating effect on our tourist industry and jobs. There are insufficient medical facilities and a shortage of doctors. It takes three weeks to get an appointment and we are constantly being told that the Hospitals are running to over capacity. It seems to me that the number of houses proposed for Birchington is not for the benefit of Thanet residents but to provide housing for overspill from London councils like the Westwood Cross development. Grade 1 Agricultural land should not be built on.	Houses should be built on brown field sites or land of a lesser quality than Grade 1 agricultural land. We owe it to the next generations to preserve this land.	787	Web
Clifford	Stephen	497	Object	I have lived in Thanet all my life, 65 years. I have lived in my bungalow 41 years. I have witnessed many changes not many have been for the best. Having worked hard all my life I wish to enjoy retirement in what i call home. Having clear uninterrupted views across beautiful farmland to Minnis Bay & Reculver I was under the impression that this A1 farmland would never be built on. I know this isn't a good reason alone for not building on, but for me and many others it is a good reason why we live here. Over the years I have noticed how difficult it is to drive from one part of Thanet to another. The roads are such poor quality now and with more road users, can only get worse. Roadworks on main arterial roads cause chaos, longer journey times and more pollution. We do not have the infrastructure to support these houses. One hospital, doctors, dentists, schools + the public sector are overwhelmed. (I have to travel to Herne Bay for a dentist) The Council have been notified by the water company that it cannot cope and will lead to shortages and hosepipes bans. The quality of life will be seriously impacted and make it miserable for everyone and I am seriously against the amount of homes proposed for the Thanet Area		1391	Paper
Coombs	Joshua	292	Object	The loss of farming land to housing will increase unemployment, especially after Brexit. The sites on brooksend fields have a significant water table and wells/holes in the area with underground natural underground streams. There is also a potential risk identified of an surface water flooding and an event occuring every 75 / 100 /or 1000 years. This is due to the above and raised groundwater levels. This development would destroy biodiversity, wildlife habitats including	The inclusion of the Brownfield sites that were not included but allocated.	876	Web

hedgerows. Endangered species such as sky larks will be at greater risk. The sites proposed would not be for local need but for those moving from London. Affordable homes would be allocated to those from Lewisham which would increase crime, fear, drugs. These sites must be for local need. 15,000 houses alone could mean 4 people per house, that's an extra 60,000 people who need jobs, schools, hospitals, water and other essential services. This would increase Thanets population by a third. There is already currently inadaequate provisions of schools social services and public transport. Birchington Medical Centre and QEQM Hospital cannot cope with current demands. Furthermore the threat of the closure of the stroke unit would be concequently disasterous. Thanet is vulnerable to water shortage and rainfall which is what CPRE have also said aquifiers are low at the times of drought, increasing probability of hosepipe bans. Incidently water bills may rise. Since 011, there have been numerous reports to Southern Water being able to cope with the rainfall and fined for illegal discharages onto our beaches and shorelines in Thanet which has a negative impact on tourism and health implications. Widespread Concreating makes more water run into drains. This water requires more filtering. and they heavy rainfall can cause flooding. Planting lots of trees and lots of landscaping with help reduce the flooding issues across the Isle of building in these other areas must happen. Houses cannot be built on this particular land due to Public Rights of Way and Registered Public Bridleways around the perimiter and across either side and the middle of the fields. There is also an ancient monument on the fields. It is understood that the land owned by Cambridge University and The Church was gifted by Quex Estates previously by Powell Cotten to the people of Birchington at the time and believed to have a restrictive covenant on its use. The SP14 strategic site and allocation of land is Grade 1 agricultural land. This housing allocation with the right infrastructure would be best placed on the former Manston Airport Site with mixed development including the 1600 proposed in Birchington. There are brownfield sites that have been idenified but not included in the Local Plan when the plan was passed to consultation by Thanet District Council. As such I believe the Plan is Unsound and not positively prepared. Other alternatives on the housing numbers: 1) Restore run down properties and bring them back into use. There are well over 1000 long term empty properties in the district. This is more sustainable as uses less greenhouse gas than a new build. 2) Disallow current properties to remain empty for more than six months. 3) Use financial incentives to encourage building on brownfield sites. 4) Other financial incentives to encourage sole occupants of large properties to down-size. 5) Encourage conversion of empty rooms above shops. 6) Encourage renting of flats and bed-sitting rooms 7) Housing could instead be built in the midlands and the North, where brownfield sites in previous mining villages abound, as do rugged sites which are unsuitable for agriculture. 8) When considering development proposals, poorer quality land is to be used in preference to land of a higher quality.

					The allocated land is heritage environment and open land. Which is landscape character area - wantsum north shore. This would be development in the countryside (urban and Village confines) This would be in my view overdevelopment of the area and right next to a conservation area.				
Cooper	Barbara	Kent County Council (KCC)	514	Object	Provision and Delivery of County Council Community Services: KCC would like to see the following text removed, and replaced with: "5) a fully serviced site of 2.05ha (to be provided at the cost of the developer) for a two -form entry primary school" 5) An area of regularly shaped land within the development of no less than 2.05ha to be transferred at nil value to the County Council for the purposes of providing a Two Form Entry Primary School. The site to be adequately serviced by the developer, including utilities and highway access." PROW and Access Service: KCC recommends the inclusion of the following text into the policy: Incorporate and provide for connections and improvements to existing PRoW and cycle networks facilitating walking, cycling and public transport to, from and within the site. To incorporate and provide for connections and improvements to existing PRoW network to provide good access to footpaths, bridleways and cycle networks to facilitate access to the surrounding countryside and provide opportunities for exercise and recreational activities for walkers, cyclists and equestrians.		1502	Er	Email
Corsby	Gillian		57	Object	Policy SP14 - Strategic Housing Site - Birchington - I object because overwhelming rejection by locals to building on Grade 1 and 2 agricultural land in previous consultations has been totally ignored despite the democratic process. Residents have been given a shorter period to comment on a vastly increased amount of paperwork and previous comments which we expected to be submitted to the Inspector will not be passed on. The National Planning Policy Framework para 112 says that local planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land and should seek to use areas of poorer quality land in preference to that of higher quality. After recent water shortages caused problems on many farms why would the Council suggest building on Grade 1 agricultural land which has a stream from which the farmers pump water into a network of pipes for watering crops. The farmer says that the soil is so good he could grow anything. It is absurd that such a large area of top grade agricultural land should be sacrificed for house building when there is land less valuable for agricultural purposes available beyond Thanet's boundaries. The planning authorities have not demonstrated significant development of agricultural land is necessary and have ignored the need for greater self sufficiency in food production. With 40% of our food imported we need to produce more not less in the UK, especially with impending Brexit. The number of houses proposed is excessive and does not appear to take into account the density of housing already in Thanet or that being a coastal area all traffic has limited ways to leave the 'island'. The single carriageway A28 to Canterbury is often congested and it is an exaggeration to call road access to and from the M25 and London via the A256 and the A299 Thanet Way as 'excellent'. The proposed new road from the A28 going through the proposed development on the farmland to Minnis Road is a bad idea. The road appears	Use brownfield sites and save Grade 1 and 2 agricultural land for food production. The infrastructure changes proposed come nowhere near solving the issues already causing problems in the area. These need to be addressed before building more houses. The Office for National Statistics has revised down its previous estimate for housing, made in 2014, which suggested that 210,000 new households would be formed per year in England, to 159,000 per year. The overall number of houses required of Thanet should be challenged before coming to a final decision. Build new towns villages instead of adding new housing on already heavily populated areas and ruining communities by turning villages into towns.	150	W	Web

				to join Minnis Road between the Medical Centre and the traffic light controlled		
				single lane under the railway line. This means that any incoming traffic		
				diverted from the A28 to get to Minnis Bay will, especially in the summer		
				months, sit in a queue emitting fumes while it waits to get on to the Minnis		
				Road and through the tunnel.		
				The Plan is based on the Government's tunnelled vision approach to national		
				housing needs and not on each local areas actual needs or circumstances.		
				riousing needs and not on each local areas actual needs of circumstances.		
Corsby	Dave	331	Object	The local plan allocates land for 17,000 new dwellings with 5,300 of them in	1012	Pape
				Birchington, Westgate and Westwood on top grade agricultural land. The		
				national Planning Policy Framework does not specifically identify self		
				sufficiency in food production as a requirement for planning authorities to		
				consider but advises that where significant use of agricultural land is necessary		
				to meet allocation targets local authorities should seek to use poorer quality		
				areas.		
				The guidance does not meet the unusual situation in Thanet where almost all		
				the land allocated for housing development is precious top grade agricultural land. None of the farmland in Thanet should be built on. Any shortfall in		
				•		
				housing requirements should be met by using brownfield sites and rugged sites in the north which are unsuitable for agriculture.		
				The present plan is based on a blinkered approach that we must have extra		
				houses even if that means permanently destroying top grade agricultural land		
				which is needed to provide self sufficiency in food supply.		
				The comprehensive considered Local Plan for Thanet is flawed by a		
				misconception that the additional houses have to be tacked onto existing		
				conurbations. The proposals are unfairly onerous to Birchington with 1600		
				houses and Westgate with 2000 houses allocated while Minster, Monkton, St		
				Nicholas, Cliffsend have escaped with relatively few additional houses.		
				Instead of further pressure on existing Thanet communities no consideration		
				or provision has been given to the alternative of building new and largely		
				separate communities with access which would not put pressure on		
				existing transport and services in Thanet.		
				It would be better for new house building to be undertaken in the areas:		
				North from Potten Street towards Plum Pudding Island with independent		
				direct access to the Thanet Way (A299);		
				West of St Nicholas towards Wagtail and Marshside with independent direct		
				access to the Thanet Way (A299);		
				Between Minster/Monkton and Richborough with independent direct access		
				to the A253 between Gore Street and Monkton and or access to the A256;		
				• South of St Nicholas in the areas surrounding Down Barton Road and		
				Summer Road extending towards independent access to the A299 and A28.		
				It is difficult to understand why the Plan seems set on spoiling the existing		
				Thanet towns and villages when the alternative of creating new independent		
				hamlets would largely avoid this. Is it that tagging onto existing		
				infrastructure is easier simpler quicker and more lucrative for developers? A		
				look at the map shows that new hamlets at say Potten Street, Wagtail, Down		
				Barton and Ebbsfleet would pose a less undesirable outcome than the present		
				proposals. The		
				suggested house building programme appears to be a short term fix which will		
				create a permanent deterioration.		<u></u>
ousins	Norma	471	Object	So why do you want to build on agricultural land.	1335	Pape

	T		1			1
				Building - By building on agricultural land would make it harder to buy		
				fresh vegetables and fruit locally, also we won't have enough water for		
				Thanet.		
				We don't have enough GPs or medical centers or dentists here also the QEQM		
				Hospital cannot cope now so how would we manage?		
				The Road structor for all the extra for all the extra cars isn't suitable, every		
				where would be grid locked and Birch village is like Oxford Street London. On a		
				Saturday as it is now.		
				What would it be like with all the extra houses and cars?		
				I would be mayhem.		
Crisp	Patricia	369	Object	1. The proposed development of 1,600 new houses is sited on Grade 1	1067	Paper
				agricultural land - amongst the top fifth in the country (CPRE). If the UK		
				population increases to to 13 million by the 2040s as predicted (NFU) then		
				extra farmland that is more than one and a half times the size of London		
				will be needed to grow the food for Londoners (ONS,2017).		
				Only 60% of food consumed in the UK is home grown and that figure is		
				expected to fall to 53% by 2040 (NFU) which will have serious implications for		
				the economy and unemployment. Measures must be taken to halt this decline		
				in self-sufficiency and that will not be achieved by building over valuable prime		
				quality land.		
				2. The loss of farmland to housing will increase unemployment, and at present		
				Thanet's 4,020		
				unemployed is the highest in Kent (ONS,2018).		
				3. Thanet is vulnerable to water shortage and low rainfall(CPRE) and aquifers		
				are low in times of drought. Widespread concreting makes more water run		
				into drains, and since 2011 Southern Water has been unable to cope with		
				heavy rainfall and has been fined for illegal discharges into the sea around		
				Thanet.		
				4. The infrastructure in Birchington cannot cope with a population increase of		
				4,000+.		
				This new influx will need jobs, schools, hospitals, water and other essential		
				services. There is already		
				·		
				inadequacies in social services provision, schools and public transport. Local		
				hospitals (QEQM) and		
				Birchington Medical Centre cannot cope with even current demands.		
				5. The extent of the proposed development would radically alter the village's		
				character and much of the housing may be to cater for homeless people from		
				London boroughs. This in turn would increase unemployment figures.		
				6. The proposed new roads will attract more motorists into Birchington and		
				the Square is already the most air polluted spot in Thanet. More roads = more		
				cars.		
				Alternative suggestions		
				1. Restore run-down properties and use the 1,000 long-term empty houses in		
				Thanet.		
				2. Use brownfield sites.		
				3. Cheaper sites in the Midlands and the North (where brownfield former		
				mining sites abound) which are unsuitable for agriculture would be better		
				suited for housing. Poorer quality land is to be used in preference to land of a		
				higher quality (DEFRA,2017).		
				4. Encourage conversions of empty rooms above shops and even change the		
				usage of empty shops into living accommodation.

				_	
			Plan and Transport Strategy can be implemented by the Council using		
			statutory planning powers, and how likely it is that other public sector funding		
			and private sector investment will be available.		
			Demonstrate prior to the EIP how the Council is proactively identifying urban		
			brownfield sites. Including how and whether the Council is in a position to be		
			able to be able to facilitate the delivery of brownfield sites especially where		
			there are land assembly challenges.		
			Prepare a Sustainability Appraisal of all sites, so that the sites can be compared		
			according to the extent to which they meet sustainability objectives prior to		
			the EIP.		
Davies	Colin	389	Object Dear Sirs	1138	Email
2 0.1100			Please accept this letter as my formal objection to the Plan to build 1600 new		
			houses on land around Birchington, and pass on to the Inspector.		
			Employment: I write as one that has experienced the need to leave the area		
			for employment going back some 45 years. In that time engineering factories		
			have closed never to be replaced. Skilled staff have drifted away. The closure		
			of Pfizer has had a major impact on the area, high paid middle classed workers		
			with a variety of skills left Thanet. The closure of the airport has also had the		
			· · · · · · · · · · · · · · · · · · ·		
			same effect. It says in the plan that 5000 jobs will be created, but not how?		
			Will these jobs be skilled what will attract major high tech employers to an		
			area that has closed its new multi million pound Canterbury University Campus		
			(Westwood), due to lack of students? What does this say about our young		
			people, and schools. Low paid jobs have been taken by EU citizens, displacing		
			our own non skilled worforce. Two and half hours to get to London plus, and		
			return another two and half hours puts off many from moving to Thanet		
			(Birchington), and the fares of £5500 a year are not bearable for most. My		
			train to Victoria (5:58) would have only one or two travellers to London, and I		
			know I was rare in that I paid the fares myself. This is not a commuter friendly		
			area.		
			It is my understanding that many people will be moved to the area that are		
			already on Benefits free up land etc, so that London councils can get better		
			returns from new tenants and profit from the sale of property. These new		
			comers will be detrimental to the low crime and peaceful atmosphere we have		
			here. They will be a drag on council resources, so badly need for the aged		
			population and those with special needs.		
			Traffic: In an area where we experience constant jams due to the amount of		
			cars on our roads and the fact that there are few alternative routes to		
			Margate, Ramsgate and Canterbury, the prospect of more cars filled the		
			residents with horror. Even the new roads would seem to funnel more traffic		
			to Westgate and Westwood, and not ease the congestion.		
			Environment: The increasing need to ensure food security has bee overlooked in		
			the plan. Acres of A1 agricultural land producing wheat and vegetables for the		
			home market will be destroyed by this scheme. The pleasant rural landscape		
			so loved by denizens lost for ever. Wildlife habitat so needed in this Country		
			covered in concrete.		
			I consider that many brownfield sites near to London would be better suited to		
			new homes, and that travel would be cheaper for those that needed it. Our		
			exit from the EU brings uncertainty to this plan and doubt in my mind as to the		
			population in the South East in the coming years.		
			Water: It has long been a concern of Birchington that water supply is		
			dependant on an aquifer that cannot deliver the quantity required by the		

				current population. To increase demand would deplete it even more, given that it cannot be renewed with the runaway caused by building foundations. Education: What extra places are there to be made for the children of the newcomers? Density of population: Given that we have a high density now, is it correct to crowd more into Thanet which is triangle with only one way out other than the sea? Regards		
Davis	Gerald	340	Observation	In regard to the proposed housing development for Thanet Ifeel that not enough thought has gone into the circumstances of the different areas. Thinking of Birchington as a whole, to build 1000 plus houses on the ground adjacent to Essex Gardens because of the extreme increase of traffic will endanger the people living on the 'Garden Estate' ie Essex Gardens, Manor Drive, Lancaster Gardens, Devon Gardens. There will need to be a green wedge or similar to protect the estate. As at the present time it is difficult to cross Essex Gardens because of the traffic racing down the road to avoid the tail back of traffic going through Birchington Square. Would it be more advisable to build on the land adjacent to the Thanet Way thus to avoid increasing population of Birchington as a whole. a) Regarding employment what measures have you put in place for the people to find employment, it is quite evident that those out of work at the present time are far to b) The road that is proposed to leave A28 and be diverted across the fields etc, has consideration be given to the fact that Minnis Road will not be able to accommodate increased traffic and would need to be diverted further down towards Minnis c) Water is a great concern and if the population is to be increased so greatly what measures have been put in place to cater for such numbers. d) There is the question of Hospital and GP surgeries, how are they to cope with increased numbers? These are just a few of the concerns of the residents of Birchington but we hope that more thought should be put in place regarding the proposed increased housing numbers. As a final note while attending a function at the far end of Cliftonville a lady there said, we like to come to Birchington because it is still like a villiage and so friendly-if the proposed housing goes ahead with such great numbers, this would disappear.	1022	Paper

Dickerso	Bob	FOCC	164	Object	I moved away from this area some 25 years ago to find work. Having retired, I	481	Web
n					have now returned - only to find that what had happened to the village of		
					Ashford TW15 is very similar to what TDC are proposing! I chose to return to		
					Thanet for a number of reasons, one of which was a history there of poor		
					planning has resulted in the total destruction of a village atmosphere. The last		
					remaining old and decorative school building has been flattened to make way		
					for multiple housing without regard to essentials such as schools, public		
					transport, hospitals, doctors, dentists, children's play areas etc. This has		
					resulted in an increase in air pollution, population (already struggling to cope)		
					and crime figures. Furthermore a decrease in fire brigade cover for that area		
					made it an unwelcome and increasingly dangerous place to live. I am very		
					much against standing by and watching something similar happen again in		
					Thanet. Birchington has a high percentage of pensioners who, no doubt, wish		
					to live out the rest of their lives in peace and quiet without having to endure		
					what I have encountered and briefly described. There are better areas in this		
					country to build housing. For example, if you drive north, past Manchester, you		
					will find countryside with easy access to the motorway, ideal for new towns to		
					be built which will not upset local residents - because there aren't any! I		
					demand you reconsider these proposals.		
Dobbs	R A		446	Object	Birchington simply cannot cope with the amount of housing being proposed,	1275	Paper
DODDS	IN A		440	Object	our hospital and Dr's are stretched to the limit as it is!! Surely it is better to	12/3	rapei
					grow more food than build houses for people who do not even live in the		
					1 -		
					Birchington Area.		
					How on earth will Southern Water cope with another 3-4000 residents? Simple		
					answer is they WILL NOT!! Our countryside is dwindling year after year and the answer is not to keep		
					building on it. Grown more produce and eat more healthily!!		
					,		
					I have lived in Thanet all my life and would show you 100's of run-down		
					properties that could be re-developed instead of blighting our landscape.		
					Employment is very very low it will only get worse!!		
					Keep BIRCHINGTON AS A VILLAGE!!		1,,,,,
Donovan	Patricia		251	Suppor	The proposed new housing would change the character of Birchington beyond	763	Web
				t	recognition. My understanding is that a London Borough has expressed		
					interest in building here. Have you learned nothing from the "Dole on Sea"		
					fiasco? Our GP surgery is already stretched - how will they cope with the		
					influx? Southern Water has said that it cannot provide more water. Birchington		
					Square is, I believe, one of the most polluted places in Thanet with very poor		
					air quality. Do you think that this problem will be helped by further vehicles? It		
					seems to me that the wishes and well-being of local people are low down (if		
					not bottom) on the list of your priorities.		
Druce	Peter		457	Object	You expect the developer to make appropriate contribution towards the	1309	Web
					expansion of the Birchington medical centre. This facility does not meet its		
					current demand. Waits of 2-3 weeks to see a doctor are not uncommon		
					QEQM Hospital does not meet current targets. Where are the staff coming		
					from to meet the new demand.		
					The road infrastructure in the Birchington area particularly Canterbury Road		

				and The Square are overloaded at present. True some will be diverted off onto		
				the new road but any freed up road space will only be filled up by generated		
				traffic.		
				The only jobs that this development will create will be to service the new		
				residents - school teachers doctors nurses shop assistants etc will not provide		
				one new industrial wealth creating job. there are around 4000 unemployed		
				people in Thanet more than enought to stisfy the needs of any employer		
				wishing to establish business here.		
				The people have spoken - we don't want these houses.		
Edmond	T & JM	362	Object	I consider the building of properties on farmland in Birchington a grave mistake	1059	Paper
Lumona	I & JIVI	302	Object	for the following reasons:-	1039	rapei
3						
				1) On leaving the EU we will need more farming land to supply our produce		
				2) The building of properties will only benefit the London boroughs and		
				increase unemployment in this area		
				3) Thanets QEQM hospital will need to be enlarged to cater for assumed		
				3,000+ population in Birchington, let alone other buildings in Thanet.		
				4) Local surgery will need to be enlarged with more parking area and more		
				doctors etc, to relieve what is overstretched at present		
				5) Water companies will need to supply more water and waste removal at		
				what cost?		
				6) More or enlarged schools		
				7) In future years all services will need to be increased an hopefully		
				government has considered this (Probably not!)

				centre of the village, wishing a semi-rural location. [redacted] fitted the bill			
				perfectly and since that time there has been no further outward development			
				·			
				of the village of Birchington. In fact, if you look at Google Earth and use the			
				tool to go back in time, the boundaries of Birchington have remained the same			
				since 1940, and probably earlier, with various plots having been infilled with			
				housing within those boundaries. The small area where I live enjoys a			
				wonderful community spirit – most of the neighbours know each other and			
				regularly chat. Dinner parties and get togethers happen often. Generations of			
				children since the houses were built in 1964/65 have enjoyed the safety and			
				freedom of our (once beautiful but now sadly neglected) green, and being a			
				cul-de-sac (with Nottingham Road) we have no through traffic so the road is			
				relatively safe. At the end of both roads we have wonderful views across the			
				open farmland, blighted in recent years by the hideous Thanet Earth			
				development which looks like a factory estate. (One questions how planning			
				permission was ever granted!). Across the Canterbury Road we can again enjoy			
				fantastic views across open fields, with Reculver Towers in the distance. On a			
				good day you can even see Canterbury Cathedral. This view in particular is the			
				one that is iconic of Birchington, especially as the sun is setting. I, and			
				countless other local people, regularly use the numerous public footpaths			
				across the fields for leisure, walking dogs etc. The land is not only used for			
				agriculture but for enjoyment too and quite rightly so.			
				This brings me to my first objection. The draft local plan notes: "The villages			
				retain their separate identity, historic character and have vibrant communities			
				and services" and "the open countryside between the towns and villages			
				remains essentially undeveloped, with a varied landscape, tranquillity and			
				distinctive views". Strategic priority 4 emphasises the need to "safeguard local			
				distinctiveness and promote awareness, responsible enjoyment, protection			
				and enhancement of Thanet's environment". Do TDC actually mean this or just			
				paying lip service? I would refer you to the document attached "Green belt			
				government policy" and to the particular purposes of green belt -			
				to check the unrestricted sprawl of large built-up areas			
				to prevent neighbouring towns merging into one another			
				to assist in safeguarding the countryside from encroachment			
				I would ask TDC how many hectares of precious green belt/agricultural land			
				has already been given up in Thanet over the last 20 years? In my time, the			
				towns have encroached onto what was once farmland – Westwood Cross			
				being a prime example, especially with the most recent contentious			
				development on farmland near Nash Farm (now, not only covered in "rabbit			

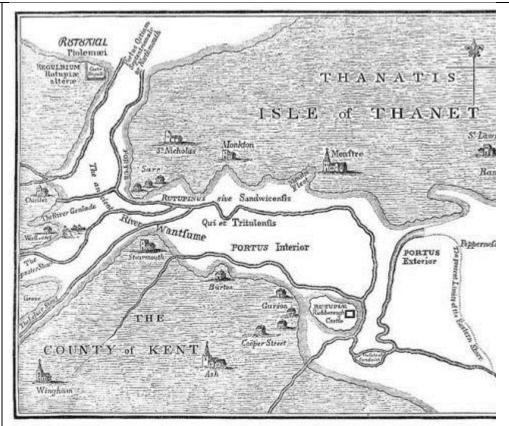

hutch" houses, but with commercial development also taking place by the likes of Hungry Horse). I would urge you to read this document in full as it contradicts TDC's plans. Gradually the boundaries of the towns and villages of Thanet have merged. We cannot allow further encroachment onto farmland by extending the outer boundaries of the main settlements. Look on Google Earth and see what the development of Thanet actually looks like and how much land has been lost already. I now refer you to the "Landscape Character Areas" published by TDC in 2012. The opening paragraphs are sufficient proof that the fields of Birchington should not be built upon: The study concludes that the former Wantsum Channel is a landscape of considerable historic importance, providing substantial evidence of centuries of natural physical change, human habitation and management, and that those elements of the landscape are worthy of protection. It also identifies long-held ideas about the Thanet landscape as possessing a gently undulating landscape, with few dominant natural features, shaped largely by arable farming combined with a historical lack of tree cover. Many of the texts comment on the unique openness of Thanet's landscape. The field study considered an objective and subjective assessment of local landscapes as seen from 67 different viewpoints in and around the district. It concluded that the views of the sea form a particularly important factor in Thanet's landscape qualities, as the sea forms the backdrop to marshes, agricultural land, urban areas and other landscape areas or features. It also provides a contrasting edge to the open countryside and the built environment. This is enhanced by the flatness of the landscape which enables the sea to be seen from some elevated or particularly flat inland parts of the district. The plots under threat in Birchington all look out over the Wantsum channel with the sea as a backdrop. You cannot allow this landscape to be despoiled. Once built upon, that landscape will be lost forever. Please read the entire document; TDC refresh your memories as there are many relevant points contained therein. The Isle of Thanet Local Plan 1998 included a policy protecting the important visual and environmental quality of major approaches to the Thanet towns and main gateways to the district. The Plan distinguished the landscape and long views, designating Pegwell Bay-Sandwich Bay as a Special Landscape Area, and the Former Wantsum Channel as an Area of High Landscape Value, with protective policies for each designation. It also included a policy protecting designated Local Landscape Areas at the Green Wedge Policy areas, Shottendane Valley (Margate), Gore End (Birchington) and Dent-de-Lion (Westgate). What was important in 1998 is just as important Now think about the impact that any development on all the plots relating to Birchington would have on tourism. People arriving by train would have the unedifying sight of a huge housing estate where once there were fields. People travelling by car, coach etc. on the Canterbury Road would see even more of the housing estate spreading across to Quex Park (which, as a main tourist attraction, I'm sure would be affected by this and as a result suffer reduced visitor numbers). Visitors to Minnis Bay in particular, which has always played host to families down for the day, and for longer periods, would be put off by the sight of it and would most likely turn round and go back, or not bother visiting Thanet again. People coming from London, Medway etc. and choosing

to visit Birchington, Westgate and Westbrook beaches don't want to be confronted by urban sprawl. This will have a knock on effect on traders in the village, on holiday rentals, on restaurants and pubs, B&Bs etc. and, ultimately, the whole of Thanet. Next you have to consider the wildlife that lives on or around these fields. The fields are regularly visited during winter months by the Brent geese, especially when wheat has been grown previously (due to the grain left behind). In addition, when out walking, I regularly see (according to the season and the crops) meadow larks, skylarks (they sing and fly upwards till you can hardly see them), corn buntings (very shy), the increasingly rare brown hares (which my dog when younger tried, unsuccessfully to chase, and I believe should be a protected species)[see http://www.hare-preservation-trust.co.uk/status.php], dormice, swallows & house martins (see them dipping over the fields catching insects and collecting mud in the rainwater pools), huge murmurations of starlings, spotted flycatchers, greenfinches, goldfinches, collared doves, various species of gulls, a family of jays live at gore end farm, stonechats, linnets, meadow pipits, pied wagtails, kestrels (I can see them hovering over the fields from my garden), rooks, bats, foxes, hedgehogs, and the farm at Suart Lane has beautiful barn owl which may be affected if it's hunting area is reduced; wildlife will be severely affected by any development and this must be taken into account. Just because you don't always see them doesn't mean they aren't there. Agriculture is the friend, and the co-dependant, of much of our native, and migrant wildlife. Bees are increasingly endangered. The crops in these field are co-dependent on bees. If the bees in Thanet disappear so do the crops, and any development of this area, being close to gardens and shrubland where various species of bees live could have far reaching effects. My next objection is that Thanet cannot sustain ANY more development, let alone 17,200 new dwellings, due to the water shortage in this area. We are in a stressed water area...we rely on aquifers for our water supply – build over the aguifers and surrounding farmland, the rain water cannot permeate to the aguifers, and the water supply dries up. Water is a finite resource. We already OVER abstract by +50%. We have no rivers in Thanet for abstraction or reservoirs; we are reliant upon the aquifers. A few years ago during a drought I saw a report where TV cameras went down into a borehole to show the severely reduced water level. It was at a critical level and a hosepipe ban was enforced. This is commonplace and water meters have been forced on us all as a result of the need to preserve water. Please refer to the document "The State of the Water in Kent". "Our rivers and groundwater provide a finite resource. In Kent we are currently using most of this capacity and in some places, exceeding capacity." If you refer to "Map 3 Recharge rates per CAMS groundwater unit" you will see that Thanet has one of the lowest recharge rates. More housing and more industry would abstract more water and the density would reduce the amount of rainwater recharging the aguifers. With climate change upsetting the equation still further we must protect the water we have. TDC planning officers said at the recent public meeting that Southern Water say they can cope. I dispute this; as a commercial business with shareholders they are more interested in profits. It is the people of Thanet who will pay the price, with more restrictions on water usage, hosepipe bans during dry spells and high bills. The water must be protected for now and for the future. You also have to consider the knock on effect to the Wantsum channel area, the Minster marshes and the Stour Valley – these areas could dry up. It

would be devastating and irrecoverable, resulting in a loss of habitat for a massive wildlife population. There is an underground stream that runs through plots S498 and S515. The farmer will support this. During winter months or after heavy rainfall there is an area that becomes a pond on the public footpath from Essex Gardens down to Minnis Bay. The fields become quagmires with footpaths too boggy to negotiate. The residents of Canterbury Road, Essex Gardens and Devon Gardens have experienced flooding. There is a pond at Brooks End, and on the Canterbury Road near Court Mount this was once the site of Birchington village pond. Naturally occurring ponds may have been filled in over time, but during heavy rainfall nature takes over. What effect will a housing development have on these areas? Unable to drain through the soil the rainfall run off will cause even more flooding problems. The houses at Brooks End, Canterbury Road, Essex Gardens and Kent Gardens could well find themselves under water. Geological surveys must be undertaken before any plans are passed, but this alone should be reason for agricultural land at Birchington to be discounted. See attachment SFRA volume 1 – it appears proper studies of groundwater flood risk have not been undertaken and one wonders if planners consulted with local people who generally have better local knowledge. And what about sewage? Southern Water appears not to be able to cope now! Every year we have beaches closed due to sewage outfalls after heavy rainfall, and this has a huge effect on tourism, not to mention the health of animals and people. The pumping station at Minnis Bay (Plumpudding) is often blocked - A few years ago, tankers were there for months clearing a blockage and taking away the sludge. This is a regular occurrence. The plots in Birchington have NO infrastructure for water supply, sewage, electricity, gas. The work that would be needed to put these services in place would be immense – how much disruption would that cause, with the heavy plant and equipment involved in such a project? The local people would have to put up with years of this – totally unacceptable. A new housing development on this major road will cause absolute chaos. Again, this will have a terrible effect on tourism. People will just stop coming to Thanet. If you look at the map below you will see the Wantsum flood risk area –that is why Birchington was built on a hill. The Wantsum channel silted up in the time of Elizabeth 1 as she would not pay for the dredging. However, with rising sea levels (look up the floods/tidal surge of 1953) Thanet has the potential to become an island again. When the English Channel was formed by the sea breaking through, an island of chalk was left on the east side of the county. It was separated from the rest of Kent by the Wantsum Channel. The Wantsum Channel was originally up to two miles wide, and as you drive towards the peninsular you can see where it once was. The Channel was protected by Richborough Castle at the western end (built by the Romans) and Reculver Fort guarded the other. The first bridge across to the island was built in 1485 and even as late as the mid 1700's there was a ferry from Sandwich. Over the course of the last millennium, the channel became silted up from the River Stour, and the shingle which was building up along the coast helped join Thanet to the rest of Kent. This is the main reason why the land is so valuable, why it is Grade 1. We must remember that Grade 1 land is rare. See http://publications.naturalengland.org.uk/publication/35012 The CPRE have produced a response to the draft local plan. I support them fully. The land, where the Wantsum Channel once was, is still only a few feet above sea level,

and in 1953 the island was cut off once more. The sea defences have since been strengthened, but if you walk along the sea walls from Reculver you will see just how low the land lies. Even today there are remains of the small harbours and quays in the villages that bordered Wantsum Channel (and there are remains at Brooks End). Even today it's still called the Isle of Thanet and the people of Thanet consider themselves to be islanders. Will the sea defences hold in the event of a huge surge? Only time will tell, but all those new houses could find themselves under water. Planners have to take geographical and historical facts into account and look at why settlements were built originally where they are. This ancient map of Thanet clearly shows the ancient Wantsum channel – with rising sea levels are we destined to once again become an island? There are

those who would welcome it.

A MAP of the Rutupian Ports, the ancient course of the Wantsume, and the present course of the River Stou space between the Island of Thanet and the County of Kent, sormerly covered entirely with wat being now all of it dry land as far as the Eastern Shore at Peppernesse.

It would be criminal to destroy this farmland when there are empty properties and land all over Thanet that could be utilised.

My next argument relates to the roads. North Thanet has one road in and out - the Canterbury Road. Birchington is a bottleneck due to the dual carriageway finishing at Brooks End and the mini roundabout at The Square. Every day, and even worse in the summer with day trippers, traffic backs up from The Square all the way down beyond Brooks End, often up to the St Nicholas roundabout. In the other direction it regularly backs before King Ethelbert School to the Westgate traffic lights. Rush hour in Birchington seems never ending but peak times (7am to 10am and 3pm to 7pm) are particularly bad. It is sometimes almost impossible, as a pedestrian, to cross the road, and pulling out of side roads such as King Edward Road can take up to 10 minutes. More housing will only add to the problem and TDC just don't seem to realise the extent of the vehicular traffic on our roads. Accidents happen on a regular basis and only time will tell if the new 50mph speed limit on the dual carriageway from St Nicholas roundabout will reduce their number, the summer months always being particularly bad. Side roads such as King Edward Road, Quex View Road, Park Avenue and Essex Gardens are already used as "rat runs" with people cutting through. These roads were not built for heavy traffic and are breaking up. KCC seem to be failing abysmally in repairing Thanet's roads (filling and patching is not working as the holes just keep opening up again) and eventually whole roads will have to be re-laid. Station Road has just been patched up...there are still potholes as the job has not been done properly. The Square in Birchington is known to be the most heavily polluted area in the whole of Thanet with pollution levels being monitored – what effect must this have on the people who live on this road or nearby? Extra traffic from

thousands of extra houses will add to the congestion and the pollution. Are TDC and KCC going to compensate the people who suffer health problems such as lung disease? Park Lane, where the local school is situated, is another dangerous and extremely busy road that was never designed for the volume of traffic that it already has to cope with. Pulling out of the junction with Brunswick Road you take your life in your hands and the parents parking outside the school only add to the problem. The junction at the top of Acol Hill has becomes busier and busier over the last few years with cars heading to Westwood...housing on those fields will make the traffic even worse. There seems to be no cohesion between the TDC and KCC who are responsible for highways. Representatives from KCC should have been included in the local consultation meetings...sadly there were no representatives from KCC, Southern Water or any of the utility companies, and TDC appeared, in my eyes, to pass the buck and not take any responsibility for these services. I object strongly to any development being started without a transportation management plan - roads need to be put in place first. In terms of the viability, development costs here and in Westgate will be astronomical to make this achievable. If the local people are to be able to comment on the plan properly then we must have complete answers to these issues. Next. Medical and ancillary services. The Medical Centre at Birchington was put into special measures last year as it was in dire straits. Many doctors and staff left the practise and it still has major problems. Trying to get an appointment is a joke. At least 3 weeks is the best you get. And with 36% over 65, the surgery has to cope with a huge elderly population. This also puts a strain on social services. QEQM Hospital is also in special measures. The Accident & Emergency department has been downgraded – serious trauma has to go (on a long journey) to Ashford. It is said that doctors just don't want to come to Thanet. I have personal experience with a family member of the 2nd rate service at the QEQM (my granddaughter through our insistence was treated at Chelsea & Westminster for a congenital problem that QEQM seemed ill equipped to deal with). An extra 25,200+ (minimum based on 2.1 people per dwelling – a figure given to me by a planning officer) people in Thanet, if 12,000 new dwellings are built, will make the demands on the medical services unsustainable. This will also effect mental health provision, nursing home provision, child protection agencies etc. What provision have TDC made for this as it appears to me to be none. One of the main contentious issues regarding these 12,000 houses is the possible influx of incomers, particularly from London Boroughs. Margate and Cliftonville have been known as "dole on sea", Kosovan City and numerous other names, due to the area being known as a dumping ground for asylum seekers, people being displaced from London due to high rents etc. TDC have not given us assurances that this will be prevented. Whilst 30% of the housing is designated as "affordable housing" this is misleading – we've all realised that this does not mean what we thought it meant. It's a misleading because it is social housing, not housing that first time buyers can afford to buy, which is the common misconception. Councils think they are fooling us by saying "affordable housing" but we have gotten wise to this http://www.theguardian.com/housing-network/2014/feb/03/affordablehousing-meaning-rent-social-housing https://www.gov.uk/government/collections/affordable-housing-supply

https://www.gov.uk/definitions-of-general-housing-terms When questioning the planning officers at Birchington's drop in, I asked if the remaining 70% of housing would have any restraints as to who could buy the properties. I was told there was no way TDC could put restraints on would be purchasers....so in effect, buy to let landlords, housing associations, London Boroughs etc. could purchase the remaining housing stock and the 30% social housing figure could become 70%, 80% or even 100%. Attached is a document FALP-Inspector-Report – further alterations to the London Plan. From this you will see that London is projected to fall short of its housing needs. This is why the people of Thanet are worried. Why should London allow private landlords to force tenants out so that they can then remarket the properties at high rents and then expect other areas to take those displaced people? Social cleansing is the scourge of London and a disgrace but we should not suffer because of it. In addition, where are those displaced people expected to find work? Thanet is an area of high unemployment and deprivation. An increase in social housing will put immeasurable strain on all services. Lack of paid council tax receipts and an increase in housing benefits will quite possibly bankrupt TDC. Birchington in particular is a village community that would be destroyed by a large influx of incomers, and social housing benefit claimants. We enjoy an enviable community spirit; although a large village, people talk to each other, make friends, help each other out etc. To conclude, I have left out many of the points raised in the local plan, not because I agree with them, but because my main personal concerns are that the proposed use of agricultural land in Birchington should be taken out of the plan, I am questioning the need for 17,200 houses overall, I am disputing the number of jobs forecast, and I advocate Manston Airport remaining as a functioning airport with only aviation related activities. Other documents used in the writing of my objections: https://www.gov.uk/government/policies/giving-communities-more-power-inplanning-local-development/supporting-pages/local-plans http://www.publications.parliament.uk/pa/cm201415/cmselect/cmcomloc/19 0/190.pdf http://www.guildford.gov.uk/media/15420/Local-Plan-Issues-and-Optionsdocument/pdf/Guildford borough Local Plan Strategy and Sites Issues and Options.pdf (what a shame TDC did not produce such a worth document!) https://www.gov.uk/government/uploads/system/uploads/attachment_data/f ile/5959/1896534.pdf https://excel.office.live.com/x/ExcelView.aspx?FBsrc=https%3A%2F%2Fwww.f acebook.com%2Fattachments%2Ffile preview.php%3Fid%3D64777691534842 4%26time%3D1425678079%26metadata&access_token=100001906038614%3 AAVI7q2PpQZw2J70YinGV7HCb-Dd95VZml8avXRsgEl4h8g&title=Country+of+birth+tables+2008+to+2012.xlsx This document shows how immigration is affecting the population of the UK – in Thanet we have had an upsurge of immigration in recent years. This is affecting the availability of jobs, and the availability of housing. It is my contention that immigration, which was unfettered during the last Labour administration, and which the coalition government have done little to contain, is having a direct impact on Thanet and the drafting of this local plan. Why should the settled local population have to put up with the consequences of failed government policies? If this link does not open see attached

				document. http://webarchive.nationalarchives.gov.uk/20100528142817/http:/www.gos.g ov.uk/gose/planning/regionalplanning/815640/		
Fearn	terranc	220		This development will be built on agricultural land that will in the future be needed for food production, QEQM cannot handle the needs of the local population as it stands and neither can the local Doctors and Dentist surgeries. Local schools also struggle and it is not enough to build new facilities without ensuring there are Doctors, Nurses, Dentists and Teachers willing and able to live and work in the area. Southern Water appear unable to deal with heavy rainfall at the moment and with extra development this can only get worse. Thanet already suffers from a water shortage and again extra development will only make this worse. Where is the employment for the extra people who move into these homes, there may be employment while they are being built but what happens afterwards. However that is assuming that these are not just for the London Boroughs to move their homeless into. Would suggest looking into getting unoccupied and 'run down' properties restored and building on brown field sites before even considering using agricultural land. Thanet could very quickly become another overspill development for London and having lived in Thanet for over 70 years I feel that it would not be a good thing.	667	Web
Fenlon	Fred	386	Object	Subject: Spoiling our Village. To Strategic Planning Team. My mother and father chose Birchington in 1977 to live, work and retire because they liked the quiet mood of this village. moved here 8 years ago for the same reason. It sound like what you want is to destroy the tranquillity of Birchington. We enjoy the views over the farm land which we need to provide our food for the future. To have space is what we moved here for. I feel that myself and other people living live here do not want the mess and contamination that the building works will bring. For a lot of these people it is their last years. I think it would be better to build on land not used for farming and to renovate dilapidated and unused housing all over Thanet. I believe there is room for some new homes but not what you propose. I'm told there are over 4000 unemployed in Thanet and you intend to expand that. Are the councils they come from going a pay for them? The landscapes will be destroyed and also the habitat for the wild life that also live here. In summary please rethink your plans to suit village life and not implode on the people who came here for what Birchington is. If you do anything at all it should not to disturb anyone or anything that lives here.	1135	Email

				Lack of medical facilities, hospitals are already unable to cope, it can take up to 3 weeks to get an appointment at the local doctors' surgeries. Delays in getting ambulances because they are queuing at the hospital and treating patients in the ambulances until they can be booked in, only to face hours waiting to see a doctor. Even if more surgeries are built and extra hospital capacity provided they need to be staffed, Thanet is no longer an attractive area to move to. Shortage of school places Detrimental effect on the tourist trade of increased traffic congestion, risk of sewage discharges onto our beaches and water shortages during dry periods For people in Birchington it is often quicker to get to restaurants and			
				superstores out of Thanet than it is to reach those in Thanet because of the traffic congestion and total lack of infrastructure Wildlife (including bats) and birds will have their habitat destroyed. The Council would do well to remember that the National Planning Policy Framework – Protecting Green Belt Land states: "The government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence. Green Belt serves five purposes: To check the unrestricted sprawl of large built- up areas To prevent neighbouring towns merging into one another			
				To assist in safeguarding the countryside from encroachment To preserve the setting and special characteristics of historic towns To assist in urban regeneration, by encouraging the recycling of derelict and			
Girdler	Mark	239	Object	other urban land. I object to the number of houses proposed for Thanet and in particular for Birchington. The infrastructure and facilities in Thanet are already stretched and operating over capacity. No new houses should be built in Kent until the facilities and infrastructure are in place to provide for them. It takes 3 to 4 weeks to get an appointment at a doctors surgery and most dentists only carry out private work which is only any good if you can afford it. The A and E department at the QEQM is operating over capacity at most times with waiting times up to 13 hours. These may be a NHS national problem but please explain to me how building 17,140 new houses will help any of the above problems.	Grade 1 Agricultural Land should NOT be built on.	725	Web
				Thanet has restricted access to the main arterial routes. The queues into Birchington from the A299 are at least a mile at peak times which is bad for the environment and pass right by the proposed new housing site. Birchington square has pollution levels well above recommended levels due to the amount of traffic passing through it. Access through Acol village has just had speed bumps fitted which means more queuing and slow moving traffic causing more and more pollution to the area. The traffic in the Westwood cross area is a complete nightmare and to be avoided at all times let alone peak times. We tend to head west from Birchington to Herne Bay and Canterbury and avoid Westwood as much as possible.			

	T					1	1
				matter what colour, race or religion the numbers are just too great and			
				affecting the quality of life of the local population. Building more and more			
				houses will only make the situation worse and put an unacceptable level of			
				demand on an already stretched water supply and sewage treatment in the			
				area.			
				The council applies strict rules on multiple occupation accommodation to avoid			
				overcrowding and this is regardless of the numbers of people requiring			
				housing. The same should be applied to the whole of Thanet with regard to			
				single dwellings to avoid overcrowding.			
Gooby	AR	270	Object	Building on Grade 1 agricultural land is a crime to this country. Why not use all	809		Email
				these empty buildings and brown field sites, most of which are in the towns			
				leaving the fields free to grow our food as we leave the EU. They may make it			
				difficult and more expensive to by food from them. What would happen if we			
				where to fall out compleatly with a country and not have the option to trade or			
				buy food at all.			
				If a lot of the housing is to become social housing from London where are the			
				jobs for them and the people that we already have unemployed (highest			
				unemployment in the country).			
				QEQM can't cope with what it has got now even with the proposed extension			
				to A&E. it is also closing the stroke unit to pay for it.			
				If the housing where to be built in the Midlands there would be more chance			
				of employment. By building over landeven more rainwater will be lost so			
				another water treatment plant will also need to be built.			
Gooby	Rosema	350	Object	My greatest concern regarding the proposed plans for up to 1600 new	1042		Email
dooby		330	Object		1042		Elliali
	ry			dwellings is that these buildings are planned to be located on Grade 1			
				agricultural land, the fifth best in the country. We need to be preserving this			
				land for agricultural use, especially as we leave the EU. We need to increase			
				self sufficiency and we also need to have control over how our food is grown.			
				My next concern is the burden that an influx of potentially 4-7 thousand new			
				residents will add to our already overstretched health and education systems			
				as well as essential services - water, drainage, sewage.			
				Other concerns are: traffic congestion and air pollution, particularly around the			
				Village Square; there is no proposal for extra secondary school places; leisure			
				facilities have not been mentioned - an increasing young population will need			
				sports facilities and youth clubs.			
Goodwin	Raymon	none 376	Object	I consider G.B. to be gradually more and more dependant on the supply of	1080	#169	Paper
	d g			foreign food, with world agricultural land diminishing due to climate		Goodwins	
				change. One of the major causes of this is over population, each human being		Raymond.pdf	
				breathing in oxygen and converting it into carbon-dioxide		(438 KB)	
				on expiration. Reducing child benefits but supplying free school meals would			
				discourage excess childbirth as the parents would not be able to incorrectly			
				use the child benefit!			
				People like myself could do loft conversions making the property multi-			
				occupancy, providing financial help was available, lessening the need to build			
				on agricultural land. Help given (financial) would allow farmers to multi - crop			
				each year.			
				Water which is in a precious supply in Thanet would be further rationed and			
				not then available to the farmer, due to increased density housing, when all			
				facilities, hospitals, medical/dental services are limited and further stressed by			
				increased population. Even shops will be overloaded and unable to compete			
				fairly with supermarkets.			

				Building on airport land would add to the 1600 houses planned, further		
				devastating the current limited facilities of present population!		l

Hambidg	R	343	Object	I am writing to oppose the Local Plan for housing on sites at Westgate-on-sea,	1028	Paper
е	'	3.3		Garlinge and Birchington.	1020	. apc.
C				The proposal to build thousands of houses on Grade 1 agricultural land		i
				adjacent to these three communities is in my view barbaric. Our local farming		i
				community is precious and should be awarded protection not only for		i
				the preservation of local jobs, wildlife and for our future but once that Grade 1		i
				agricultural land is built on there will be no turning back.		i
				I have lived in Thanet all of my life. Over the years my family and I have		i
				witnessed the barbaric loss of several delightful and architecturally stunning		i
				buildings to the greed of various developers in our lovely little town by the sea.		i
				Local bodies were not quick enough to award these historic buildings with		i
				listed status and now they are gone forever.		i
				I fail to understand why the term 'Local' is used to describe this plan. It neither		i
				represents the needs of the local people or any growth in our population.		i
				This plan only represents the needs of other areas who have failed to make		i
				adequate provision for their growing housing problems.		i
				The strain on the local Doctors (oversubscribed by 200 patients already),		i
				Dentists, Hospital, Mental Health Unit and Police would be unbearable. The A		i
				& E Department at QEQM. is already overstretched and now we have looming		i
				over us the loss of the stroke emergency care to Ashford a good hours drive		i
				away if the traffic allows.		i
				Our local primary schools cannot accommodate the number of applicants each		i
				year as the population stands at present and the promise of another infant		i
				school for Westgate quite honestly does not quell my fear for the future		i
				educational needs of this area.		i
				It has been stated by Southern Water that Westgate does not have the		i
				capacity to either supply water or dispose of waste water for the number of		i
				housing proposed in the earlier Local Plan, even greater numbers of houses on		i
				the new Local Plan can only exacerbate this problem.		i
				In the new local plan the projected new jobs in Thanet is 5,000 and the		i
				planned additional housing is 17,500 meaning probably a 35,000 addition to		i
				the population. These projections only spell one thing; many thousands of		i
				people either unemployed or having to commute out of area. If Westgate-on-		i
				Sea has the additional 2,000 houses as in the new local plan that equates to		i
				4,000 people trying to exit Westgate to get to their place of work because it		i
				will not be in Thanet.		i
				Westgate-on-Sea has a small Railway station with no parking facility so good		i
				luck to any commuters with your walk to the station and back after your long		i
				day at the office.		i
				Please rethink your plan. If more housing is absolutely needed, which I doubt,		i
				especially the numbers, they should be placed in an area that has easier access		i
				to out of the area i.e. The Thanet Way.		i

with listed status and now they are gone. The proposal to build thousands of houses on Grade 1 agricultural land adjacent to these three communities is in my view barbaric. Our local farming community is precious and should be awarded protection not only for the preservation of local jobs, wildlife and for our future but once that Grade 1 agricultural land is built on there will be no turning back I fail to understand why the term 'Local' is used to describe this plan, it neither represents the needs of the local people or any growth in our population. This plan only represents the needs of other areas who have failed over the years to make adequate provision for their growing housing problems. Southern Water has already stated that water supplies "half of demand" by 2030 and will be looking to encourage customers to use less even though here in Kent we the customers are among the most water efficient in the UK. Southern Water on the other hand is the worst water company for complaints as broadcast recently on local radio from official statistics. It has been stated by Southern Water that Westgate does not have the capacity to either supply water or dispose of waste water for the number of housing proposed in the earlier Local Plan, even greater numbers of houses on the new Local Plan can only exacerbate this problem. If the Government dictates to local Councils, these houses should be built then the infrastructure should be put in place first and funding supplied by the Central Government. Road building should be completed before house building starts. Thanet's roads are greatly congested and many in desperate need of repair. When repairs are made or when one main road is closed for repair, installations or accidents there is mayhem on all other roads with traffic at almost standstill. The strain on the local Doctors (oversubscribed by 200 patients already), Dentists, Hospital, Mental Health Unit and Police would be unbearable. The A & E Department at QEQM. is already overstretched and now we have looming over us the loss of the stroke emergency care to Ashford a good hours drive away if the traffic allows. Our local primary schools cannot accommodate the number of applicants each year as the population stands at present and the promise of another infant school for Westgate quite honestly does not quell my fear for the future educational needs of this area. In the new local plan the projected new jobs in Thanet is 5,000 and the planned additional housing is 17,500 meaning probably a 35,000 addition to the population. These projections only spell one thing; many thousands of people either unemployed or having to commute out of area. If Westgate-on-Sea has the additional 2,000 houses as in the new local plan that equates to 4,000 people trying to exit Westgate to get to their place of work because it will not be in Thanet. Westgate-on-Sea has a small Railway station with no parking facility so good luck to any commuters with your walk to the station and back after your long day at the office. Should any of the proposed housing go ahead the very least that should be demanded is a park. There is not one park in either, Westgate on sea, Garlinge or Birchington . There are two or three recreation grounds (NOT Parks) and in consideration to the fact that you will be removing the local open space which is a requirement to maintain the quality of life, it is vital that part of the plan

Hardy	Vivien	123	Object	for Westgate on sea, Garlinge and Birchington incorporates at least one decent sized park. Not much to ask when you consider that Margate has the luxury of three parks. Please rethink your plan. If more housing is absolutely needed, which I doubt, especially the numbers, they should be placed in an area that has easier access to out of the area i.e. The Thanet Way. I am writing to place my objections and concern regarding the local plan. It is concerning that grade 1 land is included in this plan as once built on there is no return. Our roads are already under strain living on the Canterbury Road the traffic is non stop and at peak times often at a standstill. More houses will mean more traffic causing even more problems. Our water table will not be able to cope Our hospital is under threat to lose its stroke unit when it could take at least 50 mins to get to Ashford hospital when we now how important those first 30 mins are We have a doctor shortage Inadequate roads or infrastructure And not enough work	277		Email
Harringt	Brian & Mauree n	475	Object	Understand that homes need to be built but on this scale it is madness We agree with all the items on the attached papper as reasons not build houses. Food, Special Soil & Countryside 1. This is Grade 1 Agricultural land. (Natural England) The soil quality is amongst the top fifth in the country. (CPRE) ', 2. Only 60% of food consumed in the UK is home-grown. (Nat Farmers Union, 2018) 3. The figure is expected to fall to 53% by 2040s. (NFU, 2018) 4. That 53% will have serious implications for the economy and unemployment (NFU) 5. "We think that it is perfectly reasonable to look at halting the decline in self sufficiency and reversing it.11 (NFU) But that won't be done by building over it. 6. Food security will be under greater pressure, with a prospective increase in the UK population of 13 million by the.2040s. (NFU) 7. Climate change and market volatility plus the possible stance of hostile nations in the future may make farmland of Thanet's calibre even more precious. 8. The standard of imported food may be lower than our own. 9. Future generations may be deprived of Thanet's remaining countryside. Our legacy to them will be urban sprawl. 10. The extent of the proposed 1,600 new homes for Birchington would radically alter the village's character. 11. Birchington's population is 10,000. This new influx will add 3,000 - 4,000 (Birchington Residents' Association) 12. Much of the proposed development may be to cater for homeless people from London boroughs. 13. 85% of people in 2015 wanted to see supermarkets selling more food from British farms. (NFU) 14. London's population is about 8.8 million, and is expected to reach 10 million by the early 2030s. Extra farmland that is more than one and a half times the size of London will be needed to grow the food for Londoners by 2031. 	1
Biodiversity	
This development will destroy wildlife habitats, including hedgerows.	
Endangered species such as sky-larks wm be at greater risk.	
Infrastructure	
9/29/2018 Mail - John Repsch - Outlook	
1. Even 15,000 houses could mean 4 people per house; that's an extra	
60,000 people who need jobs, schools, hospitals, water and other essential	
services, and would swell Thanet's population by a third. (David Steed, Thanet	
Gazette, 2017)	
2. This is already inadequate in providing Thanet with enough schools,	
social services and public transport.	
3. QEQM hospital can't cope with current demands.	
4. Birchington Medical Centre can't cope with current demands.	
Water	
1. "Thanet is vulnerable to water shortage and low rainfall."(CPRE)	
2. Aquifers are low at times of drought, increasing probability of hosepipe	
bans.	
Water bills may rise.	
3. Since 2011, there have been numerous reports of Southern · Water being	
unable to cope with heavy rainfall, and fined for illegal discharges into sea	
around Thanet.	
4. Widespread concreting makes more water run into drains. This water	
requires more filtering.	
5. Heavy rainfall can increase risk of flooding.	
6. Planting trees reduces risk of flooding.	
Unemployment	
1. The loss of farmland to housing will increase unemployment.	
2. Thanet's 4,020 unemployed is the highest in Kent. (Office for Nat Statistics,	
Aug, 2018)	
Air Pollution	
1. The Square is the most polluted spot in Thanet. (TDC)	
2. The proposed new roads will attract more motorists into Birchington.	
3. Building more roads and widening others simply attracts more cars onto	
the roads and fewer passengers onto public transport. Cars fill the space they	
are	
allotted. (Friends of the Earth)	
For many, the views of the local countryside, including Reculver, will be	
replaced by views of roof-tops. Natural landscapes are not enhanced by	
covering them in tarmac and concrete.	
Alternatives	
1. Restore run-down properties. There are more than 1,000 long-term empty	
houses in Thanet. (Kent online, Oct 20i 7) This is also more sustainable because	
it uses much less greenhouse gas than new-build.	
2. Disallow current properties to remain empty for more than six months.	
3. Use brownfield sites.	
4. Use financial incentives to encourage sole occupants of large properties to	
down-size.	
5. Encourage conversions of empty rooms above shops.	
5. Encourage conversions of empty rooms above shops.6. Encourage the renting out of flats and bed-sitting rooms.	

			r 5	the North, where brownfield sites in previous mining villages abound, as do rugged sites which are unsuitable for agriculture. (Money Week) 8. "When considering development proposals poorer quality land is to be used in preference to land of a higher quality." (DEFRA, 2017)			
Harris	Wayne	352	i	Losing Grade A farming land increasing unemployment. There are not enough schools in the area. The local hospital are under increasing pressure to cope so more people coming into the area will not help. I don't want to see the local area spoilt and we cannot afford to lose valuable top grade A farming land		1044	Paper
Harwoo	EM	351	Object I	I am totally against your plans for the building of thousands of houses in Thanet, particularly in Birchington where I live. All these new houses are to be built on top grade farmland, which is the fifth highest grade soil in the country. How is the country supposed to feed it self when the land is covered in concrete? Secondly where is the water to come from that all these extra people will need? Southern Water have no control of our water after it leaves Ashford 30 miles away. Our water quality at present is poor because of us being built on chalk which is very free draining and has large cracks in it. Also we are usually one of the first areas to get a hose pipe ban in the summertime. Another problem will be, effectively treating the extra waste water that will be produced. Thirdly, where are the thousands of people going to find work and be able to support themselves? We already have the title "Dole on Sea" and a lot of the work already in Thanet is on 'zero hours contracts' and people cannot plan their lives on that basis, nor can they live on it. Sea levels are rising and any new houses built in the Minnis Bay area in Birchington could be badly affected by flooding, as are the residents already living there. Fourthly, what plans are in place to provide all the extra medical aid people will require? Our hospital has difficulty coping now and we are already going to lose our stroke unit. Doctors surgeries are already overloaded with patients and several have closed all over Thanet. How will you cope with that situation especially with the thousands of extra residents? Also trying to get a dentist is a very great problem for many people at present. So what for the future? You must not keep concreting over our precious farmland and government		1043	Paper
Haydon	Trevor	309	Object \f	needs to be made aware of this. While it is vital that Thanet District Council considers the needs of the district for the coming years, and has consulted with residents about the content as presented, I cannot agree that this draft represents the views of Birchington residents, as expressed in response to the earlier draft, and neither does it take into account my own concerns that: "They make use of rural,	Scrap plans to put housing on productive farmland	920	Web

	, , , , , , , , , , , , , , , , , , ,		T		Т	
				green field, agricultural land a resource we'll never be able to recover". Further		
				to my comments you also appear to have disregarded the comments of our		
				own MP Roger Gail who states: "These proposals appear to conflict with Policy		
				SP26 and "the Protection of Open Space". Further, we must now consider, in		
				light of recent developments in regard to Europe, whether it is justifiable or		
				right to take farmland out of production (this is, after all, land that is currently		
				being farmed - it is not lying dormant) in order to build more houses and the		
				infrastructure to support them. I, therefore, raise the following, more detailed,		
				concerns:		
				1. The numbers of houses to be built in Birchington have increased to 1,600 -		
				There were considerable objections made to the building of a much		
				lower number of houses in the earlier draft, the increase in house numbers		
				brings with it the need to reconsider every other aspect of the plan for		
				Birchington and the village's ability to provide for the needs of increased		
				population.		
				2. Increased water consumption - Although it has not been necessary, at least		
				in recent years, to impose hosepipe in Birchington, the additional houses and		
				· · · · · · · · · · · · · · · · · · ·		
				more specifically, residents, will make this less likely as population increases.		
				3. Increased congestion and air pollution - The A28, which passes through the		
				village carries a lot of traffic and the draft plan points out very clearly		
				"Birchington Square lies on the main route to Margate for those travelling into		
				the district from the west, and as such at peak times suffer from traffic		
				congestion. This has also resulted in the area suffering from higher levels of air		
				pollution." You have not considered the impact this will have on the current		
				population. The A28 will experience increased traffic congestion, particularly in		
				the summer months when queues currently extend beyond the village		
				boundary and Birchington Square will suffer even greater levels of air pollution.		
				4. Increased waste - Water, Sewage and Refuse collection requirements will		
				increase leading in any event to increased land-fill and water treatment. Does		
				it raise the question of whether the number of sewage outflows would		
				increase during inclement weather?		
				5. Impact on wildlife - This development will destroy existing habitats, diminish		
				opportunities to provide additional hedgerows and impact endangered species		
				such as Sky-larks. The farmers in the local area currently make provision for the		
				bird population by leaving a proportion of the land (at field boundaries) to		
				form wildflower meadows.		
				6. The character of the Village - Birchington is able at present to maintain its		
				"village" feel (just), 1600 additional homes, retail provision, school and		
				enlarged medical centre would threaten this designation.		
				7. Employment - Where will the additional jobs come from and can we		
				guarantee that such jobs as are created go to local residents who will need		
				them?		
				8. Birchington Medical Centre is currently understaffed - I cannot believe that		
				increasing population will help them cope when there is no sign of them doing		
				so now.		
Hickman	Jane	313	Observ	1. Grade 1 Agricultural land	927	Paper
піскіпап	Jane	313		_	327	Paper
			ation	2. Employment 2. The post remaining country side for future generations will be gone forever		
				3. Thanet remaining countryside for future generations will be gone forever		
				4. Infrastructure. Sewerage. We always have flooding in our road, when it		
				rains. No ground for drainage To much cement, tarmac No gardens		

Hudson	Neville Birchingt 442 on Parish Council	Object	houses for the London borough overflow? Birchington struggles with to cope with the incoming traffic now, so how will it cope with the extra traffic + pollution. Birchington should be left alone, remain a village, we want to be able to enjoy fresh air, to enjoy open spaces, to enjoy wildlife, to have medical assistance when needed + all this for the future. DO NOT BUILD ON OUR LAND!! PLEASE!! Submission from Councillor Neville Hudson Birchington Parish Council In studying the amended local plan, it appears that very few of the objections	1269	Email

DO NOT BUILD ON OUR		
Hudson	P 3333	Observ	My husband + I moved to Birchington many years ago + have never lived in such a friendly place. We know our neighbours well, which in this day + age is a rarity, when we go to the village people smile, say hello. We feel content and safe here. So many of the villagers have grown up together or gone to the same schools. Thanet has the highest unemployment in Kent, so how do you propose to create employment for the families who will move into these houses. Unemployment leads to even more problems. Why build on quality farmland, if you look around Thanet alone there are so many large, unoccupied buildings that could be converted for rental ie how long has the B.Gas building + land* been unoccupied, * Boundary Road, Ramsgate? A time limit should be imposed on these buildings left unoccupied before they have to be sold. Talk to residents who occupy huge houses who want to move/downsize, who cannot afford to, offer some form of incentive! This would free up houses for families. Birchington Medical Centre is under huge strain already + struggles to give patients appointments less than 2 weeks away. How will this will be workable if the population rose dramatically? peoples lives will be at risk! These proposed houses will not be for the sole benefit of local people, will they be	1015	Paper
Hudson	Camilla 328	Object	5. Birchington Medical Centre under pressure now all these families 6. 60,000? We need jobs school hospital water etc. 7. loss of farmland will increase unemployment 8. 				substantial number of proposed new houses, is not only ignored but housing		
				numbers are increased to 1600 on grade one agricultural land.		
				Have all brown field sites and other development opportunity sites including		
				empty housing within Thanet been considered, properly researched, with a		
				reasoned view to reduce new development on our open countryside. Not		
				enough evidence to support this.		
				No evidence is offered as to how appropriate medical services and social		
				services will be delivered for the proposed increase in population. The current		
				services are already stretched to breaking point, with unacceptable waiting		
				times to see the Doctor that that patients are registered with. Care in the		
				community is often stretched in ways that make life very difficult, for the		
				particularly large percentage of elderly people in Birchington to		
				receive adequate time from care professionals, to suit their many needs. It has		
				been announced that QEQM Hospital is already losing some vital services. The		
				plan in some way should guarantee the future of a Major properly resourced		
ĺ				hospital in Thanet.		
				No evidence is offered to deal with the number of young people who will be		
1				needing secondary education within the plan time scale. Already local		
				secondary schools are stretched and have little If any additional capacity for		
I				, , ,		
				pupils above their existing entry numbers. No evidence is included in how Thanet water resources will be able to provide		
				·		
ĺ				adequate fresh water for the huge increase in housing across the Island, it is		
				well documented that we have potential shortages of this important resource;		
				this is also true for on- and off-site drainage. To say that the utilities will be		
				consulted and deliver the resources needed is not good enough. Details of		
				Positive costed plans that are guaranteed to be deliverable, should be included		
ĺ				in the submission.		
İ				The Highway proposals around Birchington are welcomed and should reduce		
				the continued environmental problems in Birchington Square. The proposal for		
i				one-way traffic in Park Lane will be helpful but is incomplete in not		
İ				recommending routes for traffic to use in the opposite direction.		
				It is suggested that all the new roads will be resourced from the proposed		
I				housing development this is only reasonable if some of development planning		
				gain resources are used to improve the quality of life for Birchington Residents.		
Hudson	Mauree	Birchingt 454	Object	Birchington Residents' Association objected most strongly in a petition to the	1301	Email
1	n	on		proposed building of new homes on Grade 1Agricultural Land. The original		
1		Residents		quantity of dwellings put before us has now increased considerably.		
				The demands on Birchington Medical Centre will increase considerably. The		
		Associati		Medical Centre at this present time is finding it hard to cope with the		
i		on		population as it stands at this present time, so any increase in patient numbers		
İ				will cause immense problems for Doctors, Staff and Patients.		
				Patients are already finding it difficult to get appointments with a Doctor, this		
				will only get to an unacceptable level.		
				Traffic will increase dramatically, with possibly two, three or four cars per		
				household. How will the roads in Birchington cope with this increase.? Parking		
				in Birchington at this present time is difficult. This will affect our local shops as		
				Westwood Cross will be very inviting, with free car parking for any length of		
				time.		
				Schools in Birchington are at near capacity, how will they cope with an influx of		
				the many pupils that will require to be educated.		
				Water is a necessary commodity, where will the water come from that will be		

Hurst	Pasama	505	Object	needed to serve the many new homes. Area's for young people to enjoy freedom are needed, with the proposed plan to build 1600 houses will deem this impossible. Members of Birchington Residents' Association object most strongly to the proposed increase in the numbers of houses to be built on our beautiful countryside. Once houses are built and concrete laid it can never be reversed.		121	Paner
	Rosema ry	505	Object	I moved to Birchington three years ago to enjoy a peaceful way of life in retirement - like many other people, I feel that Birchington's character will change completely, for the worse. The farmland is necessary for the people living here to be able to have access to food easily, also there will be great pressure on the NHS services and schools places. it will change the character of Birchington which is not meant to have a much larger community and bring in lots of social problems that occur with a community that will only move to Birchington for housing.		+ 21	Pape
lles	Joanne	319	Object	I write to express my grave concern regarding the Local Plan for 1,600 homes as proposed to be built in Birchington. The land earmarked for this is Grade 1 agricultural farmland and as such vital to the future sustainability for food production, integral to this is the level to which the water table needs to be maintained. Once this land is built on it cannot be reversed. In addition I am aware of a large number of houses and flats which are unoccupied and I am not convinced that Thanet District Council have exhausted all opportunities to bring these properties back into full use including Compulsory Purchase Orders. The housing market in Birchington is continually fluid and there is a regular quantity of properties for sale, does a demand for extra housing exist? This brings me to the next problem, the local amenities are currently stretched so without substantial investment the doctors surgery, schools and local road network simply will not cope with the additional numbers of people. I oppose this proposal and trust you will support the views of the local community by rejecting it too.	97	74	Emai
lles	G	394	Object	Letter of objection - The Local Plan - Reference Birchington I write to express by grave concern regarding The Local Plan for 1,600 homes as proposed to be built in Birchington. Isherwo od	John	223	Object	Yours sincerely This housing will increase Birchington's population by up to 40%. Main roads are inadequate at the moment, the increase in road traffic will be a disaster.	67	74	We

	1	, ,	<u> </u>			
				The proposed link road from the A28 to the Minnis Road will not have an effect		
				on the traffic going down the A28 to and from The Square, where currently		
				traffic jams happen every single day, this proposed additional housing will only		
				serve to increase the number of such traffic jams. Birchington Medical Centre		
				can't cope with its current level of work. This is an unemployment black spot,		
				where are all the jobs going to be created for these new residents, The land		
				being used is high quality farm land, poorer quality land should be used i.e.		
				TDC seem to have this dream that one day Manston will be a thriving airport,		
				its a dream, it won't ever happen, so why not use what is essentially a very		
				large brown field site to develop a whole new community, the developers to		
				fund new schools, improved road and rail access, medical centres etc. The		
				current views from Birchington looking out towards Reculver are stunning, this		
				plan will turn those views into a concrete jungle. Overall a poorly thought out		
				plan that I do not think reflects the views and wishes of the people of		
				Birchington, who you are meant to be representing.		
JACK	JAMES	Mr. 276	Object	I strongly object to the proposals outlined in the Local Plan as they affect	818	Paper
JACK	JAIVIES	1011. 270	Object		010	rapei
				Thanet and Birchington in particular. The proposed housing developments will		
				impact adversely on the overall quality of life in the District and indeed on the		
				wider community. Specifically:-		
				1. Unemployment in Thanet is high. A substantial increase in housing stock will		
				inevitably exacerbate the situation.		
				2. In general terms the local infrastructure is currently wholly inadequate for		
				the existing communities in Thanet. There will have to be massive investments		
				to provide additional schools, hospitals, roads, GP		
				surgeries, retail outlets, water, energy supplies, transportation etc.		
				3. If implemented, the proposals will adversely affect the air quality in local		
				areas which are already heavily congested.		
				4. The reallocation of top quality agricultural land for housing is a		
				serious mistake. Surely, given the inexorable increase in the		
				country's population in coming years, the need to retain high		
				yielding agricultural land must be a paramount consideration. The prospect		
				of the UK leaving the EU soon can only add weight to this argument.		
Johnson	Elisabet	Monkton 51	Observ	Providing a new school at Birchington may help provided places but it will not	128	Web

Kildaras	Polly	390	Object	Hello, I am writing to voice my opposition to the local plan of building in	1141	Email
				Birchington on Sea, Kent. For several reasons:		
				1. Cannot afford to lose green, open space-it can NEVER be made green again.		
				So important.		
				2. Infrastructure cannot cope with more people, cars, rubbish, etc. Our		
				schools, hospitals & roads are already up and over capacity.		
				3. Water- our supplies are already at breaking point without adding many		
				more thousands of consumers.		
				4. Beauty and character of the village will disappear under the weight of		
				people, losing it forever.		
				I believe that any building (and especially low cost housing) should be		
				concentrated in inner cities, like Margate. Re-generate the town centre by		
				tearing down dilapidated, empty, filthy buildings and replacing them with		
				underground parking, and multi-storey flats, modern and affordable. This not		
				only provides low cost living places, but it revitalizes the town centres, creating		
	1	<u> </u>		The state of the s	1	

				jobs, and vibrancy within the town centres, instead of fostering destruction and loathing of even visiting them. The most important reason for doing this is keeping green spaces GREEN and beautiful for all to enjoy. Forever. Really, its quite simple to achieve with a bit of common sense. Please reconsider and count my opposition as a resident of Birchington on Sea, Kent.		
Kingsma	Barry	152		I attended a meeting of residence at Birchington Centre recently. A was appalled to be informed, that far heeding any concerns we had about the sustainability of the previous draft plan, you are proposing increasing the number of houses for Birchington. • It would appear Thanet is having to accept a far higher proportion of the houses proposed for surrounding as a whole. • Birchington cannot cope with the 1600 houses planned. • We do not have any spare capacity of water at present to supply the area. • There is insufficient infrastructure at present; some services are stretched to the limit. • The mention of another entry level school, but • The senior schools would not be able to cope. They are full and have a waiting list! • The proposed relief roads do not appear to having any funding at this stage. • The A28 through Birchington is at the moment, gridlock everyday, and as a consequence we have some of poorest air quality in the area, by your own admission, this will only make it worse and endanger the health of it's residence. • Thanet has one the highest unemployment levels in South East. Where are the jobs? • Doctors Surgery close to breaking point at present and its getting worse. • 30% Social housing is far more than the councils own waiting list, so these will be filled by people from out of there area. • Our social services will not be able to cope. • All this at the expense of our Green Belt some of the best agricultural land in the country. • Why not utilize the large number of empty and derelict properties already in certain areas of Thanet as well as Brown Field sites	423	Paper
Kingsma n	Janet	154	Object	I attended the residents meeting on the 14th September and was shocked to hear that TDC are trying to have approved a Draft Local Plan that has now increased Birchington to 1600 homes, where is the logic in that. What notice have they taken from the residence of Birchington from the objections from February 2015. they have simply added more house. where is the justice in that. No Environmental Impact Assessment has been made Inadequate infrastructure: schools, social services, doctors, hospitals, public transport and roads the list goes on. The A28 in Birchington is unable to cope with traffic now Birchington has the poorest quality air by your own admission Thanet has the finest quality farmland in Kent and England. When BREXIT comes next march we are going to need our farmland to produce more crops. 30% Social housing is far more than the councils waiting list, so these are going to be filled from people out of our area, another drain on our Council	425	Paper

Langford	Andrew	170	Object	taxes. Wildlife habitat will be destroyed Aquifers are low at times of drought. Increase probability of hosepipe bans Widespread concreting makes more water into drains. Increase risk of flooding. Our legacy to future generations: urban sprawl. Thanet has the one of the highest unemployment levels where are all these people going to work! What is wrong with making use of all Thanet's empty properties? A very concerned resident I object on the following grounds: This is grade 1 Agricultural Land (source: Natural England). The soil quality is amongst the top fifth in the country Only 60% of food consumed in the UK is home-grown, and this is expected to fall to 53% by 2040 and will have serious implications for the economy and unemployment. Halting this decline in self-sufficiency won't be done by building over it (souce: NFU) Climate change, market volatility and the possible future stance of hostile nations may make farmland of Thanet's calibre even more precious	I believe that the following alternatives need to be considered: 1. Restore run-down properties - Kent Online reported in October 2018 that there are more than 1,000 long-term empty houses in Thanet. Restoring these properties is more sustainable because it uses much less greenhouse gas than new-build. Also disallow current properties to remain empty for more than 6 months 2. Use financial incentives to encourage sole occupants of large	490	Web
				1,600 new homes in Birchington will equate to an extra 3-4,000 residents. Birchington's population is c.10,000, and this massive increase will radically alter the village's character and (notwithstanding the proposed enhancements to infrastructure) place huge strain on resources. Birchington Medical Centre and QEQM hospital cannot cope with current demands, and CPRE report that "Thanet is vulnerable to water shortage and low rainfall". Southern Water are reportedly unable to cope with heavy rainfall and fined for illegal discharges into sea around Thanet. Planting trees and maintaining agricultural land reduces risk of flooding. Unemployment is likely to increase, Thanet's 4,000 unemployed is the highest in Kent (source: Office for National Statistics, August 2018) Air pollution in The Square is very high currently, and the proposed new roads will attract more motorists into Birchington	properties to down-size 3. Encourage conversions of empty rooms above shops, and renting out of flats and bed-sitting rooms 4. Use brownfield sites. For example, housing in the Midlands and the North, where brownfield sites in previous mining villages abound, as do rugged sites which are unsustainable for agriculture (source: Money Week) 5. A 2017 DEFRA report sums matters up perfectly "when considering development proposalspoorer quality land is to be used in preference to land of a higher quality"		
Lee May	A Raymon d	133 238	Object Object	Large scale housing projects are not sustainable I object to this development on the grounds that it causes the loss of Grade 1 agricultural land. We, in Britain, already import more food than we produce locally. If you equate Thanet Council's plans with hundred's of others around the country, similarly planning ahead, you get an idea of the scale of the potential loss of food producing land. Can we continue on a path of steadily increasing the importation of food as the land to produce our own food diminishes. In addition, I object to the affect of adding a potential population increase in Birchington of 5,000 plus. This would represent half of the current population. Is it sustainable? They would be hard pressed to classify it as a village in future!		322 748	Web Web
Mayhew	G	48	Object	its not good for the people who live on the edge of fields and are going to lose their views and quality of life. Over the years of building there will be noise and dumper trucks everywhere, what about public services, NHS, water supplies it will be overloaded in the areas. Its not about developers making money its about Birchington's quality of life. I moved here 25 years ago and I think I would have to move away if it goes ahead are you going to pay my fees for moving away. 				parking problems during the day for local residents along small roads		
		200		inadequate for purpose from building contractors etc.	20.4	
Noake	GE	280	Object	Thanet's Local Plan is "unsound" for many reasons below are the ones I	824	Paper
				consider most important:-		
				1) The sites listed at the top of this letter are "the best and most versatile		
				agricultural land" - Grade I farmland. The National Planning Policy Framework		
				(NPPF) Policy E18 - states that planning permission will not be granted for		
				development which would result in the irreversible loss of the best & most		
				versatile agricultural land, unless it can be clearly demonstrated that:-		

				a) the benefits of the proposed development outweigh the harm resulting from the loss of agricultural land. b) there are no otherwise suitable sites of nearer agricultural quality that can		
				b) there are no otherwise suitable sites of poorer agricultural quality that can accommodate the development.		
				Thanet District Council (TDC) stated in their strategic Priorities & objectives		
				that they would support & sustain the rural economy & recognise the		
				importance of the best agricultural land.		
				THIS PLAN FAILS TO ADHERE TO THE NPPF Policy AND TO TDC's own policy. To		
				build on this Grade I farmland will squander this irreplaceable asset and have		
				implications for the nations food security.		
				Insufficient effort has been made to identify alternative & brownfield sites for development.		
				2) The NPPF (p68 item 4) states that the planning system protect & enhance		
				valued landscapes. Sites S515 and S498 epitomize the Thanet landscape with		
				wide skylines & views to the coast this landscape will be destroyed by these		
				developments. These areas are feeding & roosting sites for Marsh Harriers & Wild Geese.		
				3) The Office for National Statistics has admitted it's growth projections are		
				wrong & has revised them down from 210,000 to 159,000 a year. Many local		
				authorities based their local plan on the higher estimate & an overoptomistic		
				estimate of economic growth.		
				Because national policy is holding them to the higher numbers they are giving		
				less weight to protecting villages from over-development - this is the case with		
				Birchington. It is referred to as a village but has not been afforded the same		
				protection as adjacent villages such as Acol, Minster or Monkton. The scale of		
				these developments has more than doubled - originally 700 dwellings, then		
				1,000 now 1,600 plus, nearby Westgate a 1,000 now 2,000. Thanet already has the second highest population density in Kent 13.7 persons		
				per hectare, nearby 5.3, Dover 3.7. It should be noted that Thanet is a severely		
				deprived area with many social problems, high unemployment, lower life		
				expectancy than the national average.		
				Services are already at capacity, the main hospital is being downgraded, Kent		
				Police have said Thanet's Local Plan does not meet requirements of sustalnable		
				development for "healthy communities".		
				Southern Water higlighted problems with supplying sufficient water when		
				housing numbers were 1/2 the new levels.		
				Thanet has one of the lowest rainfalls in the country relying on Aquifers that		
				run low at times of drought.		
				Proposed new roads are insufficient & not properly evaluated. The A28 the		
				main road into Thanet, is already frequently at a standstill. Air pollution is very		
				high particularly in Birchington square.		
				Essentially this Local Plan is building vast housing estates on the outskirts of		
				Birchington and Westgate, not "planning" at all but the worst example of		
				urban sprawl.		
				The Local Plan is unsound on numerous levels it needs complete revision & further consultation.		
Orpwoo	Patricia	168	Object	Thanet is a former island and is now a peninsula which means, with sea on	488	Paper
q O'bwoo	1 atticia	100	Juject	three sides, it occupies a restricted space. In addition the centre is, at the	700	1 apei
"				moment, occupied by Manston airport and agricultural farmland so that		
				housing and roads are concentrated around the coast. Thanet was a rural		
				community whose economy was boosted by the seasonal tourist trade, which		

is now vastly reduced. Instead it has become a favourite retirement area and, according to KCC in 2015, 36% of the residents of Birchington, for example, were over 65. This has put an enormous strain on our doctors, dentists, social workers and the QEQM hospital, which has some of the worst A&E figures in the country and finds it hard to attract doctors to the area. On many counts these plans, put forward by Thanet District Council (TDC) are not sustainable or viable. One of the major problems is the water supply. Thanet has one of the lowest rainfalls in the country and the lowest in Kent. There are no rivers or lakes and our only source of supply is the aquifer which Southern Water (SW) acknowledges is badly depleted. This problem was recognised in 1991 in a joint report by Kent County Council (KCC) and SW, who stated that the water supply was not viable. Various solutions were suggested including flooding the closed Tilmanstone Colliery near Deal, creating a reservoir at Broad Oak near Canterbury or desalination plants. The viability was again questioned in a recent report by SW whose only solution was that people would have to use less water. They have no current plans for supplying the new developments and have confirmed the supply is not viable, suggesting people will just have to use less water. In addition the water filling the aguifer is rainwater filtering down through the land into the aquifer. Much of this comes from farmland. If this farmland is lost and the area concreted over, that means even less water reaching the aquifer. Much of the interior of Thanet is Grade One agricultural land according to the East Kent Land Use Map and Natural England. That means that with a mild climate, plenty of sunshine and good soil, it is some of the best farmland in the country and can sustain up to three crops a year. With current questions about our future food supply, food security has become an important issue. Yet this Plan involves building the new houses on this very valuable land. Once the land is built on, it is lost for ever. Thanet is an employment blackspot with unemployment standing at over 20% according to figures from KCC. This amounts to some 4020 employable people, according to the Office of National Statistics (2018). Should the new developments encourage the London Boroughs to re-home people in Thanet, there would be little work for them and this would increase unemployment in an already deprived area where much of the work currently on offer is minimum wage and zero hours contracts. Birchington up until the 1950s was a rural village with many employed on farms and some transported to the nearby collieries (all now closed). The population, according to the census, in 1951 was 5081. This expanded by roughly a thousand every ten years until 1981 when it increased by 2,000 and had reached 12,200 in 1991. Originally, we were told we needed an additional 1,000 houses, but this has increased during the time. TDC has been working on its Plan to 1,700 new houses, or an increase in population of some 5-6,000. However, Birchington does not have the infrastructure to support a population of this size. We have one doctors' surgery, which is already struggling to cope according to the Care Quality Commission and two private dentists. It is difficult now to find a National Health Dentist in Thanet or neighbouring towns. The Queen Elizabeth the Queen Mother, Birchington's nearest hospital is also facing problems. Two local care homes have been closed down within the last year and there is a shortage of places for our elderly population as well as

	 				 	Т	
				provisions for Social Care. With our increasingly elderly population, the			
				situation can only become worse and the extra residents would be disastrous.			
				We have a PCSO (often taken for other			
				duties) and a Kent Warden to cover a population of now well over 12,000.			
				There is one primary school, Birchington Primary School, which, despite			
				the building of extra classrooms in the last few years, is now working to			
				capacity as is King Ethelbert the nearby outstanding (OFSTED) secondary			
				school. The only two main roads to Margate from Birchington are the A28 and			
				the Sea Road, which is in danger of collapsing because of erosion along the cliff			
				edge and a decision has been taken that, when this happens, it will not be			
				restored. Other roads around Thanet are narrow and dangerous rural roads.			
				Any planned new roads would need to be in place before development and			
				existing roads up-graded. These requirements are not definitely specified in			
				the Plan.			
				These are just some of the problems that affect Thanet and Birchington			
				in particular. Many of these queries were raised at the Draft Plan stage, but			
				TDC did not appear to listen and no substantial changes were made or			
				strategies outlined to cope with the problems. As the plan stands, it would			
				cause enormous problems for an already deprived area.			
Perryma	PJ	98	Object	Proposed development – Birchington Objection	221		Paper
n				The scale of the proposal would totally destroy the character of the village			
				The increase of traffic would result in chaos			
				Jobs. There is a shortage of jobs already in the area. Where is the employment			
				coming from?			
				Schools are already over subscribed, no secondary schools have been planned.			
				I OBJECT in the strongest possible terms to this development.			
Proctor	С	491	Object	Birchington Medical Centre has been unable to cope with increasing demand	1370		Paper
				and has difficulty in attracting new G.P.s. It appears that professional people			
				do not want to work on the Isle of Thanet. Even if extra facilities are included			
				in the housing development to accommodate the increased population, the			
				Local Plan will not work if they cannot attract the staff.			
				Do we need a thousand new homes in the village of Birchington? The			
				traffic congestion experienced regularly from Brooks End Hill through to the			
				Square			
				and along to Epple Corner is unacceptable. Changing the road layout will			
				not solve the congestion problem and it may well put an end to the success of			
				our			
				shops in Station Road. Birchington Square is already the most polluted area			
				in Thanet.			
				Birchington is a village with a population of 10,000 people. I suggest that			
				an increase of the estimated 4000 people will upset the balance and			
				unnecessarily			
				ruin the close community spirit that exists today.			
				In Birchington, the plan is to build the new homes on valuable Grade			
				1 agricultural land. The soil quality is amongst the top fifth in the country.			
				Once this land is replaced by concrete there is no going back. We need locally			
				grown produce and in the future, when we exit the E.U. it will be important to			
				us all. The farmers want to continue farming, but will they be given the			
				chance? We need these job opportunities.			
				The water supply will not sustain the increased demand required by			
				thousands of new homes. Thanet is vulnerable to water shortage and low			1

	I	<u> </u>		1			T			
						rainfall. Southern Water had threatened hosepipe bans recently. Climate				
						change means the probability of even lower rainfall in the future.				
						Rather than building on Grade 1 agricultural land, use the brownfield sites				
						and restore the run-down properties. Mary Portus highlighted the crisis in				
						Margate				
						High Street. suggesting that this area could be used for housing. If we want				
						to keep the chance for resurgence in shops, why not develop the flats above				
						these				
						shops. Decision on the Manston Airport has yet to be made and the				
						Government has consistently refused to back it. Will it prove viable for anyone				
						else? It is				
						probable that houses will eventually be built on this site and then of course				
						the number of new houses required, will need to be reduced. Building now on				
						the				
						Grade 1 agricultural land is unnecessary. Stop it now before it is too late.				
						The Isle of Thanet, surrounded on three sides by the sea, is a special case.				
						The plan, as presented, is flawed. Please consider the people who already live				
						here and let this part of the country develop in a more natural way.		1

Designer		Homes				but note changes are required to the draft policy wording and area presently			Reg 19 Local	
Homes						identified to be allocated in order for it to be effective and result in the most			Plan Reps	
						comprehensive scheme coming forward.			Final with	
									appendix.pdf	
						4.3 The proposed allocation boundary comprises land controlled by the			(64.9 MB)	
						Promoters (SHLAA sites 004, 005, 006, 008 and 009) plus land to the north-				
						west between the Site and railway line (SHLAA site 007), controlled by the				
						Church Commissioners (CC). A map is included of the proposed allocation,				
						indicating the landownerships, in Appendix 2.				
						4.4. The allegation represents an amended and increased site area and				
						4.4 The allocation represents an amended, and increased, site area and housing requirement than the previous version of the Policy SP14 contained				
						within the Preferred Options Consultation (January 2015) for 1,000 dwellings				
						(the Ptarmigan land), plus 90 dwellings on Land fronting Park Lane, Birchington				
						(the Millwood land) through Policy H02C.				
						4.5 The Promoters have subsequently collaborated to ensure the delivery of				
						a comprehensive development across the Site, including promoting additional				
						land through the Council's Proposed Revisions to Draft Local Plan (Preferred				
						Options) consultation (January 2017) and the March 2018 'Call for Sites'. The				
						majority of this land has subsequently been included in the proposed				
						allocation Policy SP14 (which also now includes the land previously identified				
						as Policy H02C), alongside the CC land.				
						as I only Hoze, alongside the celland.				
						4.6 At no time have either of the Promoters been approached by the CC. No				
						work has been undertaken to ensure this additional land can come forward				
						comprehensively with the Site.				
						4.7 A Development Capacity Plan is included in Appendix 3 which				

demonstrates the allocation land within the Promoters control can sufficiently		
support 1,600 dwellings alongside all other policy requirements. There is no		
need for the CC land to be included to achieve this.		
4.8 The Development Capacity Plan has been informed by technical work, as		
detailed in Section 5, which demonstrates the suitability of the site to		
deliver the policy requirements. To our knowledge, no such work has been		
completed for the CC land.		
4.9 The current policy requirements necessitate a development brief an		
d masterplan to beproduced for the entirety of the allocation, including the		
CC land. The inclusion of the CC land adds unnecessary complication and delay		
to the delivery of the allocation. This policy requirement should be amended to		
allow proposals to come forward for the allocation where they accord with a		
development brief and masterplan which delivers the policy requirements		
(i.e. not a development brief and masterplan for "the whole site").		
4.10. The inclusion of the CC land is uppercessary and not required. The		
4.10 The inclusion of the CC land is unnecessary and not required. The		
allocation boundary should be amended to reflect the Promoter's land		
interests. This should include the entirety of the Site, thereby reflecting		
existing field boundaries and the boundaries of land promoted through		
previous consultation exercises. The removal of the CC land will also ensure		
the allocation is suitably set-back from the railway line, thereby reducing the		
necessity for noise mitigation to be in place along this boundary.		
4.11 A Development Consists Dien is included in Appendix A subjet		
4.11 A Development Capacity Plan is included in Appendix 4 which		
demonstrates how the allocation boundary should be amended to include the		
entirety of the Site, to reflect and effectively utilise field boundaries. The		
allocation continues to provide for approximately 1,600 dwellings and		
other policy requirements, whilst responding appropriately to the more s		
ensitive areas, including providing a new interface between the urban edge		
and countryside.		
4.12 The increased ellegation areas ellegation are a great provision in terms of		
4.12 The increased allocation areas allow for an over-provision in terms of		
Green Infrastructure and Public Open Space, thereby assisting in reducing the		
Council's shortfall of open space as identified in its Open Space Strategy (2017)		
and ensuring a high quality green edge to the development.		
4.13 Furthermore, the increased allocation area allows the preservation of		
archaeological sensitive areas, which will be removed from continued		
agricultural use which is steadily degrading and destroying archaeological		
remains in this area.		
4.14 The allocation boundary should therefore be amended to that shown in		
Appendix 5 (i.e. the		
entirety of the Site) and the policy text amended to read (strike through		
text deleted, underlined text added):		
text deleted, diluci lilied text added).		
Land is allocated for up to around 1,600 new dwellings at an average maximum		
density of 35 dwellings per hectare net at Birchington. Proposals will be		
judged and permitted only in accordance with a development brief and		
masterplan for the whole site including provision within the site of in		
masterplan for the whole site including provision within the site of in		

accordance with a developmet brief and masterplan which delivers the		
following requirements:		
1) a new link road to serve the development and extending from Minnis Road		
and the A28,		
2) a minimum of 14 ha of open space		
3) a fully serviced site of 2.05 ha (to be provided at the cost of the developer)		
for a two-form entry primary school,		
4) small scale convenience retail provision required to accessibly serve day		
to day needs of the development.		
Phasing of development will be in accordance with Appendix B. The access		
road and serviced school site shall be programmed for delivery as agreed by		
the County Council as highway and education authority respectively.		
Development will be expected to provide an appropriate contribution and land		
for the expansion of Birchington Medical Centre.		
Masterplanning will be informed by and address:		
1) pre-design archaeological evaluation, 2) assessment of the impact of development on the junction of Park Land		
2) assessment of the impact of development on the junction of Park Lane		
and the A28, and the junction of Manston Road/Park Lane and Acol Hill		
3) liaison with service providers to investigate the need to upgrade the		
capacity of any utility services and infrastructure including gas supply,		
4) the need to preserve the listed buildings on the site and respect the setting		
of Quex Park,		
5) the need for integration of development and landscaping to enable a soft		
edge between the site and open countryside.		
6) appropriate noise mitigation for any development near		
the northern edge of the site which is adjacent to the railway line		
5.0 DELIVERABILITY OF LAND SOUTH AND WEST OF BIRCHINGTON		
5.1 The Site, at land south and west of Birchington, is located adjoining the		
existing village boundary, north and south of the A28. In total, the Site		
comprises 78.2 hectares of agricultural land.		
5.2 The majority of the Site has previously been included as a proposed		
allocation within Local Plan consultation documents (Reg 18 Preferred Options		
January 2015, Reg 18 Focused Revisions January 2017 and draft Reg 19 Pre-		
submission version January 2018). The updated allocation boundary		
reflects the sustainable nature of the Site and the necessity for the Council to		
identify further suitable and available housing land to meet its growth		
requirements. As detailed in the preceding section, the Site, without the CC		
land, can support the requirements of policy SP14.		
iana, can support the requirements of policy of 14.		
5.3 Development on the Site would help achieve the sustainable development		
principles of the NPPF 2012 which underpin the plan, including delivering much		
needed housing within the District, meeting the needs of the community and		
delivering a range of house types and sizes, including the provision of a		
significant level of affordable housing (i.e. 30% of 1,600 dwellings, equating to		
480 affordable dwellings.		
5.4 Over the course of its delivery, the development would support economic		
growth of Birchington and surrounding areas, providing new construction jobs		

and introducing a new labour force into the area with associated expenditure in the total exportancy. 5.5 Enthammore, the development would stronde extensive areas of new Green infrastructure, including formal and inframal areas of public open space, authorizing control to the first of the public open and producing and authorizing and authorized and an area arous, of lanctaceoing, providing area with ording in the built up area of brinding for the public open and promoting the public open and producing and program that reported in developing that or although any and accordancy with a processor that reported of housing delivery. Based on our knowledge of the Set and prior experience of the Promotings, in indicative belavity rapidicity in knowledge depending and producing and program and accordancy with a producing and program of the accordancy of public producing and program and accordancy and accordancy and accordancy and appeared. Appendix distributions are altered and accordancy

5.13 As required by the provisions of Regulation 105 of the Conservation of		
Habitats and Species Regulations 2017 (the 'Habitats Regulations') a Habitats		
Regulations Assessment report (HRA Report, July 2018) has been prepared on		
behalf of the Council to assess the draft Local Plan against the conservation		
objectives of any European protected sites that may be affected. The		
assessment concludes, subject to proposed mitigation and management		
measures, including through the use of a Strategic Access Management and		
Monitoring Plan and tariff (SAMM), there will be no adverse effects on any		
European protected sites as a result of the draft Local Plan, alone or in		
combination.		
5.14 The HRA report confirms that whilst the SAMM was initially drafted on		
the basis of a lower housing requirement the measures proposed can be scaled		
up to address the higher housing requirement. The Council will need to ensure		
this position is robust and adequately addresses potential adverse impacts on		
European protected sites and the council is encouraged to ensure this		
document is reflective of the Local Plan on site specific numbers.		
5.15 The HRA report provides, at Appendix C, a summary of the review and		
screening undertaken of the emerging policies at Preferred Options stages		
(including the 2016 amendments). No similar exercise is undertaken		
specifically for the draft Local Plan policies, however section 7.1 of the HRA		
report identifies the previous conclusions remain valid and there are no		
adverse effects on any European protected sites. Again, the Council will need		
to demonstrate robustness of this approach to ensure the plan is found		
"sound".		
Landscape and Visual		
5.16 A Summary Landscape and Visual Appraisal (September 2018, Appendix		
8) has been prepared		
to provide an update on previous landscape and visual work accompanyi		
ng previous representations for the Site.		
5.17 As detailed in the appraisal, following site visits and review of the		
published Landscape Character Assessments, the Site is considered to have		
capacity to accommodate residential development.		
5.18 The appraisal identifies a number of landscape sensitivities and		
opportunities for the Site, including the need to respect the setting of nearby		
heritage assets, the potential for integration of development and landscaping		
to enable a soft edge interfacing with the wider landscape, and the provision		
of a new 'green necklace' around the southern edge of Birchington to improve		
biodiversity and amenity.		
5.19 The Council acknowledges the acceptability of the Site in landscape		
capacity terms, proposing it as an allocation in the draft Local Plan.		
5.20 As concluded by the appraisal, the Site can accommodate the proposed		
development and provides an opportunity to address the stark urban edge of		
Birchington through the introduction of a softer transition incorporating new		
	ı I	

green infrastructure.		
Archaeology and Heritage		
5.21 An initial Heritage Desk-Based Assessment (March 2017, Appendix 9)		
identified the Site to have potential to contain buried archaeological remains		
of prehistoric through early medieval date, and recommended further		
archaeological evaluation be undertaken. Subsequently, through Geophysical		
Survey investigations (Appendix 10 and 11), it has been demonstrated there		
are particular areas of higher archaeological potential, together with other		
areas in which no features have been identified.		
areas in which no reacures have been identified.		
5.22 In liaison with Kent County Council, targeted trial trenching has been		
undertaken on Site, the results of which are included in the Archaeological		
Evaluation report in Appendix 12. This confirms the presence of archaeological		
features on parts of the Site which will be required to be preserved		
in situ as part of the Development.		
in situ as part of the Development.		
5.22 The Development County along the county of the County		
5.23 The Development Capacity plans have appropriately responded to the		
results of the archaeological work completed to date, with no built		
development shown on the preservation in situ areas. The archaeological		
sensitive areas will be utilised for open space and landscaping, where		
practicable, and thereby remove this land from ongoing agricultural use which		
is steadily degrading remains which will now instead be preserved in		
· · · · · · · · · · · · · · · · · · ·		
perpetuity.		
Drainage		
5.24 The Site is located within Flood Zone 1, at low risk of flooding from River		
or Sea, and therefore acceptable in this regards.		
0.000) and the electric acceptance in this regulation		
5.25 A Local Plan Technical Report – Flood Risk and Surface Water Drainage		
,		
(September 2018, Appendix 13) supports these representations and provides a		
summary of the technical work completed to date on the Site, including		
soakaway testing. The report demonstrates that infiltration is likely to be an		
appropriate method of surface water disposal for the Site.		
5.26 To help inform a future masterplan, and demonstrate a 'high level'		
approach to drainage, a preliminary concept drainage strategy is provided		
(Appendix B of the report) in accordance with required standards.		
Furthermore, a series of Sustainable Drainage Systems (SuDS) will be		
proposed throughout the development forming parts of the landscaping a		
nd biodiversity strategy for the Site.		
Air Quality		
5.27 It is acknowledged the Site is adjacent to the Thanet urban Air Quality		
· · · · · · · · · · · · · · · · · · ·		
Management Area (AQMA) which encompasses the main urban areas of		
Thanet. The majority of development across the district is likely to come		
forward adjoining this AQMA and therefore this is not considered to be a		
factor which would lead to the preclusion of the Site from allocation.		
5.28 Furthermore, the Site will deliver its part of the proposed Inner Circuit		
ring road, which will help direct traffic away from the urban areas and the		
AQMA (including the former AQMA at The Square, Birchington), thereby		
providing a beneficial impact with regard to Air Quality in the long-term.		

			, ,				
				Education 5.29 Kent County Council's previous consultation response to the January 2017 Reg 18 Focused Revisions consultation (April Newing; March 2017) confirmed increased education demand would be required for 6no. 2FE primary schools across the District including 1no. at either Birchington or Westgate strategic sites.			
				5.30 Subsequently, both strategic site allocations have increased (from circa. 1,100 to 1,600 at Birchington and from 1,450 to 2,000 at Westgate), therefore there may be an increased education requirement arising. Nevertheless, it is anticipated this will not exceed 2FE primary provision on the Site, and, as demonstrated on the Development Capacity Plan, land is allowed for this to be delivered. Should it be shown to be necessary, further land could be made available.			
Ransom		153	Object	The allocation of this site does not comply with the vision expressed in the Landscape Assessment "to conserve open arable farmland". This land is Grade 1 agricultural land, which should be preserved for future food production.	549	We	eb
Repsch	John	126	Object	SP14. More roads attract more traffic to fill the space allotted. The proposed link road would encourage traffic from the Thanet Way to ignore the A299 and instead take the A28. This would create more noise and air pollution in a residential area. This development would destroy wildlife habitats, including hedgerows. Endangered species such as skylarks would be at greater risk.	739	We	eb
Repsch	John	126	Object	SP14, No.2 The congested Park Lane/A28 junction would persuade motorists heading towards Birchington to take a short-cut by peeling off into the residential Quex Estate of Brunswick Road and then Park Avenue and King Edward Road.	740	We	eb
Repsch	Jill	381		I suffer from asthma, and I'm frightened of what the effects of building site dust would be. Lorries churning up dry dusty soil may make breathing very hard for me. Medication helps, but I can still be left with constricted bronchial tubes which leave me wheezing. I might have to move away, but I have no idea where to, having lived here since 1955. If, God forbid, there were ever another war, I wonder where our food would come from, given that we are getting rid of our highest quality soil at such an alarming rate. If people from South-east London were to be imported into Thanet, they would want the same way of life as they had been used to in London. Instead they would find themselves cast into a very strange-looking environment, missing many of the amenities with which they had grown accustomed and enjoyed. Margate could become a hotspot for the kind of gang violence that has been reported in London. Also, whether rational or not, a great fear for the people of Birchington is that some of the 5,000 or so newly imported neighbours might be tempted to break into the premises of those residents already here.	1112	Рар	
Rowe	Judith	216		There is not sufficient employment in Thanet for the number of new houses proposed. Thanet is not likely to attract new employers. There is no incentive for industry to move here. The airport will not re-open, neither will Ramsgate port. Thanet is already a depressed area, with high unemployment. Extra unemployed people moving to the area will put added strain on police and	658	We	eb

				social services. It is also not suitable for extra retired people, as again social care and health care is already inadequate. Thanet is not suitable for commuter dormitory as travel to London is still too far. The transport links, and road capacity, are inadequate. The schools and hospital, and GP surgery, cannot support current residents. Top grade farmland should not be lost. We are already under threat of food security due to idiocy of Brexit. There are many under developed brown field sites in Thanet, empty and under used buildings. Use these first. Penalise owners of empty/derelict buildings, and offer incentives for single people to downsize. Develop housing above retail premises. Smaller, studio sized apartments, suitable for singles, child free couples or retired or disabled would meet local needs better, especially if there were incentives for overhoused locals to move. Water and sewage services already strained. Pollution of the sea, and water supply and quality, are a concern.		
Satterth waite	Diana	109	Object	1 have been a resident of Birchington for the past 35 years and wish to place on record the following comments regarding the Proposed Local Plan for the area: Proposed housing on Grade 1 Agricultural Land - I oblect strongly to the proposal to build 1600 houses on grade 1 agricultural land around the Birchington area. Once the land has been used for housing it will be impossible to utilise it for future use. The area is being saturated with additional population but the farm land to grow food is being reduced. This will mean that more food will need to be imported, creating extra transportation, air pollution and following arexit unknown importation restrictions and costs. The land that is being built on will also reduce the amount of rainwater going into the aquifers, while the population to use water is being increased. Traffic congestion - Birchington is already struggling with traffic congestion and with a possible increase of 3200 more vehicles in the area (allowing 2 cars per household) there will be gridlock. Station Road is already struggling to cope and The Square is already suffering with high levels of air pollution. I am aware of the plan to build new roads and divert traffic away from The Square which would be a good improvement, providing this is in place before any building work starts. Utilities - my main concern is the lack of increased fresh water provision for the area. I have already commented on the reduced rainfall and increased usage following construction of the houses and as far as I am aware no plans are in place to address this problem. The disposal of waste water and sewage in this area already causes problems and the increase of population across Thanet will exacerbate this problem. Medical services - High on my list of concerns is the availability of Medical Services, both G.P. and	23-	Paper

				Hospital access. Our local Doctors Surgery has been struggling to recruit Doctors for several years and it is common to wait for 3 weeks for a Doctor's appointment, with the increase in population this will deteriorate further. I understand land has been put aside to enlarge the premises, but this will not assist with the recruitment of medical staff who do not wish to work in this area for various reasons. Our local Hospital (the Queen Elizabeth the Queen Mother Hospital in Margate) is already experiencing problems with recruitment and long waiting times for A & E services, again this can only increase. It is proposed to move all Stroke Services to Ashford which is at least an hour away (and in bad weather could be inaccessible as proved earlier in the year) so with an increased population again this will be exacerbated. General -The above points are the ones I feel most strongly about, but I am also very sad that the green spaces we have around Thanet will be lost forever. If this proposal goes ahead I feel there must be provision for green areas around the whole development, for walkers, cyclists, horse riders and wildlife.			
Sims	John	142	Object	I object to building on top grade agricultural land because this is needed to increase our self-sufficiency in food production. According to the latest reports the water supply, waste water and sewage arrangements are inadequate to support the number of houses suggested and should be fit for purpose before any building takes place. Thanet council has already allowed more building than it should and more will turn the area into one big housing estate. I am not sure that there will be enough jobs in the area to allow people to afford to buy houses unless they are definitely affordable. Can we be guaranteed this as part of the development or will they just be too expensive for young people to afford? The proposed improvements in infrastructure are not sufficient to counteract traffic delays and lessen pollution, or provide enough health care and schools. The council should consider people it represents opinions and consider the problems that would happen by making the area more densely populated.	Look more further at infrastructure changes to ensure issues can be fully resolved before building more houses. Consider using brownfield sites to put houses on and look at housing stock in Thanet that could be re-used if renovated, by forcing landlords to do this.	358	Web
Skelton	Heather	492	Object	This is an absolutely ludricous plan and will destroy the beautiful village of Birchington, where I am a member of the community. The infrastructure simply cannot cope. Even 15,000 houses could mean 4 people per house, potentially 60,000 people who need jobs, schools, hospitals, gas, water etc. This would swell Thanet's population by a third. Thanet is already at breaking point in providing adequate schools, social services & transport & this will exacerbate the problem. QEQM can't cope with current demands & neither can Birchington medical centre. Our house looks out onto beautiful countryside which I believe is Grade 1 agricultural land & amongst the top quality soil in the country. I do not wish to see the dessimation of a natural landscape in place of concrete & tarmac. Birchington Square is currently the most air-polluted spot in the whole of Thanet & increasing population & roads will add to this problem on a catastrophic scale.		1374	Paper

Smith	Robert L	314	Observ ation	Thanet already has the highest unemployment rate in Kent, more households would contribute to this problem, not to mention the jobs that would be lost through the loss of the farmland. There are several alternatives that could be explored to address housing needs, that could help to regenerate Thanet as a whole. I implore you to reconsider the destruction of this site that me & my family enjoy walking the dog, getting some fresh air & seeing nature as it should be. We love our village and Thanet as a whole but this is most definitely a mistake that will cost the residents of Birchington dearly for generations to come. The Birchington area is considered above air pollution standards set by environmental standard will not another number of vehicles generated by more housing make the problem worse. The employment that was estimated by Thanet Earth greenhouse site never came to pass as for Business Parks the number of industrial units for sale has grown over the recent years many lie empty, Thanet is not a magnet for business example empty Fizer site after		939	Paper
				years on market.			
Smith	Jenny	356	Object	The Birchington area is considered above air pollution standard set by environmental standards. Another number of vehicles generated by more housing will make the problem worse. Birchington & Westgate medical services, already stretched to capacity not to mention our local hospitals, clinics etc with mo mention of infrastructure schools etc we will all suffer.		1048	Paper
Solly	C	419	Object	[See attachment]	No Consideration arising of Village status with a large expansion of housing and infrastructure. This has not met approval from the people in Birchington or has been led by democratic need or change. Phasing Strategy may not deliver houses in the volume proposed Effects of Brexit and the change of economic activity in the area. Council decisions have increased risk of plan unsoundness. Community right to object has been ignored, which could be contrary to localism act 2012 Realistic Phasing should be made and complete (Manston Green not declared) Wording to ensure adequate water supply is available (Irrespective of IDP). Further investigation and mitigation for effects of Light Pollution especially from Thanet Earth Include wording to include assessment of historical monuments. Impact to Gore End in terms of Landscape as has been historically made in previous local plans and should be maintained, respected and enhanced. Include policy from 2015 draft that stated: Masterplanning will be informed by and address: 1) the need to clearly demonstrate how the SPA mitigation strategy as set out in Policy SP25 is being met and how it will ensure that development does not increase recreational	Solly SP14 comments.p df (8.6 MB)	Email

							pressure on designated sites, 2) a wintering and breeding bird survey to assess impact on bird populations within the district and the need to mitigate/compensate, Include in policy "appropriate contribution towards the Thanet Coast Strategic Access Management and Monitoring (SAMM) scheme" Ensure that the highway works is made before development of housing begins, the new roads will act as access roads to the new development sites. Ensure that key road links and changes to junction and road layout are covered in this policy and clearly stated. Ensure that original policies on the draft plan (2015) are represented in the published document. Assessment of the effect of development on Bat Species which is recorded in the area. Assessment of the effect of development on Bird Species which is recorded in the area. That Policy CCO5 should also be applied in respect to District heating That Policy HEO1 should be included in the policy, as there is archaeological interest. That the bridge to be widened on the single way road at Minnis road. That the junctions of Brunswick road are improved for safety as this is a high risk for accidents for traffic turning right out of the junction. That the 5 way junction at Canterbury Road, Mill Row, Essex gardens and Park Avenue to be improved. Contributions and policy should address the comments arising from the Open Space Strategy, Playing Pitch Strategy and

Stedman	Jennifer		111		Object	After an extensive perusal of the local plan I would like to put forward my objections as follows: 1. I am concerned about the rise in population for Birchington village. The objection is that no provision medically is made in the plan to accommodate this rise. 1500 houses could mean 4 people per house - an extra 60,000 people and Birchington Medical Centre and the QEQM cannot cope with current demands. 2. Thanet suffers at the present time with water shortages and low rainfall (CPRE). and Southern Water is not coping with heavy rainfall and is illegally		236		Paper

				discharging into the sea around Thanet. 3. The land proposed to be built upon is Grade 1 Agricultural Land. Once built upon this land will be lost to farming forever. With the expected growth of London's population extra (not less) farmland will be needed to grow the food for Londoners.			
Stedman	Trevor	169	Object	I have spent some time looking over the Local Plan and list below my objections: 1. The rise in population. The objection is that no provision has been made to accommodate this rise. 15000 houses could mean 4 people per house - an extra 60,000 people who will need jobs, schools, hospitals, water and other essential services and would swell Thanet's population by a third. How will Thanet cope as it is not coping already? 2. Birchington Square is the most polluted spot in Thanet - the proposed new roads will swell the amount of cars and pollution. Birchington is already gridlocked in the summer and even with new roads, the problem can only get worse. 3. The loss of Grade 1 farmland will have serious implications to both economy		489	Paper
				and employment and future generations will not have the benefit of Thanet's			
Stephen	Thomas	357	Object	remaining countryside. Once built on, it is gone for ever. The land to the south of the Garden Estate in Birchington is prime agricultural		1049	Paper
Stavens	Angolo	162	Ohiost	land - grade 1 listed and should never be built upon. The properties overlooking this land have rural views and this adds significantly to the value of the properties. If the home owners were compensated for loss of value, the compensation bill would run into millions. When the building work commenced much dust and grit would be thrown up into the atmosphere and this would cause a terrible pollution problem and when the prevailing south or south west wind blows this would blow the dust and grit into the village. This would pose a serious health hazard, particularly the elderly or those with chest conditions. Much has no doubt been written and discussed about the impact on the infrastructure, Hospitals, schools, public transport, doctors, dentist and the supply of utility services etc which are struggling to cope now. Birchington is not the place for house building on this scale.	Justify to MHCIC why Thanat should not have an influx of now	610	Woh
Stevens	Angela	163	Object	TDC should have submitted valid reasons why Thanet cannot cope with so many houses, not least because of being covered in prime agricultural fields. Also, see previous comments re ruining Thanet villages!	Justify to MHCLG why Thanet should not have an influx of new builds so huge it will ruin Thanet for ever! This should have been done by officers ages ago!	618	Web
Sullivan	J	91	Object	 The scale of the development is completely unacceptable and would destroy the character of the area A by-pass would be essential. The A28 going through the centre of the village already causes chaos and pollution. Primary schools are planned, where do the children go form there? The new houses would not benefit the local community or provide jobs because once they have been build, the labour force would move on and the new residents would commute elsewhere to work. I object wholeheartedly to the proposed plans. 		211	Paper
Swithinb ank	Mark	303	Object	I strongly object to the development of the housing (1600 new dwellings) and the proposed new road between Canterbury Rd. and Minnis Rd. for the following reasons 1. The proposed site is prime agricultural land, which if built upon would reduce the capability of growing local produce and increase food imports at a		884	Web

				time when we should be increasing local production. "When considering development proposals poorer quality land is to be considered in preference to land of a higher quality" (DEFRA, 2107) 2. The number of houses will increase the population by up to 60% (family of 2 adults and 2 children) There doesn't seem to be a plan for increasing the infrastructure to cope with this increase ie. schools, doctors surgeries, jobs, traffic, water and other essential services. 3. There seems to be no assurances that the proposed housing will be for local people and the fear is it will be used to house by London boroughs to reduce their housing needs not ours. 4. There doesn't seem to be a traffic survey of how much traffic the new road would take and the amount of pollution it would generate 5. Unemployment is already high in Thanet. Where are all these new residents going to find local jobs?			
Thacker	Andrew	515	Object	This is Grade 1 farmland which should be used to grow crops instead of building houses. And increasing the village population by potentially another 40%. We do not have the infrastructure or resources to cope with an increase of this size. Why not utilise some of the numerous derelict houses/flats/hotels/shops + factories in Thanet instead of ruining hundreds of acres of Greenbelt land + destroying wildlife habitat.		1535	Paper
tulett	robert	355	Object	 The use of grade 1 agriculture land. How are we to grow the food for our country when this is lost forever. Brownfield sites must be used for example Manston Airport Fresh clean water is in short supply in East Kent. there is no mention of where additional water is coming from. Employment lack of. 		1047	Paper
Twyman	Paul	324	Object	SP 14 should revert to the original	SP 14 should revert to the original	992	Email
Vincent	Scott	22	Object	My Objection is given at a high level. Bolting this many houses to an already overpopulated village in an area already struggling with regard to infrastructure is very short sighted. The road linking the A28 to Shottendane road is key to the transport strategy. However in the wording, more specific transport evaluation is given to the Westgate sites than those in Birchington. Surely significant transport planning at the source is crutial to future sustainability and viability. I note that the allotments have been removed from the plan, was this simply an error? I would also like to see more information regarding the type of development proposed ad where the extra dwellers were expected to come from?		38	Web
Vincent	Caroline	Birchingt 429 on Parish Council	Object	The Parish Council were not satisfied with the consultation on the amendments, they requested an officer to attend the public meeting particularly as the amendments had significant effects on the community and this was denied. The only consultation for the people of Birchington was a small box of papers in the library, this is considered unsatisfactory. On the 14th September a public meeting was held at the Village Centre approximately 150 people attended and the public voted unanimously against the amendments regarding additional housing on grade 1 agricultural land in Birchington as presented in the latest Local Plan consultation. At the Birchington Parish Council committee meeting members unanimously objected to the latest Local Plan with the proposed 1600 houses, which is considered overdevelopment.		1240	Email

		Birchington Parish council has considered the latest consultation and are particularly concerned in the following areas: 1. Insufficient attention given to the water supply. The Thanet area is vulnerable to water shortages. 2. Inadequate provision for schools with an increasing population. 3. Inadequate provision for medical services with an increasing population, the current medical centre struggles to cope with the current population. 4. Building on Grade 1 agricultural land will mean less locally produced products and more food being imported which also takes away local employment.		
		5. Lack of employment already in Thanet which has the highest rate in Kent. 6. The numerous objections from Birchington regarding the first consultation appear to have had no attention paid to them.		
walden	378	Object I object to the above plan because :-	1093	Email
		Destroying Grade A farmland Thanet have some of the best farmland in England it is ranked in the top five. To destroy this would be a national outrage . The UK needs to be self sufficient in producing its own food. The farmland also provides open countryside with fantastic views, lovely walks, fresh air (air pollution being a major problem in Birchington) opportunities to see wildlife such as hares, bats, stoats, numerous birds. Building on this would destroy what little countryside we have left in Britain. Future generations will be deprived of all this. Destroying Birchington Village. We moved to a Village we wish to stay in a Village not see it turn into a concrete jungle. Road infrastructure The A28 Canterbury Road is constantly blocked with traffic. People use the side roads as a cut through with more vehicles on the road it will be gridlocked. Hospitals, Medical Centres, Schools, Employment, Water All the above are stretched with our cure population, not enough adequate provisions have been put forward If provision for the above were put in place, build on brownfield sites NOT grade A farmland which is so precious

				the village of Birchington, which already suffers from high levels of pollution from traffic in the square, and a medical centre which is unable to meet demand. Furthermore, the majority of the land to be used for development would be high level agricultural land, which is completely unacceptable.	the whim of the developers. Agricultural land must be preserved to feed the nation.		
Wheeler	Guy	113		Birchington Specific Issues: On a practical level, the building of 1000+ homes on green field sites in Birchington is alarming for the following reasons: The water supply is dependent on a natural aquifer, and presently is unable to cope with the sewerage requirements for the area. The prospect of another sewerage plant at Minis Bay is incomprehensible. The proposed solution to pipe water in from a future reservoir at Broad Oak in Canterbury is unlikely to happen as land that occupies the pipe route is in private hands and unlikely to be sold for such development. Canterbury is expanding and it is likely any such reservoir would be only capable of supplying the city's needs and not outlying districts such as Thanet. The proposed new "Super Hospital" planned for Canterbury will have an adverse effect on water supplies in the Canterbury area. Kent County Council would be tasked with supporting a new road infrastructure, and have not detailed how they intend to deliver this (from a practical and financial perspective). Smaller access roads would fall to TDC and developer's, so far there is no evidence that any financial budgeting has been planned for the future to raise the funds required for this. The plan shows only minor road changes and has not detailed how the increase in traffic volume will be adequately catered for. The recent fire at Westwood Industrial estate saw a number of arterial roads either closed or heavily congestion at present traffic volume levels. To suggest that there are appropriate plans in place to cope with increased traffic volumes is unfounded. The philosophy of building houses first and then attracting employers and industry is a complete break with the traditional economic plan historically used in the UK, so why have TDC adopted this? History shows that industry is established first and then workers look to set up home nearer to their employer, not the other way round! Surely TDC are missing a trick here? Attract a number of employers/companies and get them to fund the road and utilit		242	Email

		1 1	Т		1	
				will have a more devastating effect on the community as it has the potential to		
				change the demographic in an unsustainable way.		
				Currently Birchington has a mixed populace of Retired and middle aged people		
				and young families. By far the highest percentage of social and welfare support		
				is tailored for the older generation (housing, medical, social support). If too		
				many young families are brought into the neighbourhood the council will be		
				faced with massive on-costs (schooling for example) and yet no proposal has		
				been included in the plan that realistically caters for the numbers projected.		
				Of a bigger concern is the prospect that the houses on the plan will be		
				purchased and populated by London Borough's for social housing; this goes		
				against the notion that the housing plan is for Thanet natural expansion. It is		
				one or the other, so, TDC which is it?		
				The spectre of increasing air pollution must also be considered, Birchington		
				already has poor air quality. With 1,600 homes in Birchington, will come the		
				prospect of 2000 extra cars on the road, hardly a step towards reducing		
				Thanet's carbon foot print! (note 12000 homes in total on the isle will result in		
				a forecasted 24,000 extra vehicles a day! You can't redevelop all of Thanet to		
				cope with this, just look at the current congestion hot-spots the Isle currently		
				"enjoys".		
				The local plan is reliant on the land owner (Birchington-St John's College)		
				realising a suitable sale price, I can't imagine many local developer's having		
				enough funds. This will then encourage out of Thanet developers, along with		
				their out of town work force to consider taking on the new builds. Hardly		
				bringing a cost benefit realisation to Thanet!		
				The sites proposed for Birchington are the exact same as the areas highlighted		
				by Southern Water as green no flood zones, hardly a surprise! But modern		
				technology now means that even areas that suffer a degree of flooding can be		
				utilised for building (Look at Netherlands, or closer to home, Norfolk and		
				Suffolk). And yet no consideration has been given to this alternative.		
				The Southern Water flood zone map shows fields along the dual carriageway		
				towards St Nicholas that could be built on and a new village/small town		
				developed. The road network would be suitable and there would be a		
				distinction between the new area nad Birchington, thus preserving the areas		
				integrity. Has this been explored and if so, where is the report?		
				The European Commission has launched legal proceedings against the		
				governments of Britain and five other countries for repeatedly breaching		
				legally binding EU air pollution rules. The prospect of an additional 24,000 cars		
				driving through Birchington everyday can only result in substantially increased		
				air pollution and an impact on the health of residences.		
White	Allan	406	Object	I am opposed to this for several reasons. the first is that Grade 1 green belt	1178	Paper
				land is to be used and can never be reclaimed. the land intended is amongst		
				the top five in the country for soil quality.		
				The next reason for opposition is the increase in population of the village. with		
				an estimated 60,000 people this will have a huge impact on jobs, schools,		
				hospital and all the infrastructure. There is already talk of the stroke unit being		
				moved from QEQM to Ashford. I don't think the NHS can take many more		
				patients. The medical centre is already under strain this could break it		
				completely.		
				In my opinion there are plenty of brownfield sites, old unused houses that are		
				unoccupied. It makes no sense to use such high calibre land with amazing		
				farming potential.		
				Lieutining Potential.		

Williams	294 Ob	There is already insufficient employment in Thanet to support the existing community let alone increasing the population. Inadequate provision already exists with schools and social services QEQM can not cope now Medical centres are oversubscribed Thanet has a low rainfall and therefore is vulnerable to water shortage. There have been illegal discharges into the sea in Thanet by Southern Water due to bursts of heavy rainfall. Loss of farmland will increase unemployment Aleardy Thanet has high unemployment Many beautiful views will be lost. Natural landscapes and access to open lands for walking aids good mental health This is grade 1 agricultural land. The quality of soil is amongst the top 20% of the country. Only 60% of food consumed in the UK is grown in the UK. This would decrease significantly with building on grade 1 land. Birchington's population is 10,000 This would increase by 3,000-4,000 Totally changing the nature of the village.	Restore run down properties. There are over 1,000 long term empty houses in Thanet. Use brownfield sites. When considering development proposals - poorer quality land used.	854		Web
Williams on George	407 Ob	lam writing to object to the proposals to build so many new homes in the Birchington and Westgate areas. Whilst I recognise the need for new homes I do not agree with the vast numbers of homes planned for this area. I list my reasons: 1) Population density: Thanet is an area of 103 square km with a current resident population of 134,000 people which is the 4th most populated district in Kent. Thanet has the 2nd highest density of population in Kent. 2) Unemployment: Thanet is already an area with a high percentage of unemployment and considerable social deprivation. The current unemployment rate for Kent is 1.9%. Thanet has the highest unemployment rate of 4.9% and worryingly the highest rate for 18 to 24 year olds in the South East at 7.5%. (source: Strategic Business Development Intelligence KCC. Please refer to photocopies A and B. Where are new residents going to work. The figures speak for themselves! According to the Local Plan there will be inward investment to create jobs, development of Manston Park (already a contentious issue), regeneration of of town centres (how and who will finance this?), Growth of the Port of Ramsgate (which has failed in the past), and new tourism related development. Surely it would be preferable to attract business and commercial development to reduce the existing unemployment problem before embarking on such a vast housing project? Housing: Affordable housing should provided primarily for LOCAL people, such as key workers and people on the Housing list. Housing should not be bought up by London Boroughs as this constitutes social		W G A B 1 W G	Villiamson George Janet Appendix B.pdf (45 KB) 11 Villiamson George Janet Appendix A.pdf (53 KB)	Paper

					Infrastructure: Thanet is currently suffering from a lack of services. The existing services such as schools, GP surgeries , QEQM are already overstretched. Consequently a large influx of people would therefore increase the pressure on existing services. Currently Thanet needs more GP surgeries, a walk in centre to help alleviate pressure on A and E at QEQM .Surely these issues should be a priority before increasing the population? The road network in Thanet is already overloaded leading to air pollution issues. Transport links need improvement. These issues must be addressed before any building commences. Environment: The Plan to build on prime farming land is totally unacceptable. The natural environment wlll be severely compromised due to overpopulation. Water supplies must be protected and light pollution issues addressed . Thank you for considering my comments (I hope!)

		Ltd		Buxton -		the some of the sites currently being promoted in the	draft Local Plan for increasing the			
				RPS		Local Plan to meet the Council's OAN over the Plan	housing allocation at Westgate on			
						period, and particularly the strategy to accommodate	Sea by 1,000 units or otherwise			
						the 2,500 dwellings which need to be reallocated as a	reduce the allocation to 1,000 units			
						consequence of the deletion of a mixed use	and allocate a wider range of			
						development at Manston Airport from the Proposed	additional housing sites to make up			
						Revisions to the Local Plan.	the shortfall.			
						The allocation for Strategic Housing Site SP15	A surley a surgery manifestical provisions			
						Westgate-on-Sea has increased from 1,000 dwellings in	Apply a more realistic housing			
						the 2015 version of the Local Plan to 2,000 dwellings in the Pre-Submission version. Again, we consider that	trajectory in Appendix B in			
						there is little justification provided for this 100%	recognition of the planning status of the site.			
						increase. The first 50 units are expected to be delivered	of the site.			
						in 2019/20 but with no planning application submitted				
						we consider this to be overly optimistic, and indeed,				
						unrealistic. The proposal must include a masterplan to				
						incorporate the provision of a District Centre, the				
						provision of community facilities and a new link road.				
						We consider that with all these matters to address the				
						Council has been too optimistic with the delivery of this allocation.				
						The NLP report 'From Start to Finish' (November 2016)				
						establishes that it takes on average 3.9 years from the				
						first identification of a site to the submission of the				
						initial planning application. NLP's report further finds				
						that on average its takes more than 4 years for an				
						application for over 500 dwellings to progress from the				
						validation to the decision date of the first applications				
						which permits the development of dwellings on site				
						whether it be a full, hybrid or reserved matters				
						application. This does not include the discharging of				
						any pre-commencement conditions if required.				
						Following the planning application being approved it				
						takes on average a further 6-12 months for schemes of				
						500 up to 1,500 units to start delivering units on site.				
						Therefore from validation to the delivery of the first				
						units on schemes of over 500 units it takes on average at least 5.3 years. We therefore contend from the				
						evidence provided within NLP's Start to Finish Report it				
						is unlikely that the strategic sites at Birchington (SP14),				
						Westgate on Sea (SP15), and Manston Court				
						Road/Haine Road (SP18) will deliver units by 2019/20.				
						Furthermore the NLP report identified the following				
						average delivery rates for greenfield sites:				

			On sites of 500 – 999 dwellings, the average annual delivery rate was 86 dwellings per annum; On sites of 1,000 to 1,499 dwellings, the average annual delivery rate was 122 dwellings per annum;		
			On sites of 1,500 to 1,999 dwellings, the average annual delivery rate was 142 dwellings per annum; and On sites of 2,000 or more dwellings, the average annual delivery rate was 171 dwellings per annum.		
			Appendix B to the Local Plan 'Housing Allocations and Permissions' sets a trajectory for Westgate which anticipates 200 dwellings per annum will be delivered from 2024/25 onward for a sustained and consecutive period of 7 years. We contend this is overly ambitious		
			and unrealistic. We therefore consider that this site (SP15, Westgate-on-Sea) is unlikely to be delivered within the proposed timescales set out by the Council. This in turn will have		
			knock on effects for the total number of units which can be delivered on this site over the plan period, and particularly the next 5 years. We therefore contend the		
			Local Plan is currently unsound as the Council is unable to demonstrate a 5 year housing land supply during the initial years post adoption and there are serious doubts that it will deliver sufficient dwellings across the plan period to meet the Objectively Assessed Need.		
			Therefore, the Council should consider allocating further sites for housing which can be delivered earlier in the plan period, including the land to the north (and south) of Millennium Way.		
Alan Byrne/English Heritage	155	Object	Policy SP13 - Policy SP18 -Strategic Housing Sites - notwithstanding the mentioning of heritage assets within the individual site allocation policies and the requirement to have regard to them in preparing	1002	Email
			development proposals, we are concerned that insufficient prior assessment of potential impacts on those assets has been undertaken in advance of the site allocations. We are unable, therefore, to fully		
			understand the likelihood or otherwise of impacts occurring that harm (or indeed preserve or enhance) the significance of the assets. For this reason, Historic England is unable to support these polices as they are currently drafted and suggest		
			HIAs are carried out to inform the policies in advance of the EIP. The policies may have to be redrafted in light of the assessments if potential for harm is identified.		
Andree	Karl 41	Object	(See also the not below on HIAs). As a long-term resident of Westgate I wish to register my strong opposition to any further developing and building of new houses in the area. Not only will this	92	Email

				put further demand on stretched resources and facilities but will also bring more cars on the local roads and damage the environment and encroach on valuable green. This will only bring benefit to the developers and spoil the environment and ambience for the current residents. I implore you to stop and not consider any further developments from being considered in Westgate and its environs.		
Attwood	Christine	97	Object	Unfortunately, I have been unable to attend the meetings held in Westgate-on-Sea regarding the current consultation and would like the following points to be considered: • The 2011 Census shows Westgate-on-Sea had 6,996 residents and 3,615 dwellings (3,255 households). The proposed 2,000 dwellings therefore seems excessive and would drastically change this small town with a distinctive village character. • The number of proposed dwellings would cause a significant loss of grade 1 agricultural land. Once built on it cannot be recovered. • The proposed dwellings would significantly affect residents of Wellesley Close, St Benets, Crofton and St Jean's Roads and those living at the Shottendane Road end of Minster Road by encroaching on their homes and denying them the views of greenery and wildlife they currently enjoy. • Primary schools in Westgate-on-Sea are already oversubscribed and the town's doctor's surgery is operating at full capacity • Doctor's surgeries elsewhere in Thanet have been having recruitment and retention issues. Many are not accessible to residents of Westgate-on-Sea by public transport. • Social affordable housing is required for Thanet residents not those of London boroughs • The lack of employment opportunities in Thanet	220	Paper
Austin	J	465	Object	I would like to say a few words regarding the talk of houses being built around the area of Westgate. It is not acceptable as there are not enough schools. Dr surgurys in the area, also Dentists The area is on Agriculture ground. plus it is flood ground.	1328	Paper
Bartlett	Н	370	Object	I am writing to oppose the housing sites proposed in the Draft Local Plan 2031 for Westgate-on-Sea and Garlinge. Firstly traffic impact an additional 2,000 homes could equate to additional 8,000 people (4 to a home average family) 4,000 cars as most people have 2 cars. The housing sites proposed are served by narrow or rural roads which are narrow and congested now and	1068	Paper

would be unsuitable for particularly heavy plant and
machinery needed to access proposed sites. Therefore
in particular Shottendane Road would need widening
and would mean loss of more farmland but if has to
occur should be done prior to any permission to build
houses and paid for by the building firms.
Impact on the environment and local landscape would
mean loss of prime agricultural land and goes
against Local Plan of keeping openness of countryside
which is a scarce commodity in Thanet. The Green
Wedges must be protected as one site west of Allen
Avenue has been offered for 130 plus homes which
would reduce the Green Wedge and with no thought
to access to proposed houses other than out onto
Shottendane Road (rural narrow road) or through The
Warren Drive which is narrow and along Lymington
and Linksfield Road which would not sustain heavy
vehicle use due to size of roads only just suitable for
cars. If building on Green wedges is allowed this goes
against Local plan of keeping each town or village
separate and the Council should adhere to section 4.12
under section of Green wedges which state they should
be protected, therefore joining Westgate-on-Sea to
Birchington and in the process wildlife habitat public
footpaths will be lost. Because farmland will be built
over future food production and farm jobs which goes
against Local Plan of promoting jobs in the Green
Sector will be lost. The field at Garlinge is also an
important heritage site so would be surrounded by a
housing development!
Local services are already under strain the GP surgery
in Westgate-on Sea cannot expand at present site.
The Queen Elizabeth Queen Mother Hospital already
over loaded and is in processes of being downgraded
which means patients having to travel further afield for
care impacting on surrounding
roads as far as Ashford.
Needs to be increase in provision of emergency
services and increase in police as crime rates will
increase.
No adequate school provision made local primary St
Crispin's already over subscribed without
additional housing being built Westwood Cross has
been allowed to expand without school
provision so additional problems in education already.
Where are additional jobs being created ? Thanet
already has high unemployment compared with
rest of Kent the Business parks are only 30% filled at
present time .Tourism is seasonal low paid
work and by building over farmland you reduce Green
sector jobs that the Council are so keen to
sector jobs that the coalion are so reen to

				promote. Manston airport is already closed unlikely to be viable as operational airport so houses should be built there as better road access already. Thanet has to have a local plan but this is contradictory and poorly thought out we have plenty of Brownfield sites but of course cheaper for companies to build on Greenfield as zero rated for V.A.T. and blight our countryside for future generations. Will the Council make sure houses are for Thanet residents first or will London boroughs buy them up creating more problems and making a dumping ground in Thanet. Thanet has been allocated to build more houses than anywhere else in Kent based on just taking the highest number of houses built in last ten years and not basing it on an average so because of this we have ended up with such a ridiculously high number of houses required to be built when a lot less needed.		
Barton	Jean	101	Object	I am writing to oppose the Local Plan for housing sites at Westgate-on-sea, Garlinge and Birchington. First I fail to understand why the term 'Local' is used to describe this plan, it neither represents the needs of the local people or any growth in our population. This plan only represents the needs of other areas who have failed over the years to make adequate provision for their growing housing problems. I have lived in Thanet all of my life and moved back to Westgate-on-Sea from Margate six years ago, back to the home I was brought up in. Over the years my family and I have witnessed the tragic loss of several delightful, architecturally stunning buildings to the greed of various developers in our lovely little town by the sea. Local bodies were not quick enough to award these historic buildings with listed status and now they are gone forever. The proposal to build thousands of houses on Grade 1 agricultural land adjacent to these three communities is in my view barbaric. Our local farming community is precious and should be awarded protection not only for the preservation of local jobs, wildlife and for our future but once that Grade 1 agricultural land is built on there will be no turning back. In the words of Franklin D. Roosevelt 'A nation that destroys its soils destroys itself'. Southern Water has already stated that water supplies "half of demand" by 2030 and will be looking to encourage customers to use less even though here in Kent we the customers are among the most water efficient in the UK. Southern Water on the other hand	226	Email

is the worst water company for complaints as
broadcast recently on local radio from official statistics.
It has been stated by Southern Water that Westgate
does not have the capacity to either supply water or
dispose of waste water for the number of housing
proposed in the earlier Local Plan, even greater
numbers of houses on the new Local Plan can only
exacerbate this problem.
If the Government dictates to local Councils, these
houses should be built then the infrastructure should
be put in place first and funding supplied by the Central
Government. Road building should be completed
before house building starts. Thanet's roads are greatly
congested and many in desperate need of repair.
When repairs are made or when one main road is
closed for repair, installations or accidents there is
mayhem on all other roads with traffic at almost
standstill.
The strain on the local Doctors (oversubscribed by 200
patients already), Dentists, Hospital, Mental Health
Unit and Police would be unbearable. The A & E
Department at QEQM. is already overstretched and
now we have looming over us the loss of the stroke
emergency care to Ashford a good hours drive away if
the traffic allows.
Our local primary schools cannot accommodate the
number of applicants each year as the population
stands at present and the promise of another infant
school for Westgate quite honestly does not quell my
fear for the future educational needs of this area.
In the new local plan the projected new jobs in Thanet
is 5,000 and the planned additional housing is 17,500
meaning probably a 35,000 addition to the population.
These projections only spell one thing; many thousands
of people either unemployed or having to commute
out of area. If Westgate-on-Sea has the additional
2,000 houses as in the new local plan that equates to
4,000 people trying to exit Westgate to get to their
place of work because it will not be in Thanet.
Westgate-on-Sea has a small Railway station with no
parking facility so good luck to any
commuters with your walk to the station and back
after your long day at the office.
Finally, Should any of the proposed housing go ahead the very least that should be demanded is a park.
There is not one park in either, Westgate, Garlinge or
Birchington . There are two or three recreation
grounds (NOT Parks) and in consideration to the fact
that you will be removing the local open space which is
a requirement to maintain the quality of life, it is vital
that part of the plan for Westgate, Garlinge and

Blewitt	John		35	Observation	Birchington incorporates at least one decent sized park. Not much to ask when you consider that Margate has the luxury of three parks. Please rethink your plan. If more housing is absolutely needed, which I doubt, especially the numbers, they should be placed in an area that has easier access to out of the area i.e. The Thanet Way. It is quite obvious that a new main relief road will be required. starting at Brooksend. Following roughly the route of Crispe Road, via Acol Margate Hill and Shottendane Road. This would relieve some of the extreme traffic congestion that already exists at the A28 Junction at Birchington Square and Minster Road Westgate. Also this route will be run mainly over	71	Web
Bottali	Denise	1962	325	Object	exiting farmland. I would like to register my objection to the Local Plan, with regards to housing being built on grade 1 agricultural land at Garlinge, Westgate and Birchington on the grounds that no such development should be given permission on land that is used to grow our food, especially with the uncertainty of Brexit looming. You should be using all brown field sites (apart from Manston) and compulsary purchasing empty and derelict homes across the Isle and renovating these for local people awaiting housing instead of lining the pockets of developers and playing into the hands of London's social cleansing, of which the Isle of Thanet cannot sustain such an increase in it's population.	999	Email
Bradley	Susan		171	Object	I have attended meetings regarding the proposed building of 2000 houses on Class 1 agricultural land between Garlinge and Westgate and write to outline my views on same: Firstly it is scandalous that you are proposing to build on class 1 agricultural land which provides food for the people of this country. Once this land is concreted over there will never be another opportunity to retrieve it again. Kent is not called the Garden of England for nothing. Currently the infrastructure in Thanet is not sufficient to service the indigenous population. By that I mean that there are not enough of the following: Hospitals (see 3) Jobs (see 4) School places (see 5) Appointments at Doctor's surgeries (see 6) Roads (see 7) Water (see 8) QEQM, our local hospital, is already in danger of having the stroke unit relocated elsewhere, which will endanger the lives of the residents of Thanet who will have to travel up to an hour to receive treatment. How	491	Email

can adding thousands more people to the equation	
help this situation. People will die as a result.	
Where are all these extra people going to find jobs?	
Thanet is already one of the most deprived and has	
one of the worst employment records in the country	
and many of its residents are in receipt of benefits.	
Thanet Schools are already overcrowded with class	
numbers rising higher. Where are the new children	
going to be educated. Are you going to build new	
schools?	
Have you tried to get an appointment at your doctors	
surgery recently? People have been known to wait up	
to three weeks to see their doctor. Thousands of extra	
people in the area are going to put even more pressure	
on the system ensuring that people will wait even	
longer to obtain an appointment. Again people will die	
As a resident of Linden Road, I frequently travel along	
Minster Road and Shottendane Road in order to reach	
Westwood Cross. Both these roads are narrow and	
carry a lot of traffic. With the proposed erection of	
circa 2000 houses, the traffic is going to increase	
hugely. This will increase pollution and increase the	
likelihood of road accidents. Especially as there are	
several schools (already oversubscribed) in the area.	
During the summer months, when the rainfall is light	
(or in the case of 2018, non existent) there is always	
the threat of a hose pipe ban. How will the addition of	
2000 houses assist in reducing the likelihood? It is very	
plain to see that this resource will be under threat and	
a hose pipe ban will become the norm.	
As stated in item 7, pollution is most likely to increase.	
This in a coastal area where fresh sea air should be the	
normality. Traffic on the Canterbury Road is already	
heavy and standing at a traffic crossing, as I frequently	
do, the fumes coming from the vehicles is toxic. I have	
thought of wearing a mask when walking.	
There are hundreds of empty properties in Thanet	
which can be utilised to accommodate families without	
the need to build on and concrete over sacred	
agricultural land. Do you really propose to build a	
concrete jungle which can then never return to its	
original purpose?	
Please consider the environmental damage that will be	
caused to the locality if all the fields and hedgerows are	
embedded in concrete	
To summarise, there appears to be no reasonable	
explanation as to why Thanet needs to be completely	
destroyed by building thousands of extra dwellings and	
which appear not to be destined for local people	
 · · · · · · · · · · · · · · · · · · ·	

				The country is overcrowded and this is as a result of		
				various governments' immigration policy over the		
				years. Now WE the indigenous population have got to		
				be punished as a result.		
Brown	Jacqueline	47	Object	Proposed 2,500 Houses to be built in Westgate on Sea,	114	Paper
	'		,	Kent		'
				Please accept this letter as formal letter of objection		
				against the proposed 2, 500 houses to be built In		
				Westgate on Sea 21,000 houses across Thanet in total		
				The reasons being:		
				Lack of suitable infrastructure:		
				1 Access - Only suitable roads for access are Minster		
				Road and Victoria Avenue to fields with proposals to be		
				built on In Minster Road; both of which are		
				purely residential, and are already gridlocked in the		
				mornings and evenings. The parking for cars of		
				residents is already abysmal. When Sainsbury wanted		
				to build a store on Canterbury Road, Westgate on Sea,		
				one of the main reasons for not allowing planning		
				permission was that there would be too much traffic		
				going into the Canterbury Road to be safe. This plan		
				would involve at least a further potential 2,500 cars		
				going from Minster Road or Victoria Avenue on to the		
				Canterbury Road every day,. whkh would pose even		
				more of a hazard. (Shottendane Road ∼s a B road and is		
				already highly hazardous)		
				2 Employment - There are no jobs, factories or large		
				shops in Westgate & Gariinge. There are no factories in		
				Thanet hence it is an area of high employment there is		
				no industry and further jobs ironically will be lost in the		
				agricultural area when the fields are built on taking		
				more employment opportunities away.		
				3 Margate hospital - The hospital is struggling to cope		
				with Thanet's current population level and there are		
				already long waiting lists. My husband has a heart		
				condition which results in him having to go into A&E at		
				times and the queues of people waiting to be seen are		
				atrocious. This will only worsen if this proposal		
				goes ahead. It was reported in the local media and I		
				think it may even have mad national news last year		
				Queen Elizabeth the Queen Mother Hospital had to call		
				in Red Cross volunteers because the staff who do an		
				excellent job were struggling to cope with the number		
				of patients needing attention. I can't imagine that		
				situation has improved. I have heard accounts from		
				work colleagues and friends who have had elderly		
				relatives having to go into QEQM of them having to be		
				kept on trolleys due to the lack of beds. The hospital's		
				Stroke Unit is also under threat of closure which would		
				put the people of Thanet's lives including my husband's		

at risk if forced to then travel to William Harvey
hospital in Ashford. Thanet has not got
the infrastructure to take this level of increase in
population.
4 - Local GPs Surgery - The surgery in Westgate Bay
Avenue is already over subsribed. Westgate is not a
suitable area to take such a huge expansion in
population.
5 Dental Surgery - There Is only one private dental
practice in Westgate
6 Schools - The local schools are already full and
increases in class sizes to cope with the larger number
of children in the area would be to the detriment of
children's education and well being.
7 Water and Sewage - There is already inadequate
water on the island, which often leads to water
restrictions during in summer. I wonder if the reasons
there were no restrictions this summer was because
this was just around the corner and would have added
further weight to this argument! The sewage plant at
Broadstairs is already prone to overspills into the local
bays which is not good for tourism the risk of likelihood
of this occuring would greatly increase. The treatment
plant is working at it's full capacity and would not cope
with the proposed level of new housing.
8 Westgate is already at capacity of population with
around 6,996 people taken from 2011 census. The
town has taken as much development in recent years
as it can accomodate. This scheme could see this rise
again four fold. The roads are filthy as it is. For example
the top end of Victoria Avenue. This situation can
only deteriorate further with a 2,500 new homes!
There is limited vehicular access in the area due to cars
having to park on the roads, pavements and verges as
the roads in the area have terraced houses, Victoria
Avenue, Belmont Road, St Benet's Road for example.
There are areas in Thanet which are rundown and
derelict putting new houses into these areas would
actually enhance Thanet. These opportunities
should be used instead of green field sites. This is the
easy option for developers and maximises their profits.
This is the main reason for this for property developers
in London to free up very expensive land and housing
in the capital and for developers locally to make
massive profits.
9 Thanet is an area of high social deprivation already
with high unemployment levels. The majority of the
isle's children leave school with low aspirations and
little hope of finding employment as it is. If the
population is increased by the levels these proposals
would bring, this make this will sink Thanet into higher

levels of social deprivation. Indeed Thanet isn't suitable
we have enough problems and issues already.
Loss of valuable agricultural land and habitat for
wildlife
1 The fields are important to grow fresh food, produce
from companies growing hydroponically just doesn't
taste the same as that grown in s-Oil under natural
conditions. This factory growing of crops and also looks
to use a huge amount of energy if the light pollution
from Thanet Earth is anything to go by. If our fields
are built on this will mean having to import more food
from abroad leading to higher costs and larger carbon
footprints.
2 The fields provide a habititat for small mammals and
invertebrates. Birds use them to hunt or forage for
food. Currently walking along the verges to the fields
you can see birds hovering above the fields they will
lose a vital hunting area if this plan is given the go
ahead. Our green spaces are precious to our
indigenious fauna. One of the many species of birds
that make their home in the fields on Minster Road are
Skylarks which are protected and under threat. The
hedgerow supports pollinators such as bees and
butterflies vital for a healthy planet and again they
are under threat as is widely reported in the media. My
family and I great value living dose to the fields and
feel privileged to see the flora and fauna it supports on
our walks along side them,
We are living in an increasingly unstable world if war
were to break out in the future and we have concreted
over our agricultural land and are unable to grow our
own food the people of this country would be in a very
precarious position. We can't just plan for now we
have to think what could happen in 20, 50, 100 years
from now because once we've lost this land there is no
getting it back.
Increased Risk of Flooding
The fields help to soak up water during periods of
heavy rain without them the area could be at greater
risk of flooding. Has the council consulted the
Environment Agency about this-? If so is the report in
the public domain I live very close to the fields in
Minster Road which are under threat of development
so would be directly affected by risk of flooding:
Summing Up
I think the housing policy in the local plan needs to be
rejected and proposed number of houses to be built
hugely reduced and vacant buildings both
residential and former businesses should be used along
with brown field sites. Agricultural land and all green

_						
				spaces should be left as they are. The architects need		
				to think smart to use the vacant buildings and brown		
				field sites to maximise the number of dwellings. Car		
				parking should be put under ground to create more		
				space. With communal gardens including a vegetable		
				plot and children's play area as well as an area for		
				residents to enjoy beautiful flowers and get together		
				for picnics and barbecues instead of individual tiny		
				gardens. We need to create communities I sincerely		
				hope you will take the issues and points I have raised in		
				this letter into consideration when making your		
				decision and will opt to reject this proposal. I also feel		
				there should be a government enquiry into this as once		
				the land is gone the decision cannot be reveresed and		
				we have lost it forever		
Brown	Stephen	110	Object	Please accept this letter as formal letter of objection	235	Paper
DIOWII	Stephen	110	Object	against the proposed 2, 500 houses-to be built in	233	Γαρει
				Westgate on Sea		
				21,000 houses across Thanet in total		
				The reasons being:		
				Lack of suitable infrastructure:		
				1 Access - Only suitable roads for access are Minster		
				Road and Victoria Avenue, both of which are purely		
				residential, and are already gridlocked in the mornings		
				and evenings. I experience this every day in journeys by		
				car on this road; as it is I consider this to be one of the		
				most dangerous roads to drive along in Thanet.		
				2 Employment - There are no jobs, factories or large		
				shops in Westgate & Garilnge. Thanet is an area of high		
				employment there is no industry. I am not convinced		
				by projections of new jobs being brought to the area		
				and can only see short term employment brought in		
				the construction industry. Long term these proposals		
				will lead to higher unemployment in the area.		
				3 Margate hospital - The hospital is struggling to cope		
				wtth Thanet's current population level and there are		
				already long waiting lists; I have several severe		
				health conditions including a heart problem which		
				means I have plenty of experiences myself and of		
				observing the queues of the people waiting to be seen		
				at		
				Queen Elizabeth Queen Mother hospital. The staff do		
				an admirable job trying to manage this at the present		
				time. The situation would greatly worsen if more		
				houses are built in Westgate and Garlinge and I worry		
				from a personal level how this would impact on me.		
				The condition I suffer from Atrial Fibrillation puts me at		
				·		
				a higher risk of suffering a stroke if the stroke units at		
				Margate and Canterbury are closed down and I had to		
				travel to William Harvey hospital in Ashford I believe		
				this would put me in greater danger as all advice with		

strokes is to be treated as soon as possible time is of
the essence in achieving a good outcome so another
huge worry I have is that the stoke unit at my nearest
hospital will be closed down.
4 - Local GPs Surgery- The surgery in Westgate Bay
Avenue Is already over subscribed. Currently it has
registered over the 10,000 patients it was built to
serve and has been extended to it's full capacity.
Westgate is not a suitable area to take such a huge
expansion in population .
5 Dental Surgery - There is only one private dental
practice in Westgate so would be unable to support
such a rise in population.
6 Traffic Congestion across Thanet - Whereever you go
in Thanet you get caught in traffic jams which causes
stress and frustration to road users. You need to allow
at least an extra half hour for any appointments to
ensure being there on time. I am also concerned about
the pollution all these stationery vehicles are
producing.
7 Water and Sewage - There is already inadequate
water on the island, which often leads to water
restrictions during in summer, and the sewage plant at
Broadstairs has in the past had overspills into the local
bays which is not good for tourism. Margate is just
building this up with the Turner and Dreamland effect
these proposals threaten to undo all the good work
that has gone into regenerating Margate so far. The
treatment plant is working at it's full capacity and
would not cope with the proposed level of new
housing across Thanet.
7 Westgate has already more than reached it's
population capacity. Thanet has already taken more
than it's fair share of development and already has 3
times over the average for Kent 439. The Thanet
average is 1368 which goes a long way to explaining
the problems already covered in earlier points the
traffic chaos, huge strain on the local health service
providers at the hospital and in the local
practices across Thanet. High levels of unemployment.
There are around 2000 empty properties across Thanet
which should be utilised to provide for local housing
needs.
Loss of valuable agricultral land and habitat for wildlife
1 The fields at risk of being built on are prime
agricultural land which serves a far more valuable
purpose in it's currrent use to grow food. This scheme
blatantly contradicts the government's plan for
agricultural self suffiency post Brexit. If we can't grow
our own food in this country we are going to have rely
on costly food imports. Kent is the garden of England

				we should preserve our fields which are iconic parts of our landscape, it is a huge part of Kent's identity. Once we have lost this land we cannot get it back. 2 The fields provide a habitlat for animals and insects. Birds use them to hunt or collect seeds and plants for food and small birds nest in the hedgerow. Every day I walk with my dog along the verges to the fields I see birds hovering above the fields they will lose this crucial hunting area if this plan is approved. Our green spaces are precious to our native species. One of the many birds that make their home in the fields on Minster Road are Skylarks which are protected and under threat. The hedgerow running beside the fields provides pollen and nectar for bees and butterflies as we all know they are under threat from loss of habitat as well as pesticides. 3 The fields and open space enrich our lives and are good for our well being. I can't imagine not being able to walk by them with my dog. My wife and I treasure being able to pause on our walks and listen to the bees buzzing and the birds singing. They provide precious moments of calm and peace in an increasingly hectic and noisy world. With my health problems they offer a place of tranquility and beauty which is vital to me and I'm sure many other local people. Increased Risk of Flooding The fields help to soak up water from heavy rain without them the area could be at higher risk of flooding. I sincerely hope you will take the issues and points I have made in this letter into consideration when making your decision and will decide to reject this proposal. I also think there should be a government enquiry into this as once the land is gone as I have already said but can't stress this enough the decision cannot be reversed and we will have lost it forever. The Campaign for the Protection of Rural England rightly is opposed to the development of agricultural land.		
Burnett	Gordon	342	Object	Please also consider this in your decision making. The loss of Grade 1agricultural land - we need to be able to provide food locally rather than rely so heavily on imports. Last year both skylarks and cuckoos have been found in the area between Minster and Shottendane Roads and are on the RSPB's Red List of endangered species. • Access roads. In my opinion, Minster Road, Garlinge	1026	Web
				High Street and Briary Close are too narrow to cope with more traffic than they already do. Due to parking, cars etc. frequently have to give way to oncoming traffic making it difficult for pedestrians to cross Minster Road and Lymington Road. This problem is

i la companya di mangantana di mangantana di mangantana di mangantana di mangantana di mangantana di mangantan					land. How would people find work in Thanet? We are		

					told to save water, we will use more.		
China		China Gateway 503	Abraham	Object	China Gateway International Limited has concerns over	1418	Email
Gateway		International	Laker -		the timescales and feasibility of some of the sites		
International		Ltd.	RPS		currently being promoted in the Local Plan to meet the		
Ltd.					Council's OAN over the Plan period and compensating		
					for the 2,500-dwelling allocation being removed from		
					the Proposed Revisions to the Local Plan.		
					China Gateway International Limited has concerns over		
					Strategic Housing Site Policies SP14 Birchington, SP15		
					Westgate-on-Sea, SP18 Land at Manston Court		
					Road/Haine and Housing Allocation HO2 Land north		
					and south of Shottendane Road. The reasons for these		
					concerns are set out below;		
					The allocation for Strategic Housing Site SP15		
					Westgate-on-Sea has increased from 1,000 dwellings in		
					the 2015 version of the Local Plan to 2,000 dwellings in		
					the Pre-Submission version. Again, we consider that		
					there is little justification provided for this 100%		
					increase. The first 50 units are expected to be delivered		
					in 2019/20 but with no planning application submitted		
					we consider this to be overly optimistic and unrealistic.		
					The proposal must include a masterplan to incorporate		
					the provision of a District Centre, the provision of		
					community facilities and a new link road. We consider		
					that with all these matters to address the Council has		
					been too optimistic with the delivery of this allocation.		
					In conclusion we consider that the Pre-submission		
					Local Plan is currently unsound as there are concerns		
					still to be addressed over the delivery timescales of		
					several of the Strategic Housing Sites and housing		
					allocations. We consider these issues mean it is		
					unlikely that the Council will be able to ensure the		
					delivery of sufficient housing during the initial years of		
					the new development plan to meet its increased		
					Objectively Assessed Need.		
					Development of the three sites (Phases 1, 2 and 3) has		
					the potential to provide a significant level of housing		
					and employment opportunities, additional services and		
					make a substantial contribution to the strategic vision		
					and future growth of Thanet District as a whole.		
					Accordingly, we strongly urge the Council to consider		
					the inclusion of these sites as allocations within the		
					emerging Local Plan.		
Cooper	Barbara	Kent County 514		Object	Provision and Delivery of County Council Community	1503	Email
•		Council (KCC)			Services: KCC would like to see the policy amended as		
		` '			follows:		
					"3) provision of community facilities as outlined in the		
					Infrastructure Delivery Plan including an area of		
					regularly shaped land within the development of no		
					less than 2.05ha to be transferred at nil value to the		
					County Council for the purposes of providing a Two		

				Form Entry Primary School. The site to be adequately serviced by the developer, including utilities and highway access. And 1ha of land for a new medial centre." PROW and Access Service: KCC recommends the inclusion of the following text into the policy: Incorporate and provide for connections and improvements to existing PROW and cycle networks facilitating walking, cycling and public transport to, from and within the site. To incorporate and provide for connections and improvements to existing PROW network to provide good access to footpaths, bridleways and cycle networks to facilitate access to the surrounding countryside and provide opportunities for exercise and recreational activities for walkers, cyclists and equestrians.	
Cornford	Joanna	367	Observation	Informed and considered planning based on the needs of our area, Westgate on Sea, should in the view of those who live and work in this area concentrate on: Bringing back into use empty properties Development of brown field sites Provision of adequate infrastructure Provision of adequate facilities for our already over stretched services The Draft local Plan as presented is full of fine words with little relevance to our needs. The Draft local Plan is obviously a 'quick fix' for central government initiatives, following the neglect by former governments, to provide adequate housing stock Nationwide. Since 2015 the objectively assessed figures for housing in Westgate on Sea have been proved inaccurate by those who have researched the figures (Neighbourhood Plan Steering Group NPSG and CPRE). This Draft local Plan proposes to build on grade one agricultural land at a time when scientific concerns exist that our three most important issues this century are: Food scarcity Depleting natural resources Climate change The National Union of Farmers are calling for politicians to encourage new investment in farming; at a time of climate change with long growing hours, farm land in the south will have the ability to grow crops that thrive in warmer soils, crops we now expensively import but in the future will be unavailable due to climate change (a reality which central government continue to put their heads in the sand over). Global food demand will rise by at least 60% over the	Paper

	[1] [2] [4] [4] [4] [4] [4] [4] [4] [4] [4] [4
	advises that where significant use of agricultural land is
	necessary to meet allocation targets local authorities
	should seek to use poorer quality areas.
	The guidance does not meet the unusual situation in
	Thanet where almost all the land allocated for housing
	development is precious top grade agricultural
	land. None of the farmland in Thanet should be built
	on. Any shortfall in housing requirements should be
	met by using brownfield sites and rugged sites in the
	north which are unsuitable for agriculture.
	The present plan is based on a blinkered approach that
	we must have extra houses even if that means
	permanently destroying top grade agricultural land
	which is needed to provide self sufficiency in food
	supply.
	The comprehensive considered Local Plan for Thanet is
	flawed by a misconception that the additional houses
	have to be tacked onto existing conurbations. The
	proposals are unfairly onerous to Birchington with
	1600 houses and Westgate with 2000 houses allocated
	while Minster, Monkton, St Nicholas, Cliffsend have
	escaped with relatively few additional houses.
	Instead of further pressure on existing Thanet
	communities no consideration or provision has been
	given to the alternative of building new and largely
	separate communities with access which would not put
	pressure on existing transport and services in Thanet.
	It would be better for new house building to be
	undertaken in the areas:
	North from Potten Street towards Plum Pudding
	Island with independent direct access to the Thanet
	Way (A299);
	West of St Nicholas towards Wagtail and Marshside
	with independent direct access to the Thanet Way
	(A299);
	Between Minster/Monkton and Richborough with
	independent direct access to the A253 between Gore
	Street and Monkton and or access to the A256;
	South of St Nicholas in the areas surrounding Down
	Barton Road and Summer Road extending
	towards independent access to the A299 and A28.
	It is difficult to understand why the Plan seems set on
	spoiling the existing Thanet towns and villages when
	the alternative of creating new independent hamlets
	would largely avoid this. Is it that tagging onto existing
	infrastructure is easier simpler quicker and more
	lucrative for developers? A look at the map shows that
	new hamlets at say Potten Street, Wagtail, Down
	Barton and Ebbsfleet would pose a less undesirable
	outcome than the present proposals. The
	suggested house building programme appears to be a
I	a soo state was a suitant proposition to be a

				short term fix which will create a permanent		
				deterioration.		_
Dadd	JC	95	Object	I wish to register my strong objection to the proposed	218	Paper
				housing development at S 1 - S2 Westgate, Garlinge		
				and other agriculture areas of Thanet.		
				I do not believe Thanet can sustain such a high		
				proportion of housing and also the high proportion of		
				traffic.		
				These proposals will alter the character of Westgate		
				and Garlinge and the rest of Thanet to such an extent		
				that they will not be recognisable.		
				I would like to make the following points:-		
				1) The loss of valuable Grade 1 and Grade 2 agricultural		
				land. Due to the imminence of Brexit we will need good		
				agricultural land for future use, and Thanet has some		
				of the best growing soil in the UK. To put houses on		
				this land is just not acceptable.		
				2) The hospital, doctors and dentists cannot meet the		
				demands required at the moment, with the present		
				level of population, and certainly could not cope with		
				the addition of 17,000 houses, i.e. average of2 adults		
				and 2 children per family which amounts to an increase		
				in population of 34,000 adults and 34,000 children		
				which would equate to 68,000 more people on our		
				small, already overcrowded Island.		
				3) Water and waste disposal would have to be		
				dramatically increased.		
				4) I strongly believe housing should be for local people,		
				and I do not think there will be anywhere near the		
				demand for this number of houses.		
				5) There are not enough schools to cope with this		
				increase.		
				6) There is not enough work for the present		
				population, so how would a further 34,000 adults be		
				employed?		
				7) The huge increase in traffic would be bad for health		
				and the environment. Because there are already two		
				schools in the close vicinity of Minster Road the areas		
				of Minster Road and Lymington Road are already		
				gridlocked between 8.30 and 9.15, and again from 3pm		
				to 3.30pm. Any emergency vehicles needing to use		
				these roads at these times are met with a huge		
				problem at present, which will become much worse if		
				the proposed houses are built. Crossing the road at any		
				time is a problem especially for families taking children		
				to school, Add thousands more vehicles to this it would		
				make it horrendous.		
				8) The refurbishment ,of derelict housing stock should		
				be brought back into use, for example the old home for		
				the blind on Westgate sea front.		
				9) The use of brown sites should be encouraged.		

				10) We are only a small island and if these house builds continue every 13 years, Thanet will disappear under concrete and tarmac.11) The character of our lovely villages and small towns, along with agricultural land, needs to be protected at all costs		
Davies	Julie	CPRE Kent 147	Object	Comments on behalf of CPRE Kent Thanet District Committee. Object to the choice and size of strategic sites for housebuilding and consider that the Council should: Take account of environmental constraints (including best and most versatile agricultural land and water supply/quality) in setting its housing targets — which will moderate the need for loss BMV agricultural land to housing. Produce an up to date site viability assessment, transport strategy and up to date Infrastructure Delivery Plan (demonstrating costs and funding sources) prior to the EIP. Demonstrate, prior to the EIP, how the measures and proposals in the Local Plan and Transport Strategy can be implemented by the Council using statutory planning powers, and how likely it is that other public sector funding and private sector investment will be available. Demonstrate prior to the EIP how the Council is proactively identifying urban brownfield sites. Including how and whether the Council is in a position to be able to be able to facilitate the delivery of brownfield sites especially where there are land assembly challenges. Prepare a Sustainability Appraisal of all sites, so that the sites can be compared according to the extent to which they meet sustainability objectives prior to the EIP.	387	Web
Dennis	BL & LA	354	Object	We are writing to oppose the housing sites proposed at Garlinge and Westgate-on-Sea for the following reasons:- 1) Impact on traffic and congestion along Minster Road Westgate on-Sea ,Garlinge High Street and Shottendane Road all of which are narrow and would be unable to cope with a higher volume of traffic , heavy plant and machinery along them.Prior to any building taking place the Council should ensure road widening occurs first paid for by the construction companies to reduce congestion and pollution levels in the area.The amount of houses being built is based on the highest amount of houses built over the last 10 years in the area and not an average therefore the amount this area is being asked to provide is far too many we have the highest allocation in Kent!	1046	Paper

2) We discours with notantial site of west of Allen	
2} We disagree with potential site of west of Allen	
Avenue Westgate-on-Sea which is sited in the Green	
wedge separating Westgate-on Sea from Birchington	
being offered as a possible site for 130 plus houses as	
this is the Green wedge and goes against council policy	
on Green wedges (section 4.12 Green wedges). There	
would be no access to these proposed houses other	
than through The Warren Drive which cannot cope	
with traffic now let alone increased traffic and heavy	
plant the only other access would be onto the	
Shottendane Road which is narrow and rural which	
would be extremely dangerous unless road widening	
occurred which means loss of more farmland.	
3) Local services would suffer there is only one GP	
surgery in Westgate-on-Sea and one for	
Birchington. Westgate surgery has no room for	
expansion in its present location and could not cope	
with additional patients (already informed by Dr	
Meakin at previous meetings). The Queen Elizabeth	
Queen Mother hospital is already under strain without	
impact from the additional strain these additional fa	
miles would It is under review of being downgraded	
meaning local people having to travel further to	
Ashford for treatmeant bringing additional strains to	
roads around Thanet.	
4) No adequate school St Crispins at Westgate-on-Sea	
already over subscribed .Westwood Cross has already	
been expanded with no school provision Thanet	
doesn't have enough places now without increase from	
additional families.	
5) Impact on local landscape would mean loss of prime	
agricultural land which goes against local plan of	
keeping openness of countryside. There would be loss	
of wildlife and public footpaths that run through the It	
goes against the plan of promoting green sector jobs as	
farmland is being built over and loss of food production	
capacity would be a consequence.	
6) There is a potential risk of flooding particularly in	
Westgate-on-Sea as in the 1970's the field flooded	
resulting in loss of life, building over this land you are	
reducing surface water There is also a risk of	
contamination to the underground water table. Also	
water pressure in the area particularly around The	
Warren Drive , Allen Avenue and Ursuline Drive is very	
low now, this would impact on residents in this area	
with even lower water pressure than we receive now.	
7) Employment where are the additional jobs likely to	
be created we already have business parks only filled	
to 30% capacity .Tourism is mainly seasonal and low	
paid work. Building over farmland you are reducing	
Green Sector jobs and this goes against the promotion	
Green Sector Jobs and this goes against the promotion	

		<u>, </u>				
	T			of such jobs in the Local Plan. Manston airport is		
				already closed and unlikely to operate as an airport		
				again and should be used to build houses on instead		
				not wait and decide later to use for housing when		
				prime agricultural land has already been destroyed.		
				8) The number of houses recommended is far too		
				many. We have numerous properties in Thanet that		
				are empty and decaying and brownfield sites which		
				should be used first but of course are not zero rated for		
				V.A.T so cheaper to build on Greenfield sites as new		
				property zero rated. Will there be a guarantee that the		
				affordable houses will be for Thanet residents first as it		
				is cheaper to live here than London and property		
				allocated on need.Thanet has the potential to become		
				a dumping ground for the London Boroughs.		
				Whilst we appreciate Thanet has to have a Local Plan		
				this is ill thought out and full of contradictions. Perhaps		
				Council should revisit actual need based on fact as in		
				last ten years highest building of houses was 830		
				lowest year 30!! The council have just opted for highest		
				amount instead of taking an average therefore		
Dotteson	D D M/	426	Ohioat	imposing on Thanet far too many houses.	1200	Danas
Dettmer	PRW	436	Object	I do not agree with the proposed building of houses on	1260	Paper
				prime agricultural land in Westgate /		
				Garlinge. Westgate has already a higher density of		
				population than the rest of Thanet including		
				Canterbury.		
				How are our doctors surgeries and schools going to		
				cope with the amount of extra people. Do you intend		
				to build new surgeries and schools and extra		
				sewerage.		
				I know that there are a considerable number of		
				householders who are really concerned of the current		
				local plan and we hope that this is thought through.		
Everest	Penny	179	Observation	Background	508	Paper
				Thanet should have had a new Plan 5 or 6 years ago		
				but were late in starting this process. TDC proceeded		
				to ask local landowners if they were prepared to sell		
				any land for development. One of the main offers was		
				from Quex which led to proposals for extensive		
				development on Quex-owned land adjoining Westgate		
				-on-Sea and Garlinge. This led to a public outcry. In		
				2015 TDC, under new leadership, started to review the		
				draft left by their predecessors . Time went by and it		
				was claimed that the uncertainty over the future of		
				Manston Airport made It difficult to finalise the draft.		
				In 2017 the Government asked those Councils which		
				had still to adopted an LOP (of which Thanet was one)		
				to explain why this had not been done. In early 2018		
				just two Councils in the UK were told that urgent		
				measures were being taken to speed things up. Even		

now we still don't know the fate of Manston Airport.
One proposal is to build 2,500 houses there. TDC say
that if Manston is retained as an airport, those houses
would have to be built elsewhere and most of them
have been allocated to Westgate-on-Sea. In addition to
the 2015 proposal to build 1,000 new homes we are
now faced with having over twice as many.
In my view I feel the figures given by Central
Government as the Objectively Assessed Housing Need
(OHAN) (17,140 additional homes for period to 20 1)
are obviously unrealistic if the purpose is to provide
housing just for the local population because:-
(I) The population figures sent by Central
Government are largely based on reports by a
consultant called G L Hearn. The findings in their latest
report (2016), which increase the estimates for
population growth in Thanet, are distorted by the
figures for 2013-14 which are completely untypical,
and for 2014-15 which are very high. This can be seen
easily in figure 2 of the summary. More up-to-date
Office for National Statistics (ONS) figures for 2016-17
(July June), show a return to the lower trends in earlier
years, with natural growth showing a decline of 200,
internal net migration at 419 and international net
migration at 314, giving total net annual growth of 533,
far below the 1,365 estimate in the Hearn Report. The
figures have clearly been inflated to legitimise massive
migration into Thanet from London.
(ii) There are nearly 2,000 empty, derelict and
unoccupied dwellings in Thanet and the first priority
should be to focus on these.
The proportion of elderly people in Westgate-on-Sea
(nearly30%) is well above the Thanet average and
almost double the national average of 16%.
almost double the national average of 10%.
Overcrowding
Looking at the allocations of housing to Westgtate-on-
Sea the proposals look preposterous:-
Thanet, at 27%, is already far more 'built -on' than the
neighbouring Districts (eg Dover at 8% and Canterbury
at 9%).
The average population density of Kent is 439. The
Thanet average is 1,368 (so Thanet is already over 3
times the average for Kent), compared with Dover at
368 and Canterbury atallocations of new homes would
double the population and therefore the population
density of Westagate-on-Sea, thus increasing
overcrowding and pressure on schools and clinics.
531. However, the population of Westgate-on-Sea right
now is over 2,800!!!! The proposed
Westgate surgery is now over-subscribed with 10,200

				more houses in Westgate but 150 would be

				l is too cramped in its premises, and adding residents		

				thought, many things need to be considered before		
				making any decision. A wrong decision can never be		
				rectified.		
				a) You are proposing to build on the most fertile land in		
				the country and when we leave the EU, such land will		
				be most vital for growing our own food.		
				b) Global warming means a shortage of water which		
				both household and farmers need and how do you		
				propose to supply enough water plus disposal of		
				sewrage etc.		
				c) Employment - where are all the extra population		
				going to work. Unemployment is already very high in		
				this area.		
				d) The Queen Elizabeth hospital is already		
				overstretched		
				e) Where will you find the extra doctors and nurses		
				when there is already a shortage throughout the		
				country?		
				f) Local Council services will be overstretched		
				g) Infrastructure - roads schools surgeries etc would		
				have to be built before any houses.		
				Conclusion - do not build all these unwanted houses in		
				Westgate. Concentrate on renovating existing empty		
				houses.		
				Please read and reconsider		
Georgiou	Constantia	96	Object	I am a resident of Westgate on Sea of which I am proud	219	Email
				to be a member, I think it's one of the best place to		
				live.		
				Westgate does not need all this extra housing, a large		
				number of the population are of an older generation		
				30% above Thanet average.		
				Why don't council improve all the empty houses nearly		
				2,000 in Thanet so they become habitable? That would		
				house a lot of people and it is a waste to see them		
				empty.		
				Our surgery's, schools and our roads are overstretched		
				as it is.		
				We would be overcrowed, busier roads, longer waiting		
				times at our surgery's who are already finding it		
				difficult to cope with the number of patients they have.		
				adding too many more residents will create a		
				deterioration in all our health.		
				I am not against some housing but the number you talk		
				about 2,000 is over the top by too much! Thank you for		
				taking the time to read what I think.		
Glendinning	Gail	264	Object	I am disgusted that you are considering building	800	Paper
I				thousands of houses on top grade farmland, which will		
		ı ı			1	i I
				double the population of Westgate.		
				Our town is not set up for so many more people. We		
				, ,		

	T			has said thou would have an issue with supplies to		
				has said they would have an issue with supplies too.		
				I feel you haven't allowed a petition to be signed		
				because you would get many more people letting you		
				know they don't want this, but less people tend to		
				write letters these days. I feel you are trying to scew		
				the figures of complainants to your advantage.		_
Glendinning	Carole	312	Observation	I feel it is wrong to build houses on grade A farmland,	926	Paper
				doubling the population of the town, while the roads		
				are not suitable for more traffic and we do not have		
				enough facilities such as doctors and schools.		
				This will put the present population at risk with this ill		
				conceived plan.		
godden	christopher	391	Object	My objections to the proposed houses earmarked to	1147	Paper
				be built on land in Westgate/Garlinge are as follows		
				1. The use of A1 agricultural land for housing does not		
				make sense in the current climate with Brexit looming		
				foor production is going to be ever more important		
				with the possible import & export problems from our		
				EU removal.		
				2. Who are these houses for. Local people can't afford		
				them. It would seem they are going to be for London		
				migrants.		
				3. The QEQM Hospital is already at breaking point. The		
				local Doctors Surgery in W/Gate is full. The local		
				Dentist is full.		
				4. The local Schools are full (St Crispins and Chartfield)		
				5. There are 2000(approx) empty derelict &		
				unoccupied dwellings in Thanet.		
				6. There is a lot of brownfield sites all over Thanet that		
				should be used long before A1 agricultural land is used.		
				7. The traffic problems in and around Westgate at		
				various times of the day would only get worse if more		
				houses are built in Westgate.		
				8. That said houses do need to be built for local people.		
				Affordable housing that the young of Thanet have a		
				chance to buy. But not to the detriment of the local		
				environment robbing the next generatiom of residents		
				a greenfield outlook.		
Hambidge	R	343	Object	I am writing to oppose the Local Plan for housing on	1027	Paper
				sites at Westgate-on-sea, Garlinge and Birchington.		
				The proposal to build thousands of houses on Grade 1		
				agricultural land adjacent to these three communities		
				is in my view barbaric. Our local farming community is		
				precious and should be awarded protection not only		
				for the preservation of local jobs, wildlife and for our		
				future but once that Grade 1 agricultural land is built		
				on there will be no turning back.

	quick enough to award these historic buildings with
	listed status and now they are gone.
	The proposal to build thousands of houses on Grade 1
	agricultural land adjacent to these three communities
	is in my view barbaric. Our local farming community is
	precious and should be awarded protection not only
	for the preservation of local jobs, wildlife and for
	our future but once that Grade 1 agricultural land is
	built on there will be no turning back I fail to
	understand why the term 'Local' is used to describe
	this plan, it neither represents the needs of the local
	people or any growth in our population. This plan only
	represents the needs of other areas who have failed
	over the years to make adequate provision for their
	growing housing problems.
	Southern Water has already stated that water supplies
	"half of demand" by 2030 and will be looking to
	encourage customers to use less even though here in
	Kent we the customers are among the most water
	efficient in the UK. Southern Water on the other hand
	is the worst water company for complaints as
	broadcast recently on local radio from official statistics.
	It has been stated by Southern Water that Westgate
	does not have the capacity to either
	supply water or dispose of waste water for the number
	of housing proposed in the earlier Local Plan, even
	greater numbers of houses on the new Local Plan can
	only exacerbate this problem.
	If the Government dictates to local Councils, these
	houses should be built then the infrastructure should
	be put in place first and funding supplied by the Central
	Government.
	Road building should be completed before house
	building starts. Thanet's roads are greatly congested
	and many in desperate need of repair. When repairs
	are made or when one main road is closed for repair,
	installations or accidents there is mayhem on all other
	roads with traffic at almost standstill.
	The strain on the local Doctors (oversubscribed by 200
	patients already), Dentists, Hospital, Mental Health
	Unit and Police would be unbearable. The A & E
	Department at QEQM. is already overstretched and
	now we have looming over us the loss of the stroke
	emergency care to Ashford a good hours drive away if
	the traffic allows.
	Our local primary schools cannot accommodate the
	number of applicants each year as the population
	stands at present and the promise of another infant
	school for Westgate quite honestly does not quell my
	fear for the future educational needs of this area.
	In the new local plan the projected new jobs in Thanet

				is 5,000 and the planned additional housing is 17,500 meaning probably a 35,000 addition to the population. These projections only spell one thing; many thousands of people either unemployed or having to commute out of area. If Westgate-on-Sea has the additional 2,000 houses as in the new local plan that equates to 4,000 people trying to exit Westgate to get to their place of work because it will not be in Thanet. Westgate-on-Sea has a small Railway station with no parking facility so good luck to any commuters with your walk to the station and back after your long day at the office. Should any of the proposed housing go ahead the very least that should be demanded is a park. There is not one park in either, Westgate on sea, Garlinge or Birchington . There are two or three recreation grounds (NOT Parks) and in consideration to the fact that you will be removing the local open space which is a requirement to maintain the quality of life, it is vital that part of the plan for Westgate on sea, Garlinge and Birchington incorporates at least one decent sized park. Not much to ask when you consider that Margate has the luxury of three parks. Please rethink your plan. If more housing is absolutely needed, which I doubt, especially the numbers, they should be placed in an		
Hardley	Lorna	431	Object	area that has easier access to out of the area i.e. The Thanet Way. To whom it may concern, I write today in response to your local plan for the Thanet area. Having lived here for most of my life I have enjoyed growing up, and now raise a family of my own. I have noticed over the last decade or so, that local jobs, NHS services and school places have been harder to obtain.	1247	Email
				By building more houses in the local area, which mean more people living in the local area, these services are going to be stretched even further. As for the roads, they cannot cope with the current traffic, let alone adding a potential 2000 more, as well as construction traffic. The farmland, which I have come to love and admire, will be destroyed, which will leave local farmers out of pocket, and also our houses at more risk of flooding, due to be fact that drainage can be a problem {and has been in the past in the Westgate area). Driving round Thanet I have seen plenty of empty properties, which if he council purchased and renovated would reduce the need for so many extra houses needing to be build. Surely this would be a		

Hart	M	438	Object	The area suggested is farmland which is necessary to our local community. We do not have the Drs or	1263	Paper
				schools to accept 2,000 plus people in this area.		
Hollaway	Patricia	480	Object	Please Take note	1346	Paper
				I object to the Building of 2,500 Houses on Farm Land		
				in Westgate & surrounding areas, We have not got the		
				fasilitys for these, We cannot cope now with not		
				enough of the, where are the jobs coming from		
				Doctors, Dentist, Hospitals, nursing Homes, ambalance,		
				Fire Services, Water Sewers, Parking, Schools, Shops,		
				Street Lights		
				We have polution everywhere, The Drains are never		
				cleaned they are mostly blocked up. Beaches dirty &		
				poluted, To much Traffic on Roads. Pot holes		
				everywhere, to much Waste Rubish & litter, no one to		
				clean Streets that are filthy, Speeding on Roads		
				esspially Minster Road its a wonder no body had been		
				killed here. The stroke unit at QEQM Hospital closing,		
				Water Pressure, Excess dirt & waste from Building site:		
				Everything in Westgate & Thanet is a Eye Sore, Dirty,		
				Overgrown the Parks etc are never landscaped the		
				Trees are never seen to & overgrown the footpaths are		
				dangerouse, no Police as such.		
				Shall I go on All TDC does is put Council Tax Up.		
				I have lived in Thanet all my life 79 yrs its never been		
				this bad		
				Disgusted		
				P.S My Father-in-law gave his life for this dirty country		
				what for his family were from Ramsgate since 1804.		
Hollister	Clare	329	Object	In common with the vast majority of my community, I	1008	Email
Homster	Ciarc	323	Object	am writing to express my extreme concern regarding	1000	Eman
				the excessive number of new homes being proposed -		
				and thereafter forcibly imposed on - Thanet in the new		
				Local Plan, regardless of the views of the people who		
				actually live there, or the woeful inability of the current		
				local infrastructure to serve their needs. Most		
				particularly of all - again, in common with my whole		
				community - I am objecting to any building on the ST1		
				and ST2 sites around Westgate and Garlinge, which		
				comprise prime agricultural land.		
				When seeking to build all these new homes, key issues		
				Thanet residents want addressed and answered are:		
				Who is going to live in them? Where are the jobs for		
				them? And where is the infrastructure to cater for such		
				a massive new influx in population when the existing		
				infrastructure is already unable to cope? Are the new		
				homeowners going to bring wealth, jobs, vital skills or		
				other positive benefits to our community, or are they		
				going to place yet further strain on already over-		
				stretched council funds and public services? And if you		
				cannot answer them then surely the homes should not	1	

be built. It is nothing short of insane to do otherwise; to sacrifice land for a future that may never happen, or put the rights and needs of people yet to live here above those who already do. Some sympathy does go to TDC, in being forced by central government to come up with these higher home numbers. But one also likes to think that, when it comes to allotting more specific areas for new homes, council members have the sense and integrity to appreciate the type of land that their community always wants preserved as more off limits and sacred. And most sacred of all should be prime agricultural land. TDC should be commended for turning down building permission on the ST1 and ST2 sites, last time they came up for consideration. In so doing, they also earned much respect and gratitude from the local population. So once again I would like to highlight the fuller reasons why these sites should not be built on, in the hope that TDC will make the same sensible decision to reject this land for building on again: Food production. You may be aware that the ST1/2 sites feature the highest possible grading for farmland/food production in the UK - i.e. Grade 1. We only have 21% of this type of extra-fertile land in the entire UK for growing food on and thus cannot afford to lose it as a resource. We do not know how much more of our own food we may need to produce in a post Brexit world, and thus sacrificing any more of it for housing - on top of that already sacrificed at Westwood - would be foolhardy to say the least. Especially when there are plenty of other option sites still on the table. It also makes little sense to be building more and more homes for an expanding population, only to find we then can't feed them because we have sold off all the farmland. Flooding/sinkholes risk. The council have previously been alerted to past flooding from the ST1 site into Victoria Avenue and Belmont road below, in the 1970s, resulting in fatalities, after heavier rain. Currently it is only heavy (and deeply ploughed) agricultural soil, and the roots of crops/more mature surrounding trees and shrubs that retain excess water from heavier rainfall in the ST1 site. Once this land is concreted over the flooding risk during heavier rain would become more severe again, due to the specific geography of the ST1 site. Residents who have lived many decades around this site also say that both it, and the ST2 site, have developed sinkholes in the past which of course, in a residential area, could endanger life. Moreover, as the

above facts are already well documented, this would	
severely affect any insurance payout should any of the	
properties built on this land be flooded or lost to	
sinkholes.	
Environment/loss of wildlife habitat. The STI and ST2	
sites host a significant population of wildlife - i.e. voles,	
shrews, foxes, badgers, umpteen different species of	
birds, insects and moths, plus the rarer slow worm.	
Building on this land would wipe them out. The CPRE	
(Council for the Protection of Rural England) have also	
made their views known re how devastating an	
environmental impact the destruction of this land for	
building would have.	
4. Impact on residents' physical, mental and	
psychological health. It is not always appreciated how	
much mental and physical benefit residents gain from	
the nearby presence of open space, fields and	
countryside. Or that a vast majority of residents	
surrounding the ST1 and ST2 sites only moved there, or	
bought their houses there, in order to experience, or	
benefit from, views of open countryside. And escape	
the kind of more oppressive, urban, built up landscape	
they previously lived in. The ST1/2 sites are, in fact, not	
just 'bits of land' but vital space that oxygenates our	
whole community and keeps it in better mental health.	
It is where people walk, take exercise and appreciate	
their surroundings. Countless studies have also shown	
that the more built up an environment people live in,	
the more their mental health declines. The same is true	
of higher levels of traffic pollution. Both of these higher	
risks to mental health would ensue if this land was built	
on.	
Education and learning. For many local children, the	
ST1/2 sites present their only real experience of	
countryside. They walk across it to school each	
morning and back in the afternoon. It is where they	
play in summer, pick blackberries in the autumn, learn	
about local plants and wildlife, the rotation of different	
crops and more fully understand the changing of	
seasons. All of this would be lost to them forever if the	
land were built on.	
Destruction of more individual village identities.	
Currently Westgate and Garlinge represent two very	
individual town or village communities, with their own	
hearts and identities which are important to them,	
separated by the current ST1/2 site farmland. Building	
on this would morph them both into one big urban	
sprawl, and their more individual hearts and souls as	
communities would be lost forever.	
Dangerous and previously failed precedents. Residents	
are concerned that the allotment of any more prime	

				1			
					agricultural land for housing sets a dangerous		
					precedent - i.e. that Thanet council, unlike its residents,		
					places no value whatsoever on its precious		
					farmland/countryside as a resource and sees it all as		
					'fair game' instead to stick houses on. Not only that but		
					the allotment of prime agricultural farmland for		
					housing has previously occurred at Westwood, with		
					the big new housing development currently sited along		
					Haine Road, which is widely viewed locally as a total		
					eyesore, if not utter disaster. For has an uglier, more		
					barren or soulless complex ever been devised? No		
					heart, no space, no community. Nothing. No one I		
					know would ever want to live there and homes are		
					proving trickier to sell. Thus vital, precious farmland		
					was pointlessly sacrificed for this abject failure and		
					blight on the landscape.		
					Other options. If more new housing is really needed, in		
					the kind of numbers previously cited, then surely the		
					most sensible thing to do is site them at Manston, and		
					create a whole new community there, with its own		
					more self-sufficient infrastructure - i.e. schools, shops,		
					medical centre - which in turn would take pressure off		
					local resources elsewhere? There is certainly the space		
					and it would mean no further farmland would need to		
					be sacrificed. I think the majority of Thanet residents		
					would view that as the least worst option.		
					In all honesty, most Thanet residents view the Local		
					Plan as the most catastrophic event to ever hit their		
					community, and something which promises them ever		
					more misery, and destruction of their everyday quality		
					of life, as the future unfolds. In terms of more traffic,		
					noise, crowding, air pollution, crime, stress and		
					struggles to access most basic services like health and		
					education.		
					But decisions still have to be made as to where new		
					homes should be cited, in a way that does not alienate		
					this council ever further from its residents. Which the		
					destruction of any further agricultural land for housing		
					will surely do. For reasons now fully highlighted in this		
					letter. Never, ever underestimate what our fields and		
					countryside really mean to us all in Thanet, or how		
	_				hard we are prepared to fight to preserve them.

				will surely do. For reasons now fully highlighted in this		
				letter. Never, ever underestimate what our fields and		
				countryside really mean to us all in Thanet, or how		
				hard we are prepared to fight to preserve them.		
Ingram	Dawn	468	Object	I am opposed to the proposal of the amount of housing suggested on the farmland in Westgate.	1332	Paper
				The farmland is even more important to the local		
				community more than ever before due to Brexit. We		
				need to get back to a more sustainable way of life.		
				I am also against the amount of houses suggested as		
				we cannot cope as it is at doctors surgeries. So much		
				so, you can only complain or speak to a doctor		
				concerning one issue or problem. The length of waiting		
				for an appointment is ridiculous as it the wait already		
				on an already over stretched QEQM.		
				This is just the tip of the iceberg - we do not have the		
				facilities - water waste to cope as it is. We have no jobs		
				for the existing people of Thanet.		
				Pollution will increase! I moved here for health! Our		
				beaches will become even more at risk of pollution.		
				Thanet is not big enough not broad enough for this		
				ridiculous increase. So I totally oppose the entire local		
				plan. I feel you think small term + of your pockets		
				rather than long with the isle in mind.		
Jefcoate	John	271	Object	I wish to object to the proposal to build 2000 new	810	Paper
				homes in the Westgate area, ST1 and ST2.		
				This is agricultural land and too valuable to build on.		
				Westgate is not big enough to home so many		
				residents. We do not have adequate roads and the		
				widening of eg Shottendane road will not ease the		
				burden in the town and beaches of Westgate,		
				Birchington nor Garlinge. Access roads are too		
				narrow and there is no space for widening or building		
				car parks. It will spoil my quality of life in		
				my retirement years.	245	
Jefcoate	Nicola	274	Object	I am writing to express my concern regarding the	815	Paper
				proposal to build an excessive number of new homes		
				on prime agricultural land ST1 and ST2, which will for ever impact our local community and change the		
				nature of the area in which we have chosen to live.		
				Westgate does not have the infrastructure, and		
				alarmingly does not have adequate road access from		
				the rest of Kent due to our geographical sea side		
				location on the Island of Thanet. Moreover there is no		
				obvious means to increase parking in the town unless		
				buildings are demolished or green squares concreted		
				over.		
				I understand central government demands provision		
				for more housing but it appears that locations have not		
				been well enough thought through, maybe with an		
				attitude of this site is easy to choose being available		

from the current landowner and it looks like good
infilling on a map.
I think the following points need serious further
consideration:
• I believe it is foolish to use prime Grade 1 agricultural
land for building. A nation needs to be able to produce
significant amounts of food to feed its population. Non
agricultural land or land of poorer agricultural quality
should be designated for building.
• It appears that the proposed housing is intended
primarily for people from out of the area. I suspect the
promise of provision of adequate jobs to attract
working and self supporting families to be a 'pie in the
sky'. Thanet people have heard similar projections all
too often.
Do we genuinely have sufficient infrastructure and
facilities ie space, to provide for such an extreme
population growth in Westgate? I believe it may well
detrimentally impact our quality of life eg more traffic,
pollution, noise, overcrowding, crime and stress and
time to access basic and vital local services. I am
concerned that phasing of building will result
in developers avoiding provision for eg services and an
insidious increasing pressure on existing local services.
Westgate and Garlinge do not have the appropriate
planned space to serve 2000 or so new homes. A new
service centre would be needed for a new
population that could potentially double our current
population.
• I am concerned that the only people able to park cars
in Westgate town will be those with blue badges, thus
pushing local retailers out of business as we transfer
shopping to the internet, and yet more white vans.
• The needs and rights of local residents to live in a
community of their choosing is being ignored. The
current local plan calls for the local seaside resorts to
maintain their character. This proposal violates this
right. In the 2011 census Westgate on sea had a
population of 6996. Building on ST1 and ST2 as
proposed is an extreme increase that will impact us all.
I recall the flooding of properties in Westgate
(Victoria Rd) in the 1970's with a fatality. Clearly this
agricultural land is essential for surface rainwater
drainage. This raises legal considerations should
properties be flooded due to the new buildings and
consequent loss of natural drainage as it is already well
documented.
• I understand there are sink holes in this ST1 and ST2
area. Clearly this should be a major concern for the
safety of any residents.
These sites are important wildlife sites and should be

						protected for the sake of our environment and		
						conservation.		
						As my home of about 25 years backs onto the site in		
						question I believe I will be directly and negatively		
						impacted by this scheme		
						It is my opinion that sites nearer Manston / Pegwell		
						area should be favoured as a site for a new community.		
						Since the 1960's to my knowledge, various attempts to		
						re ignite Manston as an airport have failed beyond the		
						short term. To the south of Thanet the road		
						infrastructure from the south and west exists with duel		
						carriageways for fast and easy access into the rest of		
						Kent. With new homes in one main location it would be		
						far easier to provide local services such as GP surgeries,		
						much needed dentist, schools, community and		
						recreational hubs for the 21st century. There is		
						considerable chalkland in this area with a very thin soil		
						making it ideal for building but not for agriculture.		
						I hope this proposal to build on prime agricultural land		
						in ST1 and ST2 is rejected and further investigation		
						made into building on brown field sites and areas		
						where access to our local towns and villages and out		
						beyond Thanet is more suitable and sustainable.

						being allowed through.		
						Consider please the impact on our community and I		
						quote a few		
						Traffic (busy & restricted parking Increase in vehicle		
						parking which is terrible already		
						Road In and out of Westgate which is difficult as it is		
						now		
						Local Council Services Rubbish collection street lighting		
						sewarage		
						Health and Wellbeing Causing long waiting list for		
						hospitals who are having trouble coping already.		
						Dentist few and far between & long waiting list.		
						Doctors overloaded already with patients some indeed		
						have not got a place on a doctors lists now. Emergency		
						Services having a job coping.		
						All the above and much more are really worrying. The		
						loss of farmland which we need.		
						I feel we wrote enough (could go on & on) think of the		
						infrastructure needed which mostly is never dealt with		

				ie Westwood Cross. Schools which are full up already & children have to be ferried to school miles from where they live We are against this plan & want to protest vehemently that common sense will prevail.		
Lane	Angela	326	Object	I am writing to object to the draft local plan ammendments which I viewed recently at the Westgate library. This letter concerns SP15 - Strategic Housing Site - Westgate, particularly the extended amount of dwellings that are proposed towards the High Street Garlinge, which would leave our cottage in the middle of a built up area. If these properties are built it would have a negative impact on our whole family and change our way of life. We live in a beautiful Victorian Farm Managers cottage on the edge of a lovely village, with wonderful neighbours. My husband works in the countryside and my daughter has been brought up as a country girl and is very proud of our way of life. I personally cannot imagine living in the middle of a new housing estate, with all its cars and people, bustle and noise. We bought our cottage as a forever home, as many country people do, always loving its character rural views and peace and quiet. These extra properties would leave us overlooked and boxed in, immediately reducing the value of our beautiful home. This leaves us unable to sell to escape the development and leaves me heartbroken at having to consider such a drastic move. I object strongly to having mine and my family's life being dictated in this way.	1000	Paper
Lane	Simon	463	Object	concerning policy SP15 - strategic housing site - Westgate, particularly focusing upon Garlinge High Street. After much reading and map referencing, I strongly object to the proposed development of housing added to the draft local plan. this would have an extremely detrimental effect on the quality of life for both myself and my family. The proposed housing would surround our cottage, leaving use living in the middle of a large new town. As we are country people, (my work is countryside based) this is a most distressing situation. I do not wish to be overlooked and hemmed in by a modern housing estate, (London overspill social housing?) with its noise and light pollution and its many cars and inhabitants. we particularly purchased our cottage for its age, character, history and rural aspect and have been blissfully happy here since 1991. Our property's value is reflected in these attributes, yet no mention has been made of any compensation for the drop in value as we are destined to become part of a new town, rather than a character cottage with field views, on the	1318	Paper

	<u> </u>			adas af a cillaga difectivity that is		
				edge of a village. i feel that this leaves us in the		
				unenviable position of being unable to sell up and		
				move to escape the encroachment, as other character		
				cottages om rural or semi-rural settings are at a		
				premium, as ours has been until this point. They are		
				also extremely hard to find in such a favoured		
				position. Although a 'functional green corridor' (AD13		
				chapter 3 item 1) is mentioned in the plan. no		
				reference is given to the proximity of the proposed		
				housing, to our boundary, and as a countryside skills		
				tutor having seen extremely slim slices of headland		
				being considered a 'green corridor', this does not give		
				me confidence in the plan. An exact measurement		
				would be more useful to all concerned. I have many		
				other concerns about the size of this proposed		
				development which can be referenced in my initial		
				letter of objection to the initial draft plan.		
				I would be happy to meet and discuss the proposed		
				plan, with an inspector, to clarify any points or if it		
				would be deemed helpful in any way.		
				Thank you for your time and consideration in this		
				matter.		
Lane	Megan	466	Object	I am writing to object strongly to the proposed	1330	Paper
				ammendments to the draft local plan, specifically		
				policy SP15 - Strategic housing site - Westgate. The		
				extra properties that have been added to the plan now		
				completely close in around our cottage, leaving us in		
				the middle of a large housing estate. I am now 21		
				years old and have always been extremely happy living		
				in our cottage in Garlinge, with open fields around us,		
				our lovely neighbours and safe small village to live		
				in. this would obviously change completely if this		
				proposal is accepted and would change our way of		
				life. the value of our cottage would drop as a		
				consequence of living in the middle of a housing estate		
				without views, making it impossible for my parents and		
				I to be able to afford to move away from the new town		
				back into the countryside. Add to that thousands of		
				new residents (2000 houses) with their cars, noise and		
				lack of village attitude and it is plain to see that this is		
				an extremely upsetting and difficult situation for us to		
				be in. there should be some form of compensation for		
				the de-valuing of our cottage, allowing us an escape		
				route from inprisonment in a town.		
Lee	Α	133	Object	Large scale housing projects are not sustainable	323	Web
Martin	TC&C	441	Object	I am completely against the building of extra houses in	1268	Paper
				the Westgate/Garlinge area. It is completely a big		
	I			mistake. The extra houses will not bring anything to		
				mistake. The extra houses will not bring any tring to	l l	I I
				enhance the area, completely the opposite, putting		
				<u> </u>		

					current residents. The area is struggling with all the demands on it i.e. school places, doctors, dentists and the QEQM hospital, to name a few - all already under considerable pressure - people now complain about all these services and how underfunded they are - more houses will only add to these problems and the services we do have will be even more thinly spread. The infrastructure of the roads will be even more chaotic than they already are with more traffic - a recent 'fire' in Westwood showed this as a good example. Complete shambles! Thanet comes to a stand-still when one or two of it's major roads has to close for anything- including roadworks/accidents/bad weather. Considering all the empty properties around the area that are talked about - why are they not being renovated to accommodate some of the people the houses are being built for? Is it because new builds attract NO VAT but revamps DO? The builders that will be used will be 'out of area' workers therefore the local tradesmen will not benefit from any of this. You really do not need to be clever to see how the building of these new properties will impact on the local area and surrounding community - common sense needs to be		
					brought into play - PLEASE - DO NOT BUILD MORE HOUSES		
May	Raymond		238	Support	I object to this development on the grounds that it causes the loss of Grade 1 agricultural land. We, in Britain, already import more food than we produce locally. If you equate Thanet Council's plans with hundred's of others around the country, similarly planning ahead, you get an idea of the scale of the potential loss of food producing land. Can we continue on a path of steadily increasing the importation of food as the land to produce our own food diminishes. In addition,The population of Westgate is in the low 7,000's. This proposed development of up to 2,000 houses equating to a least 6,000 residents. So the plan is to nearly double the population by 2031. Quite a frightening prospect for their residents.	751	Web
Mayall	С	Southern Water	473	Object	In line with paragraph 162 of the National Planning Policy Framework (NPPF) and the National Planning Practice Guidance (NPPG), Southern Water has undertaken an updated assessment of existing infrastructure capacity and its ability to meet the forecast demand for 2,000 new dwellings at this site. As per our previous representations at Regulation 18 stage, that assessment reveals that additional local sewerage infrastructure would be required to accommodate the proposed development Since OFWAT's new approach to water and wastewater	1355	Web

connections charging was implemented from 1 April	
2018, we have adjusted our requisite site specific	
policy wording to align with the new charging	
mechanism. Despite changes to this mechanism, the	
need remains for recognition that there is limited	
capacity at this site's "practical point of connection", as	
defined in the New Connections Services and as a	
result, network reinforcement will be required in	
advance of occupation.	
This reinforcement will be provided through the New	
Infrastructure charge but Southern Water will need to	
work with site promoters to understand the	
development program and to review whether the	
delivery of network reinforcement aligns with the	
occupation of the development.	
Therefore, whilst a lack of capacity is not a	
fundamental constraint to development, new or	
improved infrastructure would need to be provided in	
parallel with the development.	
Southern Water has limited powers to prevent	
connections to the water and sewerage networks, even	
when capacity is limited. Planning policies and	
planning conditions, therefore, play an important role	
in ensuring that development is coordinated with the	
provision of the necessary infrastructure.	
Unless planning policies support delivery of necessary	
underground sewerage infrastructure there is a risk	
that it will not be delivered in parallel with the	
development, leading to an unacceptable risk of foul	
water flooding in the area to both new and existing	
residents. This situation would be contrary to	
paragraph 109 of the NPPF, which requires the	
planning system to prevent both new and existing	
development from contributing to pollution.	
In addition, our assessments revealed that Southern	
Water's underground infrastructure crosses the site,	
and this needs to be taken into account when	
designing the site layout. Easements would be	
required, which may affect the site layout or require	
diversion. These easements should be clear of all	
proposed buildings and substantial tree planting.	
Southern Water is unable to support Policy SP15 as	
sound because it does not adequately support delivery	
of the local sewerage infrastructure necessary to serve	
this site in parallel with development. We consider that	
this site in parallel with development. We consider that	
paragraphs 109 and 157 of the NPPF. Accordingly, in	
line with the NPPF and National Planning Practice	
Guidance and to ensure sustainable development, we	
propose that the following criteria are added to Policy	
SP15 (new text underlined):	
St 13 (Hew text dilucililied).	

	1	T	1	T.,		T
				Masterplanning will be informed by and address:		
				[]		
				the need to ensure occupation of development is		
				phased to align with the delivery of sewerage		
				infrastructure, in collaboration with the service		
				provider		
				[]		
Messenger	Carol	383	Object	I am one of the ward councillors and when I was	1127	Web
				elected in 2015 there were two main issues for		
				residents the additional houses (then it was 1000		
				homes) and keeping Manston as an airport. The		
				community are not disputing that homes are not		
				needed but not on Grade I agricultural land, with issues		
				of severe flooding in the area and a broken		
				infrastructure to place 2000 homes, as stated in the		
				plan is just ludicrous.		
				The Ove Arup report (Sustainability Assessment),		
				reference policy SP15 – expressed concern about the		
				Strategic Housing Sites in Westgate; that it does not		
				support the Sustainability Objective and expresses		
				concern about the environmental impact of the		
				housing on greenfield sites.		
				There are currently just over 80 households on the		
				housing register in Westgate and with a population of		
				just over 7000, 2000 extra homes will destroy this		
				community that still has a small high street vibe, with		
				independent shops that are distinct with their Victorian		
				canopies over hanging the walk way. This area is		
				already suffering from the creation of the Westwood		
				Cross Shopping Centre (WWX) and will not improve		
				with 2000 homes, as the location of these homes will		
				encourage more people to jump in their cars and head		
				to WWX as there is ample free parking. There are no		
				car parks in the town of Westgate.		
Milimuka	Elle	GVA 358	Object	The majority of the proposed allocation site is classified	1053	Web
TVIIIITTAKA	Line		Sajeet	as 'Excellent' in the Agricultural Land	1033	1
				Classification, with a small portion identified as 'Very		
				Good'.		
				It is unclear how an additional 1,000 homes can be		
				achieved on this site while maintaining the maximum		
				housing density. Indeed, during the most recent call for		
				sites, the land owner suggested 2,500 homes		
				could be delivered on a significantly larger (172ha) site		
				bound by Park Road and Shottendane Road to		
				the south and stretching considerably further west		
				than the proposed allocation. We therefore question		
				whether this site is available, viable, sustainable or		
				feasible within the plan period.		
Millar	Bill	NHS Thanet 513	Observation	In relation to Westgate on Sea, the amount of new	1486	Email
ivilliai		Clinical	Observation	development has increased to 2,000 dwellings.	1400	Liliali
		Citilical		development has increased to 2,000 dwellings.		

	Commissioning Group			Although it is recognised that additional capacity will be needed for an additional 4,800 patients, the impact on numbers would make it difficult to justify a whole new development for Westgate Surgery at an early stage. Nevertheless, limited spare capacity exists and the premises are already too small for the list they serve. Options are currently being explored to relocate/redevelop the Westgate Surgery but any proposals need to be affordable as well as financially viable. There may be an opportunity to incorporate a new scheme within a mixed-use development and this would be worth further investigation with landowners and Thanet District Council planning officers. It is unlikely that any s106 contribution would be sufficient to make a meaningful financial contribution towards the capital cost of any new development, however if land were to be gifted to the NHS as a condition of any planning consent, the development cost could be more affordable.				
Millwood Designer Homes Limited	Millwood designer Homes Limited 508	Anna Gillings - Gillings Planning Ltd	Object	These representations should be read in conjunction with the accompanying document dated October 2018. As above, the principle of the allocation for up to 2000 homes is entirely supported. However, there are a series of amendments to the policy which are required to ensure the policy represents the most appropriate approach to delivery. The key issues can be considered as follows: Additional uses It is noted that the Plan supports accommodation for the elderly (within Policy HO20), and it is considered appropriate for SP15 to specifically define that the overall housing provision may include such accommodation. This is relevant in the case of sheltered housing for example, which falls within Class C3 would therefore be considered to contribute towards the objectively assessed need. Density and Site Area Millwood proposes an amendment to the allocation boundary in order for it to better accommodate the proposed number of homes in a comprehensively planned neighbourhood, one that integrates with existing development, routes, features and landscape. Rather than following arbitrary lines across open fields the proposed boundary would align with established routes such as Shottendane Road to the south and with the significant designation of the Scheduled Monument to the south west. There are multiple benefits to this proposed amendment, significant among them being:	- Thus the policy should be reworded to read: Policy SP15 - Strategic Housing Site - Westgate-on-Sea Land to the east and west of Minster Road, Westgate is allocated for up to 2,000 new dwellings (which may include an appropriate proportion of accommodation for the elderly) at a [delete - maximum] average density of 35 dwellings per hectare net across the site. Phasing of development will be generally consistent with the indicative phasing in accordance with Appendix B. Proposals will be judged and permitted only in accordance with a development brief and masterplan for the whole site including provision within the site of: 1) a minimum of [delete - 17.5] 25 ha of open space [delete - to include a functional green corridor between existing urban edge and new development to preserve the more rural characteristics of existing urban edge dwellings]	1431	Gillings Millwood.pdf (74.4 MB)	Web

the ability to take a more comprehensive approach to masterplanning for up to 2000 homes that can 2) provision of a [delete - District relate and connect to established routes; Centrel retail provision to meet the the creation of a neighbourhood with a lower average retail need of the development, fit housing density; and with the retail hierarchy and serve the significantly more generous provision of green the appropriate catchment infrastructure (see 'Landscaping' text below). It is noted that the Plan sets out 'a maximum density of 3) provision of community facilities 35 dwellings per hectare net'. Millwood supports an as outlined in the Infrastructure average density of 35 dwellings per hectare but Delivery Plan (IDP) including a suggest the wording of the policy is amended to reflect [delete - fully serviced] area of 2.05 that this is an average rather than overall maximum. ha serviced to the boundary (to be This wording amendment would allow for a greater provided at the cost of the variety in character and density across the site, developer) to accommodate a new including low density areas of housing, while still two-form entry primary school, ensuring an average of 35 dwellings per hectare and 1 ha of land for a new medical overall. centre, if advised to do so by the Phasing CCG. Millwood Designer Homes are entirely committed to bringing forward the proposed new homes in general Development will be expected to accordance with the timescale in Appendix B. However, provide an appropriate and proportionate contribution to offthe policy as currently worded seeks accordance with this phasing, without any flexibility. However, at 11.3 site highway improvements. the Plan clearly confirms the phasing set out in this appendix is indicative. Thus the policy wording should Masterplanning will be informed reflect this, to allow for flexibility over the plan period, by and address: particularly in light of the infrastructure requirements of the site and wider area. 1) a transport assessment (including modelling of junctions of Landscaping the A28 with Minster Road, Briary The proposed policy stipulates a minimum of 17.5 Close and Garlinge High Street, the hectares of open space. This document illustrates that, junction of Minster Road with within the current allocation boundary, this minimum Shottendane Rd the junction of area is not achievable in combination with an average Brooke Avenue with Maynard residential density of 35 dwellings per hectare. Avenue), and incorporate: Millwood's vision for Westgate is a masterplan designed through a landscape-led approach with • measures to promote multimeaningful, multifunctional areas of public open space modal access, including footway for the new and existing residents to enjoy. A new and cycleway connections, and an neighbourhood of up to 2000 homes requires a variety extended bus service accessible to of types and sizes of public open spaces, but the area the new dwellings quoted within the current SP15 policy does not enable • Link road through the site to link this variety or quantum of open space. Thus the policy Shottendane Road to Dent de Lion wording should reflect this and increase the minimum Road/High Street Garlinge/A28 area of public open space required to 25Ha (which for • Upgrade of Shottendane Road to the avoidance of doubt includes play pitches but not Local Distributor standard 'all other sports' as defined by the Fields in Trust). • appropriate road and junction The proposed policy stipulates a 'green corridor improvements and signalling, between the existing urban edge and new 2) an archaeological evaluation, development' as part of the minimum 17.5 hectares of 3) the need to safeguard the open space also stipulated by the policy. Millwood do setting of scheduled ancient

				not believe this is an appropriate response to existing properties along the northern boundary of the allocation. A narrow corridor of green space along this edge would be largely bordered by back gardens, reducing the opportunity for natural surveillance and overlooking of the corridor, potentially resulting in an unappealing and underused route. The wording in the policy relating to this 'green corridor' should be removed. District Centre It is acknowledged and supported that a range of other complementary uses should be provided as part of the allocation, in order to provide for a balanced community. However, it would be overly prescriptive to define the need for a District Centre within the Plan, particularly as Westgate on Sea already benefits from a defined District Centre. The allocation should therefore allow for the needs of the development to be defined at the time of any application. Thus an amendment to this element of the policy is proposed to state that provision should be made to meet the retail needs of the development, but allowing for those needs to be defined in due course. Community Facilities As noted above, the inclusion of a range of uses is supported. In particular, Millwood Designer Homes support the inclusion of land for a 2FE Primary School (as it is understood this need has been evidenced by KCC). For clarity however, it is important the policy confirms that the requirement is for a serviced area of land, up to the boundary of that land, as it will be for KCC, or any alternative education provider, to define requirements for servicing within the plot. An amendment is therefore proposed. In respect of the medical centre, although again, this is supported in general terms, the need for a new medical centre has not been specified at this stage by the CCG. This is in comparison to the requirement in the Plan for medical centre at Westwood (SP38) where the CCG intension is defined. The policy must allow for the requirement for a medical centre to be undertaken in conjunction with, a	monuments and the listed Dent de Lion Gateway, 4) liaison with service providers to investigate the need to upgrade the capacity of any utility services and infrastructure including gas supply, 5) appropriate arrangements for surface water management/sustainable drainage schemes in line with Margate Surface Water Management Plan, 6) a Landscape and Visual Impact Assessment to address any visual impact on views to and from the adjacent Green Wedge and protecting wide open landscapes and strategic views 7) the need for integration of development and landscaping to take account of public rights of way and enable a soft edge between the site and open countryside.		
Nichols	Patricia	482	Object	On perusal of the information gathering re this proposal it appears that the plan for building this amount of houses is based on figures that are questionable; possibly entirely incorrect.!		1348	Paper

				homes so again I question who these homes are for.		
				buy? I understand that only 30% will be affordable		
				enough to house our population. So I am wondering are these homes to be built for London boroughs to		
				properties around the area would be more than		
				declined. So that in fact the 2,000 empty and derelict		
				grown at the rate first predicted in fact it has actually		
				I understand that the population of Thanet has not		
				life.		
				need to keep these fields for our sanity and quality of		
				Westgate there is only one small playground so we		
				and lovely parks but here these are few and in		
				provide homes. London is known for its green spaces		
				seen farmland disappear around Westwood Cross to		
				Already in my short experience of residing here I have		
				100 years which is so important to our heritage.		
				farm prides itself on being in the same family for over		
				tranquillity so important to our wellbeing. One local		
				living around are able to enjoy nature, peace and		
				space is not only necessary for providing food but areas where wildlife can prosper, it also ensures that those		
				make the country self -sufficient post Brexit. This open		
				considered for building? The government is trying to		
				in the country being grade 1, so why would it even be		
				treasured. I understand that this is the best farming soil		
				fields and farmland and this is something to be		
				within 10/15 minutes' walk of our flat we could reach		
				fact that not only did we have beautiful beaches but		
				with the coastline, when we moved here I loved the		
				Westgate. I discovered Thanet in 2006 and fell in love		
		· ·		and specifically about the 2,500 houses to be built in		

built in Westgate-on-sea. In 2015 it was proposed that			
1,000 homes be built, recently I believe this has been			
increased to in excess of 2,000.			
My reasons for opposing this decision are as follows:			
The planned development is on grade 1 agricultural			
land rather than brown field site. I first heard of this			
plan on the day that it was stated that our country we			
only produce 60% of our own food surely this			
development decrease that statistic even more. Also it			
would effect the environment by increased transport			
needs , lorries and planes.			
In a recent television interview the leader of KCC said			
that in the event of a lorry build up getting to Dover			
these lorries would be held on Manston airport site so			
again another environmental act of madness built			
opposite these potential new homes			
Westgate has an aged population and there is very			
little in the way of public transport. Indeed recently the			
last bus from Margate to Westgate leaves at 10.15pm			
and at the present time no bus serves the area where			
the houses will be built.			
Margate has the highest rate of unemployment in			
Thanet where are these people going to get			
employment?			
	1065	Nunn rep.JPG	Paper
The population figures used to support this draft plan	1005	(37 KB)	Tuper
are largely based on reports by consultant G L		(37 KB)	
Hearn. The figures presented in this report do not			
reflect the true net growth of Thanet in the recent past			
(that being the last decade and including the most			
recent consensus figures). The report includes atypical			
numbers from 2014/15 and 2016/17 and inflates the			
estimated growth from a realistic number or circa 500			
increase to an estimated 1365. There is no evidence to			
support a natural increase of more than 800 individuals			
on an annual basis above the average experienced			
in the recent years.			
Thanet has an overcrowded population already with			
27% of Thanet already built on compared to other			
neighbouring districts, for example Dover 8% and			
Canterbury%. The average population density of Kent is			
439, Thanet's average is 1368.			
It is impossible to understand how the inflated			
estimate of increased demand can be justified.			
The Local plan is supposed to support the local			
demand. The local area cannot sustain the			
increased volume of people which would come from			
outside of the area.			
2. Medical Care			
2. Medical Care As a local resident it is already impossible to register			

	when a proposed new doctors facility would be
	constructed, fitted out and staffed. It is already very
	difficult to secure a place at a local doctors practice
	and it is frequently challenging if not impossible to
	obtain an appointment the day one is needed.
	Dentist- it is extremely challenging to register for a
	local NHS dentist place
	Hospital- QEQM in Margate is closing critical units, with
	no other easily accessible suitable hospital in the
	region being available how would the additional 30,000
	householders be supported. The most recent CQC
	report (5 Sept 2018) details 10 out of 14 measurement
	areas with require improvement.
	Additional demand on this key service in both the near
	and longer term would put the existing
	local population at risk.
	The additional 30,000 houses are proposed to be a
	mixture of social and private housing. Social housing
	alone will put extreme pressure on these services and
	those not in this primary entitlement bracket (myself
	included) would be forced to have to pay for private
	medical and dental care.
	3. Water and Waste
	The demand on the local water supply is already
	resulting in variable water pressure, at peak times the
	pressure to my house is already significantly reduced.
	What does this local plan provide to address the
	additional demand on the water supply resultant from
	30,000 additional houses.
	Waste: The Victorian sewage system which runs under
	and services Thanet is already under considerable
	strain with several occurrences where raw sewage has
	been discharged to the sea in recent years. How does
	the council plan to address the increased demand and
	prevent damage to the environment and ecosystem.
	4. Education
	All local schools (both primary and secondary) and
	significantly overcrowded, insufficiently staffed and
	challenged to appropriately support children at all
	levels of educational needs and abilities.
	Building small scale localised primary school buildings
	will not provide revenue and staff to support the
	additional demand arising from 30,000 additional
	houses and will not address the additional demand on
	secondary schools.
	5. Road network and local parking
	Aside from the transport plan featuring widening and
	improvements to some link roads (eg Thanet Way to
	Westwood Cross) the local road network is already
	overwhelmed by road users. Roads through the coastal
	towns and villages are often at a stand still and in the
, <u>'</u>	

evenings full of cars parked on both sides of the road.
With regards to Garlinge proposals. Draft plans
proposes new road(s) running through
from Shottenden Road through to Dent-de-Lion Road
with the exit being directly in front of my house.
Dent-de-Lion Road is restricted where my house is
located by the pavement and a protected footpath on
the boarder of the field opposite my house. The road
cannot be widened and is not possible on many
occasions for cars to pass in either direction due to
parked cars or if the vehicles are large/wide. The new
road would be seen as a cut through by car users
wishing to find the quickest route from the Thanet Way
to the west side of Margate. The noise and air
pollution resultant from this would be significant and
damaging. This route would encourage drivers to
use routes through existing residential areas and cause
risk to health to pedestrians, elderly and local children.
This road would significantly disrupt my health, well
being and the value of my property.
How would the council propose to mitigate these risks
and impact?
6. Employment
Thanet Policy on Jobs and Economic Growth. Policy
SP02. This document refers to a minimum of 5,000
additional jobs planned for Thanet to 2031.
Thanet already has an unemployment level of 4.9%
which is twice the national average (2.4%).
As stated in the opening paragraph the proposed
30,000 houses across Thanet is not warranted
to support the local demand for housing. Additional
residents would have to be brought into the area to fill
these houses and there is not enough employment.
The 5000 additional jobs would not reduce the local
unemployment to the national average. The area
would be over run with unemployed people, seeking
benefits and calling upon the local services which are
already significantly challenged. The additional demand
on resources would not provide wealth to the area and
would not therefore generate future employment
opportunities.
The 2000 additional houses for the Garlinge area have
no employment opportunities. The local area has 2
small pubs and few high street shops and no
employment opportunities. In order to
take employment opportunities (if they were to exist)
individuals would be forced to take public or private
transport further increasing the pressures on the road
network and further contributing to noise and
pollution.
7. Current population of Garlinge
7. Garrent population of Garninge

The residential area surrounding the Quex estate proposed for developints a quiet not through estate largely populated by elderly residents. A large proportion of the area made up of bungalows which are by design are most suitable for the older generation. An influx of 2000 new houses would bring with it a completely different mix of ages and would change the balance of this well established area. The quality of life of the esting residents would be significantly and negatively affected. 8. Waste Management The council's ability to maintain services to meet existing waste output from the existing population is already significantly to challenged on an annual basis. The increased demand on these services will be increased demand on these services will be increased demand on these services will be increased demand and contamination to the local environment. 9. Emergency Services: The local services are already stretched beyond supply ability. None violent/low level crimes are not responded to due to resource constraints. How does the plan address the increased demand and prevent an impact on the local community. 10. Disruption from the building site My house faces not constraints in community. 11. There will be constant noise from the site machinery and which is proposed for 2000 development from 2018 to 2031. There will be constant noise from the site machinery and which is proposed for 2000 development from 2018 to 2031.

There will be constant disruption to my house. There will be constant noise from the site machinery and
will be constant noise from the site machinery and
vahicles there will be land discruption, the site will have
vehicles, there will be land disruption, the site will have
concreate silos, the site will require erection of
electricity and lighting creating light pollution both
during construction and when populated. Construction
vehicles will create road blocks, local road will be
closed during construction causing more vehicles to
use the already over loaded area. The construction site
and residential site thereafter will significantly affect
my house. My view (which adds to the value of
my house will be destroyed). My house, quality of life
and value of my assets will be demaged permanently,
how does the council justify this and how do they
propose to compensate me for this.
11. Impact to the character, quality and function of
Thanet's rural settlements and natural
environments.
My house has trees with tree preservation orders on
the property. I recently enquired about carrying out
some works to reduce the size/manage the trees and
was told that I could not do so without planning
approval and they were protected because of the value
they have to the local landscape. This landscape will be
destroyed by the development plans, how does the

				_		т-
				council justify destroying the landscape which has		
				previously been documented as being important to the		
				local community.		
				12. Utilisation of Prime Agricultural land for housing		
				The Quex estate land proposed for development is		
				grade A agricultural land. The proposal to build on this		
				land is contrary to the Government's plans for		
				agricultural self-sufficiency post Brexit. The offer by		
				Quex to sell this land for development has not taken		
				community interests into account. The first choice for		
				agricultural land should be to protect it for that		
				purpose.		
				The DRAFT plan does not include options to build on all		
				available brown field sites. Brown field sites should be		
				first consideration and there is no compelling		
				arguments to support the exclusion of brown field sites		
				from the DRAFT plan.		
				These are my objections to the DRAFT plan and I		
				require a full review to all points raised, a detailed		
				reply to each point raised and an opportunity to		
				discuss my objections at the public examination of the		
				Plan.		
Pannell	janet	498	Object	WHY I MOVED TO WESTGATE ON SEA- My husband	1396	Paper
				and I are both in our mid-sixties and moved to		,
				Westgate-on-Sea in February 2017. We were		
				downsizing from our four bed roomed house in Herne		
				Bay and moved to a bungalow in a quiet close here. I		
				used to holiday in Westgate as a child/teenager, when I		
				was living in the Medway Towns. My husband and I still		
				feel the same sort of feeling now that I used to get		
				whilst in Westgate, although we are not on holiday, but		
				retired. The other reason for moving from Herne Bay		
				· · · · · · · · · · · · · · · · · · ·		
				is that, over the last 30 years we have seen so much		
				new development and the roads have		
				become increasingly busier there. We also suffered		
				from noise pollution from the new A299/Thanet Way,		
				which could be heard most days, night and day.		
				We chose our bungalow mainly because its location		
				suited us; 5 minutes to town, 10 minutes to Doctors		
				and 15 minutes to the seafront. We like to walk and we		
				can walk into Birchington or Margate (but have only		
				walked once that way as we find the area quite		
				run down, although it is meant to be improved). We		
				also like to walk across the farmer's fields off the top of		
				Minster Road - one way takes us to Somali Farm (Mr		
				Linington who leases the farm from Quex Park Estates I		
				understand and is meant to have a lifetime tenancy)		
				and onward to Birchington (avoiding the busy A28) or		
				we go left to Garlinge (Dent De Lion		
				Gateway) and across the A28 to Westbrook Seafront.		
				There is a hard path through each field and it is lovely		
				a da mara patri tin bagii cacii nela ana it is lovely		

	scenery any time of year, ideal for cycling and dog	
	walking also.	
	There is quite a bit in the Plan about improved cycle	
	ways, walks and about managing to maintain the	
	scenery/vistas in the area -your health has to be	
	improved if you feel happy about your surroundings	
	and are able to get out in the country or by the sea	
	either walking or cycling. You can imagine our upset	
	then on learning about plans to build 2000 new homes	
	off the Minster Road on the very same farmer's land	
	that we enjoy to walk through.	
	SP 15 - WESTGATE KEY STRATEGIC DEVELOPMENT SITE	
	NO 3 ON FIGURE 18- PAGE 34 OF THANET DISTRICT	
	STRATEGY 2015-2031 (DRAFT)	
	We have been to two local meetings about the Thanet	
	Local Plan and been to look at documents at the local	
	library. There is a lot to read and we have not had the	
	time or understanding to take all the recommendations	
	in - we can only comment therefore on our local area	
	issues.	
	The development proposed is to the East and West of	
	Minster Road, approaching Shottendane Road - a	
	narrow, very busy route which leads to Garlinge High	
	Street and then onwards to Margate (hospital area) or	
	if you turn right you can get to Manston or Birchington	
	or Acol/access the A299 to Ramsgate. We are worried	
	about the impact 2000 homes will have on that road	
	and on Minster Road, which becomes very busy	
	particularly between 4 pm and 6 pm. There is a small	
	private school on Minster Road, nearly opposite the	
	park and parents need to pick their children up from	
	here/drop off so would be increasingly dangerous.	
	Minster Road is also used to access Lymington Road	
	(we live in a close off Lymington Road) and in turn the	
	road where the primary school is (St Crispins Road) so	
	the junction between Lymington Road and Minster	
	Road also is very busy at certain times of the day. Any	
	work to up-date Shottendane Lane to a local	
	distribution standard would cause inevitable	
	delays/inconvenience.	
	Although we are saddened to think of the farmland	
	being built on because of the extra traffic in the area	
	and losing the wonderful walks/ vistas, we are also	
	concerned that the land is Grade 1 and its use for	
	housing is opposed by the Campaign to Protect Rural	
	England. As I mentioned before I think we need to	
	grow more food in the area and if this land	
	(and potentially the developer will want more land and	
	wish to build right up to Shottendane Lane, not just the	
	area shown on the plan) is built on we won't be able to	
	re-instate it's use for food produce. We don't know	
1 1	1.0 matter to and for food producer the don't know	

what will happen to the farmer himself, who tells us he has been dold he can have the leave und he does he have the his was und he does he not as outcestul fruit and veg shop/ate from sonail Farm, which is where we often wait. Vo. Those sheeps has a delicency of notural and service of the property of the property of the property of the property of the property of the property of public parks an graderies of \$8 hectars of public parks and graderies of \$8 hectars of public parks and graderies of \$8 hectars of \$9 hec	
nuns a successful Trutt and we per work poly/cafe from Somali Farm, which is where we often work to. Thanet already has a deficiency of natural and seminatural green space of 13.3 hectares and a deficiency of public parks and gardens of 38 hectares (P.34 Thanet Draft Local Plan – prosubmission publications - Regulation 19 - Policy ST11 - Housing Provision - Item 3.12.2 so why would you think to build his valuable land (lovely views, lovely views, lovely view walking/cycling away from main roads). BUS ROUTE - Any development on the formland would need to see that a bus route was walkide nearer to it. At the moment, there is an infrequent service from Lymington Road to Margate/Messvala, Lunderstand the Plan does mention of Margate/Messvala, Lunderstand the Plan does mention Stagescoach to review. Service 3.2 (Dane Valley to Schriffige) so that the valual penetrate any proposed development. If housing were to be included for elderly persons, it would penetrate any proposed development. If housing were to be included for elderly persons, it would not supply and a large type of the persons of the perso	
Farm, which is where we of ten walk to. Thanet already has a deficiency of natural and seminatural green space of 133 hectares and a deficiency of public parks and gardens of 38 hectares and a deficiency of public parks and gardens of 38 hectaros and a deficiency of public parks and gardens of 38 hectarosism in the sale profit Local Plan - presubmission - bould on this valuable land (lowely views), ovely safe walking/polyging away from main roads). BUS ROUTE - Any development on the farmland would need to see that a bus route was available nearer to it. At the moment there is an infrequent scribe from Lymington Road to Margate/Westwood Cross and a good bus service along the A28 - to Cantrol Views of the Carbon And Any and Margate/Banagate/Bradstairs. Lunderstand the Plan does mention Stagecoach to reache service 32 (Dane Valley to Garlinge) so that it would penetrate any proposed development. If housing were to be included for elderly persons; It would definitely be very important. MEDICAL SFRUCES/SCHOOLS - We have only one suggery in Westgate and I understand that is overscribed with 10,200 patients. It is already cramped and in Garlinge there is only a Portakan Surgery 2000 new homes would probably hold at least 3500 adults and probably over 3000 children so a were problem by the surgery would need to be built on that would penetrate and probably over school would be needed before housing. Children of up to Junior School age in Westgate would likely choose to go to St Crispin's but that is overcrowded and in carlinge there is only a Portakney thoose to go to St Crispin's but that is overcrowded and in only in the problem plus to surrowded and in which it is situated, where there is already a problem plus to surrowded and in only in the plus are wegation.	
Thanet already has a deficiency of natural and semi- natural grane pages of 13.5 hectares (P.34 Thanet Draft Local Plan presubmission and adeficiency of public parks and gardens of 38 hectares (P.34 Thanet Draft Local Plan presubmission and this valuable land (lovely views, lovely safe walking/cycling away from main roads). BUS ROUTE - Any development on the farmland would need to see that a bus route was available nearer to it. At the moment there is an infrequent service from Lymington Road to Margiate/Westwood Cross and a good bus service along the A28 - to Canterbury and Margiate/Romagiate/groadstatus Judicial Color Views (Sovely Sov	
natural green space of 153 hectares and a (eficiency of public parks and grarders of 38 hectares (P.34 Thanet Draft Local Plan - presubmission publications - Regulation 19 - Policy SP11 - Hough Provision - Item 3.12; so why would you think to build on this valuable land (lovely views, Lovely safe walking/cycling away from main roads). BUS ROUTE - And gevelopment on the farmland would need to see that a bus routle was available nearer to it. At the moment there is an inferent service from Lymington Road to Margate/Nestwood Cross and a good bus service along the A28 to Cantrebury and Margate/Roadstairs. I understand the Plan does mention Stagecoch to Centrebury and Margate/Roadstairs. I understand the Plan does mention Stagecoch to review Service 32 (Dane Valley to Garlings) so that it would generate any proposed development. I how give ret to be included for elderly persons, it would definitely be very important. MEDICAL SERVICES/SCHOOLS - We have only one surgery in Westgate and I understand that is overscribed with 10.200 patients. It is already cramped and in Garlings there is only a Polish ungery 2000 new homes would probably hold at least 3500 adults and probably over 3000 children are would probably hold at least 3500 adults and probably over 3000 children are would be needed before housing. Children of up to Junior School age in Westgate would like westgate would like how so the St. Crispin's but that is overcrowded and I don't think they can expand - plus any expandion would have a knock on to the road in which it is situated, where there is a laready a problem plus the surrounding roads, particularly at drop off/pick up times TOURISM — In Birchington of Schotlendane Lane/Park Lane there are two carwan parks - Birchington Vale	
public parks and gardens of 38 hectures (P.3.4 Thanet Draft tocal Plan presubhistions) = Regulation 19 - Policy \$911 - Housing Provision - Item 3.1.72 so with yould you think uld on this valuable land (lovely views, lovely safe walking/cycling away from main roads). BUS ROUTE - Any development on the farmfand would need to see that a bus route was available nearer to it. At the moment there is an infrequent service from Lymington Boat of Margate/viewod Cross and a good bus service along the A28 - to Canterbury and Margate/Pamagate/Straits. I understand the Plan does mention Stagecoach for review Service 32 (One Valley to Garling's) so I twood penetrate any proposed development. If housing were to be included for elderly persons, it would define by every important. MEDICAL SERVICES/SCHOOLS - We have only one surgery in Westgate and I understand that is overscribed with 10,200 patients. It is already cramped and In Garling there is only a Protababin surgery. 2000 new homes would probably hold at least 3500 adults and probably over 3000 children and be in place before any housing. Little likely could be needed before housing. Children of up to Junior School age in Westgate and I understand would be needed before housing. Children of up to Junior School age in Westgate would likely choose to go to St Crispin's but that is overcrowded and in Garling there is only a Respansion would have a knock on for the road in which it is situated, where there is already a problem plus the surrounding roads, particularly at problem plus the surrounding roads, particularly at problem plus the surrounding roads, particularly at drop offlylok up times TOWISM - in Birchington off Shottendane Lane/Park Lane there are two caravan parks - Birchington Vale

SUPERMARKETS/SHOPS - We have quite a number of	SUPERMARKETS/SHOPS - We have quite a number of
small shops/businesses in Westgate but only one	
Supermarket, which is a small Co-op, very heavily used.	
Extra development would make queues in there even	
longer and I think another supermarket - like a	

				Sainsbury or Tesco Local would be needed in the area to cope. PATHWAYS -Would need to be extended on Minster Road as they peter out at the end of the current housing along it and you have to walk on the farmland. AIR POLUTION - Assuming the majority of the houses would have at least one car there would be about 2000 more cars on the roads in our vicinity (bearing in mind a lot will have two and a few will have none). This will bring a lot more air pollution. NEW ROADS -We understand that there is likely to be a new road to Minnis Bay from Brooksend on the A28 if the Birchington development goes ahead and a new road from Brooksend to Acol and a road from Shottendane Lane across to Garlinge (Dent-de-Lion), forming a new roundabout and somehow to adjoin the A28 at Westbrook. We are worried about the congestion on the A28 whilst these roads are built. There is already a long tailback at Brooksend at the end of the working day. If a new road is built across the farmland/development to Garlinge, that will impact on the noise levels in the area and there will be a lot of hold-ups in the area for people travelling to and from work. We are worried about being sandwiched between two heavily trafficked roads, i.e. A28 and the new road from Brooksend to Acol, which may head towards this way (we haven't been able to see a definite plan of the route it would take yet) but possibly it will head up to the A299. The last thing I would like to add that if any development has to go ahead at Westgate I hope it will just be for no more than 50 homes and that a large proportion of those would be for older residents who may like to downsize from their larger houses; that in turn would allow for their homes to be purchased by prospective families. There is a lack of suitable housing for older persons (other than flats) and I hope also that no housing development will take place on the proposed site (Westgate/Garlinge).		
Pannell	Richard	500	Object	THE DRAFT DEVELOPMENT PLAN OF THE THANET DISTRICT COUNCIL (AUGUST 2018) Having reviewed the plan at Westgate Library I feel compelled to write and express my deep concerns regarding the plan. I consider the number of new homes proposed and their location on mainly prime agricultural land will have a severe detrimental impact, changing Westgate and the surrounding areas into crowed and busy environments.	The Plan should be a tool to inform the Local Community. Unfortunately, because of amendments, conflicting information and confusing content, this suggests to me that the Plan has not been positively prepared.	Paper

	The Plan should be a tool to inform the Local	
	Community. Unfortunately, because of amendments,	
	conflicting information and confusing content, this	
	suggests to me that the Plan has not been positively	
	prepared.	
	One important area where conflicting information	
	seems to have been provided is the prime agricultural	
	land, owned by the Quex Park Estates, running	
	adjacent to the northern side of Shottendane Road at	
	Westgate which is not included in the Plan for	
	development. However, at a meeting I was told by a	
	local Councillor that the land in fact in the plan	
	and designated for housing development.	
	The Hearn report suggesting the Thanet area	
	population growth of 1365 persons each year until	
	2031 and used as the basis for the conclusion that	
	17000 new homes are going to be required is obviously	
	incorrect when considered against the actual growth in	
	the local population noted in the ONS 16/17 survey	
	which stated a 533 persons population growth.	
	In the local community there is a sense that the	
	number of 17000 new homes, suggested in the Plan, is	
	connected to the on-going practice by London	
	Boroughs moving families, on their housing waiting	
	lists, to cheaper homes in the Thanet area. This	
	practice can be clearly identified in the new housing	
	estate adjacent to the Westwood Shopping Centre	
	at Ramsgate.	
	Affordable housing for local people - 'Yes', but not	
	affordable housing for the LondonBoroughs.	
	This approach to provide high volume housing surely is	
	very short sighted, when Thanet has the second	
	highest density of population in Kent (Dartford being	
	the highest). It would seem that other areas in Kent,	
	such as Canterbury or Dover, with less density of	
	population and better employment opportunities for	
	new migrants, would be a preferred option for new	
	migrants.	
	In Westgate, if the proposed housing were to be built,	
	then its' population could potentially double its size	
	and overwhelm the local schools and other public	
	services.	
	Westgate doctors' surgery is currently over-subscribed	
	with 10,200 registered patients (maximum 10,000	
	patient registrations).	
	As the plan allows for building on some of the best	
	agricultural land in the County, which is strongly	
	opposed by the Campaign to Protect Rural England,	
	and contrary to Government proposals for land use	
	after Brexit, I am, therefore, somewhat confused as to	
	the thinking behind such drastic proposals.	
<u> </u>	· · · · · · · · · · · · · · · · · · ·	<u> </u>

					Another serious issue with the plan is that currently open corridors between the building developments of		
					Birchington, Westgate and Garlinge are proposed to be built upon which will merge the identities of the three towns.		
					I trust the feedback to the Plan that I have submitted		
					herein, and feedback from other concerned local people, will be given serious consideration and used to		
					further develop the plan by reducing the proposed new		
					builds to suit the current stretched utility services and		
					the local infrastructure.		
Parnell	Margaret		392	Object	My objections to the houses being built in Westgate 1. Population density of Westgate is already 28,000	1152	Paper
					building houses would increase overcrowding putting		
					more pressure on schools, clinics and doctors.		
					Roads around Westgate are full to capacity and roads are heaving, the roads around Westgate were		
					not built for all the extra traffic plus parking is a		
					nightmare.		
					3. QEQM Hospital is finding it more difficult to cope		
					with the present population, for eg the first time in my		
					life had to go to A&E and had a five hour wait.		
					4. Primary schools in the area are overcrowded and under resourced.		
					5. Sewerage is also a problem, the tip at Margate is		
					always extremely busy and is often closed due to the		
					sheer capacity of waste.		
					6. I have lived in Westgate for many years and the		
					thought of all the beautiful fields being built on is		
					beyond belief. Please think carefully before making any		
Peeling	Dorothy		420	Object	final decisions. I have lived in Westgate for over sixty years. I like the	1196	Paper
reemig	Dolothy		420	Object	peace and quiet of the fields and countryside	1150	rapei
					outlook. I also think it is important to keep the		
					farmland for food especially when we leave the EU.		
					The doctors at present is coping with the pressure of		
					the people who live here, extra will cause problems.		
					I am in my eighties and I love living in St Benets, and I		
					am worried about the noise increase, and increase in traffic, which is already bad.		
Pennington	M	Westgate Town	502	Object	I am writing to express our opposition to the proposal	1410	Email
· cgco		Council		o sjest	to allocate a total of 2,500 new houses to Westgate on		2
					Sea, in the framework of the latest draft local		
					development plan. Our position Is based on the		
					following facts:		
					1) The OAHN (Objectively assessed housing need) is		
					grossly overstated, because it is based on completely out-of-trend figures for a single year (2013-14).		
					Moreover, it underestimates the additional		
					accommodation which can be provided from currently		
					unoccupied dwellings and does not take into account		

	the proportion of elderly people In the existing	
	population.	
	2) The population density in Thanet in general, and in	
	Westgate in particular, is-already very high compared	
	with the rest of Kent.	
	3) Our schools and clinics are already overstretched.	
	4} Additional housing would have to be built on prime	
	agricultural land, which is contrary to	
	the Government's food security and environmental	
	plans post-Brexit.	
	5) There are serious questions about the effects of	
	increases in housing developments on the water table	
	here.	
	In addition, the process of consultation has been	
	inadequate and unacceptable. Thanet District Council	
	will not release the feedback from the Open Spaces	
	consultation which was completed over a year ago.	
	Moreover, Thanet District Council "lost" the	
	representation from Westgate on Sea in 2015. In the	
	latest consultation, it seems the draft plan supplied to	
	Westgate on Sea Library was not the correct version.	
	In our view Thanet District Council should reject the	
	'one-size-fits-all" OAHN figures from Whitehall and	
	insist on a more serious approach to local planning.	
	Thanet is an exceptional case because of its level of	
	deprivation - it is not part of the "rich south-east" as it	
	is commonly perceived.	
	1. OAHN	
	i) The findings in the latest report (2016) by G L Hearn,	
	which increase the estimates for population growth in	
	Thanet, are distorted by the figures for 2013-14 which	
	are completely untypical and for 2014-15 which are	
	very high; this can be seen easily in figure 2 of the	
	summary. More up-to-date ONS figures for 2016-17	
	(July-June) show a return to the lower trends in earlier	
	years, with natural growth showing a decline of 200,	
	internal net migration at 419 and international net	
	migration at 314, giving total net annual growth of 533,	
	far below the 1,365-annual growth in the Hearn report,	
	which in our view is completely discredited. The latest	
	figures for EU net migration show much sharper	
	falls than those predicted In the report - indeed, the	
	figures in the report would be counter to Government	
	policy. The figures have clearly been 'pumped up' to	
	legitimise massive migration into Thanet from London.	
	ii) There are nearly 2,000 empty, derelict and	
	unoccupied dwellings in Thanet and the first priority	
	should be to focus on those.	
	iii) The proportion of elderly people in Westgate	
	(nearly 30%) is well above the Thanet average, and	
	almost double the national average of 16%.	
<u>'</u>		

				2. Population density i) Thanet, at 27%, is already far more 'built-on' than the neighbouring districts (eg. Dover at 8% and Canterbury at 9%). ii) The population density tables of ONS for 2017 show a Kent average of 439 and a Thanet average of 1368 (so Thanet is already over 3 times the average for Kent), compared with Dover at only 368 and Canterbury at 531. The current population density in Westgate is already over 2,8001 I The proposed allocations of new homes would double the population and therefore the population density of Westgate, thus increasing overcrowding and the pressure on schools and clinics. 3. Schools and clinics i) Westgate surgery is now over-subscribed with 10,200 registered patients (maximum 10,000 registrations). It is too cramped in its premises and adding residents will result in a deterioration in health care for all. Even within Thanet, Westgate is already a deprived area, with health indicators for life expectancy and disability considerably worse than average. ii) The two primary schools in the area proposed for housing (St Crisplns and Chartfield) are overcrowded and under-resourced. 4. Agricultural land i) The land proposed for development Is prime agricultural and its use for housing is opposed by CPRE. This is contrary to the Government's plans for agricultural selfsufficiency post-Brexit. ii) The fact that Quex have offered the land for sale does not take community. or national food security interests into account. 5. Water supply i) We understand the water table in Thanet Is at risk and further housing development could create serious water supply problems. It is for Thanet District Council to represent the people of Westgate to the authorities in Whitehall, but in the past, we feel we have been let down. We need someone to stand up for us and demonstrate that we		
Phelan	Jennifer	67	Object	can manage our own development. I am writing concerning the proposed destruction of our beautiful Westgate. Firstly, I cannot believe that anyone would think building on the arable fields, some of the best arable in	178	Email
				the country. Considering the erosion of green in Thanet, we need all the green space we can keep. Secondly, where are all the jobs for these people going to come from. We are already one of the worst palaces in the South East for work, also one of the most		

<u></u>	1				1	 ,
				crowded.		
				Thirdly, where is the water going to come from? All of		
				these houses will be using a massive amount of		
				water. The proposed reservoir we were supposed to		
				be getting near Canterbury never materialised. Surely		
				it doesn't take much to realise that the water situation		
				will be desperate.		
				Fourthly, I know we will be promised new schools,		
				Doctors surgeries, but will they come before the		
				houses? Westgate schools and Doctors fit the current		
				requirements, a shopping area is also enough to suit		
				requirements. This is an extremely badly thought-out		
				business by someone looking for a quick fix and no		
				doubt the income from rates is flashing the pound		
				signs, that is if anyone can get a job to pay them.		
				I sincerely hope this plan will be rethought and		
Dunatan	Durana	462	Object	common sense prevail	4247	Danas
Preston	Duncan	462	Object	I feel I must write to ask you not to allow this	1317	Paper
				development to proceed. The building of 2000 houses		
				in such a small town will absolutely ruin the		
				community. The Schools, Doctors, Dentists are all		
				massively over subscribed already so to add another		
				25%+ to the existing population is just not acceptable.		
				The road infrastructure can not possibly sustain this		
				amount of new traffic I would urge you to visit		
				Westgate, by the library, at 8.45ish in the morning and		
				see the queues at the traffic lights. On a Sunny day in		
				summer the queues to Margate on the Canterbury		
				road is horrendous so these houses will also have a		
				detrimental effect on Margate, just as it is becoming a		
				vibrant town again.		
				The logic of building 2000 houses on good agricultural		
				land is absurd when there is perfect infrastructure and		
				space at the former Manston Airport site. I would hope		
				that, as the Strategic Planning Officer, you will agree		
				that the site of these houses has been a political		
				decision to "save the Airport" and not done with the		
				interests of the people in Westgate & Birchington.		
Price	Carol	112	Object	Re: Local Plan: ST1 and ST2 sites	238	Paper
				In common with the vast majority of my community, I		
				am writing to express my extreme concern regarding		
				the excessive number of new homes being proposed -		
				and thereafter forcibly imposed on - Thanet in the new		
				local Plan, regardless of the views of the people who		
				actually live there, or the woeful inability of the current		
				local infrastructure to serve their needs.		
				Most particularly of all - again, in common with my		
				whole community - I am objecting to any building on		
				the STI and ST2 sites around Westgate and Garlinge,		
				which comprise prime agricultural land.		
				which comprise prime agricultural lattu.		

When seeking to build all these new homes, key issues
Thanet residents want addressed and answered are:
Who is going to live in them? Where are the jobs for
them? And where is the infrastructure to cater for such
a massive new influx in population when the
existing infrastructure is already unable to cope? Are
the new home owners going to bring wealth, jobs, vital
skills or other positive benefits to our community, or
are they going to place yet further strain on already
over-stretched council funds and public services? And
if you cannot answer them then surely the homes
should not be built. It is nothing short of insane to do
otherwise; to sacrifice land for a future that may never
happen, or put the rights and needs of people yet
to live here above those who already do.
Some sympathy does go to TDC, in being forced by
central government to come up with these higher
home numbers. But one also likes to think that, when it
comes to allotting more specific areas for new homes,
council members have the sense and integrity to
appreciate the type of land that their community
always wants preserved as more off limits and sacred.
And most sacred of all should be prime agricultural
land.
TDC should be commended for turning down building
permission on the STI and ST2 sites, last time they
came up for consideration. In so doing, they also
earned much respect and gratitude from the local
population. So once again I would like to highlight the
fuller reasons why these sites should not be built on, in
the hope that TDC will make the same sensible decision
to reject this land for building on again:
1. Food production. You may be aware that the STI/2
sites feature the highest possible grading for
farmland/food production in the UK- i.e. Grade 1. We
only have 21% of this type of extra-fertile land in the
entire UK for growing food on and thus cannot afford
to lose it as a resource. We do not know how much
more of our own food we may need to produce in a
post Brexit world, and thus sacrificing any more of it for
housing - on top of that already sacrificed at
Westwood - would be foolhardy to say the least.
Especially when there are plenty of other option sites
still on the table. It also makes little sense to be
building more and more homes for an expanding
population, only to find we then can't feed them
because we have sold off all the farmland.
2. Flooding/sinkholes risk. The council have previously
been alerted to past flooding from the STI site into
Victoria Avenue and Belmont road below, in the 1970s,
resulting in fatalities, after heavier rain. Currently it is

T T	
	only heavy (and deeply ploughed) agricultural soil, and
	the roots of crops/more mature surrounding trees and
	shrubs that retain excess water from heavier rainfall in
	the STI site. Once this land is concreted over the
	flooding risk during heavier rain would become more
	severe again, due to the specific geography of the STI
	site. Residents who have lived many decades around
	this site also say that both it, and the ST2 site, have
	developed sinkholes in the past which of course, in a
	residential area, could endanger life. Moreover, as the
	above facts are already well documented, this would
	severely affect any insurance payout should any of the
	properties built on this land be flooded or lost to sinkholes.
	3. Environment/loss of wildlife habitat. The STI and ST2
	sites host a significant population of wildlife - i.e. voles,
	shrews, foxes, badgers, umpteen different species of
	birds, insects and moths, plus the rarer slow worm.
	Building on this land would wipe them out. The CPRE (Council for the Protection of Rural England) have also
	made their views known re how devastating
	an environmental impact the destruction of this land
	for building would have.
	4. Impact on residents' physical, mental and
	psychological health. It is not always appreciated how
	much mental and physical benefit residents gain from
	the nearby presence of open space, fields and
	countryside. Or that a vast majority of residents
	surrounding the STI and ST2 sites only moved there, or
	bought their houses there, in order to experience, or
	benefit from, views of open countryside. And escape
	the kind of more oppressive, urban, built up landscape
	they previously lived in. The STI/2 sites are, in fact, not
	just 'bits of land' but vital space that oxygenates our
	whole community and keeps it in better mental health.
	It is where people walk, take exercise and appreciate
	their surroundings. Countless studies have also shown
	that the more built up an environment people live in,
	the more their mental health declines. The same is true
	of higher levels of traffic pollution. Both of these higher
	risks to mental health would ensue if this land was built
	on.
	5. Education and learning. For many local children, the
	STI/2 sites present their only real experience of
	countryside. They walk across it to school each
	morning and back in the afternoon. It is where they
	play in summer, pick blackberries in the autumn, learn
	about local plants and wildlife, the rotation of different
	crops and more fully understand the changing of seasons. All of this would be lost to them forever if
	the land were built on.

6. Destruction of more individual village identities.
Currently Westgate and Garlinge represent two very
individual town or village communities, with their own
hearts and identities which are important to them,
separated by the current STI/2 site farmland. Building
on this would morph them both into one big urban
sprawl, and their more individual hearts and souls
as communities would be lost forever.
7. Dangerous and previously failed precedents.
Residents are concerned that the allotment of any
more prime agricultural land for housing sets a
dangerous precedent - i.e. that Thanet council, unlike
its residents, places no value whatsoever on its
precious farmland/countryside as a resource and sees
it all as 'fair game' instead to stick houses on. Not only
that but the allotment of prime agricultural farmland
for housing has previously occurred at Westwood,
with the big new housing development currently sited
along Haine Road, which is widely viewed locally as a
total eyesore, if not utter disaster. For has an uglier,
more barren or soulless complex ever been devised?
No heart, no space, no community. Nothing. No one I
know would ever want to live there and homes are
proving trickier to sell. Thus vital, precious farmland
was pointlessly sacrificed for this abject failure and
blight on the landscape.
8. Other options. If more new housing is really needed,
in the kind of numbers previously cited, then surely the
most sensible thing to do is site them at Manston, and
create a whole new community there, with its own
more self-sufficient infrastructure - i.e. schools, shops,
medical centre - which in turn would take pressure off
local resources elsewhere? There is certainly the space
and it would mean no further farmland would need to
be sacrificed. I think the majority of Thanet residents
would view that as the least worst option.
In all honesty, most Thanet residents view the Local
Plan as the most catastrophic event to ever hit their
community, and something which promises them ever
more misery, and destruction of their everyday quality
of life, as the future unfolds. In terms of more traffic,
noise, crowding, air pollution, crime, stress and
struggles to access most basic services like health and
education.
But decisions still have to be made as to where new
homes should be cited, in a way that does not alienate
this council ever further from its residents. Which the
destruction of any further agricultural land for housing
will surely do. For reasons now fully highlighted in this
letter. Never, ever underestimate what our fields and
countryside really mean to us all in Thanet, or how
country state really fricant to as all fit friance, of flow

				hard we are prepared to fight to preserve them.		
Ralph	SA	474	Object	I object to the Building of 2,500 houses on Farm Land	1339	Paper
				in Westgate & surrounding, we do not have the		
				facilitys for this. We cannot cope now & TDC does		
				nothing it is Disgracefull. Where are the jobs coming		
				from & these houses wont be for LOCAL people they		
				will go to the overflow of London etc.		
				Where are the Hospital, Doctors, Dentists, nursing		
				Homes, ambalence, Fire Service, Water, Sewers,		
				Schools, Parking, Shops, Street Lights, Rubbish Bins,		
				Dog Bins		
				TDC cannot clean Drains, Repair Roads, Footpaths,		
				Beaches. No Street Cleaning, Trees & Parks are not		
				seen to, Speeding on Roads, STROKE UNIT closing at		
				QEQM Hospital No Police on the streets. I can go on		
				but I got writters cramp.		
				Please use your heads & STOP THIS NOW		
				Let us locals have a hand in this we pay enough Council		
				TAX.		
Scott	D	56	Object	I have examined the plans and I know the site well.	149	Paper
				I wish to object strongly to the development of this		
				amount of houses on this site of green belt. The land is		
				top grade agricultural land and a natural wildlife area		
				and is used by all walks of life - dog walkers, ramblers,		
				cyclists, photographers, bird watchers and people who		
				just want to enjoy our beautiful countryside. All this		
				would vanish if tons of concrete were to be dumped on		
				it. This amount of houses, people and cars would put		
				an enourmous strain on a already overloaded		
				Westgate.		
				As you already know, water is a problem already.		
				Sewers need updating, Schools are overloaded as are		
				doctors, Dentists & Hospitals & the roads are		
				congested. The Council have no staff due to lack of		
				money as it is so who's going to clean the streets and		
				empty the bins and who's going to police all these		
				extra people what with a shortage of policemen/women.		
				My son is dreaming of working on the land when he		
				leaves school in a years time but he's had to change his		
				mind and look for something else because houses dont		
				spout food, agricultural land does, so along with		
				thousands of local Thanet people dont destroy our		
				green and pleasant land.		
Scott		511	Object	The Proposed allocations ST1 and ST2	1441	Email
50011			Object	The proposed allocations ST1 and ST2 in the Draft Local	1771	Linaii
				Plan are not proportionate to the existing built form		
				and local services and should be withdrawn. Moreover		
				it is now clear that the designation of the proposals		
				may have been to provide contributions towards a new		
				highway Route. The "Inner Circuit" requires		

Sewell	D	377	Object	development contributions which will not and, at the current time, cannot be financed by KCC - the strategic highway Authority. Also, the money made from the housing allocation will be taken as section 106 monies for this new road. TDC have stated that they will not consider the CIL monies and this once again is against Localism. We hereby write to protest at the above draft local plan for 2000 new properties to be built in Westgate-on-Sea to house overspill from London on prime agricultural land. We need this land to grow food supplies so please take this into consideration, bearing in mind the cost of imported food post-Brexit is likely	1088	Paper
				to rise steeply. (We don't even have a decent road now for our area and further services like buses, taxis are polluting our air so we desparately need a TRAM system - do you have a 5, 10, 15 year plan for our area? The litter in our area is also depressing - we despair! Our surgery is turning people away daily because they are full up. Poor tourists and residents have to queue in traffic for ages to get anywhere. Southern Water denied us for six months a supply of water for showers, heating etc. Couldn't be bothered - too busy - we don't count. The situation is deteriorating very rapidly so the prospect of disruption of 2,000 properties being build will further exacerbate our growing problems. Water		
Sexton	Peter	489	Object	leaks are reported but go for months with no result. I am writing to formally object to proposals to develop areas adjacent to Minster Road, Westgate on Sea. I understand that there is already a significant number of identified sites that have planning permission for housing in the local Thanet area, as well as a significant acreage of brownfield land which would accommodate sufficient housing to meet the needs of future local needs. Thanet also has a significantly higher than average number of unoccupied houses which could make a further significant contribution to meeting future demands. The areas identified for development offer Grade 1 agricultural land and therefore would score highly in any decision for them not to be included. Recent agreements by all political parties on the need for policies to fight climate change, TDC see it fit to build on land currently used to produce food and therefore reduce the amount of locally produced crops and directly impact our food mile footprint. The uncertainty of our current political situation adds to the necessity to protect our agricultural capacity. The visual landscape and wildlife and biodiversity also add unmeasurable value to the communities adjacent to	1359	Email

flower these identified sizes will have on invervenible impact to both this and Grade 1 agricultural land. The addition of the proposed number of houses adds a disproportionate increase in population to two small villages and also a disproportionate amount of the	
locality in relation to the existing levels of deprivation and lack of employment opportunities and the impact further developments will have. Westgate and Garlinge are two separate villages and the proposals in the plan would simply mean the creation of a "mini conurbation", therefore destroying the uniqueness of what the settlements currently offer local residents. I note that good planning practice considers population growth trends and the avoidance of adding overly large developments onto existing small communities. The local plan therefore fails on both counts. The population of Westgate sand Garlinge has not significantly increased over the past three censuses and would not likely do so in the future. The addition of the proposed number of houses adds a disproportionate increase in population to two small villages and also a disproportionate amount of the

proposed total of over 20000 houses across Thanet	
	proposed total of over 20000 houses across Thanet.
I also have a number of real concerns around what is	I also have a number of real concerns around what is

				being said regarding the number of Houses required.		
				Thanet Council have the responsibility to meet the		
				housing needs of its local population. I also question		
				the decision to base the proposed developments in		
				the local plan being made on the very highest		
				population and employment growth. Thanet is an area		
				of significantly higher unemployment than most of		
				Kent and the UK as a whole. To suggest need for a		
				further 20000 homes is wildly optimistic at the very		
				least.		
				Local Planners have a huge responsibility to ensure		
				sustainable development to meet the needs of its local		
				population. They also have a responsibility to ensure		
				planning procedures and practice allows prioritisation		
				of all potential sites after appropriate and		
				detailed consideration of the potential impacts. The		
				National Planning Policy Framework argues		
				for sustainable development. This means that after any		
				development any area should be no worse off than		
				before the development. So if important agricultural		
				land is lost, quality landscape is lost, if there will be		
				more congestion, overcrowded schools, hospitals and		
				surgeries then a site should not be included.		
				The sites suggested for development in Westgate are		
				not appropriate for development and should not be		
				part of any future Local Plan.		
Sherriff	Patricia	180	Observation	As a resident of Westgate .I am deeply	522	Paper
				concerned with the proposal for an additional		
				2500,new houses for Westgate. On sea. And would like		
				to point out a few issues and give some positive		
				alternatives.		
				2,500 houses will double the population requiring the		
				present services to be grossly extended. I.enew		
				schools, businesses, hospital, doctors! Surgeries		
				,transport, Police and all services ,otherwise health and		
				education and well being of everyone wilf suffer.		
				The already large density of population will greatly		
				increase.		
				A need to in crease employment for these extra people		
				or will these Londoners and others commute daily ?		
				Kent is known as The Garden of England yet		
				agricultural land is going to disappear in large areas We		
				will need our agricultural land for the future.		
				The crime rate will also increase with additional new		
				housing estates .		
				There will no doubt be a number of foreign speaking		
				families with children who will pose Language		
				problems in schools The elderly often have hearing		
				problems and find foreign accents difficult to		
				•		
	l l			understand	l l	l l
				understand Resources including water electricity and gas need to		

				be adequate . Present roads will not accommodate the extra transport necessary and new roads need to be built before thoughts of building extra housing . On a more positive note some alternatives that might be possible . If so much housing is required in the country .Why not build a new town.with low raise flat blocks to save land ,These could be built farther afield After World War 2 several new towns were built very successfully so perhaps that is what is needed. 2 . The unoccupied and derelict buildings could be refurbished for housing again saving prime land. 3. Developers could be given an . Incentive to provide housing on sites they have already acquired. 4. School extensions could be considered to cope with children of foreigners who tend to reduce the teaching capacity available to our children. It is very important to maintain a high standard of education. 5 . Building of small blocks of flats would minimise the use of agricultural land. Westgate on sea is a beautiful little town with lovely		
				buildings and friendly ,helpful people and nice buildings. We have something very special and beautiful? WHY SPOIL IT?		
Smith and Christopher Porteous	Janet	366	Observation	As residents of Westgate-on-Sea, Kent, we feel compelled to write regarding the proposed Housing Plan for Westgate-on-Sea and adjoining villages In Kent. Whilst there is always a need for housing for the ever increasing population -to suggest building thousands of houses on mainly prime agricultural land seems absurd. The land has been farmed by local people for centuries giving families a living in a very deprived area. There are very few job prospects here, with high unemployment and many on benefits. Who will live in these houses? Will they be for local families or is the idea to ship out families from the much overpriced london Boroughs? To build homes in this quantity will create an ever increasing pressure on our already overstretched facilities such as schools, doctors and hospitals. As weli as domestic services like gas, electricity, water and especially sewage II There would need to be an infrastructure in place to cater for the extra volume of usage. Not like the situation at Westwood Cross when large quantities of houses were built but there is still no sign of schools, doctors or open spaces for children to play. Also, our roads would be gridlocked -they were not	1063	Paper

	,					
				built to cope with large volumes of traffic. The		
				Canterbury Road is already bursting at the seams and it		
				you live in this area you would know that on many		
				occasions this summer it has taken hours to do a short		
				journey. Where would all this traffic go?		
				These plans have not been thought through. Surely		
				there are other options instead of building on this		
				prime agricultural land. THE FIEIDS ARE FOR FOOD NOT		
				HOUSES.		
				We beg you to think again before giving any sign of		
				approval for this gross overbuild which will change our		
				landscape and villages forever.

Swindells	John	203	Object	Initially I enclose a copy of my letter dated 1st March 2015 outlining my reasons for objecting to just 1000 houses on the prime agricultural land in Westgate on Sea and Garlinge and stressing the importance of MANSTON AIRPORT as an airport. My views have not changed at all but I now find that some 2,500 properties are being suggested which will of course mean approximately 5000 adults, 5000 children and at least 3500 motor vehicles. The proposal does not bear thinking about. This part of Thanet would be permanently gridlocked. We do not have, the schools, medical services, policing or any other facilities to cope with such an incredible expansion of population. The population growth figures put forward are of course totally misleading and out of date. Thanet also have around 2000 empty/derelict properties which could be brought back into use and thus solve a huge part of the housing problem. As we head into the unknown of a disastrous "Brexit" and the vast increase in food costs being suggested, how can anyone even consider using our prime		629	052 Swindells John letter 2015.pdf (140 KB)	Paper

-						
				agricultural land for housing. Thanet has many far		
				more suitable areas to use for development and that is		
				only if we really do need thousands of new houses.		
				We are already an overcrowded "Isle" compared to		
				many other parts ofKent and since it is very unlikely		
				that Thanet residents will actually require the		
				suggested developments, it seems possible that the		
				vast numbers of houses will actually be to relieve		
				housing problems in south London rather than for local		
				families. We do not have the facilities or infrastructure		
				to become a dumping ground for other council areas.		
Sykes	Anthony	31	Object	Westgate will be ruined by this development. It is far to	All economic trends do not support 57	Web
'	,			many for the community to absorb. When the	these numbers. Those who have

				numbers doubled.		
Taylor	Ray	380	Object	I am happy to accept that we, the United Kingdom,	1103	Paper
Taylor	Nay	380	Object	need more houses and I agree that each town and	1103	rapei
				village with the UK should shoulder part of the in		
				builds. Having said that Ibelieve the number of houses		
				should be proportionate to the size of the town/village.		
				It is my belief that 500 new houses in Westgate on Sea		
				,		
				& Garlinge would be enough for both communities to		
				absorb the influx of this development. For the District		
				Council to propose the building of 2000 houses on		
				prime agricultural land is nothing but a short-sighted		
				approach to a knee-jerk response to a housing issue		
				brought about by successive Administrations within the		
				Isle ofThanet passing the buck.		
				My individual thoughts are;		
				Fresh water -I live in the area where the houses will be		
				built. If we have a fire around this area Southern Water		
				(SW) need to reduce pressure to several streets to		
				maintain pressure for the Emergency Service. Once the		
				fire is extinguished SW re-instate the water pressure.		
				This results in brown water coming from the taps with		
				many black bits floating in it. We have complained to		
				SW but their view is that we were left with no option		
				than to reduce pressure and this causes the dirt within		
				the pipe to fall to the bottom of the pipe which, when		
				the pressure is re-instated, comes out of your tap. The		
				remedy- run your tap for up to 30 mins until clear. This		
				area is on a water meter! How can SW cope with an		
				additional 2000 houses?		
				Sewerage- At the height of the summer season when		
				we have many visitors staying in and around Westgate		
L		I I	l.	, , , , ,		

on Sea SW at a public meeting that they were working	
at maximum capacity. This Public Meeting was held in	
Westgate Pavilion 2015 with Chris Wells (then leader of	
TDC) and Sir Roger Gale (local MP) present. If, during	
the summer, we have heavy rain then SW have no	
other option than to discharge untreated sewage	
directly into the sea. Thanet is well known for having	
beaches closed because of excrement and soiled items	
on the beach. The addition of these houses will;	
Increased instances of pollution on the beaches	
resulting in them being closed to the public.	
2. Thanet will only need 2 or 3 of these occasions in	
one year of beach closures due to effluent being	
present on the beaches before visitors and tourists will	
find other places to go. Tourism is our main	
employment here in the lise of Thanet.	
3. Increase in health problems with possible legal	
action against SW and TDC	
Rain Water run off -In 1953 the farmer thought he	
would change the direction of ploughing the fields that	
are now allocated to these 2000 houses being built.	
Because the field was ploughed North to South rather	
than the traditional East to West there was nothing to	
prevent the rain water run off to flow down the	
surrounding roads and to pool around Canterbury	
Road. In the summer of 1953 we had a severe storm.	
The run off soon found its level opposite Grove Road	
and Canterbury Road. The water level went above the	
first-floor windows of many houses and resulted in one	
death and many homes left uninhabitable.	
If we concrete and tarmac over these fields then we	
will be faced with the same situation at some time in	
the future. Couple this with both Thanet District	
Council and Kent County Council withdrawing services	
like clearing litter and clearing the street drains then	
even a blind man can see what is waiting to happen.	
Traffic- In these days where it is not unusual for	
households to have 2 cars per house this could mean	
an extra 2500-3500 extra cars on the streets of	
Westgate on Sea. This would have a crippling effect on	
Westgate and Garlinge. The centre of both	
communities is already full to bursting with cars and	
this will just bring gridlock to our town centres. There is	
also the increased pollution that these extra vehicles	
will bring to our streets. This, tied in with the average	
person in Westgate is elderly, has a high risk of	
casualties on the roads.	
Another consideration are the roads around this area.	
The roads are narrow with cars parked on both sides.	
Currently there is a voluntary give-way policy between	
locals. These roads are not suitable for larger vehicles	

and an increase in traffic flow would be totally manic. Even the Emergency vehicles have difficulty using these roads with certain side roads being unpassable after 1800hrs when everyone returns home from work/school. The Contractor has suggested that they would be willing to widen and extend Shottendane Rd as part of the Section 106. This is great but the contractor went on to say that they would only do these road works if the contractor in Birchington did their end of the road building and that Kent County Council honoured their promise to build at the other end taking vehicles away from the area onto a main dual carriage way. Employment- The lise of Thanet has the highest Unemployment in the whole of Kent and is in the top 5 within the UK. Currently the unemployment is 4.9 whereas the National average is 2.4 (ONS Mat 2018) I We have little or no employment on this lise. I note, with some astonishment, that TDC are proposing these 2000 houses with no new business' being created in the area. One of the main reasons why this area of Thanet is interesting to those choosing to live here is that it is a great place to retire to! This will have a side effect of discouraging people from buying these houses. If this turns out to be the case then the developer would be left with no alternative than to sell the empty houses to the highest bidder which is a very real worrying for us in Westgate on Sea after the debacle at Westwood Cross! Where are all these jobs coming from'? The Local Plan states that 5000 jobs will be created by the building of these houses. The Consultant who did this report stated that 3000 jobs would be created on a 'temporary basis'. TDC did not like this figure so upped it to 5000 with no evidence to back up their figures. Also, what happens to those jobs once the houses are finished? Emergency Services- There is no provision to increase the cover of emergency services in our part of Eats Kent. Currently, Kent Police spend most of the day responding to triple 9 emergencies only. The Fire Brigade has lost one of their engines/tenders and our local hospital, QEQM, is having some of their flag ship units being removed from them to William Harvey Hospital in Ashford. We are becoming more and more isolated which will be exacerbated by these extra 2000 houses. It is also a concern that, as we are currently waiting up to 3 weeks for a Doctor's Appointment, that these extra people will be forced to attend A&E at QEQM Hospital for treatment. Building on Grade A Farmland -without a doubt this

Thanet, and that Thanet have been allocated 3% more	
houses that anywhere else in Kent. Does that mean	
that Kent has been allocated 3% more houses that any	
other county in the country?	
I strongly object to these proposals for the following	
reasons:-	
a. Houses being built on Grade A agricultural land?	
WHY? This land is vital for the provision of fresh food	
for the residents of Westgate on Sea and	
surrounding areas. There are lots of Brown field areas	
in Thanet that-you should use to build houses on.	
Roger Gale told us at a meeting in The Swan in	
Westgate last week that he personally had identified	
Brown Field sites in Thane large enough for these 2000	
houses to be built on.	
b. Statistics show that there are lk empty properties in	
Thanet left to rot, I suggest you take on all these	
properties, refurbish them and use them to house the	
needy in Thanet. That will help to solve a housing	
problem and clean up the area.	
c. 2k extra houses with an average of 3 persons per	
household = a total of 6k people, almost doubling the	
population of Westgate on Sea. I notice you have	
used the census of 2001 rather than that of 2011 which	
will give a more accurate reading of the actual	
population, WHY?	
d. The infrastructure in this part of Thanet is diabolical	
now, what will it be like with another 2K + vehicles	
using it daily? Will the infrastructure be dealt with	
before the houses are built? Since the houses were	
built at Westwood Cross just a few miles away,	
Shottendane Road has become a constant nightmare	
with	
traffic. The roads in Thanet are filthy, drains blocked	
due to lack of cleansing, litter everywhere. We pay	
Council Tax to TDC to provide a service that we are	
not getting.	
e. All you are talking about is building houses. Who is	
providing schools, doctor's surgeries, dentists, hospital,	
employment for all these residents? A few	
labouring jobs will probably be created whilst the	
building is taking place but after that they will be	
unemployed and living on the resources of TDC.	
f. What percentage of these houses will be Social Housing 2 Will the Social Housing be used for residents	
Housing? Will the Social Housing be used for residents of Thanet?	
g. Affordable Housing? What is your definition of	
Affordable Housing?	
h. Do you have plans to sell any of these houses to	
London Boroughs or Housing Associations? These people will be promised a better life living by the sea	
people will be profitised a better life living by the sea	

				only to find when they arrive here that they cannot get work, no schools for their children, no medical services and the cost of living is unaffordable because of the farm land has been built on and food then will have to be imported from other countries, hence pushing up the cost of living. Do you think this is a proper way to treat human beings? i. Southern Water have been telling you for years that the Fresh Water available is at it's absolute limit now. Doubling the population and no fresh water is very scary. Houses, people and NO WATER? This does not make sense. J. Sewage is also a very big problem in this area now with untreated sewage being discharged directly into the sea, the result being that several beaches around Thanet have been closed for some time during the swnmer season. Thanet needs tourists, with beaches closed they will not return b1:Jt go elsewhere and the tourist industry will just die. k. I agree that we need some houses but it should be proportionate to the size of each village and the facilities available. Please acknowledge receipt of this letter with an answer to my questions.			
Twyman	Paul	324	Object	SP 15 should revert to the original	SP 15 should revert to the original	993	Email
Walker	Roger	371	Object	I am opposed to the above proposal for the following reasons: Looking at the proposed site there is, and if history tells us anything, there will be no infrastructure put in place prior to construction commencing leading to the inevitable problems viz: 1. The roads are already badly congested and in places in poor condition and with all the construction traffic - Gridlock. 2. Even worse when construction is completed and a further 2000 plus cars are let loose on our country lanes. 3. There is already overload at the Westgate Surgery. The addition of a minimum 4000 patients cannot be accepted. The possible proposal for a bigger surgery somewhere close will only add to the congestion. The ageing population of the area will further exacerbate the problems. 4. Where are the children going to be educated, the current schools could not handle that level of influx. The traffic on school days in the area is already causing huge problems. 5. Most critical is WATER. Where is that to come from. Southern Water are already experiencing major difficulties. We have no reservoir. A salt water		1069	Paper

			treatment plant, maybe, but will that be in place prior to construction commencing. I am sceptical. 6. Jobs. There is no industryin an area that has already a high unemployment rate. Where are this huge influx of people going to find employment. 7. FINALLY and my biggest objection is the proposal to build on precious agricultural land. We are going to need that land to feed an ever burgeoning population in the future. I look forward to your future proposal regarding the above.			
Wallis D B	428	Object	I am writing to object to the Draft Thanet Local Plan 2018 with special reference to the Garlinge and Westgate development. I am the owner of Dent de Lion Medieval Gatehouse (National Monument 31404) and object to the encroachment of the development to this site. Dent de Lion Gatehouse represents the only standing remains of an otherwise demolished fortified house. It survives well, retaining most of its original fabric, including interesting decorative details, and provides evidence for the high architectural quality and importance of the house during the medieval period. An extract from a letter to me, from A. R. Middleton on behalf of the Secretary of State for Culture, Media and Sport identifies this building as "A rare monument type with fewer than 200 identified examples, its remains are considered of national importance". This Grade II* monument, painted by J. M. W. Turner in 1792, sits within a barn complex with stables, oast house, farmhouse and yard, farm cottages, a small copse, 'protected' trees and orchard - it links through these to the open countryside beyond. It has been surrounded on three sides by uninterrupted extensive grade 1 agricultural land for over 600 years. These open views make a strong contribution to its significance. Development in the surrounding countryside will intrude on important views from the monument (which is over thirteen metres tall) and will also disrupt valued views of this historic building from approach roads and other viewpoints. The setting is an important factor of this national asset. The new building line proposed includes the farmhouse and yard, the farm cottages, the orchard and the copse, plus 200 metres of hedging planted by the Dent de Lion residents. If developed it would effectively destroy the character of the site. "As heritage assets are irreplaceable any harm or loss	1235	121 Wallis D B.pdf (109 KB)	Paper

					convincing justification" 'National planning policy framework', Paragraph 132		
Vard	Linda		157	Object	Again the majority of land allocated for development is prime agricultural land which is not acceptable nor is it in line with National requirements. Do not allow building on Agricultural land.	448	Web
White	Matthew	Dent De Lion Residents Association	336	Object	We are writing to object to the Draft Thanet Local Plan 2018, specifically the Garlinge and Westgate development. I am the current chairperson for the Dent De Lion Residents Association, which consists of 12 households. I am also on the steering committee for the Westgate Neighbourhood Plan and therefore have been involved in various meetings, especially with the proposed developer Millwood Homes. We object to the development and we are concerned about the detrimental impact such a large development will have on the setting of Dent de The Medieval Gatehouse is a Grade 2* Listed Scheduled Ancient Monument. "Monument No 31404 is of national importance, and as such is affordable protection under the provisions of the Ancient Monuments and Archaeological Areas Act 1979" Letter from the Secretary of State to Dennis Wallis, owner of the gatehouse. Scheduled Monument Consent is needed for works within the protected area of a monument in terms of impact on its setting. We believe this applies to the whole setting of Dent De Lion, which has incorporated the barn buildings, farmer's cottages, farmhouse, and orchard for hundreds of years. Millwood Homes have shown an initial respectful knowledge of Dent De Lion and are proposing a green exclusion zone to surround and protect this area. Dent De Lion has been surrounded by open fields in a rural setting for over 600 years and deserves to remain so. Developing the fields into a 2000 dwelling development that engulfs Dent De Lion is not 'safeguarding' this ancient monument. It is worrying enough that 1000 houses were initially designated to this area, but our increasing concern is to do with the rise in housing numbers from 1000 to 2000, and with TDC indicating on the land allocation sitemap a smaller area of available land than Millwood Homes are proposing to develop on. This will result in a loss of additional green space, which will be used to protect Dent De Lion. Millwood have indicated that 2000 dwellings per hectare.	1018	Paper

	developer Millwood Homes. Our objections are based	
	on both a personal impact level as well as a more	
	general effect on the local area, local residents, and	
	infrastructure.	
	We are concerned about the impact such a large	
	development will have on the setting of Dent de Lion.	
	The Gatehouse is a Grade 2* Listed Scheduled Ancient	
	Monument of national importance and as such there is	
	planning law to protect the view to and from this	
	monument. This also applies to the	
	setting of Dent De Lion, which has incorporated the	
	barn buildings, farmer's cottages, farmhouse, and	
	orchard for hundreds of years. Millwood Homes have	
	shown an initial respectful knowledge of Dent De Lion	
	and are proposing a green exclusion zone to surround	
	and protect the area. Our concern is to do with the	
	increase in housing numbers from 1000 to 2000, and	
	with TDC indicating on the land allocation sitemap a	
	smaller area of available land than Millwood Homes	
	are proposing to develop on. This will result in a loss of	
	additional green space, which will be used to protect	
	Dent De Lion. Millwood have Indicated that 2000	
	dwellings on this mapped area will give a housing	
	density of 40 dwellings per hectare, which is well above	
	the draft plans maximum density of 35 dwellings per	
	hectare.	
	We want to object to the loss of the semi-rural	
	setting. We moved here in 2002 from the centre of	
	Ramsgate with the specific intention of creating a	
	home in a semi-rural location partly surrounded by	
	fields. Our main reason was so that we could raise a	
	family in a quiet and safe environment but we are now	
	faced with raising our young daughters surrounded by	
	a housing estate with the possibility of it being partly	
	populated by social housing and the problems that	
	potentially brings.	
	processes, company	
	Millwood Homes have said that the orchard will	
	not be used for development but we have concerns	
	that the limits placed by TDC on available land will put	
	pressure on this orchard being developed. It is a	
	natural wildlife habitat that needs to be protected. It is	
	a good natural environment that supports varied	
	wildlife, including protected species such as bats and	
	lesser spotted woodpeckers. There are TPO's on some	
	of the trees, which we hope will be respected.	
	We strongly object to the proposed road linking	
	Shottendane Road and Dent De Lion Road. This	
	suggested road has not yet been modelled or properly	
	considered. I have been asked as a member of the	
	Westgate Neighbourhood Plan to attend and onsite

This
reasons. Firstly, this road will potentially be used as a main access to and from the new development, with Garlinge having, the majority of the proposed 2000 dwellings, many of which will want to use this new road to get access to the junction of Garlinge High Street and the A25 Centretury Rand, but had not take only takes one car trying to turn right that is not willing to go into the middle section of this junction of cause a build up of cars behind. I have sat in a queue for 15 minutes or more on many occasions and adding possibly hundreds of additional cars to this junction is important. This will also cause major delays at this properties of the properties of the properties of the properties. The will be accessed the properties of the properties of the properties of the properties of the properties of the properties. The properties of the p	
main access to and from the new development, with Garlinge having the majority of the proposed 2000 devellings, many of which will want to use this new road to get access to the junction of carriage sligh Street and the A28 Canterbury Road. It only takes one car trying to turn right list is not willing to go into the middle section of this junction to cause a build up of cars behind. I have said in a quese for 15 minutes or more on many occasions and adding possibly hundreds of addictional cars it is junction is impractical. This will also cause major delays at the junction of benth be the Road and Garling High Street. Why develop Shottendane Road as a major arterial road and not use if as the main point less the main point access in and out of the new development? Secondly we have major concerns about the proximity of this new road to the setting of Dent De Lion and the harm it will cause. Will it est with the proximity of this new road to the setting of Dent De Lion and the harm it will cause. Will it est with the setting of Dent De Lion and the harm it will cause. Will test into the exclusion road proposed yellowood thomes? * We object to the development on grade agricultural land that has been farmed for over any concerns about the away out are also taking away the lifetime ternant farmers jobs. homes and income. With Previous and the prove that one of the policy of the housing with Garling and Westgate getting 30% more than the rest of Thanet. Thanet is already one of them to the rest of Insert than the rest of Thanet. Thanet is already one of them to the subject one in grade and westgate getting 30% more than the rest of Thanet. Thanet is already one of the subject one than the rest of Thanet. Thanet is already one of sub and impact are less severe on the rural villages. 2000 housels going to destroy the village feel and appearance of Garlings and Westgate and put more pressure on amentics than any work of the mount of the policy of the housing when the contract and put more pressure on the rural village	
Garlinge having, the majority of the proposed 2000 dwellings, many of which roll want on this new road to get access to the junction of Garlinge High Street and the A25 Canterbury Road. It only takes one car trying to turn right that is not willing to go into the middles eaction of this junction to cause a build up of cars behind. I have sat in a queue for 15 minutes or more on many occasions and adding possibly hundreds of additional cars to this junction is impractical. This will also cause major days at the junction of Dent De Lion Road and Garlinge High Street. Why develop shortendene Road as a major arterial road and not use it as the main point of access in and out of the new development? Second where war major concerns about the proximity of this new road to the setting of Dent De Lion and the harm will cause. Will it eat into the exclusion zone proposed by Millwood Homes? • We object to the development on grade lagricultural land that has been farmed for over 600 years. Once this has been build can ever be returned to its original condition and farmed. If you take the farmland away you are also taking wavy the lifetime tenant farmers job; nows and income. Will breat look and you can be considered to the returned to riso original condition and farmed. If you take the farmland saw you are also taking wavy the lifetime tenant farmers job; nows and income. Will breat look and you can be considered way you are also taking wavy the lifetime tenant farmers job; nows and income. Will breat look and you go will be sufficiency when it comes to food. • We object to the density of the housing, with Garlings and Westgate getting 30% more than the rest of Thanet. Thanet, is already one of them sold income. Well breat of many than the rest of Thanet. Thanet, is already one of the sold impact are less severe on the rural willages. 2000 houses is going to destroy the village feel and appearance of Carlings and well-gate end under the proper of the proper of the proper of the proper of the proper of the proper of the p	
dwellings, many of which will want to use this new road to get access to the junction of Garlinge High Street and the A28 Conterbury Road. It only takes one car rying to turn right that is not willing to go into the middle section of this junction to cause a build up of cars, be shind, I have sain a queue for 15 minutes or more on many occasions and adding possibly hundreds of additionate cars to this junction is impractical. This will also cause major delays at the junction of born the Lon Road and single High Street. Why develop Shottendame Road as a major arterial road and not use it as the main gringer High Street. Why develop Shottendame Road as a major arterial road and not use it as the main post of access in and out of the new development? Secondly we have major concurrs about the proximity of the proximity of the wroad to the setting of Dent De Llon and the harm it will cause. Will it eat into the exclusions roun proposed by Milkwood Homes? **We object to the development on grade **Lagricultural land that has been farmed for over Occi years once this has been farmed for over Occi years once this has been farmed for over Occi years once this has been farmed for over the land of the province of the prov	
road to get access to the junction of Garlinge High Street and the AZE Cartechury Road th only takes one car trying to turn right that is not willing to go into the middle section of this junction to cause a build up of cars behind. I have sat in a queue for 15 minutes or more on many occasion and adding possibly hundreds of additional cars to this junction is impractical. This will also cause major delays at the junction of Dent De Lion Road and Garlinge High Street. Why develop Photelmane Road as major aterial road and not use it as the main point of access in and out of the new development? Send we have major concerns about the proximity of this new road to the setting of Dent De Lion and the havill cause. Will it eat into the exclusion zone proposed by Millwood Homes? • We object to the development on grade lagricultural land that has been farmed for over 600 years. Once this has been band and any out are also taking away the lifetime tenant farmers jobs, homes and income. With Brest looming, now more than eve we need to prove our self-sufficiency when it comes to food. • We object to the density of the housing, with Garringe and Westgate getting 30% more than the rest of Thanet. Thanet is afresdy on wome or than ever food the carries of the control of the most densely populated areas in Kent. This should be more evenly distributed across. We are concerned that although there is the mention	We are concerned that although there is the mention
of a new medical facility in the local plan, this might	
not go ahead if proper funding cannot be allocated.	
The current doctors surgery in Garlinge has already	
been marked for closure once this year but is still open	been marked for closure once this year but is still open

				at the moment. It is more than double over subscribed. How can the current NHS infrastructure (surgery's and A&E) cope with another proposed 2000 homes in Westgate and		
				Garlinge, and on a wider scale 17000 homes in Thanet? We object to the current housing assessment of 17000		
				houses for Thanet. The ONS has recently revised down its previous estimate for households being formed to		
				159,000 per year. This puts a big question mark over		
				the government's current plans for 300,000 new homes to be built per year. The current figures being		
				used estimate a Thanet population growth of		
				approximately 1200 people per year and yet the		
				population growth for Thanet last year was just over		
				500, less than half of the estimate. Over development		
				based on over estimated figures will just create a pool		
				of empty houses and half finished developments due		
				to lack of house buyers. There aren't enough jobs for locals so why would anyone want to move to Thanet.		
Wing	Susan	397	Object	Firstly, I have had difficulty in accessing your site after	1159	Email
			,	my first visit as it was branded as a danger.		
				Comments are in respect of Westgate in particular		
				though would apply to much of the planning.		
				My concerns are: This is prime farm land. With Brexit approaching we		
				will need to produce more food not less! This has been		
				a site where sky larks have bred – this is a protected		
				bird.		
				Infrastructure is not in place.		
				Lack of school places, our infant/junior schools are full		
				with no expansion room.		
				lack of medical and dental cover in Westgate for the extra population. No NHS availability with our dentist is		
				a usual state. The increase in size of our medical centre		
				will not guarantee more GP's they are a rare breed.		
				Vehicular access is difficult now and likely to be chaotic		
				by 2031.		
				Water both for house use and for run off may cause Southern Water a problem they cannot resolve.		
				Sewage may be a similar problem.		
				Local hospital, despite its best efforts cannot cope with		
				the current flow of patients. Is this to be expanded?		
				Are we using brown field sites first?		
				I am sorry that these are last minute points but I am sure tally with much that has been submitted.		
Woodbridge	M	94	Object	I totally object to houses being built on Grade 1	215	Paper
				Agricultural land. who are the houses for?		
				I totally object to the 2,500 houses being built in		
				Westgate and Garlinge. The proposed houses being		

				1			1
			\Box		built was said in 2015 to be 1,000 why has it gone up		
					another 1,500 is the total going to stop at that I don't		
					think so. Who are the houses for?		
					We still have a lot of unused land and empty buildings		
					in Thanet to consider. I object because Westgate		
					cannot cope with the amount of traffic we already		
					have.		
					Our schools are already overstretched with unruly		
					children from the London area we don't need anymore.		
					Our doctors surgeries are overstretched not enough		
					GPs. Doctors have retired no GPs to replace them. I		
					cannot get a GP appointment on the day or weeks		
					ahead. Our QEQM Hospital can not cope with the		
					volume of patients when you are seen after 5-6 hours		
					sent home not treated correctly (overstretched) not		
1					enough doctors or nurses.		
					How can you possible think we can cope in Thanet with		
					more people coming to this area with no jobs.		
					Thanet cannot afford to keep more people on benefit		
					because that is what will happen. this is a deprived		
					area. We don't have the proper infrastructure Thanet is		
					classed as a desert area. Come on you people start		
					supporting the residents of Westgate Garlinge &		
					Thanet in general. No to houses on Grade 1 agricultural land. We need fields for food not red bricks.

					also with the inclusion of the sites STI & ST2 relating to		
					Garlinge and Westgate.		
					I would like it noted that Iwish to be able to add further		
					objections to this proposal as and when facts come to		
					light as I have submitted a number of Freedom of		
					Information questions to Thanet District Council that		
					currently remain either completely unanswered or only		
					answered in part, despite now being well over the		
					statutory 20 working days and also despite several		
					follow-up e-mails from myself regarding this.		
					The need for 12,000 houses		
					My first concern is that the council appear to be trying		
					to fit the plan details around the chosen number of		
					12,000 houses, rather than coming to a figure based on		
					a deliverable, achievable number of houses required by		
					an objective, evidenced based need for local people		
					which is at the heart of the localism act.		
					There still appears to be misunderstanding on the issue		
					of where the 12,000 requirement originates. In a		
					conversation with Planning Officer Steve Moores it was		
					confirmed that whilst the government had not said

	housing requirements despite Experian themselves
	being unconvinced that these figures are actually
	achievable.
	In the local plan produced by Swale, they have
	acknowledged that we are in a time of huge economic
	uncertainty. They have plans to create 7,000 jobs
	saying that to achieve this they only need to deliver a
	more realistic 10,800 houses and that (3.0.6) "a higher
	target committed to prematurely would result in goals
	which are not obtainable, and ultimately expose
	communities to uncertainties and demands for
	infrastructure that have little prospect of being
	obtainable".
	I would say that Thanet's hope for 5,000 jobs and
	12,000 houses will ultimately prove to be
	unobtainable. Swale also state they are planning to
	effectively use brown field sites and minimise the loss
	of high quality agricultural land. Thanet only plan to
	use 40% brown field sites. This would then mean that
	60% of the allocations are on green field sites. In the
	case of Garlinge and Westgate (STI & ST2) 100% of the
	allocation will be on green field Grade 1agricultural
	land.
	The Green Wedges
	In the draft local plan it states that the green wedges
	that separate Thanet's towns will be protected. I ask
	that ST1 is re-designated as a green wedge as this land
	is all that actually separates Garlinge and Westgate and
	provides the protection that enables them to retain
	their character as individual villages in their own right.
	Having lived in Thanet all my life and in Garlinge High
	Street for 16 years and for the last 4 years in Briary
	Close, I can confirm that community pride and
	individuality is at the heart of the village of Garlinge. I
	also have many friends in Westgate who feel the same
	about their village and community.
	It is inevitable that Garlinge and Westgate will lose
	their separate identities if the line that has been drawn
	straight across the map from the built up area of
	Garlinge to the built up area of Westgate is filled in
	with the proposed housing allocation. This will create
	an unacceptable, continuous sprawl of houses.
	Protecting our agricultural land should be a priority as
	it is some of the best and most versatile growing land
	in the country and it should therefore be treated as an
	asset. Liz Truss who is the Secretary for the
	environment recognises this. It is particularly important
	that we maintain a cautious approach regarding the
	use of green field sites at this time as currently the fate
	of Manston, which is potentially a vast brown field site
	remains unknown.
1 1	

		Potential Residents	
		Westgate's population is approximately 6,996 as of the	
		2011 Census and Garlinge 4,849. This has changed very	
		little in the last 10 years when it was 6,594 for	
		Westgate and 4,858for Garlinge in the 2001 Census.	
		This is a total increase of only 393 people in 10 years.	
		This is the natural amount of growth and the amount	
		upon which growth for the next 10 to 20 years should	
		be based.	
		The decline in the Cliftonville wards in terms of crime	
		and anti-social behaviour and the subsequent need for	
		a selective licensing scheme illustrates what happens	
		when the demographics of an area are changed by an	
		influx of new people rather than allowing only the	
		natural local growth that is the idea of localism to	
		occur.	
		I was very concerned to see an advert produced by	
		Westminster Council offering up to £25,000	
		(dependant on current property size) for tenants over	
		60 wishing to downsize and relocate to mainly new	
		built homes along the coast and in the countryside.	
		Thanet's ambitious local plan sounds almost purpose	
		built for this and I am sure other London boroughs and	
		their tenants will also be very keen to take advantage,	
		as, indeed, appears to already be the case in parts of	
		Thanet.	
		Crime	
		I have mentioned above my concerns regarding the	
		impact of demographic change on crime. Westgate and	
		Garlinge are currently very safe and friendly villages in	
		which to live and to visit. I would ask that ST1 & ST2	
		are removed from the plan in order that our low levels	
		of crime are able to remain as such.	
		Thanet as a whole has very high levels of crime, in fact	
		it has the highest levels in Kent, which is another	
		reason to adopt a more reserved approach when	
		considering our total housing allocation. This is	
		especially relevant at a time when policing budgets and	
		policing numbers are being cut. There is talk of merger	
		between Kent and Essex police and rumours that	
		Margate police station may close, this would severely	
		impact on response times for Westgate and Garlinge.	
		QEQM Hospital	
		The CQC report dated 13/8/14 rated emergency care at	
		QEQM as inadequate, mainly due to not enough	
		appropriately trained staff which put patients at risk of	
		receiving unsafe care. Also a 40% vacancy rate for	
		medical registrars led to delays in assessment,	
		treatment and discharge of patients requiring medical	
		care. Medical emergency patients were not always able	
		to be transferred to the appropriate specialist.	
<u> </u>	1 1	To the string of	

Moulting for the MUC reveals I leave how difficult it is
Working for the NHS myself, I know how difficult it is
for EKHUFT (East Kent NHS Foundation Trust) to recruit
the appropriate staff. I can also confirm that currently
many clinics in Outpatients are extremely over booked,
leading to long waits for patients in the department
and that extra clinics regularly have to be put on in
order to prevent patients breaching government
targets, in a service which is already stretched to
capacity and beyond with existing patients. I was extremely concerned that via a Freedom of
Information request to EKHUFT dated 12/1/15 asking
what measures were in place to cope with an
additional12,000 houses, I received the reply "we can
confirm EKHUFT has not been formally asked to
comment as part of the planning process as yet,
therefore we are unable to make a comment regarding
the new houses being built in Thanet".
Doctors, Dentists and Schools
The surgeries at Garlinge and Westgate are near to
capacity and are unable to expand much further.
Recently I stood outside the surgery in the rain, 10
minutes, before opening time to get an urgent
appointment for my son, to be told all appointments
with my doctor had been taken and it would have to be
a telephone consultation- not ideal for a poorly child
with a chest infection!
It is already extremely difficult to find an NHS dentist
accepting new patients locally, this will only get worse
with higher demand for services.
I am also concerned at the lack of consideration given
to education, especially at secondary school level.
Transport Infrastructure
Westgate and Garlinge are poorly services by buses in
comparison to the rest of Thanet, and are not serviced
at all by the Thanet Loop. This will be a major
disadvantage for any new development in these
villages.
The Canterbury Road is already an accident black spot.
In 2013 along a very small stretch of the A28 (from just
between Westgate Golf Club and the junction of
Hartsdown Road) there were 5 serious crashes, 13
minor crashes, with a further 12 crashes on the roads
South of the A28 within that area. There was a fatality
in 2007 outside St Augustines and a fatality further
along the A28 at Margate sea front in 2010. Obviously
increased traffic from a new development will lead to
increased risk of collision.
At present, Thanet is often gridlocked, with the air
quality around Birchington Square often having
dangerous pollution levels. The Canterbury Road is
already under tremendous pressure, particularly at

		cortain times of the day and the surrey dire read-	<u> </u>	
		certain times of the day and the surrounding roads		
		such as Garlinge High Street and Minster Road are		
		narrow and congested. If Shottendane Road is		
		widened, traffic to Westwood Cross will create even		
		more of a bottle neck at Coffin Corner/ Victoria traffic		
		lights. Traffic leading towards Birchington/ Canterbury		
		will have terrible trouble when it gets to Acol. Again, I		
		was extremely concerned to discover via a Freedom of		
		Information question to KCC sent on 2/2/15 that no assessments have been done to check on the transport		
		·		
		infrastructure viability of ST1 & ST2. The reply was "we		
		can confirm that at this stage there are no plans for		
		the area. KCC have been presented with pre		
		development papers and before this can be		
		considered we will require a full transport assessment		
		and the highway authority will require full mitigation to accommodate any additional impacts on the highway		
		network generated by increased trips from the		
		development areas. This may involve upgrades and		
		improvements to existing roads and		
		junctions in and around the area and further afield		
		such as key hotspots of Coffin House Corner/Victoria		
		traffic lights and Birchington square".		
		Why were these assessments not obtained prior to STI		
		& ST2 being included in the draft plan? How can these		
		sites be deemed to be deliverable when this vital		
		transport needs remains unknown? Where is the		
		assurance that any such transport improvements can		
		be funded or delivered?		
		ST1 & ST2		
		It appears that the original version of the local plan		
		only included sites \$485 & 5486. At some point these		
		were included under the umbrella of ST1, in Quex's		
		own words "as ST1 & ST2 are all under one ownership		
		and therefore easier". I believe STI & ST2 were hastily		
		added without due thought and process and should be		
		removed as unsuitable from the local plan along with		
		the previously named S485 & S486.		
		Archaeology		
		The fields around Dent De Lion and around the original		
		5485 & 5486 sites are archaeologically highly sensitive		
		and will require evaluation as crop mark sites, before		
		any development can take place.		
		Birds and Wildlife		
		There are many farm land and migratory birds seen on		
		the fields that comprise STI & ST2 and as such a		
		wintering and breeding bird survey is essential.		
		Preservation of the hedge that runs along the length of		
		Briary Close is also essential as this has many birds		
		(such as Black Birds) nesting within in. I understand		
		from Mr Verrall that a wildlife assessment will need to		
	<u> </u>	<u>.</u>	<u>. </u>	

be performed at the appropriate time of year and as there are also Slow Worms (protected under the Wildlife and Countryside act 1981) living in the Briary Close hedge, I believe this should also include a full reptile survey prior to any works starting. Briary Close Briary Close is a quiet, peaceful cul-de-sac. We brought our house for the quality and enjoyment of life it offers. Public authorities, such as the council, have a duty to	
take positives steps so that we can peacefully enjoy our	
home, as is set down under Article 8 of the Human	
Rights Act. The extra noise and pollution created both	
during the construction phase and afterwards when	
the houses are occupied, particularly if Briary Close is	
to become a through road, will be in direct breach of	
the human rights of myself, my family and my	
neighbours.	
The questionable needs of any proposed new	
development will not mitigate our human right to	
peacefully enjoy our existing home and current	
amenities.	
Briary Close Junction	
On a recent visit to my home Mr Verrall was able to see	
for himself the unsuitability of Briary Close as a through	
road. The road junction is extremely difficult to exit,	
particularly when turning right. The natural curve of	
the A28 and the parking in the lay-by at th,e entrance	
makes the lack of visibility both difficult and	
dangerous.	
Briary Close is very narrow and cannot be widened at	
the point the road bends, cars have to reverse into the	
road from their driveways here and the dustbin lorry	
can only access Briary Close by reversing down the	
road with great difficulty.	
Drainage	
The fields at ST1 & ST2 have serious drainage problems	
and Southern Water have confirmed the current sewer	
system will be unable to cope with any extra demand.	
Agricultural land plays an important part in soaking up	
excess rainfall. In 1973 a women died when a flash	
flood occurred. According the Borough Engineer at the	
time, this occurred as in the worst hit area of	

Westgate, there had been a gathering ground of about
640 acres for the rainwater. About 6 inches of rain had
fallen on bone dry and hard agricultural land. It had
been unable to permeate through the earth and there
had been an estimated build up of 360,000 tonnes of
water. Since this date the land has been ploughed in
such a way as to avoid this happening again, however if
this land is concreted over no amount of drains will be
sufficient to prevent another flooding disaster.
Southern Water does not have a good track record
regarding waste. In June 2012 more than 20 beaches
were closed after raw sewage entered the sea when
Foreness Point sewage pumping station failed. A
subsequent report criticised communication and a lack
of contingency planning. In 2014 OFWAT imposed a
short fall levy of £150million for 'non compliant'
discharges from sewage systems and flooding to
properties caused by blockages since 2010. In May and
July 2014 swimmers at 9 beaches were advised not to
enter the sea due to raw sewage discharges from
Southern Water pumping stations. Given the
complexity of problems with drainage at the ST1 & ST2
sites and the ongoing problems experienced by
Southern Water, I am very concerned with the
prospect of large sewage containment tanks being
proposed as a possible solution, especially with such a
large scale development.
The potential would be for these to block, overflow,
flood and release noxious gases into our environment.
Allowing the housing allocation to go ahead on this
basis will put Thanet District Council in direct breach of
Article 8 of our Human Rights in regards to protecting
us from pollution.
Water Supply
Thanet is already water stressed. Hosepipe bans have
been imposed during many hot summers as our
reserves run critically low. Thanet Earth is a recent
addition to Thanet and consumes large volumes of
water. The building of an additional 12,000 houses will
not be compatible with the amount of water that is
available, especially during any extended dry period.
Consultation
The way in which the public have been consulted on
the local plan is flawed. Stage one of the local plan
process was consulted on in summer 2013, however,
very few people knew about this. A show of hands at
the packed Garlinge residents association meeting,
revealed not one person there had been aware of this. The bias towards the internet by TDC as a means of
Line place towards the internet by LLV as a means of

informing people and as a means of gathering people's
views is prejudiced against the majority of Garlinge and
Westgate residents, as many are elderly and as such do
not have the knowledge, confidence or access to be
able to be consulted in this way .
Garlinge and Westgate have also been discriminated
against by having no council run drop in sessions in the
area. The meetings in Westgate and Garlinge were
organised by the residents associations and the council
could not have foreseen this being the case. The
meetings were attended by so many Garlinge and
Westgate residents that many had to be turned away
without finding out the information they required. The
level of attendance at these meetings shows the huge
concern of the residents in these villages. The length of
the consultation for this phase of the plan is
inadequate.
The wording of the draft local plan is lengthy and not
easy to understand and the implications of it will be far
reaching and irreversibly damaging if it proceeds in its
current form. Not enough time has been given for
people to research and raise their objections.
Conclusion
Thanet's draft local plan is not sustainable and has
serious flaws throughout. It is overly ambitious with no
certainties over funding of infrastructure and
ultimately it will not be deliverable.
The geographical location of Thanet means that it faces
challenges which other areas do not have to contend
with and therefore due consideration should be given
to this. Thanet already supports approximately 1,000
more people per square kilometre than other
surrounding districts and in 2014
the level of crime was higher than all other areas in
Kent. The Grade A agricultural land included in the
draft local plan allocations is classed as the best
and most versatile land. A summary of the Interim
Sustainability appraisal report states that the
protection of the best and most versatile agricultural
land has the potential to contribute towards the
economy, avoiding increases in flood risk and has
significant benefits for the protection of green field
land from development.
It was concluded that not protecting best and most
versatile agricultural land is not predicted as being
likely to have any positive effects.
The land allocations for Westgate and Garlinge (STI &
ST2) have been included in the draft local plan for
expediency and ease under one ownership and not
because they meet any sustainability criteria as these

			assessments clearly have not been under taken. These		
			sites are wholly unsuitable. The level of improvement		
			required with regard to vital supporting infrastructure		
			means that these sites will ultimately be undeliverable.		

Respondent Surname	Respondent First Name	Respondent Organisation Name	Respondent number in this document	Agent Name	What is the nature of this representation?	Comment	What changes do you suggest to make the document legally compliant or sound?	Comment ID	Attached documents	Submission Method
		St Johns College	311	Mark Hodgson - Savills	Object	On behalf of our client, St John's College, Cambridge we have supported the overall allocation for 1450 dwellings on this site throughout the Local Plan process. This site has been consistently identified in the previous iterations of the Thanet Local Plan and we have carried out a number of technical studies covering the following subjects: Ecology; Landscape; Utilities; and, Archaeology Ecology Our preliminary ecological appraisal was carried out in May 2016. The conclusions of this appraisal stated that the arable fields that cover much of the site are considered to be of low intrinsic ecological importance and the intensively managed nature of arable farm land within the site limits its potential to support protected or otherwise notable species. It also highlighted that the site is located within close proximity to a number of statutory designated sites but it is considered likely that subject to the adoption of sufficient protection and enhancement of habitats the impacts on ecological resources can be avoided or suitable mitigated. Landscape The landscape work that has been carried out has concluded that the site is extremely open with very few features and there has been a loss of hedges, woodlands and orchards as a result of arable farming with a resultant loss of landscape and ecological features. Given the current open character of the landscape it is important that any development that is undertaken has a positive relationship with the countryside with a newly created urban/rural interface. No key views have been identified that across the landscape that need to be protected at this	In light of the above representations we consider that the proposals map should be amended in order to increase the allocation as shown on Appendix 1 to this representation. This is to allow flexibility on the approach to the cemetery extension through the masterplan process. The allocation boundary should also be amended to exclude the recently permitted 40 dwellings in the south-eastern most corner of the site. Acting for a strategic site landowner we would welcome the opportunity to put our view in person to the Inspector.	1294	101 Hodgson MArk Savills Appendix 1.pdf (8.2 MB)	Email

stage.
Given the open nature of the site there is
significant opportunity to create a
multifunctional landscape that can
accommodate both landscape and ecological
mitigation and enhancement as well as new
paths, cycle ways which can improve the visual
impact of the area.
Utilities
This report was essentially a baseline survey to
establish what utilities were present on the site
and therefore may form constraints when
seeking to develop the site.
The key constraint is the 132 kV electric
overhead line and the accompanying masterplan
has been developed to accommodate this asset
within the site.
There is also a 400mm water main crossing the
site which can also be accommodated within the
proposed masterplan.
Consequently it is not considered that there are
any utility restrictions that will prevent the
development of this site.
Historic Environment Desk-based Assessment
This assessment has identified that there is no
overriding heritage constraints that would
preclude development of the site. It goes on to
state that any buried archaeological remains
within the site are unlikely to represent an
absolute constraint on development.
The key historic constraints on the site are the
buildings at Nash Court focused on the grade II
listed farmhouse. This forms an interrelated
farmstead complex, retention and
refurbishment of which could be accommodated
within a masterplan of the site. This could result
in a significant heritage benefit to the site. Our
masterplan has envisaged that there will be
public open space around Nash Court so the
setting will remain unaffected.
Transport
The policy states that development will be
expected to provide an appropriate contribution
to off-site highway improvements including in
respect of the Thanet Transport Strategy.
Ultimately this will need to be determined at the
time of the planning application as the detail of
the contributions required are unclear at this
time.
Margata Cometany
Margate Cemetery

Part of our objection to the Westwood
allocation relates to the adjoining Cemetery
extension proposed under policy CM03. This
land is owned by our client and we believe it
should be included within the strategic
Westwood policy boundary shown on the
Proposals Map as opposed to a separate
allocation. Our reasoning is set out below and
also in our objection to Policy CM03.
A draft cemetery proposal was consulted on in
the Preferred Options consultation in January
2015 under Policy CM03. This policy stated that
Margate Cemetery is nearing capacity and a
need has been identified for its expansion and a
site of 4.2 hectares has been identified to the
east of the
existing cemetery to accommodate the
additional land requirement. This policy has
been carried forward into the Submission Plan.
However, there is no evidence provided in
relation to the amount of land required or how
this particular area of land was identified. This
extension is proposed on land owned by St
John's College and at present there is no funding
in place to deliver this cemetery extension.
In this context the College wishes to work with
the Council in order to assist in the delivery of
this cemetery proposal. Subject to agreement
on the site area actually needed for the
cemetery expansion we have included an
alternative site for this proposal within our
illustrative masterplan. This site covers the same
area of 4.2 ha as shown in the previous
consultation document under Policy CM03. It
should be stressed that this is an indicative
masterplan and further
discussions are required on the justification and
size of the cemetery proposal.
Size of the cemetery proposal.
However, it should be noted that this is not a
requirement that arises as a result of the
proposed residential allocation under Policy SP16. Pathor it is an existing pood and it is
SP16. Rather it is an existing need and it is
reiterated that any identified need for the
cemetery extension results from broader need
in the locality and not as a result of the
proposed housing allocation. As such, it is
necessary to emphasise that any land offer over
and above direct mitigation for the scheme will
be offered to the Council to purchase in order to
comply with relevant legislation and national

policy. Reference is made to the following
extract of the Planning Practice Guidance, which
sets out the fundamental tests:
Planning obligations may only constitute a
reason for granting planning permission if they
meet the tests that they are necessary to make
the development acceptable in planning terms,
directly related to the development, and fairly
and reasonably related in scale and kind. These
tests are set out as statutory tests in the
Community Infrastructure Levy Regulations 2010
and as policy tests in the National Planning
Policy Framework.
23b-001-20161116
Subject to agreement on the site area actually
needed for the cemetery expansion we have
included an alternative site for this proposal
within our illustrative masterplan. This site
covers the same area of 4.2 ha as shown in the
previous consultation document under Policy
CM03. It should be stressed that this is an
indicative masterplan and further discussions
are required on the justification and size and
location of the cemetery proposal.
It is suggested that the policy approach to the
provision of the cemetery extension should be
changed to one of support but without the need
to specify a size and location. This approach
provides flexibility on the location subject to
detailed site investigations. This could be a
sensible way forward for the provision of the
Margate cemetery extension given the
uncertainties around the justification, timescales
and area required. Consequently the strategic
allocation area
at Westwood under Policy SP16 should be
increased to include the land proposed for a
cemetery extension as shown on our indicative
masterplan.
Masterplan
Accompanying this set of representations at
Appendix 1 is a Strategic Masterplan Vision
document which shows an indicative layout as
to how the proposed 1,450 dwellings could be
accommodated on the site. As explained above
an additional area of 4.2 ha has been included to
allow for the
accommodation of the cemetery expansion.
This masterplan document also includes a

revised allocation boundary on the south east
corner of the allocation. This is because planning
permission has been granted under reference
OL/TH/15/1256 and reserved matters approved
under reference R/TH/16/1522 for 40 dwellings
in this location. We
therefore consider that this area does not need
to be included within the allocation.
This Masterplan document explains the
opportunities and constraints across the site
together with appropriate access points and
shows an illustrative layout as to how the site
could be developed.
This is clearly an important strategic site within
the District and the College continues to support
the allocation of this site at Westwood as part of
the overall Local Plan strategy.
We have also had an opportunity to review the
various documents prepared by Dixon Searle
Partnership, and in particular the "Local Plan
and CIL Viability Assessment" dated December
2017 and the further update "Strategic Sites
High-Level Further Review" dated July – August
2018. We understand that the one of the
primary reasons for updating the viability
appraisals is due to Thanet District Council (TDC)
adopting an updating sites list with a
combination of increased dwelling numbers in
some circumstances.
We agree with Dixon Searle Partnership ("DSP")
that the appraisals – which test the "strategic
sites" – are high level in nature. DSP state;
"To test the potential viability of sites of a
strategic scale and characteristics, appraisals
were carried out and, as agreed with the
Council, the specific inputs for each scenario
appraisal based primarily on high-level
assumptions reflecting published information
and our experience of viability work on similar
sites in a range of other locations – both for
strategic level assessment and site-specific
viability review / s.106 negotiation purposes".
Furthermore, we agree with DSP's statement;
"This is a high-level picture that could and most
likely will alter as more information becomes
known about the sites and market conditions
vary, etc"
We therefore support the allocation and look
forward to working with TDC in the future with
refining the viability once further site specific

Byrne/English					- notwithstanding the mentioning of heritage		
Heritage					assets within the individual site allocation		
					policies and the requirement to have regard to		
					them in preparing development proposals, we		
					are concerned that insufficient prior assessment		
					of potential impacts on those assets has been		
					undertaken in advance of the site allocations.		
					We are unable, therefore, to fully understand		
					the likelihood or otherwise of impacts occurring		
					that harm (or indeed preserve or enhance) the		
					significance of the assets.		
					For this reason, Historic England is unable to		
					support these polices as they are		
					currently drafted and suggest HIAs are carried		
					out to inform the policies in advance of the EIP.		
					The policies may have to be redrafted in light of		
					the assessments if potential for harm is		
					identified.		
					(See also the not below on HIAs).		
Cooper	Barbara	Kent County	514	Object	Provision and Delivery of County Council	1504	Email
		Council (KCC)			Community Services: The proposed allocation of		
					5000 homes in the Westwood area will produce		
					up to 6FE of additional primary demand (1260		
					pupils); in order to ensure adequate school		
					places for this increase in demand new primary		
					schools will be required. The current		
					consultation plan incorporates just one 2FE		
					primary school, proposed within SP17; this site		
					already benefits from a planning permission and		
					the associated s106 secured the 2FE primary		
					school site.		
					Two additional primary schools are required; an		
					application for 900 units is currently being		
					considered on part of the allocation at SP18, the		
					County Council is seeking a 2FE primary school		
					site in response to that application. It is		
					requested that the associated policy for SP18		
					reflects the need for the site to include the		
					necessary primary school as well as the required		
					secondary school site.		
					To ensure an adequate supply of places to meet		
					the additional demand directly generated by the		
					proposed growth, a further primary school is		
					required in the Westwood area; given the		
					proposed spatial distribution of dwellings it		
					would be most appropriate for this school to be		
					located within one of the residential allocations at the Northern end of the Westwood area. The

		1			T T	
				be an appropriate location to allow the greatest		
				number of pupils to live as close to the new		
				schools as possible.		
				Minerals and Waste: Policy CSW 16:		
				Safeguarding of Existing Waste Management		
				Facilities of the adopted KMWLP outlines the		
				need for existing and permitted waste		
				management facilities to be safeguarded. It is		
				also required that the Minerals and Waste		
				Planning Authority for Kent is consulted for any		
				proposed new development located within		
				250m of safeguarded waste management		
				facilities. This is to ensure that the proposed		
				new developments do not compromise the		
				ongoing and lawful operation of the safeguarded		
				waste management facilities.		
				This strategic housing site allocation appears to		
				be within 250m of the safeguarded Margate		
				Refuse and Recycling Centre, and therefore		
				requires an Infrastructure Assessment to		
				determine whether the proposal is accordance		
				with Policy CSW 16 of the KMWLP.		
				Similarly, the CEMEX concrete production		
				facility at the Manston Road Depot is		
				safeguarded under Policy CSM 7: Safeguarding		
				Other Mineral Plant Infrastructure of the		
				adopted KMWLP. This site allocation also		
				appears to be within 250m of this safeguarded		
				mineral infrastructure, and therefore requires a		
				Mineral Infrastructure Assessment to investigate		
				whether the allocation is acceptable in not		
				compromising the future lawful operation of this		
				mineral plant infrastructure.		
				PRoW and Access Service: KCC recommends the		
				inclusion of the following text into the policy:		
				Incorporate and provide for connections and		
				improvements to existing PRoW and cycle		
				networks facilitating walking, cycling and public		
				transport to, from and within the site.		
				To incorporate and provide for connections and		
				improvements to existing PRoW network to		
				provide good access to footpaths, bridleways		
				and cycle networks to facilitate access to the		
				surrounding countryside and provide		
				opportunities for exercise and recreational		
				activities for walkers, cyclists and equestrians.

					implemented from 1 April 2018, we have		
					adjusted our requisite site specific policy		
					wording to align with the new charging		
					mechanism. Despite changes to this mechanism,		
					the need remains for recognition that there is		
					limited capacity at this site's "practical point of		
					connection", as defined in the New Connections		
					Services and as a result, network reinforcement		
					will be required in advance of occupation.		
					This reinforcement will be provided through the		
					New Infrastructure charge but Southern Water		
					will need to work with site promoters to		
					understand the development program and to		
					review whether the delivery of network		
					reinforcement aligns with the occupation of the		
					development.		
					Therefore, whilst a lack of capacity is not a		
					fundamental constraint to development, new or		
					improved infrastructure would need to be		
					provided in parallel with the development.		
					Southern Water has limited powers to prevent		
					connections to the water and sewerage		
					networks, even when capacity is		
					limited. Planning policies and planning		
					conditions, therefore, play an important role in		
					ensuring that development is coordinated with		
					the provision of the necessary infrastructure.		

					Unless planning policies support delivery of necessary underground sewerage infrastructure there is a risk that it will not be delivered in parallel with the development, leading to an unacceptable risk of foul water flooding in the area to both new and existing residents. This situation would be contrary to paragraph 109 of the NPPF, which requires the planning system to prevent both new and existing development from contributing to pollution. In addition, our assessments revealed that Southern Water's underground infrastructure crosses the site, and this needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. These easements should be clear of all proposed buildings and substantial tree planting. Southern Water is unable to support Policy SP16 as sound because it does not adequately support delivery of the local sewerage infrastructure necessary to serve this site in parallel with development. We consider that this is inconsistent with national policy, in particular paragraphs 109 and 157 of the NPPF. Accordingly, in line with the NPPF and National Planning Practice Guidance and to ensure sustainable development, we propose that the following criteria are added to Policy SP16 (new text underlined):		
Millar	Bill	NHS Thanet Clinical Commissioning Group	513	Observation	Masterplanning will be informed by and address: [] the need to ensure occupation of development is phased to align with the delivery of sewerage infrastructure, in collaboration with the service provider [] An additional 1,450 dwellings in the Westwood area, in conjunction with the growth already being experienced in the area will increase pressure on local GP practices as there is currently no dedicated provision of healthcare services in this area of intense growth. Many of the closest practices are already at capacity and would be unable to absorb the growth from more new housing. Many of the existing premises are ageing and not fit for purpose, Recruitment and retention of clinical	1487	Email

Alan Byrne/English Heritage			155		Object	Policy SP13 - Policy SP18 - Strategic Housing Sites - notwithstanding the mentioning of heritage assets within the individual site allocation policies and the requirement to have regard to them in preparing development proposals, we are concerned that insufficient prior assessment of potential impacts on those assets has been undertaken in advance of the site allocations. We are unable, therefore, to fully understand the likelihood or otherwise of impacts occurring that harm (or indeed preserve or enhance) the significance of the assets. For this reason, Historic England is unable to support these polices as they are currently drafted and suggest HIAs are carried out to inform the policies in advance of the EIP. The policies may have to be redrafted in light of the assessments if potential for harm is identified. (See also the not below on HIAs).		1004		Email
Cooper	Barbara	Kent County Council (KCC)	514		Object	Provision and Delivery of County Council Community Services: KCC would like to see the following text removed, and replaced with: "2) as required provide a fully serviced site of 2.05ha (to be provided at the cost of the developer) for a new two form entry school as an integral part of the development." An area of regularly shaped land within the development of no less than 2.05ha to be transferred at nil value to the County Council for the purposes of providing a Two Form Entry Primary School. The site to be adequately serviced by the developer, including utilities and highway access. Minerals and Waste: Policy CSW 16: Safeguarding of Existing Waste Management Facilities of the adopted KMWLP outlines the need for existing and permitted waste management facilities to be safeguarded. It is also required that the Minerals and Waste Planning Authority for Kent is consulted for any proposed new development located within 250m of safeguarded waste management facilities. This is to ensure that the proposed new developments do not compromise the ongoing and lawful operation of the safeguarded waste management facilities. This strategic housing site allocation appears to be within 250m of the safeguarded MPL Waste Management and therefore requires an Infrastructure Assessment to determine whether the proposal is accordance with Policy CSW 16 of the KMWLP. PROW and Access Service: KCC recommends the inclusion of the following text into the policy:		1505		Email

					Incorporate and provide for connections and improvements to existing PROW and cycle networks facilitating walking, cycling and public transport to, from and within the site. To incorporate and provide for connections and improvements to existing PROW network to provide good access to footpaths, bridleways and cycle networks to facilitate access to the surrounding countryside and provide opportunities for exercise and recreational activities for walkers, cyclists and equestrians.				
Davies	Julie	CPRE Kent	147	Object	Comments on behalf of CPRE Kent Thanet District Committee. Object to the choice and size of strategic sites for housebuilding and consider that the Council should: Take account of environmental constraints (including best and most versatile agricultural land and water supply/quality) in setting its housing targets — which will moderate the need for loss BMV agricultural land to housing. Produce an up to date site viability assessment, transport strategy and up to date Infrastructure Delivery Plan (demonstrating costs and funding sources) prior to the EIP. Demonstrate, prior to the EIP, how the measures and proposals in the Local Plan and Transport Strategy can be implemented by the Council using statutory planning powers, and how likely it is that other public sector funding and private sector investment will be available. Demonstrate prior to the EIP how the Council is proactively identifying urban brownfield sites. Including how and whether the Council is in a position to be able to be able to facilitate the delivery of brownfield sites especially where there are land assembly challenges. Prepare a Sustainability Appraisal of all sites, so that the sites can be compared according to the extent to which they meet sustainability objectives prior to the EIP.		389	V	Web
May	Raymond		238	Object	I object to this development on the grounds that it causes the loss of Grade 1 agricultural land. We, in Britain, already import more food than we produce locally. If you equate Thanet Council's plans with hundred's of others around the country, similarly planning ahead, you get an idea of the scale of the potential loss of food producing land. Can we continue on a path of steadily increasing the importation of food as the land to produce our own food diminishes.		792	V	Web
Solly	С		419	Observation	The Policy should consider a link road through Westwood industrial Estate as a road improvement between Nash and Margate Road. This offers relief of traffic from Westwood and the Victoria traffic lights Junctions. 		Tesco Stores Ltd	408	Mark Buxton - RPS	Object	We have concerns over the timescales and feasibility of the some of the sites currently being promoted in the Local Plan to meet the Council's OAN over the Plan period, and particularly the strategy to accommodate the 2,500 dwellings which need to be reallocated as a consequence of the deletion of a mixed use development at Manston Airport from the Proposed Revisions to the Local Plan. Strategic Housing Site SP18 Land at Manston Court Road/Haine Road is proposed to comprise up to 1,200 new dwellings and leisure uses. This is an increase in the number of dwellings proposed for this site compared to the Preferred Options Revisions, increasing by 500 dwellings. The Council consider that the first 50 units could be completed on site by 2019/20. However as the outline application was only submitted in March 2018 and the applicants have had to address a number of outstanding matters including highways, flood risk and conservation issues we consider that it is extremely unlikely that the necessary permissions will be agreed in time for the first units to be completed by 2019/20. The Outline Planning Application has yet to be determined, Reserved Matters and Discharge of Pre-Commencement Conditions will need to follow, the site may then need to be sold to a housebuilder to commence site preparation works. All this takes time before development is commenced. Completions of the first dwellings ready for occupation typically takes several months more. In addition, the proposed allocation adjoins a number other proposed strategic allocations and residential sites. Therefore any highway improvements would need to accommodate the additional traffic generated by these cumulative developments and contributions agreed across the sites. We consider that is it	Provide a robust justification in the draft Local Plan for increasing the housing allocation at Land at Manston Court/Haine Road by 500 units or otherwise reduce the allocation to 700 units and allocate a wider range of additional housing sites to make up the shortfall. Apply a more realistic housing trajectory in Appendix B in recognition of the planning status of the site.	1189		Email

	Т				T	
				very optimistic for the necessary highway		
				improvements and contributions to be agreed		
				between the various landowners and then		
				implemented prior to the units being completed		
				on site within the Council's notional delivery		
				period.		
				The NLP report 'From Start to Finish'		
				(November 2016) establishes that it takes on		
				average 3.9 years from the first identification of		
				a site to the submission of the initial planning		
				application. NLP's report further finds that on		
				average its takes more than 4 years for an		
				application for over 500 dwellings to progress		
				from the validation to the decision date of the		
				first applications which permits the		
				development of dwellings on site whether it be		
				a full, hybrid or reserved matters application.		
				This does not include the discharging of any		
				pre-commencement conditions if required.		
				Following the planning application being		
				approved it takes on average a further 6-12		
				months for schemes of 500 up to 1,500 units to		
				start delivering units on site. Therefore from		
				validation to the delivery of the first units on		
				schemes of over 500 units it takes on average at		
				least 5.3 years. We therefore contend from the		
				evidence provided within NLP's Start to Finish		
				Report it is unlikely that the strategic sites at		
				Birchington (SP14), Westgate on Sea (SP15),		
				and Manston Court Road/Haine Road (SP18)		
				will deliver units by 2019/20.		
				We therefore consider that this site (SP18,		
				Manston Court Road/Haine Road) is unlikely to		
				be delivered within the proposed timescales set		
				out by the Council. This in turn will have knock		
				on effects for the total number of units which		
				can be delivered on this site over the plan		
				period, and particularly the next 5 years. We		
				therefore contend the Local Plan is currently		
				unsound as the Council is unable to		
				demonstrate a 5 year housing land supply		
				during the initial years post adoption and there		
				are serious doubts that it will deliver sufficient		
				dwellings across the plan period to meet the		
				Objectively Assessed Need.		
				Therefore, the Council should consider		
				allocating further sites for housing which can be		
				delivered earlier in the plan period, including		
				the land to the north (and south) of Millennium		
		1		Way.	1.22

						Commencement Conditions will need to follow,		
						the site may then need to be sold to a		
						housebuilder to commence site preparation		
						works. All this takes time before development is		
						commenced. Completions of the first dwellings		
						ready for occupation typically takes several		
						months more.		
						In addition, the proposed allocation adjoins a		
						number of other proposed strategic allocations		
						and residential sites. Therefore, any highway		
						improvements would need to accommodate		
						the additional traffic generated by these		
						developments and contributions agreed across		
						the sites. We consider that is it very optimistic		
						for the necessary highway improvements and		
						contributions to be agreed between the various		
						landowners and then implemented prior to the		
						units being completed on site within the		
						Council's notional delivery period.		
						• • •		
						In conclusion we consider that the Pre-		
						submission Local Plan is currently unsound as		
						there are concerns still to be addressed over		
						the delivery timescales of several of the		
						Strategic Housing Sites and housing allocations.		
						We consider these issues mean it is unlikely that		
						the Council will be able to ensure the delivery of		
						sufficient housing during the initial years of the		
						new development plan to meet its increased		
						Objectively Assessed Need.		
						Development of the three sites (Phases 1, 2 and		
						3) has the potential to provide a significant level		
						of housing and employment opportunities,		
						additional services and make a substantial		
						contribution to the strategic vision and future		
						growth of Thanet District as a whole.		
						Accordingly, we strongly urge the Council to		
						consider the inclusion of these sites as		
						allocations within the emerging Local Plan.

	should increase to up to 35 dwellings per
hectare. This has already been demonstrated in	nectare. This has already been demonstrated in

					part through the outline planning application comprising part of the SP18 and H03 allocations. Through appropriate masterplanning, an increase in housing numbers can be accommodated at site SP18, as demonstrated by the outline planning application which consists of a mix of densities thereby creating an appropriate and sensitive development of the Site. We consider that the inconsistent densities in the Local Plan are not based upon site specific characteristics and are not justified or effective. On this basis the Plan is unsound. Increasing the housing density at Site SP18, as part of the strategic allocation, would introduce a consistent approach throughout the plan, as required by national planning policy, will be appropriate for the site and location and will provide greater certainty both in respect of housing delivery and supporting infrastructure.		
Johnson	Elisabeth	Monkton Residents Association	51	Observation	Again probably too much development for the current infrastructure.	132	Web
May	Raymond		238	Object	I object to this development on the grounds that it causes the loss of Grade 1 agricultural land. We, in Britain, already import more food than we produce locally. If you equate Thanet Council's plans with hundred's of others around the country, similarly planning ahead, you get an idea of the scale of the potential loss of food producing land. Can we continue on a path of steadily increasing the importation of food as the land to produce our own food diminishes. The south western edge of this proposed development is only 1,650 metres from Manston runway. If it ran, as envisaged by RSP as a 24/7 cargo hub, this would seriously impact the residents living there and the pupils in the proposed secondary school.	793	Web
Mayall	С	Southern Water	473	Object	In line with paragraph 162 of the National Planning Policy Framework (NPPF) and the National Planning Practice Guidance (NPPG), Southern Water has undertaken an updated assessment of existing infrastructure capacity and its ability to meet the forecast demand for 1,200 new dwellings at this site. That assessment reveals that additional local sewerage infrastructure would be required to accommodate the proposed development. Since OFWAT's new approach to water and wastewater connections charging was	1357	Web

implemented from 1 April 2018, we have
adjusted our requisite site specific policy
wording to align with the new charging
mechanism. Despite changes to this
mechanism, the need remains for recognition
that there is limited capacity at this site's
"practical point of connection", as defined in
the New Connections Services and as a result,
network reinforcement will be required in
advance of occupation.
This reinforcement will be provided through the
New Infrastructure charge but Southern Water
will need to work with site promoters to
understand the development program and to
review whether the delivery of network
reinforcement aligns with the occupation of the
development.
Therefore, whilst a lack of capacity is not a
fundamental constraint to development, new or
improved infrastructure would need to be
provided in parallel with the development.
Southern Water has limited powers to prevent
connections to the water and sewerage
networks, even when capacity is
limited. Planning policies and planning
conditions, therefore, play an important role in
ensuring that development is coordinated with
the provision of the necessary infrastructure.
Unless planning policies support delivery of
necessary underground sewerage infrastructure
there is a risk that it will not be delivered in
parallel with the development, leading to an
unacceptable risk of foul water flooding in the
area to both new and existing residents. This
situation would be contrary to paragraph 109 of
the NPPF, which requires the planning system
to prevent both new and existing development
from contributing to pollution.
In addition, our assessments revealed that
Southern Water's Fleete Manston Water
Service Reservoir is adjacent to the site. In
connection with this, water supply (as well as
wastewater) infrastructure crosses the site,
which needs to be taken into account when
designing the site layout. Easements would be
required, which may affect the site layout or
require diversion. These easements should be
clear of all proposed buildings and substantial
tree planting.
Southern Water is unable to support Policy
SP18 as sound because it does not adequately

					support delivery of the local sewerage infrastructure necessary to serve this site in		
					parallel with development. We consider that this is inconsistent with national policy, in		
					particular paragraphs 109 and 157 of the NPPF.		
					Accordingly, in line with the NPPF and National		
					Planning Practice Guidance and to ensure		
					sustainable development, we propose that the		
					following criteria are added to Policy SP18 (new		
					text underlined):		
					{] The Masterplan shall incorporate:		
					1) [] 5) The need to ensure occupation of		
					development is phased to align with the		
					delivery of sewerage infrastructure, in		
					collaboration with the service provider		
					[]		
Milimuka	Elle	GVA	358	Object	An additional 500 homes is proposed on	1055	Web
					agricultural land to the west of the Manston		
					Court Road/Haine		
					Road allocation. The majority is classified as 'Excellent' in the Agricultural Land Classification,		
					with a small		
					portion identified as 'Very Good'.		
					This site was promoted by the landowner in the		
					most recent Call for Sites for "Between 751 -		
					667 dwellings		
					(35 dph /30 dph). Site area: 31.33ha" however		
					no evidence has been provided to confirm it is		
					deliverable or achievable and the site was not assessed in the SHLAA.

		Council			Council. We have Manston Green development, further building at Haine Road and are getting entrapped Manston Parish will be too big			
Solly	С		419	Object	This site has at late notice been included as a strategic site and the highway requirements have confused the whole road strategy for the plan. The new road appears (by councils own options) to have 2 designs based on the outcome of the airport. This policy should be suspended due to the uncertainty of the airport has been resolved. This is largely at the moment down to RSP's plans for highways if a DCO is granted if not granted the funding and design of the road network will be different (as it is proposed to have a road across the airport site from a different option taken by the council). Therefore the viability, transport modelling, highway commitments, funding model and from whom is very much in doubt. This policy may not be appropriate to provide housing delivery in the short term and will affect the housing phasing plan. This may not be the best option for housing and lacks any form of positive preparation especially for roads. This site is on High Quality Agricultural Land and for which lower grades should be sought first.	This policy should understand the aspects of the DCO decision of Manston Airport and/or Stone Hill's parks plans. The site has been choosen to provide road infrastructure in this plan but this is has a number of uncertainties. The policy should be suspended until the outcome of the DCO is known, and future planning policy, possibly in the next local plan review.	1223	Email
Stevens	Angela		163	Object	Far too ambitious a plan and unreal! The present secondary school by Manston/Haine (apart from grammar schools) aren't full. The roads already are! Doctors and dentists around Thanet are closing. How is this ever going to be viable? More residents, more cars, even more gridlock without proper services.	Dismiss this plan completely!	621	Web
Twizell	Heather	Natural England	512	Object	Policy SP18 -Strategic Housing Site - Land at Manston Court Road/Haine Road Natural England would query why this is the only Strategic Housing Site policy (SP13-SP18) to include a specific clause (4) requiring an assessment of the site's potential to support breeding or wintering birds. Is there particular evidence held around this site that requires policy protection over and above that given in clause 5, part 2 of SP12? Even if evidence is		1452	Email

provided that clause 4 is justified we believe it		
will still require some rewording. Should survey		
work demonstrate that the site is of value for		
breeding or wintering birds what is required is		
more likely to be mitigation than enhancement.

Bates	John		226		Observation	Too many residential properties in Thanet do not have off- street parking of any sort. Many vehicle owners are increasingly finding it difficult to park their vehicles near their homes and those that do are causing accessibility problems to service and emergency vehicles in many parts of Thanet. Yellow lines are not the answer. I would suggest that all new individual residential properties built in Thanet each have off- road parking for at least two vehicles to alleviate any future issues - to not do so is only going to cause greater problems in future.	Ensure two off-road parking spaces for each individual new residential property built within Thanet	872		Web
Behrendt	Mark	Home Builders Federation	423		Object	Policy SP19 - Type and Size of dwellings Policy is unsound as it is not effective This policy requires housing developments to address the SHMA recommendations regarding the size and type of both market and affordable housing. However, on many sites, and in particular smaller sites, it will not be possible to have a mix of dwelling types to reflect those set out in the SHMA and set out in the supporting text to this policy. We would suggest that the wording be amended to provide greater flexibility and require applicants to take account of the recommendations of the SHMA. Such flexibility within the policy will be important given that the revised NPPF reduces the scope to reduce requirements with regard to affordable housing and infrastructure. Whilst these expectations should be reasonable greater flexibility on the mix of dwelling type and tenure will provide scope for developers to try and ensure the Council's requirements elsewhere in the plan can be delivered. Recommendation That the first paragraph of policy SP19 be amended to read: "Proposals for major housing development will be expected to address take account of the SHMA recommendations regarding the make-up of market and affordable housing types and sizes needed to meet requirements." Walker	John	The Ramsgate Society	231		Observation	Type and Size of Dwellings 4.1 We have no major comments on this section of the Draft Plan, which is based on the Strategic Housing Market Assessment 2016 (SHHA). The recommendation of a planned balance within the affordable housing sector of 45-50% flats and 50-55% houses seems appropriate, and we agree with the Plan's stipulation that "schemes proposing a higher proportion of flats will need to be accompanied by a supporting justification" (para 3.33). 4.2 However, it is not clear from the body of the Plan what the planned figure for affordable housing is within the overall provision for 17,140 homes up to 2031. TDC's document "Guidance for Residential Developers-Affordable Housing" stated that there was a "substantial shortfall of affordable homes in the District" (para 12). In March 2018 there were nearly 2500 households on the housing waiting list, most of which require one or two bedroom accommodation. This acknowledged shortfall of social housing to rent needs to be addressed urgently, and relates primarily to the needs of the existing population, whereas many of the calculations of future housing need in the Plan are focused on expectations of inward migration. 4.3 In this context it is essential that the Council has in place		707		Web

a firmly enforced policy requiring developers to make	
provision for a proportion of affordable homes on new sites.	
Policy SP20 within the Draft Plan states that "residential	
development schemes for more than 10 dwelling units,	
including mixed use developments incorporating residential	
shall be required to provide at least 30% of the dwellings as	
affordable". This is a very good start, and represents an	
improvement on the policy in the Guidance referred to above	
which had a higher threshold of 15 dwellings, but everything	
depends on how the Council acts in relation to the further	
statement that "the above requirements will only be reduced	
if it would make the proposed development unviable to meet	
them".	
4.4 TDC's "Planning Obligations and Developer Contribution	
Supplementary Planning Document" provides valuable advice	
on the full range of situations and services where such	
contributions are relevant. In the case of affordable housing,	
it includes a reminder that national policy "sets out that the	
presumption is that affordable housing will be provided on	
the application siteso that it contributes towards creating a	
mix of housing".	
4.5 This last point is often forgotten: the purpose of the	
planning obligation policy is not simply to get the developer to	
make a contribution towards the provision of affordable	
housing, whether in houses or in "commuted payments", but	
to help create a more socially mixed community. Developers	
have a habit of seeking to avoid the requirement of making	
provision for affordable housing by claiming "non-viability", or	
by seeking to offer a commuted payment of money in lieu of	
the affordable housing quota. Sometimes when developers	
argue the case for non-viability what they really mean is that	
they believe that the proximity of the affordable housing will	
affect the value or saleability of the private housing being	
developed: that is not a relevant factor in the criteria for	
assessing non-viability. We urge TDC to strictly enforce SP20	
for the benefit of those people seeking affordable housing.	
for the benefit of those people seeking anordable housing.

Agnew	Richard	Gladman	516		Object	Policy SP20 – Affordable Housing Gladman are concerned with this policy seeking for at least 30% of dwellings to be affordable and submit that this is inconsistent with the Viability Assessment supporting the Local Plan. The Viability Assessment states at Paragraph 29 that 'an affordable policy headline target applicable at 11+ dwellings, and seeking not more than 30%, is likely to be workable in striving to secure an optimal level of affordable homes provision' (emphasis added). Figure 9 on Page 115 takes this further to state a suggested range of 20-30% not exceeding 30% in any To be sound this policy should be amended to reflect the evidence base.		1539		Email
Barnett	David		146		Observation	I am in total agreement to this policy and in respect of this would submit that I own an area of land that I would be prepared to offer for development of 100% social/affordable housing development. The land is situated adjacent to an existing residential area of a like nature and is currently redundant. The site has clearly defined and mature boundaries and although situated on the perimeter of a defined "Green wedge" a previous ladscape appraisal has concluded that the site is more in keeping with the very closely situated built environment than the farmland that surrounds it. I would therefore submit that this site should be seriously considered as a potential site to increase the provision of affordable/social housing as outlined in this policy.		377		Web
Behrendt	Mark	Home Builders Federation	423		Object	SP20 - Affordable housing The policy is not sound as it is unjustified This policy seeks to require all developments off over 10 units to provide at least 30% affordable units. The first issue that we have with this policy is that it is established as a minimum requirement. This does not provide the necessary certainty for either the decision maker or applicant as to the required level of provision. The policy should set out clearly what is expected of the developer and if they meet that expectation then an application should not be refused on that basis. Secondly, we are concerned that the Council has ignored its own viability evidence in setting its 30% requirement. The position adopted by the Council in its affordable housing policy is the third recommendation set out in paragraph 3.12.3 of the viability assessment. This paragraph outlines that this is an aspirational target and that this will require the Council to negotiate on this position on a more frequent basis than should the policy be established at a lower level. In particular the viability assessment raises concerns that the development of PDL sites could be compromised by a 30% requirement where costs are higher. To this end the viability assessment also recommends that either a lower requirement for all development is set within the local plan or a	Recommendation The Council reduces its affordable housing requirement to 20%.	1211		Email

				variable rate between PDL and green field sites. To address this concern arising from the viability assessment the Council have			
				included a clear statement that viability considerations will be taken into account			
				when assessing applications. This is welcomed. However, we are concerned that			
				whilst this policy is being examined against the original NPPF, it will be applied			
				under the revised NPPF, which in paragraph 57 gives more weight to the viability			
				testing of the local plan. It will therefore be important that the Council does not			
				seek to establish aspirational targets within its local plan that push the margins of viability, but establishes a requirement for affordable			
				housing that will minimise the need for negotiation. This is made even more			
				important given that the Council are yet to establish the rate which it intends to			
				set CIL. Under the revised NPPF paragraph 35 would require this to be considered			
				as part of the examination into the Local Plan and allow for a through			
				consideration of their impact on deliverability. Without this rate it is therefore			
				important that sufficient scope is provided for within the plan to ensure that the			
				Council can support infrastructure provision alongside the delivery of affordable housing.			
				We would suggest that further consideration needs to be given to the evidence			
				supporting this policy and the national policy framework under which it will be			
				delivered. This evidence indicates that a target of 20% would achieve the			
				Government's expectations in the revised NPPF and would allow scope to ensure			
				that the necessary infrastructure requirements can be delivered without			
				compromising the delivery of affordable housing. Without a reduction in the			
				affordable housing requirement the policy will be out of date on adoption and require an immediate review to ensure its conformity with national policy.			
				Recommendation			
				The Council reduces its affordable housing requirement to 20%.			
Bransfield	Sheila	456	Observation	POLICY SP20 – AFFORDABLE HOUSING		1307	Email
				Demands within the Local Plan for developers to provide 17% starter homes, 18%			
				affordable rent and 65% social rent dwellings can only be included if TDC's			
				Planning Department enforce Planning Conditions, which they incessantly fail to			
				do. Developers submit plans including such properties, but appear to have no			
				intention of building any. Most new builds are detached, many with four or five			
				bedrooms, which render them out of reach of those in greatest need.			
Carter	Viv	176	Observation	Inevitably, builders aim to comply with the number of affordable homes within		498	Web
				their development, then having gained planning permission, decide the cost of building the affordable element is not viable. This was quoted to me by the			
				developers of the "Stone Hill Park" site, when I asked how many homes would be			
				affordable. Until this get out clause is removed- we will not have affordable			
				housing.

						affordable housing in any development of 10 or more units as this is fundamental to helping local people to get on the housing ladder. This policy needs to be much more robust.				
Johnson	Elisabeth	Monkton Residents Association	51		Observation	As previously commented this has not so far happened,		133		Web
Millwood Designer Homes Limited		Millwood designer Homes Limited	508	Anna Gillings - Gillings Planning Ltd	Object	As with Policy SP19, this policy as drafted is overly restrictive and does not allow for site specific circumstances to be taken into account. Although the principle of 30% provision and the preferred mix of tenure is accepted, the policy should allow for exception or flexibility in respect of the tenure where it is agreed individual site circumstances suggest a different approach should be taken.	The policy should therefore be amended to read: "Residential development schemes for more than 10 dwelling units, including mixed use developments incorporating residential shall be required to provide at least 30% of the dwellings as affordable housing, provided in the following proportions, where appropriate:"	1433	Gillings Millwood.pdf (74.4 MB)	Web
Solly	C		419		Object	Point 1: Thanet has a issue with its local population in employment opportunities and the rapid rise in house prices for which will not be affordable by increasing supply alone. There is also an additional issue that the in-migration of people are increasing the price of housing further. Thanets local plan needs to consider "Local Need". Requirements in planning applications should not be reduced because of viability (see point 2), it simply should be rejected. Affordable homes should be protected and even enhanced to a higher level. For every 1000 homes it is suggested that 51 houses will be starter homes, 54 as affordable rent and 195 for social rent. A breakdown of these figures is shown below. Shelter wrote a report in 2014 and the data suggest that on the 3 scenarios the highest percentage in Thanet for affordability was 25%. This suggests many people are priced out of the housing market. Information is shown below. Shelters report highlighted many problems with affordable homes. The local plan should reflect "local need" as its top priority and should increase the requirement appropriately. Point 2: 2 sites which have been approved under this local plan have already been challenged for viability. The 2 planning applications were: OL/TH/16/0376 – LAND REAR OF 2-28 KINGSTON AVENUE, MARGATE Where ""Members confirm that planning permission be deferred to officers for approval subject to securing a legal agreement for the provision of financial contributions as set out in the report and conditions outlined at Annex 1, including the provision of an affordable housing financial contribution in lieu of on-site	Remove the ability to reduce or eliminate affordable housing commitments as was seen Introduce a affordable housing viability test. So that planning committees would know if development is viable before approval of a application Increase Percentage to 40%	1224	Solly affordable housing.pdf (510 KB)	Email

						affordable housing provision, as outlined in this report." and OL/TH/16/1416 – LAND ADJOINING 1 CHILTON LANE AND CANTERBURY ROAD EAST, RAMSGATE. Where ""Members approve the planning application subject to submission and approval of a legal agreement securing the financial contributions as stated, along with the reduced level of affordable housing provision." These sites are under SP15 Policy Planning meeting minutes: https://democracy.thanet.gov.uk/documents/g4697/Printed%20minutes%2016th-May-2018%2019.00%20Planning%20Committee.htm?T=1&CT=2 This similarly caused a reaction in the press. News story: https://theisleofthanetnews.com/cutting-of-affordable-homes-on-thanet-developments-branded-as-profits-over-people/ Affordable housing is very much needed in Thanet, and so a test of viability should be made foraffordable housing in this policy. Planning committees are then better informed of the requirementsand viability of affordable housing.
