

The Fishing Facility, Royal Harbour

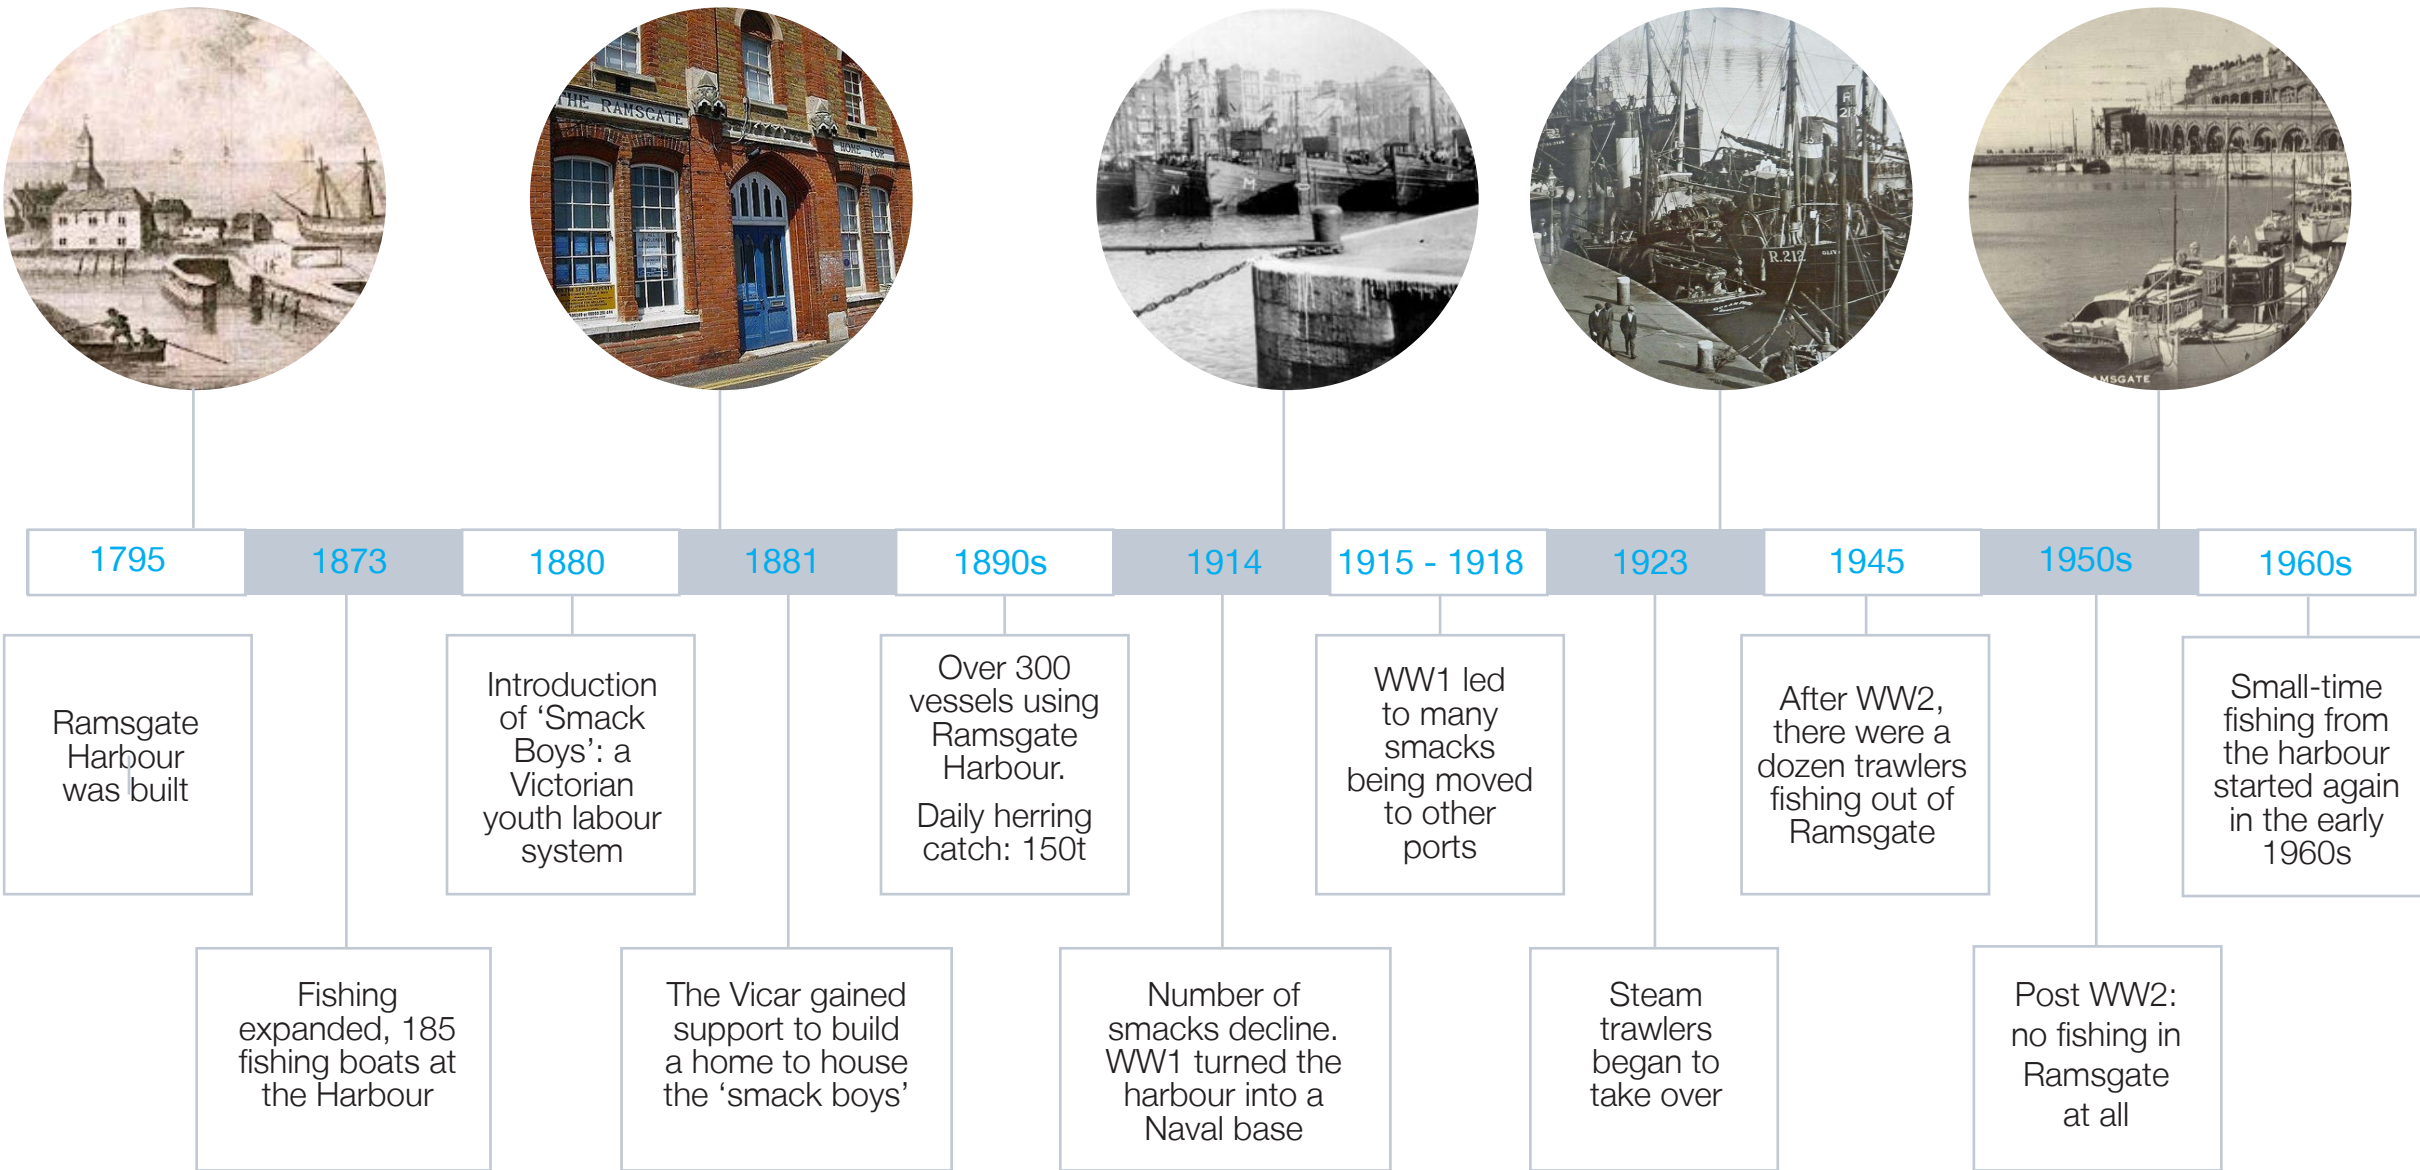

Levelling Up Funding has been awarded as part of the Inclusive Harbour project to support the local fishing fleet. We are developing designs for quayside fishing facilities to enable freezing and processing of daily catches, as well as the creation of retail units to sell the catch. The aim of this project is to revitalise the fishing industry in Ramsgate and provide an avenue to create new jobs and business opportunities.

Project Aspiration

The aspiration is to revive Ramsgate's fishing industry by providing the Thanet Fishing Association with a new processing facility to ensure their operations are sustainable and scale-able. It is key to ensure Ramsgate's successful fishing heritage is persevered. The potential for a harbour fish market can provide direct access to freshly caught fish making the local catch easily accessible for Ramsgate residents. Any external areas could also enable passers by to engage with and watch fresh fish being offloaded from boats to be graded.

Expression of The Fishing Facility's entrance, external grading area and engagement with the public.

Proposed Potential Massing and Scale

Architectural Inspiration

Inspiration for the 'Look and Feel' of The Fishing Facility. Incorporating a traditional 'industrial' roof design will allow the internal processing areas to be lit with natural skylights with the space for potentially incorporating solar panels. Use of differing materials and colour is key to give The Fishing Facility its own identity along Ramsgate's seafront.
